# Arrest 12 White Men in Beating of Pupils At Grenada Schools

## Accused of Conspiracy To Violate Civil Rights Of Negro Youngsters

GRENADA, Miss. (AP)—The FBI Saturday arrested 12 white men accused of conspiring in the attacks on Negro children at newly desegregated schools.

They were taken to Oxford, 45 miles to the north, for arraignment before a U.S. commissioner and were released on $1,000 bond each.

U.S. Atty. H. M. Ray said the men were charged with conspiracy to violate the civil rights of the Negroes who were attacked Monday, when desegregated schools opened in Grenada.

The law makes it illegal to "injure, oppress, threaten or intimidate any citizen in the free exercise or enjoyment of any right or privilge secured to him by the Constitution or laws of the United States. . . ."

Maximum punishment would be 10 years in prison and a $5,000 fine.

**13th Man Sought**

In Jackson, Roy K. Moore, head of the Mississippi office of the FBI, said a 13th man was being sought by agents. He was identified as a justice of the peace, James Richard Ayers.

One of the 12 arrested, Wilburn Ray Carroll, 24, is the son of Constanie Grady Carroll who has been sentenced to four months in prison for contempt of court.

Constable Carroll has pleaded guilty to refusing to accept a federal court subpoena and slugging a lawyer who tried to serve it on him.

The FBI arrests came the day after a federal judge at Oxford made permanent his injunction ordering Grenada officials to protect Negro children from "savage and senseless" attack by white men.

**After Testimony**

Judge Claude Clayton's decision came after two days of testimony by witnesses who said Grenada police took no action while white men beat the Negro youngsters with ax handles and chains.

A heavily armed force of highway patrolmen remained on guard in this northern Mississippi city of 8,000—scene of a long civil rights drive. White

# RFK in Milwaukee Stumping for Lucey

BY TIM WYNGAARD
Post-Crescent Staff Writer

MILWAUKEE — The Kennedy image was stamped on gubernatorial politics of Wisconsin Saturday evening as New York Sen. Robert F. Kennedy returned to the state to endorse the candidacy of Lt. Gov. Patrick J. Lucey.

Kennedy, speaking twice to Milwaukee audiences, recalled the presidential origins of the Kennedy family in the snow covered streets of small Wisconsin towns — and coincidentally urged state voters to make long time Kennedy backer Lucey their next governor.

Kennedy recalled the years of his late brother on the campaign trail and in the White House, before audiences totaling about 3,000.

The speeches given at the University of Wisconsin-Milwaukee and Alverno College were keyed to the theme of the youth and education.

**Keyed Remarks**

John Kennedy, he said, did more in those fields than previous presidents, obviously keying his remarks to his youthful audiences.

Kennedy closed each visit with the usual and popular question and answer session in which he was able to trade jokes and jibes with the students and area residents.

During these sessions he called for revision of national selective service policies, saying he favored a lottery system over college deferments, opposed military foreign aide to new nations and mentioned President Johnson but once.

Kennedy jokingly denied he is seeking the presidency at any time in the future but his audiences were not convinced. Signs and shouts of "Kennedy in '68" and "Kennedy in '72" were common.

**On Speakers Stand**

Accompanying Kennedy on the speaker stands were most of the Democratic state-wide ticket and Congressmen Henry Royce,

# Major Paper Expected From Pope Monday

## Encyclical Will Deal With War In Southeast Asia

VATICAN CITY (AP) — Pope Paul VI came home from vacation Saturday to tackle an intensive round of decision making, starting with Viet Nam and the giant question of contraception for Roman Catholics.

The first item is an encyclical to be issued Monday dedicating October as a month of special prayers by the world's half-billion Catholics for an end to the Viet Nam war. The Vatican, announcing it Saturday, said it would be a papal document "of notable importance." It is the fourth encyclical of his pontificate.

**Birth Control**

In the weeks ahead the pontiff also is expected to give a new ruling on birth control, think over the possibility of a new international trip, spur church negotiations with East European Communist regimes, and issue more guidance for steer-

Canada, Midwest Showered

# Meteorite Startles Valley

BY MIKE WALTER
Post-Crescent Staff Writer

A fiery meteorite, which caught the eyes of thousands of persons throughout midwest America, is reported to have thudded to earth in a sparsely populated area of Ontario, Canada.

According to the Provincial Police at Toronto, the meteorite, undoubtedly the largest of many which struck the earth during a "shower" around 8 p.m., CST, Saturday, was pinpointed as landing near Huntsville, about 125 miles north of Toronto and 25 miles east of a bay off Lake Huron.

The Post-Crescent was alerted to the shower shortly after by the Fond du Lac County Sheriff Department, which reported receiving "about 100" calls from persons who had sighted a meteorite landing, supposedly, just east of Fond du Lac.

**Sheboygan County**

Sheboygan County Sheriff authorities and Coast Guard offices from Chicago to Two Rivers reported being deluged with calls of persons who sighted numerous "fireballs" landing in Lake Michigan.

A Sheboygan County official reported monitoring police calls from undetermined points in Michigan which said the same fireballs landed to the west, also supposedly in the lake.

"We even had a call from a guy who said there were a bunch of tracers like he'd seen in World War II," the official said. "We went to where he said, and all we found was a couple of lovers and that sure as hell wasn't tracers."

**Showers Fragments**

According to the Federal Aviation Agency in Fort Wayne, Ind., a dying meteor, termed a bolide or exploding meteor, broke up over northeastern Indiana, showering the area with smoldering fragments, one believed to be as big as a house.

Others were viewed close hand and were about 1½ feet in diameter, according to the Associated Press.

A United States Weather Bureau report out of Austin Straubel Field in Green Bay said a Trans-World Airlines pilot flying 35,000 feet above Grand Rapids, Mich., had seen the fireball and it "lit up the whole cabin."

**Upper Peninsula**

The Green Bay weatherman also reported the main fireball was seen to the east by a pilot in a small craft returning from a trip to the Upper Peninsula.

According to the Austin Straubel official, who monitored the Toronto report, Provincial Police reported the meteorite had landed, but no injuries or damage were ascertainable.

He added that sightings of the meteor had been reported to the weather bureau as far west as Denver, as far south as Peoria, Ill., and as far east as Erie, Pa.

**Burning Fragments**

Burning fragments fell on a farm near the tiny Indiana town of Sweester, where witnesses said they burned several minutes before flickering out.

An FAA supervisor at Fort Wayne said the dying meteor painted a red glow across the sky and fell with a trailing trail of flames. From the FAA at Kalamazoo came the report that the phenomenon "lit up the entire northeast sky like the early morning sun."

## Blue Book Isn't Blue Anymore

MADISON (AP)— Wisconsin's 1966 Blue Book — dressed up front and back — is ready for distribution.

The usual plain blue covers are gone.

The new look shows the state coat of arms in four colors on the front cover. The back cover has, also in color, the officially recognized sugar maple tree, the white tailed deer, the badger, the robin, the wood violet and the muskellunge.

H. Rupert Theobald, legislative reference bureau chief, has provided a 225-page section explaining state government.

'Really Round'

# Gemini 11 Pictures Show Curve of Earth

MANNED SPACE CENTER, Houston, Tex. (AP) — Vivid color pictures snapped by the Gemini 11 pilots from man's record altitude dramatically captured earth's curve from horizon-to-horizon bearing out their awed description: "Boy, it's really round!"

However, officials revealed Saturday that smudgy windows and exposure problems cut into the quality of most of the movie film Navy Cmdr. Charles (Pete) Conrad Jr. and Lt. Cmdr. Richard F. Gordon Jr. took during their three historic days aloft.

**Lofty Orbit**

Gemini 11 used a captured Agena rocket to soar to a lofty orbit ranging upwards to 851 miles Wednesday, farther from earth than any man has ever ventured. Still pictures taken from the high-flying outpost showed earth's smooth, sweeping curve clearer than on any other man-made photograph.

There were breathtaking pictures of Australia, the Indian Ocean, the Bay of Bengal, the Arabian Sea, the Red Sea, the Gulf of Aden, Ethiopia and Somali — all with amazing clarity despite Gemini 11's dirty windows.

Movies emerged as a problem area for the third consecutive time on a Gemini mission, though. Technicians processed over 1,000 feet of movies brought back when Gemini 11 splashed home Thursday, then a spokesman said: "We got a lot of very badly underexposed film that required a special souping (development) job. You've got to remember, though, it's very difficult to take pictures up there. And, remember, Pete had that stuff on his windows."

**Color Movie**

One brief color movie sequence did show with striking sharpness Gordon astride the nose of his spaceship as he tied Gemini 11 to an Agena rocket during his shortened 44-minute walk in space.

His companion, it showed, aptly described the scene when he barked to Gordon during last Tuesday's stroll: "Ride 'em, Cowboy!"

Officials said a second 80-foot roll of Gordon's excursion was so badly exposed it could not be printed. And, on a third, the camera, mounted on the spacecraft hatch, was aimed in the wrong direction, missing Gordon completely.

## Victim of Polio Wed in Iron Lung

COLCHESTER, England (AP) — Heather Russell, 33, almost completely paralyzed by polio for the past 11 years, went to the altar Saturday in a special chair equipped with a breathing machine for her wedding at a local church.

After the ceremony she signed the register, holding the pen in her teeth.

Miss Russell married Ronald Strudwick, 54, a hospital worker.

She has to spend most of her time in the iron lung and can go nowhere without a breathing machine. It went, with a rocking bed in which she has to sleep, into a specially equipped light truck which took the couple off for a short honeymoon.

Later she will return to the hospital where she is a patient and her husband works. They hope later to move into a specially equipped bungalow.

Outnumbered Three to One

# Marines Cut Off, Fighting Hard as Viet Nam Ground Action Picks Up

SAIGON, South Viet Nam (AP)—Battle action picked up near the frontier demilitarized zone, and two companies of U.S. Marines were reported cut off and fighting hard Saturday night against a battalion or more of North Vietnamese regulars.

The Americans, members of Bravo and Delta companies of the 4th Marine Regiment, seemed outnumbered about three to one. But they had air and artillery support, and a spokesman said, "They don't seem to be in any particular danger." Reinforcements were moving in, though rough terrain and darkness slowed their movement.

**Kill 80 Reds**

Marines were reported to have killed 80 of the enemy in this and other actions aimed at sweeping Hanoi's infiltrated troops from the coastal sands and inland jungles of Quang Tri, the northernmost province of South Viet Nam.

In air and ground war operations elsewhere:

Officers disclosed that more than a million men were under arms on the allied side. They listed 1,051,000 — 705,000 in South Viet Nam's armed forces and 346,000 foreign servicemen. The U.S. roll totals 308,000.

In Moscow there was another Soviet-North Vietnamese meeting, its purpose and subject matter undefined. A Vietnamese-Soviet Friendship Society delegation headed by Nguyen Xien, vice chairman of the standing committee of Hanoi's National Assembly, talked with Fyodor K. Kulakov, a secretary of the Soviet Communist party's Central Committee.

**Speed Up Change**

In Saigon Premier Nguyen Cao Ky, exulting at the 80 per cent turnout of registered voters for the election of a Constituent Assembly last Sunday, told newsmen he would speed up the transition from military to civilian rule. He said the government again was considering whether to grant legislative status to the assembly. Under the existing rules, its duties would be limited to writing a constitution.

Dominating reports from the air war was a heavy blow at North Viet Nam's transport system in the Thanh Hoa area, 80 miles south of Hanoi. Pilots said they had stranded three freight trains by cutting the tracks and then worked over trucks sent in to take off the supplies. They estimated they had left 35 boxcars and 55 trucks smoking, twisted wrecks.

**129 Missions**

This operation was among 129 missions Friday, marked by two dogfights. In one of these a heat-seeking Sidewinder missile fired by an American F4C Pantom jet downed a MIG17. The pilot parachuted. This was the 19th Soviet-designed fighter destroyed in combat over North Viet Nam. The United States lists five planes lost in such actions.

Enemy ground fire, however, downed two more, and the total U.S. aircraft announced as shot down in the Vietnamese war edged up to 704. Of these, 375 planes and 3 helicopters were lost over North Viet Nam, and 120 planes and 206 helicopters over the south.

## Another Glorious Late Summer Day

Fox Cities — Variable cloudiness with little change in temperature today and tonight. High today near 70 degrees. Light and variable winds. Precipitation probability less than 5 per cent today and tonight.

Appleton — High temperature for the preceeding 24 hours 74, low 55. Barometer 30.12 and steady. Wind southwest at 3 miles per hour. Dew point, 50. Relative humidity, 60. Skies cloudy. No precipitation.

Sun sets at 6:59 p.m., rises Monday at 6:36 a.m. Moon sets tonight at 9:10 p.m.

Pen in Hand, Sen. Robert F. Kennedy, D-N. Y., signs autographs at Mitchell Field in Milwaukee after arriving Saturday night for a two-day campaign for Lt. Gov. Patrick Lucey, right, Democratic nominee for governor. (AP Wirephoto)

BELL

# Regional Planners Told Fox Valley Unit Stands Alone

## $48,545 Budget Approved by Commission at Annual Meeting

Geographic areas encompassed by the Fox Valley and Wolf River Basin Regional Planning Commissions "do not overlap at any point," according to Roger A. Baird, secretary of Kimberly-Clark Corp. and chairman of the Citizens Organization for Regional Planning.

Baird spoke to members of the Fox Valley commission at the group's fall meeting Thursday night at Grand Chute town hall and urged approval of the proposed 1967 commission budget. The $48,545 budget, nearly $13,000 higher than last year's, was later approved unanimously.

In urging acceptance of the budget Baird said a number of Valley business leaders "believe that your (Fox Valley Commission) continued existence is essential to the further development and progress of the predominantly urban area you represent."

**Support Planning**

The citizens group is an organization to support regional planning. Baird said he conferred with most of the major industrial and opinion leaders in the area and found them "solidly behind" the Fox Valley commission.

Baird's report to community representatives attending the fall commission meeting said in part:

"I have discussed the commission, its programs and its major problems with community leaders including the presidents of a number of major companies located in the valley and I have been struck with the unanimity of their views on your organization.

**Better Qualified**

"They believe that your organization, created specifically to solve the common problems of this small area of which you have an intimate knowledge, is far better qualified to cope with these problems than any other organization which might exist either presently or in the future."

Speaking of the recently formed Wolf - Fox Coordinating Committee, made up of three members of each commission, Baird said, "I do not believe that this in any way relieves you of your responsibilities for the primary planning needs of the Fox Cities communities.

"The geographic areas encompassed by your commission and the Wolf River commission do not overlap at any point. The function of this committee (Fox-Wolf Coordinating Committee) should, therefore, be limited to the discussion of common problems and should never be made a forum for the settlement of jurisdictional disputes which should not exist," Baird said.

**Planners Salary**

One major reason for the budget increase, Eugene Franchett, commission director, said occurred with the inclusion of $7,200 as salary for a new planner.

Commission officials said they hoped to hire a person with engineering capabilities to fill the newly created post.

The budget cost is divided between the 12 member communities with Appleton's share listed at 37.6 per cent of the total or $17,689. The city of Neenah's assessment is shown as 15.9 per cent or $7,480.

Other communities of the commission and respective assessments are: City of Menasha, $5,081; Kaukauna, $3,905; Town of Menasha, $3,952; Town of Grand Chute, $2,303; Village of Kimberly, $2,211; Town of Neenah, $1,082; Village of Little Chute, $988; Village of Combined Locks and Town of Harrison, $941 each; and the Town of Buchanan, $470.

**Junior Varsity Cheerleaders** elected at Clintonville Senior High School are, kneeling, from left, Patricia O'Connor, Debbie Caskey and Patricia Balke; and standing, same order, Linda Gretzinger, Cheryl Schroeder and Sherri Flink. (Laib Photo)

# Third Petition Filed in Attempt To Leave Stockbridge District

## Signers Number 50 Less Than In Earlier Ones

STOCKBRIDGE — Petitioners trying for the third time to detach from the Stockbridge School District and attach to the Chilton district have approximately 50 fewer signers than in the last two attempts.

The original petition, involving territory south of County Trunk F and east to Lake Winnebago shore, and the second petition, involving a portion of the northeast section, contained approximately 129 signers. The third one contains 80 signatures. Both earlier petitions were denied.

The areas in question are about the same as those stated in 1965. Of the 40 families signing the petition, approximately eight students currently enrolled in Stockbridge public schools would be involved.

Fifty-seven students currently enrolled also would be involved because of living in the areas designated, but their parents were non-signers of the petition.

At a special referendum on June 17, 1965, a vote to build a $200,000 addition to the high school was passed by district voters by a 3-1 margin. Bids for this addition were not opened until August 19, 1965, after the two petition hearings. Ground was broken for the addition last September.

# State Commissions Blast Kellett Report

## Proposed Plan Would Reduce 90 Governmental Agencies to 17

Post-Crescent Madison Bureau

MADISON — The State Industrial Commission Thursday became the third major state agency in less than three weeks to criticize publicly the governmental reorganization proposals made by a special study committee headed by William R. Kellett of Menasha.

The Kellett report, now being circulated among state agencies in the form of a draft legislation, would reduce the state governmental agency sprawl from more than 90 to less than a dozen and a half, group them in a cabinet, and place them firmly under the control of the governor.

The Industrial Commission, one of the few agencies that would survive the proposed reorganization virturally intact, Thursday attacked the plan as being drawn without any consultation of staff personnel in the agency and as one which would place the state's labor department under the complete control of the governor and his political appointees.

The Kellett committee was formed by the legislature, and is made up of a bipartisan group of legislators and of prominent business leaders from throughout Wisconsin. The proposed legislation is being circulated to invite comment from state agency heads on the plan's merits and defects, and a possibly revised report will be issued to the legislature.

The first criticism came from the State Board of Health, which was joined shortly after by a sharply worded letter from the State Conservation Commission. Both those agencies would be altered in a major fashion if the proposed steps were followed.

The Kellett report proposes replacing the present three man Industrial Commission with another three man commission headed by a secretary appointed by the governor, who would serve at the chief executive's pleasure. Two "hearing commissioners" would also be appointed, but would have no administrative capacities beyond hearing cases brought before the commission, according to Commissioner Gene Rowland. The governor would be allowed through the secretary to make, beyond the three new commissioners, 10 additional appointments of deputy commissioners who would head the working branches of the commission, according to the interpretation of the legislation made by Commission chairman Joseph Fagan and Rowland.

**Increase Efficiency**

Purpose of the reorganization is to make the state agency more responsive to the wishes of the governor, and to increase efficiency within the organization, they said.

Fagan said that, "I have some serious doubts that this is in the best interests of the people."

He said that the constant changing of administrations due to the shifts of political power would result in a "platoon system" of running the agency, and that divisions within parties could result in as great an upheaval within the commission as a shift of power from one party to another.

Increased communications between state agencies and the executive office can be accomplished, Fagan suggested, by adding staff members to the Governor's office who are expert in the technical fields administered by the departments.

"If civil service is leading to inertia in government or to non-responsiveness to the people, then I am in favor of change. But this goes beyond that," Fagan went on.

Fagan said that the members of the special study committee "had a preconceived idea that they were going to have a cabinet form of government. Let's not just buy a pig in a poke and go from 90 agencies to 17 for the sake of change at the expense of public service," he said.

Fagan warned that if political appointees were placed in the positions of deputy commissioners above division heads within the commission, many of the professionals "are going to pick up and leave."

Rowland said that no legislative member of the special study committee could have objected to the plan in the fall of an election year for fear of being labeled "anti-economy" by his opposition. The plan should not have been revealed until after the November general election, he said.

Commission secretary Stephen J. Reilly said that the proposed revisions "would undermine the civil service system in this state."

But he added that the political appointment of the deputy commissioners to head divisions within the agency would result in the acquiring of great loyalty among the department heads.

# Byrnes Rejects Attempt to Hike Federal Control

## GOP Congressman Speaks in Appleton Friday Afternoon

"Contrary to Democratic campaign talk, government does not support us; we support the government," Rep. John W. Byrnes said in a campaign speech Friday afternoon in Appleton.

"Imagine the nerve of Democrat candidates for Congress telling us they will take care of us if we elect them to office," Byrnes said.

"This is nothing more than an attempt to buy our votes with our own money. The federal government has no resources except what it takes out of the hides of every citizen, even the poorest, with a wide variety of hidden and open taxes," the congressman told a meeting of Byrnes' workers at Alex's Manor House, near downtown.

"In any event, I doubt the people of this district want to be taken care of by some bureaucrat. They want to take care of themselves. They will reject anyone who proposes taking away their freedom of action by turning every human problem over to the federal government," Byrnes said.

**"Johnson Yes-Men"**

"These are the real pessimists — these candidates so anxious to join the chorus of Johnson yes-men in Congress. They see a crisis in every corner, a problem under every bed and they can think of no other solution except to let the Great White Father in Washington try to solve it with our tax money. They scare us in order to persuade us to turn over our lives and fortunes to LBJ and his bureaucratic army.

"We've got a great district built by the efforts of a great people who have worked for what they've achieved. The results of those efforts are evident in the dynamic progress we see on all sides. The people of this district know that success and progress come, not by having someone take care of us, but through our own willingness to work, to save, to plan and to sacrifice in order to take care of ourselves. This is the only way we'll ever build the better America we all seek.

"No government can take the place of individual effort. The day these Johnson yes-men sell the idea we can all sit back and relax and let the government do it all for us is the day this country heads for the rocks of oblivion."

Byrnes, who opened his campaign for re-election Thursday, is speaking in all seven counties of his district before returning to Washington Monday night.

*New London Project*

# Setting Up Lunch Program Challenges School Officials

NEW LONDON — Setting up a hot lunch program for an entire school system is neither simple nor economical.

Planning the program, hiring personnel, purchasing equipment and planning lunches, is being left up to Steve Fuhrmann, program supervisor.

District voters this spring gave the board of education authorization to initiate a lunch program for the students as soon as possible. The program is expected to be operating in all schools by the end of the year.

Supt. H. James Ramsdell said eventually the program will be operated so that it will break even. Major cost and loss is expected to be experienced during the first months of operation while personnel are being trained and schedules and participation are uncertain.

**Program Cost**

The total cost of initiating the program will exceed $80,000. Cost breakdown shows $38,259 for construction in the kitchen, $52,750 for kitchen and cafeteria equipment and $8,000 for tables and a truck to deliver the food to outlying schools.

Estimates of operating costs have been made and per meal cost has been established. Proposed meal prices are 30 cents for grades one through six; 35 cents for junior and senior high school students, and 45 cents for adult tickets for full-time staff personnel.

About 1,650 out of a possible 2,130 students are expected to take part in the program. Total daily income from the sale of lunch tickets is estimated at $538.

**Need 31 Employes**

Salaries of the 31 employes required to handle the operation of the program will total an estimated $156.95 per day.

Salaries range from $1.90 per hour for head cook to $1.25 for helpers and dish washers. A total of 71 work hours per day is anticipated in the senior high school where all food will be prepared. Totals for the entire district will be almost 114 hours per day.

About 60 applications for work have been received at the lunch program office.

Construction in the kitchen area is expected to be completed about Oct. 15. Sufficient work was to have been completed by Thursday to allow field measurements to be taken for kitchen equipment.

**Completion by November**

It will take about six weeks for the kitchen materials to be completed. The kitchen is expected to be completed by Nov. 14. Employe training will start about the same time.

A timetable for starting the hot lunch program has been set and will include all of the district schools over a period of time.

The lack of surplus commodities such as butter and cheese from the federal government will not effect New London as it did on lunch program in other schools, but will add to the cost.

Further commodity cutbacks are indicated in 1967, but have not been designated.

# Charge Three In Connection With Theft

## Tools, Auto Parts Valued at $325 Taken at Readfield

WAUPACA — Three young Appleton men have been charged with allegedly entering a Readfield garage and taking auto parts and tools worth about $325.

James W. Walters, 20, 932 Lawrence St., and William M. Patterson, 20, 218½ W. Atlantic St., were returned to county jail after being unable to furnish $3,000 bonds. Richard Seibers, 21, 219 N. Durkee St., is being held in the Outagamie County jail and was scheduled to be sentenced Friday on another burglary count. Waupaca County charges are being consolidated with the Outagamie County charges, Undersheriff William Mork said.

The trio allegedly entered a garage owned by Mrs. Elsie Spengler, Readfield, May 24 and took several custom car parts and tools. The items reported stolen were owned by Thomas Spengler, Waukesha.

## Cancer Society Elects Waupaca Minister to Head County Chapter

WAUPACA — The Rev. Edmund Webster, Waupaca, was named president of the Waupaca County chapter of the American Cancer Society, at a meeting here Tuesday. He succeeds Mrs. Kenneth Neuman as president.

Other officers elected were, G. H. Stordock, Waupaca, first vice president; Mrs. Morris Cohen, Weyauwega, second vice president; Mrs. John Penney, Waupaca, secretary, and Mrs. Jerry Taber, Waupaca, treasurer.

Mrs. James Cristy, New London, was elected as a delegate to the state convention and Mrs. John Morgan, Waupaca, was named an alternate.

# 2 Young Burglars Get 3-Year Terms

## Judge Keller Imposes Sentences In Attempt to Curb 'Epidemic'

Commenting, "We're having an epidemic of burglaries in this community and it just can't go on," Outagamie County Judge Gustave J. Keller Friday afternoon sentenced two young Appleton men to three years in the state reformatory for their parts in burglarizing a service station last month.

Richard A. Siebers, 21, and Richard A. Tetzlaff, 18, both of 121 W. College Ave., were two of four persons charged with burglarizing the Zephyr Service Station, 1349 W. Spencer St., early the morning of Aug. 16.

Siebers and Tetzlaff pleaded guilty Aug. 26, after they waived preliminary hearings and were bound over to the felony branch of Outagamie County Court. Judge Keller had ordered the pair to jail without bond while he awaited results of a pre-sentence investigation.

**Consolidate Counts**

Siebers also pleaded guilty Friday afternoon to burglary charges brought by Waupaca and Calumet counties. The youth consented to consolidation of the counts with Outagamie County charges. He admitted his part in burglarizing the Darboy Club May 17 and the Thomas Spengler garage May 24 near Readfield in Waupaca County.

Consolidation proceedings were carried out by Dist. Atty. Nick F. Schaefer and Waupaca and Calumet authorities.

Siebers was sentenced to three years on each of the three burglary counts, with sentences to be served at the same time.

The same Appleton attorney represented both youths in court Friday. He asked leniency for them, stating that neither boy was inside the station when the burglary was taking place.

**No Probation**

Judge Keller said, however, that considering the youths' past records he could not permit probation. He called attention to the fact that Tetzlaff has been "in difficulty" 13 times and appeared in County Court in July for disorderly conduct.

He pointed out that Siebers was involved in two counts of theft in October 1962, and that "the boy has been before this court on several occasions. He has not respected the consideration given him," Judge Keller said in imposing the reformatory term.

The Branch 1 judge showed obvious concern over the recent rash of burglaries in Appleton and Outagamie County. He told Siebers, "Burglary is one of our more serious crimes."

The court was told that Siebers drove the car used in the Waupaca and Calumet burglaries. Money, auto parts and other items were taken.

About $25 cash, umbrellas and bank bags were missing following the Zephyr Service Station burglary.

An 18-year-old rural Appleton youth late in August was placed on probation after he admitted his part in the service station burglary and Robert V. Krull, 23, 209 W. Pacific St., is awaiting a preliminary hearing in connection with the burglary. The hearing is set for Sept. 30. He is being held under $5,000 bond.

# PTA Conducts Vision Tests

## Mothers Helping With Eye Checks At New London

NEW LONDON — Vision testing for all grade school pupils in the school district area began Tuesday.

The testing, initiated six years ago by the Parent-Teacher Association (PTA), is conducted by mothers. Mrs. Alice Murray, city-school nurse, helps supervise the program.

Children are re-tested with the help of the nurse and reports on faulty vision are sent to parents. Vision screening is an annual event for each grade in the district.

**Mothers Assist**

Mothers interested in assisting with the program should contact Mrs. J. W. Weber, PTA Health Committee chairman.

Volunteers working at Lincoln School were Mrs. Robert Gabriel, Mrs. Alfred Lau, Mrs. Toni Prinsen, Mrs. William Schmidt, Mrs. Ned Demming, Mrs. Fred Sweeney, Mrs. Douglas Hanson, Mrs. Don Pederson and Mrs. Ray Oberstadt Jr.

Mrs. Clifford Zielow is chairman of the testing program at Emanuel Lutheran School.

## Golf Chairmen Named For Clintonville Event

CLINTONVILLE — Mr. and Mrs. Carl Rulseh, Marion, are chairmen of a two-ball foursome event Sunday at Clintonville Riverside Golf Club. Tee-off time will be right after the Green Bay Packer football game telecast has ended.

## Inventory Planned at Burglarized Warehouse

An inventory was scheduled to determine if anything was missing following a burglary early today at the Stop and Shop warehouse, in the 500 block of South Alley in downtown Appleton.

A police patrolman spotted the burglary at 2:15 a.m. while making a door check.

# Young Champs Get Awards From New London Golf Club

NEW LONDON — Bill Rieckmann won the boys' junior division championship of the New London golf club for under 18-year-olds and Amy Huppler captured the girls' championship. Trophies were presented Wednesday.

Dee Demming and Mark Miedam placed second in the junior tournament.

Awards also were presented to winners in the tournament held for youngsters taking part in the annual lesson program conducted by J. N. Wells, club professional. About 80 youngsters took part.

Winners in the 8 to 10-year-old group were Leslie and Marcia Ladwig, girls, and John Rieckmann and Tim Huppler, boys. Mary Clegg, Jane Mergy and Ann Huppler won the girls 11 to 13-year-old competition and Mike Smith and Pete Vanderveer, boys competition.

Amy Huppler and Dee Demming took honors for girls over 14 and Mark Hirschboeck and Dave Beckman were the winners in the boys division.

*Community Celebrates*

# Wittenberg Doctor Wins Deferment

WITTENBERG — News of the one-year deferment of this community's only physician sparked a spontaneous celebration Thursday.

When the community received a telegram from Sen. William Proxmire, announcing the deferment, signs were quickly prepared and attached to the village fire truck.

"Dr. Lawton Stays" they proudly announced as the truck, with siren blowing, was driven through the village. Dr. Ledra Lawton, 30, had been ordered to report for induction Sept. 9 but the community sprang into action to retain him.

James Beversdorf headed the Wittenberg Medical Service Committee and with the assistance of committeemen they initiated a petition which was sent to the Selective Service System in Washington, D.C.

**Telegram To President**

Also, a telegram was sent to President Johnson informing him of the matter. The committee worked through Seventh District Rep. Melvin Laird, R-Marshfield, and Sens. Gaylord Nelson and Proxmire along with Assemblyman Bert Grover of Shawano County and the Shawano County Welfare Department.

Adolph Lehner of Oconto Falls, who had worked on a similar drive in his community a year ago, also offered his assistance.

Lawton is married and has two children. He has been here since late May. Dr. Kwoh Chenz San of Korea had served the community briefly last winter. Prior to that the area had been without a physician.

The nearest physicians are in Tigerton and Wausau. The petitioners said their physician was needed to serve 17,000 persons living in a 15-mile radius of Wittenberg.

**Plans for the Year's Programs** were discussed by officers of the Clintonville Junior Woman's club at a recent meeting. From left are Mrs. Robert Kuehl, president; Mrs. Harold Arneson, vice president; Mrs. Dennis Damrau, secretary, and Mrs. Larry Bricco, treasurer. (Laib Photo)

## Fremont PTA Schedules Year's First Meeting

FREMONT—The first meeting of the Parent-Teacher Association for this school year will be at 8 p.m. Tuesday at the multipurpose room at the Fremont Grade School.

Newly elected officers are the Rev. Raymond Barz, president; Mrs. Duane Schmidt, vice president; Mrs. Gary Weiss, secretary, and Mrs. Olin Mead, treasurer.

# Don't Count Sukarno Out Quite Yet

## That's the Advice Almost One Year After Military Coup

By T. JEFF WILLIAMS

JAKARTA, Indonesia (AP) — Don't count Sukarno out yet.

That's the advice of several diplomats and some Indonesian political sources, almost a year after the military clipped the Indonesian president's powers.

Most of these people think Sukarno is fighting a losing battle in his struggle to keep control, but they warn the game still is not over.

Both army strong man Gen. Suharto and Foreign Minister Adam Malik have asked Sukarno to leave the country but he repeatedly has refused, reliable sources say.

The 65-year-old president, in the privacy of palace dinners, still exudes confidence and determination to head this nation of 109 million.

Student leaders say they soon will begin massive demonstration in an attempt to drive Sukarno out of the country.

### *He's a Marxist*

This week the defiant Sukarno declared he is a Marxist — but not a Communist Marxist. He again challenged his critics to prove he had not been loyal to the Indonesian revolution, which has its basis in anti-imperialism.

At a recent dinner in the palace, Sukarno told his guests he knew forces in Indonesia were attempting to oust him.

"They can assassinate me, they can kill me, but they will not topple me," he declared.

Sukarno was laughing and joking easily, but some at the dinner noted he was nervous, moving his hands in jerky movements and fidgeting as he sat.

His humor still was evident when he joked about student claims of forming a new order: "Why do they talk about new order and old order? There isn't any order in Indonesia."

Some diplomats question the wisdom of letting Foreign Minister Malik be out of the country at this critical stage in the power game. He is en route to the United States where he may lead Indonesia back into the United Nations next week.

Malik is generally considered the driving force here in keeping Sukarno in check. Associates call him the only one who has the courage to say what he thinks in Sukarno's presence.

Malik also is instrumental in guiding Gen. Suharto through the intricacies of keeping an outward show of governmental legality while continuing the internal moves to oust Sukarno.

Without Malik here, some believe, the more experienced Sukarno may move too fast for Suharto and trip him up with political maneuvers.

### *Plans Split*

The Honorary Council is composed of the four military chiefs — including Suharto —and several Cabinet ministers. Sukarno's critics charge he will split the government with this and also protect former ministers who might incriminate him when brought to trial.

One of these key men slated for trial is Dr. Subandrio, who was staunchly pro-Peking during his reign as foreign minister.

The anti-Sukarno students have told Gen. Suharto that if he does not take care of Sukarno in one way or another, they will, authoritative sources say.

But many observers believe open removal of Sukarno at this stage would trigger civil war. It looks as if Suharto is playing the waiting game, hoping to break down Sukarno's image in the public eye before forcing him out.

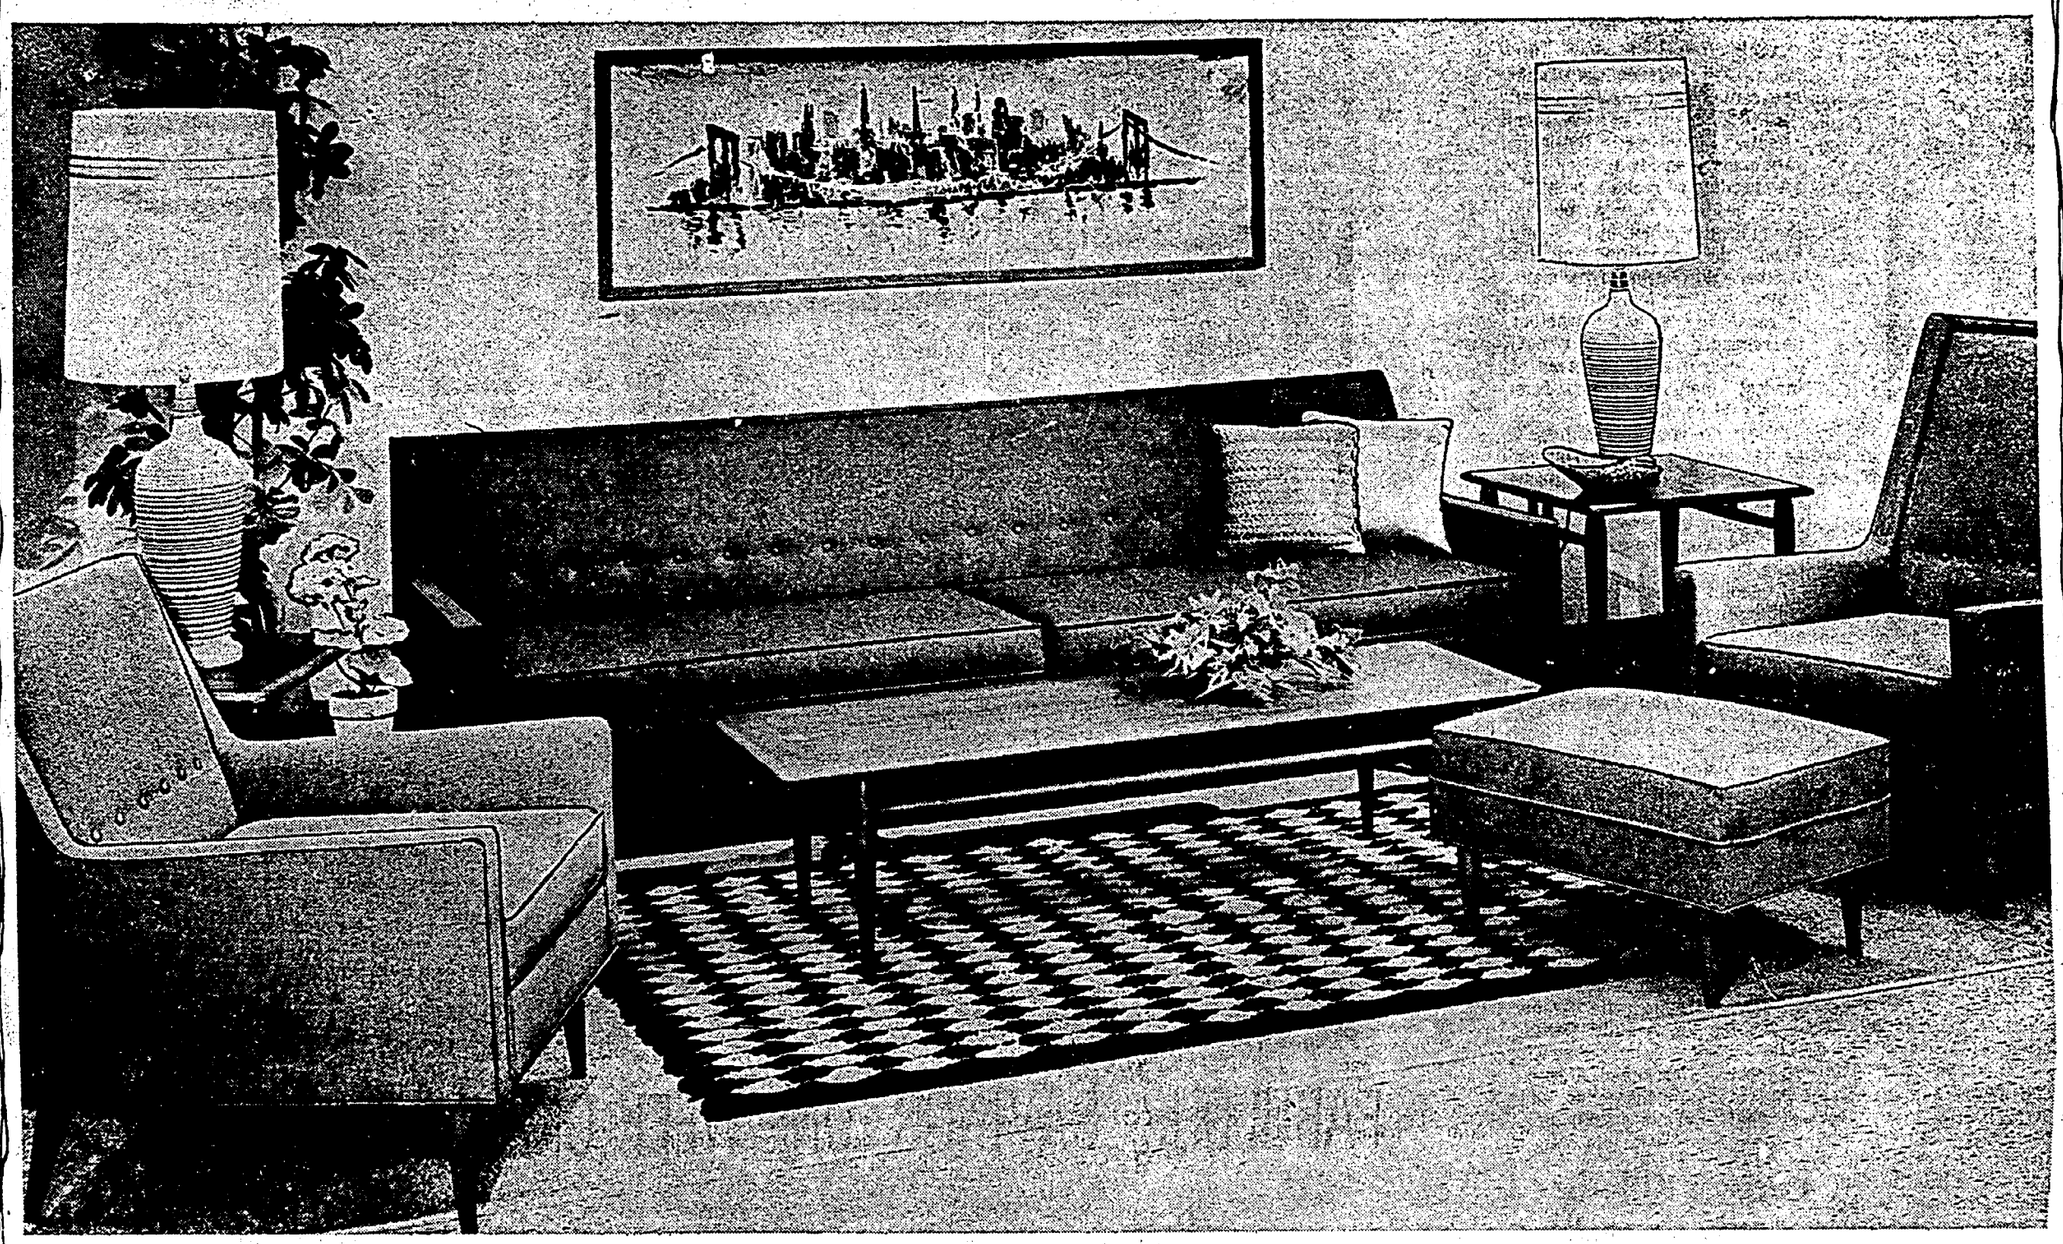

## Interstate Highway Opening Scheduled

MONTPELIER, Vt. (AP) — American and Canadian officials will celebrate the opening of Interstate Route 89 at the Border Sept. 19.

Federal, state and local officials will participate in a ribbon-cutting and shrub-planting ceremony.

# Negro Leaders Attempting to Muster Support for Powell

## New York Democrat Fighting To Retain Committee Power

WASHINGTON (AP) — Negro leaders were reported Saturday to be trying to mobilize support for Rep. Adam Clayton Powell, D-N.Y., in his fight to retain control of the House Education and Labor Committee.

The New York Democrat's office said pledges of help for the embattled chairman had come from Negro labor leader A. Philip Randolph; Stokely Carmichael, head of the Student Non-violent Coordinating Committee; Floyd McKissick of the Congress of Racial Equality; comedian Dick Gregory; Cecil Moore, leader of the National Association for the Advancement of Colored People in Philadelphia; and individual Negroes across the country.

**Vow Protests**

A Powell spokesman said they had volunteered to bring demonstrators to Washington, picket the homes of committee members known to be against Powell, stage protest rallies, or take any other steps that might help.

Powell is doing nothing to encourage such activities, the spokesman said, and has sought to discourage any demonstrations in Washington.

A meeting of whites and Negroes active in civil rights and labor organizations has been scheduled for Tuesday in New York to discuss means of helping Powell. Randolph, president of the AFL-CIO Pullman Porters Union, will act as chairman.

Powell's leadership has been challenged by Rep. Sam Gibbons, D-Fla., a junior member of the committee, who is seeking to have the chairman's powers shifted to six subcommittee chairmen. Gibbons' reorganization plan is due to be voted on at the next meeting of the 31-member committee Thursday morning.

**Long Revolt**

Powell has claimed he was being attacked because he was a Negro. But whatever its source, the revolt against him has been building for a long time. In fact, the committee has been a battleground between the chairman and members for years, going back to Powell's predecessor, Rep. Graham Barden, D-N.C.

Two of the members believed to be supporting Gibbons actively, Reps. Edith Green, D-Ore., and Frank Thompson Jr., D-N.J., were leaders in a successful revolt against Barden in 1957.

Barden was forced to give the subcommittee chairmen the right to hire their own staff members, and strict jurisdictional lines for each subcommittee were fixed, depriving Barden of the right to assign bills. He found this so distasteful he left Congress after the next session, putting Powell in the top spot.

**Personal Charm**

Powell's personal charm and political instinct held the fractious committee together fairly well for a while, and it played a major role in putting through the legislative programs of the Kennedy and Johnson administrations.

But troubles stemming from Powell's flamboyant behavior outside Congress kept arising. After his much-publicized trip to Europe with two women employes of the committee in 1962, the House clamped down on all committee travel.

## Annual Oktoberfest Opens in Munich

MUNICH, Germany (AP) — Firecrackers, brass bands and official keg-tapping ceremonies marked the opening Saturday of the annual Munich Oktoberfest, the world's biggest beer-drinking festival.

Confident officials predicted more than four million visitors would consume at least a million gallons of beer during the 16-day carousal and wolf an estimated total of 350,000 fried chickens and more than 700,000 pork sausages.

## New Brown Lipstick

DAKAR, Senegal (AP) — An African woman pharmacist, Felicia Basse, has produced brown lipstick in all shades, light to darkest, because, she said, it seems more appropriate for Negro women than red lipstick.

# Mansfield Says Thailand Bases Are Necessary

### Majority Leader's Backing Qualified By Lack of Facts

WASHINGTON (AP) — Sen. Mike Mansfield of Montana, the Senate majority leader who has opposed expansion of the war in Viet Nam, gave a qualified endorsement Saturday to the American military build-up in Thailand.

Mansfield said in an interview he had little official knowledge of U.S. military operations in the little country bordering Viet Nam. But he said he accepted as credible news reports that two new large military bases were under construction there.

"In view of the present conditions, as they actually exist, there probably is a need for these bases," he said.

**Hearings Tuesday**

The Senate Foreign Relations Committee, of which Mansfield is a member, starts closed hearings Tuesday on the U.S. role in Thailand.

Chairman J.W. Fulbright, D-Ark., has raised the issue that the American build-up might convert Thailand into "another Viet Nam." He said Congress ought to know "what we are getting into."

But Mansfield said he doubted inquiring senators, who will hear Asst. Secretary of State William P. Bundy as the first witness, would learn much that is new.

"I doubt that we will find out any more in the hearings than we already know from credible news reports," he said.

**Fragmentary Mention**

Mansfield said Thailand operations had been mentioned "in only a fragmentary way" in White House briefings on Viet Nam. He added that so far as he knew, Congress was informed about activities there only from what it read in the papers.

The majority leader said the chief factor behind the American military build-up seemed to be for "defense against the threat of Chinese subversion of northeast Thailand." He noted that this area had a large population of North Vietnamese.

Mansfield said he was not prepared to challenge published reports that the United States had 25,000 troops in Thailand and was building big bases at Sattahip, on the Gulf of Siam, and at Nam Phong.

Justino Diaz as Antony has a kiss for Cleopatra, Leontyne Price, in costume, left, after opening performance at the Metropolitan Opera's first night in its new home at Lincoln Center in New York City Friday night. The leads of Samuel Barber's "Antony and Cleopatra" later appeared in street clothes, right, at a post-opera party. (AP Wirephoto)

Strike Lifted for Night

# Metropolitan Opera Opens Season In Elegant Lincoln Center Home

By STANLEY JOHNSON

NEW YORK (AP) — The Metropolitan Opera opened its $45.7-million new home at Lincoln Center in a blaze of glory Friday night — and it almost seemed as though fireworks went off when General Manager Rudolf Bing announced from the stage that the musician's strike, which threatened future performances, had been settled.

Cheers went up from the audience already dazzled by the gala opening night, with Samuel Barber's new American opera "Antony and Cleopatra" on one side of the footlights and a cross-section of the world's power and wealth on the other.

**American Dream**

Leontyne Price sang the role of Cleopatra. The parents of her leading man, Justino Diaz, who played Antony, flew to New York from Puerto Rico to attend the performance.

Bing had just come from backstage where he and Mrs. Lyndon B. Johnson — guest of honor at the opening — had met with the parents of Miss Price. Amidst the diamonds and the white ties, the Mississippi Negro farm tenant parents of the diva were like the embodiment of the great American dream.

With Mrs. Johnson in the state box, as her chief guests, were President Ferdinand Marcos of the Philippines and his wife Imelda in a pink and white, jewel-encrusted native gown called a terno.

**Famous Faces**

Joining them were Gov. and Mrs. Nelson A. Rockefeller of New York — who had not been expected — and who seemed to occupy the section of the box left vacant when U.N. Secretary-General U Thant failed to show up. He sent word that he had a toothache.

Sens. Robert F. Kennedy, D-N.Y. and Edward Kennedy, D-Mass., who had not been on the list of advance ticket holders either, were in the audience.

Mrs. John F. Kennedy, widow of the president, was absent because, a spokesman said, she was in Boston entertaining scholars sent here by the British government in honor of her husband.

With most of New York's "best-dressed" unable to get tickets, fashion reporters described the audience as "rich but tacky."

**Lady Bird**

Mrs. Johnson, at her best in an alabaster chiffon gown by George Stavropolis, was an exception.

Mrs. James Price, in a beige lace suit and pearls and the star's brother, immaculate in the white dress uniform of a U.S. Army lieutenant colonel, beamed with pride as Mrs. Johnson told them Leontyne was "so regal." Col. Price returned from Viet Nam last year.

They weren't at all in awe of Bing — his chest covered with medals — and Mrs. Price told him she had always thought he was a "stout gentleman."

"I was until a week ago," he said, referring to the strike and the mechanical difficulties and the other troubles which for a time made it seem a dream that the Met would be able to open its new home on time.

The building itself, the magnificent finale to the cultural complex of Lincoln Center, seemed to overshadow the opening night.

The fountains, and the Marc Chagall murals and the audience took almost as much attention.

## Girl Objects to Fare for Mousy Friend, George

WAKEFIELD, England (AP) — The hunt was on today for a bus conductor who charged a fare for a mouse.

"Charging for a mouse riding in a bus is taking things to extremes," said an official of the West Riding Automobile Company.

Judith Sharp, 10, lodged the complaint against the conductor. She said he demanded a fare of eight cents for her pet mouse George, who measures 3½ inches from nose to tail and is carried around with Judith in a little box.

"The conductor looked at the box and saw George through the air holes," Judith related. "He demanded the fare on the ground that all animals must be paid for."

"I think it is most likely that George's fare will be refunded," a company official said.

## Transfer Trial Of Marine on Charge of Rape

MADISON (AP)—The trial of Ronald Brinkman, the 21-year-old AWOL marine from Lombard, Ill., charged with two counts of forcible rape, was transferred to circuit court.

Brinkman waived a preliminary hearing in county court Friday to determine if there were sufficient facts to have a trial.

Besides the rape counts pending in Dane County, Brinkman, who eluded a massive manhunt for two days before being captured in mid - July, has been charged in Green County with kidnaping a 15 -year- old rural Monticello girl.

The date of the arraignment and trial would be set by the circuit judge assigned the case, according to County Judge William Buenzli.

The case was transferred from county court because, according to Wisconsin law, all felonies must be tried in circuit court. State law also forbids the name of a rape victim to be made public.

He's the kind of friend you can depend on — always around when he needs you. (Copyright, 1966)

Both Sides Agree

# Rematch on Rights Bill Likely in Next Session

WASHINGTON (AP) — Winners and losers in the Senate struggle over President Johnson's open housing-civil rights bill agree that a rematch is likely next year.

At the moment, neither side is ready to forecast the outcome.

But both acknowledge that the current engagement probably will end Monday when a second bid to shut off debate and force action is expected to fall short of the two-thirds vote it needs.

If that happens, Senate Democratic Leader Mike Mansfield of Montana has said he will reluctantly shelve the House-passed civil rights measure.

**Means Death**

That means it would die with the end of the 89th Congress.

Senate Republican Leader Everett M. Dirksen of Illinois, whose opposition is the key factor in the anticipated rejection, and Sen. Philip A. Hart, D-Mich., who tried to guide the bill to passage, both said they anticipated a new Johnson proposal on civil rights next year.

"Certainly there will be a new civil rights bill next year," Dirksen said.

Dirksen said he did not know what would be in such a bill but if it were like the current proposal, it would be rejected.

Hart, predicting that a ban on racial discrimination in housing one day would become government policy, said he could not forecast the prospects of a new civil rights proposal next year.

**Begin Again**

But he indicated its chances would be better if it came early in the session. Johnson proposed the current bill in an April 28 message. It passed the House Aug. 9 and ran into a September filibuster in the Senate.

Because a new Congress will convene in January, the process of passing civil rights legislation will have to begin all over again. And that could create a new problem.

Hart said it would be reasonable for the House, having passed a controversial civil rights bill in an election year, to insist that the Senate act first on any renewal of the proposal.

Dirksen thinks so, too.

"I have an idea that when you touch a red hot stove once, you're pretty careful after that," he said.

## Bias Against Women

OTTAWA (AP) — Canada has just signed a 31-year-old international convention designed to prevent employment of women in mines.

## Planes for Air France

PARIS (AP)—Air France, the nationalized French airline, announced Saturday it has ordered four Boeing 747 planes to be delivered early in 1970. The planes are designed to carry up to 450 passengers at subsonic speeds. Several European and U.S. airlines previously had ordered the planes.

Inside the Capitol

# Knowles Is Content With Patrick Lucey As Foe in November

BY JOHN WYNGAARD
Associated Press Writer

MADISON — Gov. Warren P. Knowles, leader of the Republican state ticket for the fall election, is content with the nomination of Lt. Gov. Patrick J. Lucey for the governorship on the rival Democratic slate.

Knowles privately confided to his political managers before the primary election that he felt Lucey would be a less formidable challenger than at least two others among the Democratic aspirants. Like others, he viewed Davied Carley as especially dangerous in a general election situation because he might have been able to make some appeals to dissident Republicans or Independents. As the Republican analysts see it, Mr. Lucey is too well identified as "Mr. Democrat" to make any inroads of significant depth into non-Democratic voting ranks.

Wyngaard

But the Knowles campaign command doesn't intend to take any chances. It will organize the hardest campaign of which it is capable. In fact, some of the managers are already concerned that the public identification of Knowles as the favorite at the start of the fall vote drive may be hurtful to their cause. They prefer to keep an attitude of doubt and tension, to bring out the maximum campaign effort.

Robert L. Pierce, key Wisconsin politician and a prominent member of the Republican national committee, has a ready answer as he is increasingly asked for his preferences and predictions for the 1968 presidential nomination of the party.

He favors the selection of Rep. Melvin R. Laird of Wisconsin, a veteran Wisconsin Republican leader at a youthful middle age, Pierce says flatly and consistently. Laird is the chairman of the Republican policy committee of the house of representatives and is probably the most influential Republican congressman Wisconsin has had in Washington in a couple of generations.

* * *

Watch for action by the state conservation commission to raise the price of the state parks admission stickers for non-resident visitors.

The commission is understood to be prepared to act, and is now awaiting the results of a review of the matter by a blue ribbon committee of recreational advisors. Park costs are rising, and there is a resistance to the idea of subsidizing non-resident service to an excessive extent in spite of the realization that the state is courting the patronage of tourists because of their generally beneficient effect upon the Wisconsin economy.

* * *

Look for Democratic campaigners to abandon as an issue the cost to the state budget of Mrs. Warren Knowles' favorite project, the rebuilding of the state executive residence. Trial balloons during the primary campaign apparently brought a doubtful response from the electorate.

* * *

Jack Mills, Wisconsin-trained Republican politician who has been chief of staff of the Republican congressional campaign committee in Washington for half a dozen years, is likely to leave that assignment soon after the election.

Mills is pondering what is said to be a highly attractive industrial job offer. He is a native of Beloit and was formerly a leader in the Young Republican federation of Wisconsin.

* * *

Republicans will be watching Assemblyman George Borg of Walworth County, winner of the senatorial nomination in the primary election, and a reasonably sure prospect for election in the fall.

Borg has set out a pattern for a political career in a careful and practical way. He possesses three of the most valuable assets for a political vocation, youthful energy, a grasp of political practicalities, and virtually unlimited financial resources.

* * *

Some Democratic leaders were privately relieved when Cletus Johnson of Green Bay, without a perceptible effort, defeated Mrs. Minnie Townsend of Milwaukee for the dubious privilege of running against Secretary of State Robert C. Zimmerman in November. Johnson's Scandinavian name undoubtedly helped him, but practical liberals privately believe that Mrs. Townsend, a Negro, would have been a drag on the ticket in most precincts.

* * *

Assemblyman Harvey Dueholm, the veteran legislative spokesman of Polk and Burnett counties, is one of the most effective humorists in the legislature and can always bring up an anecdote to make a point.

He hesitated only a moment the other day when, in testifying about the opposition of his northern Wisconsin farm constituents to a legislative pay increase he was asked whether he regarded himself as typical of his constituency in terms of modest financial means. Dueholm said he did.

"How do you then explain", he was asked by a young lawyer member of the legislature's finance committee, "that one of your sons is enrolled in the Harvard University Law School?"

Dueholm paused, as if in embarrassment, and then retaliated.

"We have lived general generations through honest work," he replied. "But had a big family . . ."

Then:

"We haven't told the boy's mother yet. She thinks he is working as a bookie in Nevada."

The interrogator gave up.

* * *

Few legislative politicians of modern times have been as solidly entrenched in their districts as Robert Huber, the speaker of the state assembly and veteran Democratic assemblyman for the heavily Democratic West Allis district. Friends have arranged a testimonial dinner in his honor, and ambitiously printed 3,000 tickets. They have been sold out.

## Parents Killed; Family Council To Plan Future

RACINE (AP) — Thirteen children have decided a family council would be the first wise step in charting a future in the absence of their parents who died Friday in a car - truck crash near Racine.

The collision at a highway intersection claimed the lives of Daniel Swartz, 49, his wife, Verlane, 46, and one of their 14 children Billy, 3.

Swartz, a parts salesman for a Racine farm implement firm, and most of the family moved to Racine 14 months ago from Turner, Mich. Among the survivors are four married daughters living in Michigan and a son, Charles, 22, of Saginaw, Mich.

Dan, 16, the oldest child at the Racine home, directed his brothers and sisters to stay in the home instead of moving in with neighbors.

"I can't say anything definite about what we will do until I talk with my older sisters," he said adding that a family discussion about the future was planned after Charles' arrival from Saginaw.

## Court Rules Paper Can Examine Report On Police Brutality

MADISON (AP) — The State Supreme Court ruled Friday the publisher of the Waukesha Freeman may look at a censored version of a city report about alleged police brutality.

The decision upheld in part an order by Circuit Judge Clair Voss to allow Henry A. Youmans to look at the report and statements by police officers in an inquiry made by the Waukesha city attorney.

The City of Waukesha had appealed Voss' order in an effort to prevent the report from being made public.

The Supreme Court said one portion of the report would not be revealed. It related to questions asked a police sergeant on a side issue involving the reputation of another person.

# Arrest 12 White Men In Beatings of Pupils

CONTINUED FROM PAGE 1

merchants have been under Negro boycott about a month.

The FBI identified those arrested as:

—Doyle Cleveland Vance, Grenada, truck driver.

—Donald Bain, Grenada, factory worker.

—Leland McBride Belk, Grenada, service station operator.

Archie Larry Campbell, Grenada.

William Bryant Flannigan, Grenada, garden nursery owner.

John Silas Hodges, Grenada.

Clyde Perry, Grenada, Sanitation Department worker.

Carroll Wilbur Ray, Grenada, auto body shop owner.

Jack M. Richardson, Grenada, smoked ham house operator.

Robert Earl Shields, Grenada, service station manager.

Grover Lee Vance, Duck Hill, auto mechanic.

Virgil Vernon Vance, Grenada, laborer.

**"Savage, Senseless"**

The arrests followed a U.S. Dist. Court order that Grenada officials protect Negro children from "savage and senseless" attacks by white men.

Judge Claude Clayton issued the order Friday night, saying the violence Monday and Tuesday in Grenada, 45 miles to the south, was "the shame of all who occupy leadership, both official and civic, in the county and the city of Grenada."

The ruling came after two days of testimony in which witnesses had said that in many instances police had taken no action while white men beat Negro children with ax handles and chains outside the newly desegregated schools.

Failure by Grenada officials to obey the injunction would expose them to contempt of court action.

**Constable Sentenced**

Judge Clayton emphasized the gravity of such action by sentencing Grenada Constable Gray Carroll to four months in prison for contempt.

The judge signed an order Friday night requiring Carroll to surrender to the U.S. Marshall here before noon next Saturday, Sept. 24. In court Friday the judge said Carroll would have to begin his term at noon Saturday. But the later date was stipulated when he signed the order.

Carroll remained free under his original $3,000 appearance bond. The case against him had been pending since he pleaded guilty at a hearing last month involving Negro claims that law officers were ignoring the court's orders to protect legal civil rights demonstrations.

The constable had refused to accept a federal court subpoena and struck a lawyer who had tried to serve it on him.

# Sen. Kennedy In Milwaukee For Pat Lucey

CONTINUED FROM PAGE 1

Milwaukee and John Race, Fond du Lac.

Lucey and Kennedy selected Race to accompany them to the speaker platform at UW-M, obviously reflecting concern over the political fate of the Democratic first term congressman who is being seriously challenge by Assemblyman William Steiger, Oshkosh.

Also on the platform were defeated gubernatorial candidates Dominic Frinzi and Abe Swed, both of Milwaukee. Democratic National committeeman David Carley, defeated in a bitter intra-party struggle was absent.

Carley and Lucey met and made peace in Madison Friday, but Lucey explained that Carley was uttering a long standing commitment to his family to spend a weekend in Door County.

**Aid Campaign**

Kennedy spoke several months ago at a fund raising dinner kicking off the Lucey campaign, and returned Saturday during a weekend jaunt to aid Democratic campaigns in Minnesota, Wisconsin and Ohio. Kennedy is scheduled to address a similar rally in Kenosha today.

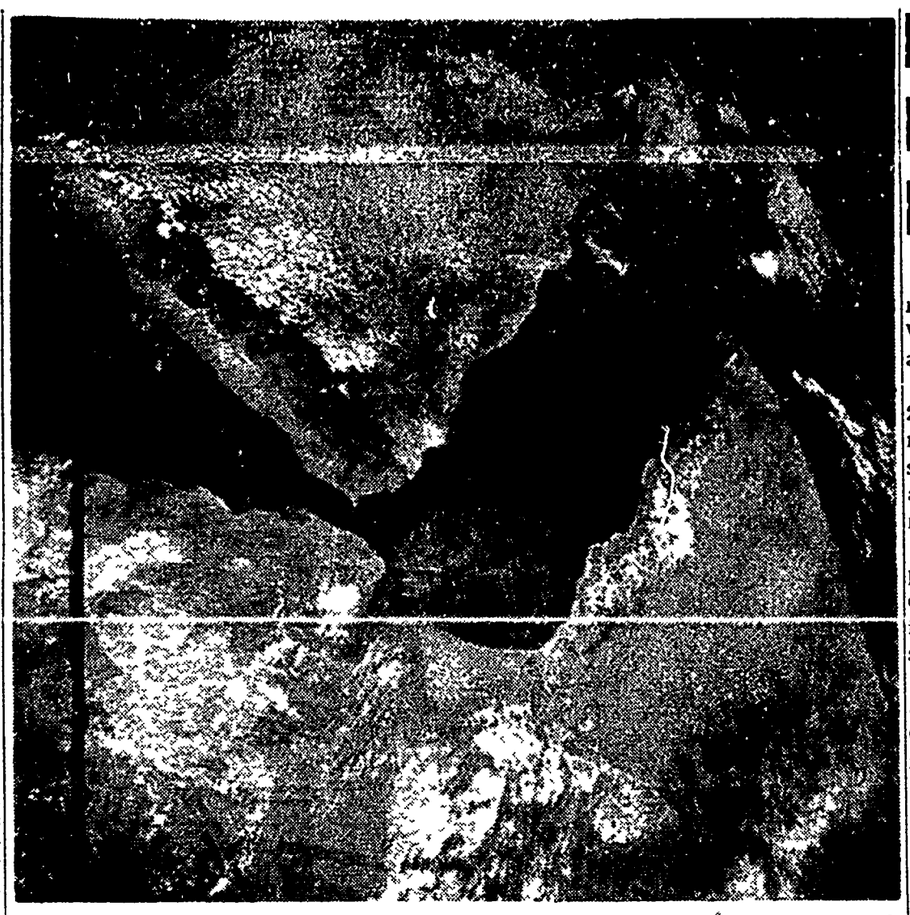

Lucey has scheduled a final fund raising dinner which will be held just before the Nov. 8 election and which might feature one of the Kennedy brothers, according to Lucey spokesmen.

**Favor Johnson**

State Democratic party leaders however are known to favor President Johnson as a featured speaker if possible.

Kennedy, a long time intimate of Lucey dating from the years before the 1960 presidential campaign, gave every indication that he will return to aid Lucey in the Lt. Governor's race against incumbent Republican Gov. Warren P. Knowles.

Kennedy smiled at Lucey as he said, "The Kennedys' feel that they have a second home in Wisconsin." Kennedy, as did Ted Sorenson a week ago, implied that he has an interest in the fate of the gubernatorial politics of the state.

**Gemini 11 Astronauts** Pete Conrad and Richard Gordon photographed this view of the earth showing Ethiopia and Somalia in northeast Africa, with the Red Sea and the Gulf of Aden, in their record-breaking flight. An antenna of the Agena, which boosted them to their record altitude, is at left. The photo was made at 460 miles altitude. (NASA Photo via AP Wirephoto)

## British Thieves Hit Jewelry Store

LONDON (AP) — Four men wearing nylon stock masks Saturday plundered the strongroom of Collingwoods, the Mayfair jewlers, where some of Britain's lords keep their coronets.

Two watchmen were tied up while the gang collected bracelets, brooches, rings and necklaces. No figure was given for the haul but it is believed to run into thousands of pounds.

## Goodwill Visit

MOSCOW (AP) — The Indian army chief, Gen. P.P. Kumaramangalam, has arrived here for a two-week Soviet goodwill visit.

## *Author Jim Bishop Says Jackie Blocks Book Plans*

NEW YORK (AP) — Author Jim Bishop said Saturday that Mrs. John F. Kennedy had attempted to prevent him from writing a book on the assassination of President Kennedy.

Bishop said Mrs. Kennedy had asked him twice by letter two years ago to drop plans for a book to be called "The Day Kennedy Was Shot." When he declined, he said, the Kennedy family silenced most sources and brought pressure on his publisher, Bennett Cerf of Random House.

Cerf confirmed that Mrs. Kennedy had asked him not to publish the book.

The former First Lady informed him, Bishop said, that she had "hired" author William Manchester to write the history of the assassination. Manchester's book, "The Death of a President," is due for publication in January by Harper & Row.

The attempts to stop Bishop's book were disclosed Friday by Jack Anderson, an associate of Washington syndicated columnist Drew Pearson.

Mrs. Kennedy could not be reached for comment on the column or on the statements by Bishop and Cerf.

Bishop, in a telephone interview from his home in Hallandale, Fla., said Mrs. Kennedy had sent him a handwritten letter dated Sept. 17, 1964, in which she asked him "to please not go ahead with your intended book, 'The Day Kennedy Was Shot.' The idea of it is so distressing to me, I can't bear to think of seeing — or of seeing advertised — a book with that name and subject — one that my children might see or someone might mention to them."

**Hired Manchester**

She wrote that she had "hired" Manchester "to protect President Kennedy and the truth."

She added: "He was to interrogate everyone who had any connection with those days — and if I decide the book should never be published — then Mr. Manchester will be reimbursed for his time. Or if I decide it should be known — I will decide when it should be published."

When Bishop asked Mrs. Kennedy not to "stand in the doorway of history," she replied that "none of the people connected with November 22d will speak to anyone but Mr. Manchester. That is my wish, and it is theirs also."

# Major Paper Expected From Pope Monday

CONTINUED FROM PAGE 1

ing the controversy over the Vatican Council's church-renewal program.

The Pope, who will be 69 Sept. 26, came back here from two months at his Castel Gandolfo summer palace looking tanned and rested. Crowds cheered him in St. Peter's Square.

Pope Paul received an 800-page report — including a secret set of recommendations — from his Birth Control Commission three months ago. Its contents have occupied much of his attention since he went to Castel Gandolfo July 17 for a summer retreat he called "a period of work and meditation."

**New Attitudes**

Some sources have said a majority on the 75-member commission had proposed new attitudes on contraception which would go far beyond the current church teaching allowing total abstinence or the rhythm system — abstaining from intercourse during a woman's fertile periods — as the sole means of birth control. The main problem now is whether to permit use of the contraceptive pill.

The Pope was said to have told a visitor as recently as early this month that he still had not yet come to a final decision.

## Death Sentence

CARACAS, Venezuela (AP) — A hen stepped on the trigger of a shotgun leaning on a wire fence and hit Mrs. Dama de Giron with a scattering of buckshot in the legs. Though it was clearly accidental, Giron, the husband, decreed the hen must die — "by immersion, in the soup kettle."

Canadian Operation

# Siamese Twins Are Successfully Parted

TORONTO (AP) — Infant Siamese twin girls joined from the chest to the navel were successfully separated Saturday in a 6½-hour operation by two teams of Canadian doctors.

"The general situation is satisfactory," a medical bulletin said. "The children are awake and alert."

The doctors said they were "generally pleased" with the results of the surgery but added that because of the seriousness of the operation, the condition of the three-month-old girls, Crystal Ann and Cheryl Ann McGee, was critical. The operation was performed at Toronto's Hospital for Sick Children.

The major concern in the operation stemmed from the fact that each girl's heart protruded into the chest of the other.

Hospital director John T. Law said Crystal Ann's heart had been successfully placed in her chest and the incisions sewn up.

**Plastic Dome**

Her sister's heart is still protruding, Dr. Law said, and is covered by a plastic dome prepared in advance of the operation.

Her heart cannot be placed in her chest for the time being, he said, because doctors fear such a procedure would be more than she could stand now.

Before the physicians went to work on the critical heart phase of the operation, they successfully separated the girls' livers, which were bound together by common tissue.

The twins were born June 2 to Mrs. Leonard McGee of Guelph, Ont.

Weeks of study, testing and practice preceded the surgery, but the doctors said much had to be learned as the operation went on. Although tests revealed many details of the twins' vital organs, doctors said, they could not show completely the extent of the neurological integration of the two bodies.

Siamese twins with a heart defect similar to that of the McGee girls died during a separation in Edmonton, Alta., in 1959.

Before the operation McGee, 26, told newsmen: "If there is a slight chance for our girls to have a near normal life we want to take it. It's a real gamble but the stakes are the highest."

## *John Race Greets Kennedy With 20-Pound Cheese*

MILWAUKEE — Rep. John A. Race today welcomed New York Sen. Robert F. Kennedy to Wisconsin with a present of a 20-pound cheddar longhorn of Wisconsin cheese.

Race noted that Kennedy also represents a dairy state in the U.S. Congress and said he was "certain Kennedy shared his (Race's) pride in the great dairy industries of Wisconsin and New York."

The 6th District Democrat said he was confident Wisconsin dairy farmers would show their appreciation at the polls this fall for "those Democratic lawmakers who have fought to improve dairy prices."

Kennedy will spend this weekend stumping for Race, Lt. Gov. Patrick Lucey and 1st District Rep. Lynn Stalbaum.

## *007 Worries Pakisan*

KARACHI, Pakistan (AP) — The Pakistan government has warned importers of foreign films to use restraint in their selections and threatened to ban spy films of the James Bond type. The Central Board of Censors denounced the Bond series as being "full of crimes and bedroom scenes."

## Good Way to Get Education

# Sounds and Signs of a Tobacco Auction

By SIDNEY STAPLETON

GREENVILLE, N.C. (AP) — A city fellow can get an education the first time he sets foot onto a tobacco warehouse selling floor.

The auctioneer rattles off a string of sounds, the buyers holler and bellow and the crowd moves up one row of baskets and down another.

The signs the buyers use to communicate their bids resemble the initiation rites of a secret order. One scratches his nose, another tugs at his ear lobe, another gives his belly a contented pat.

There's a little fellow who trails the auctioneer to record the buyer and price for each basketful. Somewhere along the line he looks lost, shrugs his shoulders, but continues to write.

### Pains Him

The "marker" goes in front of the auctioneer to set the price he thinks the buyers should consider as rock-bottom — and it pains him to be so cheap.

"C'mon you thieves," cries the auctioneer when the bids don't come in fast enough or high enough to suit him.

"I can't take that," he shouts, rejecting the bids he thinks are too low. Or he places a hand on his head and sings his disapproval, "da-amn, da-amn, da-amn," until they come around to his way of thinking.

"Sixty-four," yells one buyer, fingering a bundle of tobacco.

"Sixty-five," shouts another, trying to look as if he's transgressed his judgment.

"You're killing me, you thieves," shouts the auctioneer.

But he smiles broadly when they raise the bid, and points an accusing finger at the winner as if the buyer has just bankrupted his company.

The speed of the action makes continuous stream of sights and sounds.

The buyers and auctioning party overturn the tobacco in the basket to check quality, decide its worth, haggle over the price, outbid each other and award a sale — all in the time it takes for a few shuffling steps.

Then they're off to the next basket with never a break in the auctioneer's banter.

"C'mon you thieves," he shouts at the end of the sale. "I'll buy you a cup of coffee."

**Tobacco Auctioneer** Ray Oglesby (second from left, with fist to face) chants, cajoles, cusses and generally moves buyers from the manufacturers to up their bids. This is a tobacco warehouse in Greenville, N.C., in the heart of the big Eastern North Carolina Tobacco Belt. At left is Willy Edwards, a marker, who sets arbitrary base prices on each tobacco bundle to start valid biddings. (APN Photo)

## Propose Technical School at Wausau

# Approve First Plans New Institute

MADISON — Initial approval has been given to plans for the development of an area technical institute in Wausau by the State Board of Vocational, Technical and Adult Education.

With it, the Marathon county institution became the first in the state to comply with the requirements of a law passed by the 1965 session of the Legislature that requires all areas of the state to be in an institute district by 1970.

A contingent of delegates from the Wausau school, to be built by the Marathon county vocational, technical and adult board, explained plans to the state board for the development of the $3.6 million institute that will be financed through the levying of a tax on residents of the county. The recently enacted statute allows such vocational boards to levy a tax of up to two mills on the equalized valuation of property in the area district. Several months ago the state board designated Marathon county as the base county for an area district, and Wausau as the site of the new district school.

The development of the area districting plan will be completed in December, and other counties may be added to the Marathon county base at that time.

In recommending approval of an allocation of $230,000 from the state board to the county vocational board to allow immediate development of the plans, state board director Clarence Greiber pointed out that the site selected for the school is located on Wausau's northwest side, and is just 34 minutes from students in Stevens Point.

The state board approved the allocation of the funds to allow for site acquisition and partial payment of architects' fees for building plans.

The state board also approved a study to determine when and how the balance of the state administered federal funds to be used for half of the building costs will be allocated. The state-federal total will be about $1.7 million.

The $230,000 allocation represents a commitment of almost half of the remaining available funds of the state board from federal sources for the next year to the new institute. Unallocated of the 1967 federal aids expected is about $500,000. An additional $700,000 may be available if a bill now in the U.S. Senate is approved, however.

### 'Almost Ideal'

The site was termed "almost ideal" by state board officials, as it is a 96 acre pie-shaped wedge that will be bounded on all sides by major roads. The city branch of U.S. Highway 51 will constitute one boundary of the tract, and the Wausau Beltline will be another.

Expansion of the present school is necessary even without the additional students drawn by the creation of one of the state's major technical institutes, Wausau representatives said. Enrollment this year is 850, 200 more than one year ago. About 400 students were turned away for lack of room this fall, they said.

The new institute will have an initial capacity of about 1500 students, according to the plans.

Greiber, in supporting the requested allocation to the state board executive committee, termed the Wausau vocational school recommendation "one of the five real trouble spots in the state." Other schools which have been forced to turn away students for lack of space are in Madison, Milwaukee, Kenosha and Eau Claire.

The building schedule submitted with the request calls for the site purchase in October, and the completion of drawings necessary for the letting of bids in February, 1967. Bids will be received next March 15, and construction started on April 1. The building will be ready for occupancy on August 1, 1968, according to the proposal.

Also constructed on the site will be a building for the performing arts which will contain an auditorium. The title to the building, financed and constructed by the same private foundation which built the Wausau YMCA building, will be given to the Marathon County vocational school board.

The local financing of the school will be done through the sale of bonds. Funds are expected to be available from the bonds before the end of the year, according to the Wausau representatives.

The contingent included L. B. Hoyt, director of the new school, and Walter Lehman and Kermit Goertz, chairman and treasurer, respectively, of the county vocational, technical and adult board.

About all the representatives did not receive from the state vocational board was permission to change the name of the new institute. A request had been made to call the facility the "North Central Technical Institute," as county vocational board feels that the name "Marathon County Vocational, Technical and Adult School" is too long.

New at Prange's! . . . . .
A scrub-less, wax-less,
mop-less kitchen floor;
yours with Mohawk carpet!

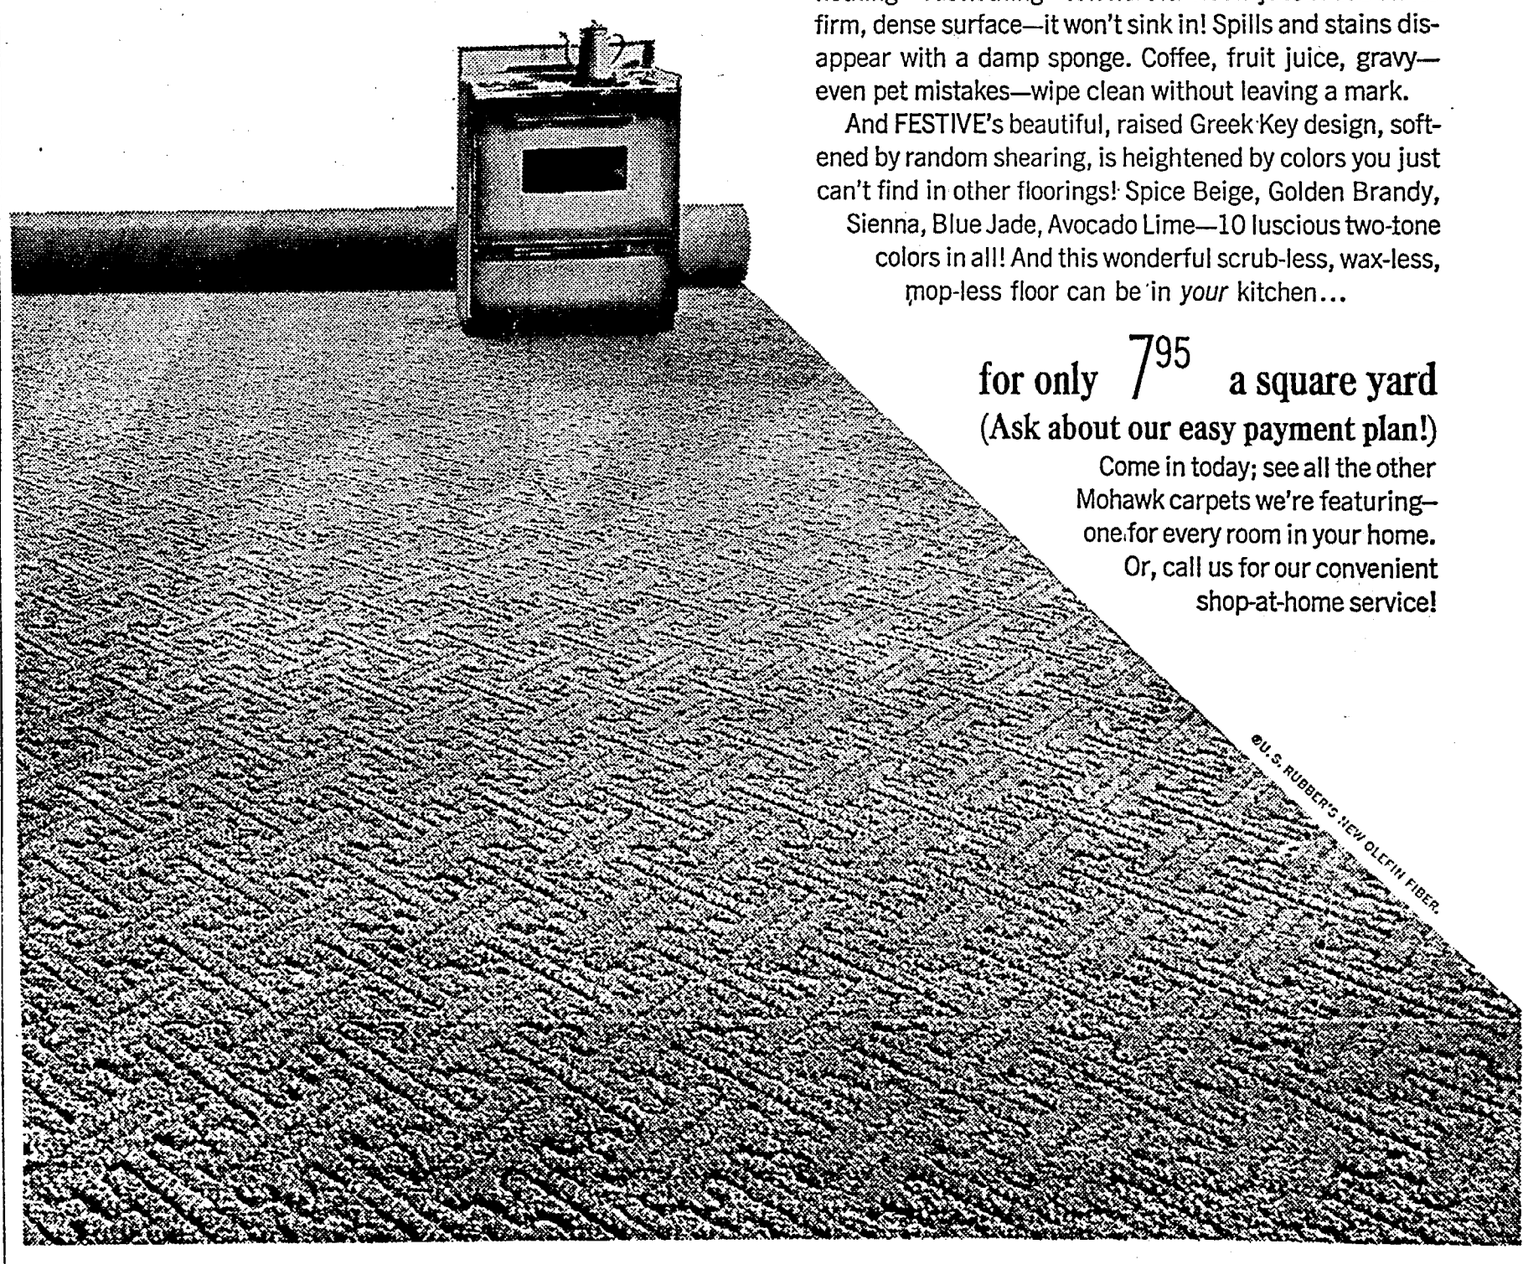

Carpeting in a kitchen? Don't laugh. It's a lot more practical than you might think.

Ask yourself this: is it easier to sweep, wash, scrub, wax and buff a kitchen floor—or just vacuum it? You know the answer. But you also know you can't use any old carpet in the kitchen. What about stains? Spills? Grease? And wearing out in front of the refrigerator? You need a carpet made especially to take all these daily abuses, without looking old before its time.

And let's face it. What about your feet? You walk about nine miles a day in your kitchen. Wouldn't you rather do it on a nice, soft carpet—like this one?

It's Mohawk's FESTIVE...made of 100% Polycrest® continuous filament olefin fiber! It's so moisture-resistant that nothing—but nothing—can hurt it! Water just beads on its firm, dense surface—it won't sink in! Spills and stains disappear with a damp sponge. Coffee, fruit juice, gravy—even pet mistakes—wipe clean without leaving a mark.

And FESTIVE's beautiful, raised Greek Key design, softened by random shearing, is heightened by colors you just can't find in other floorings! Spice Beige, Golden Brandy, Sienna, Blue Jade, Avocado Lime—10 luscious two-tone colors in all! And this wonderful scrub-less, wax-less, mop-less floor can be in *your* kitchen...

for only 7.95 a square yard

(Ask about our easy payment plan!)

Come in today; see all the other Mohawk carpets we're featuring—one for every room in your home. Or, call us for our convenient shop-at-home service!

## Investigations Underway for Several Years

# TFX Controversy Called 'Blunder' by McClellan

By BEM PRICE

WASHINGTON (AP) — Defense Secretary Robert S. McNamara said he wanted a single fighter aircraft of great dependability at the lowest possible cost for joint use by the Navy and Air Force.

What McNamara ultimately got was four aircraft and speculation by Sen. John L. McClellan, D-Ark., that maybe he had committed "a reckless, $5-billion blunder."

Each of the four aircraft is a distinct version of the variable wing, TFX — tactical fighter, experimental — now called the F111.

To explore the possibility of a costly blunder, the Senate Permanent Investigations subcommittee, headed by McClellan, is preparing to reopen the TFX hearings which were recessed Nov. 20, 1963.

Under present plans, the subcommittee's hearings probably will be resumed in January or February although there may be one brief session this fall to receive a TFX progress report from the Pentagon.

### Crux of Dispute

The crux of the dispute is this:

Did McNamara force a second best aircraft on the Navy and Air Force in an attempt to save $1 billion?

Was the selection of the design submitted by General Dynamics of Fort Worth, Tex., over the one proposed by the Boeing Co., of Seattle inspired by either politics or favoritism? Or both?

Now, nearly three years later, only one thing is clear:

General Dynamics and its principal subcontractor, Grumman Aircraft Engineering Corp., of Bethpage, N.Y., have, so far, failed to develop an aircraft acceptable to the Navy.

Sen. Richard B. Russell, D-Ga., chairman of the Senate Armed Services Committee, told McClellan on the Senate floor in August:

"The Navy stated it could not use the plane in its present configuration and size."

At this point, McClellan raised the possibility of a blunder.

McClellan said he wanted to know — and said the country needed to know — whether the performance of the TFX as a weapons system was being sacrificed just to achieve an aircraft for use by the Navy and Air Force.

The Marine Corps, a part of the naval establishment, has already told Congress, the F111 is unsuitable for its purposes.

McClellan said he also wanted to know the terms of the contract for the sale of 50 of the F111s to the United Kingdom plus 24 to Australia. The ultimate "buy" is reportedly around 574 for both nations.

### Touchy Elsewhere

The whole subject of the F111 is a touchy one in Great Britain and Australia. The present British purchase order totals $840 million for 50 planes, including spare parts and spare engines.

In buying the F111 as a strike aircraft, the British abandoned development of their own fighter-bomber, the TSR 2, a fact which brought a chorus of protests.

McNamara told Congress in 1963 he had set out to acquire "an advanced fighter, offering substantial performance advantages over the previous models."

"It seemed clear to me," he explained, "that my second and third objectives, maximizing the dependability and minimizing the cost, could be best accomplished if the Air Force and Navy were to utilize the same aircraft."

As matters now stand, McNamara's single TFX fighter concept has expanded to development of four aircraft. They are:

F111A — an Air Force fighterbomber capable of exceeding 1,500 miles an hour at 60,000 feet.

F111B — a Navy interceptor with performance characteristics similar to F111A, but with a shorter nose and "high lift" wings three feet longer. It must be operable from carriers.

FB111 — A strategic bomber whch is essentially an F111A with Navy wings and a "stretched" fuselage to give it more fuel capacity.

RF111 — A high speed, high flying version of the F111A for reconnaissance missions.

General Dynamics has a contract to build 16 prototypes of the F111 for the Air Force, while Grumman is to build five for Navy consideration.

Originally, General Dynamics proposed to build 1,700 of the F111s for $5.5 billion, whereas Boeing proposed to build a like number for $5.4 billion.

### Must Go Back

To understand the controversy, it is essential to go back to the 1963 hearings which began Feb. 26 and recessed Nov. 20. The hearings developed 2,740 pages of testimony.

The McClellan subcommittee heard testimony that four times a source selection board had accepted the evaluation work of a 235-man team of military and civilian aviation experts. These experts had assigned operation superiority to the Boeing design each time.

Four times, the subcommittee was told, McNamara ordered a re-evaluation of the findings, an act which the subcommittee heard was without precedent in the Pentagon's history.

On the fourth go-round, and after both General Dynamics and Boeing had submitted revised designs, the evaluators concluded there was little to choose from although Boeing still was assigned a slight operational superiority.

General Dynamics was rated as superior in managerial techniques.

In explaining his decision, McNamara said the General Dynamics design was more conventional than Boeing's; that Boeing's cost estimates were "unrealistic"; that Boeing in trying to meet the Navy's weight requirements (50,000 pounds fully fueled and armed) was, in truth, offering two planes, whereas he thought he could save $1 billion by adhering to the one plane concept.

The subcommittee asked Joseph L. Campbell, then comptroller general, to ascertain from McNamara just how he arrived at the estimated $1 billion savings figure. What were the basic calculations?

### Testimony

Campbell then testified:

"McNamara went back to the beginning to give us the whole story of the whole philosophy and the planning. When it came time to examine the records he stated that he had the figures in his head, indicating to us he did not have them on paper."

To clarify the differences in performance offered by General Dynamics and Boeing, the committee prepared a chart, the accuracy of which was attested to by Air Force Col. Roy A. Jaynes, weapons system staff officer for the F111TFX.

For security reasons an "X factor" common denominator was assigned to each aircraft.

The chart showed:

In relation to the General Dynamics' design, the ferry range of the Boeing plane was "X" plus 1,276 miles.

Boeing's proposed plane could carry 69 per cent more bombs with the wings fully extended; 11 per cent more with the wings swept back a full 72.5 degrees.

Boeing's plane could carry 50 per cent more nuclear bombs; 100 per cent more air-to-air missiles.

Boeing's plane for the Navy weighed 2,208 pounds less than General Dynamic's.

Further, Boeing's design afforded the Navy model an ability to "loiter" on combat air patrol 5½ times longer than General Dynamics.

General Dynamics' was rated superior in size, a fact which would enable the Navy to carry five more aboard a carrier than the plane proposed by Boeing.

A memorandum, dated Nov. 21, 1962, justifying the selection of General Dynamics, was introduced into the hearings. It was signed by McNamara, Navy Secretary Fred North and Air Force Secretary Eugene M. Zuckert.

It read: "Inasmuch as either of the proposed aircraft can perform the mission required by both services and the evaluation of the proposals provide no overriding margin between the competitors, it is necessary to consider other factors.

### First Factor

"The first of these is the degree of commonness. On a reasonably comparable basis, 85 per cent of the parts in the General Dynamics version are identical, contrasted with 60 per cent in the Boeing versions. Boeing is, in effect, proposing two different aircraft."

In his one and only brief personal appearance before the committee, McNamara asserted that at the decision-making level in the Pentagon "we desire that there be no influence whatsoever of self-interest. To the best of my knowledge there is none."

McNamara told the committee in response to questons, there was absolutely no connection between the selection of General Dynamics and the fact that the then vice president, Lyndon B. Johnson, came from Texas.

The defense chief said that in his opinion there were three areas in which he thought he might be questioned — political influence, financial self-interest and "ignorance, stupidity or poor judgment."

Since he had denied political interference and made public a record of all his financial holdings, McNamara said, that left only the third category and he had made the General Dynamics decision on the basis of what he thought best for the nation.

Since the committee has yet to issue a report, conclusions on the subject of politics and possible influence have been left hanging.

All of this was nearly three years ago. General Dynamics has turned out 14 of the proposed 16 prototypes for the Air Force, while Grumman has built four for the Navy.

Both General Dynamics and sources say this figure is down Grumman still have myriad technical problems to solve, not the least of which is still the weight of the Navy version of the FIII.

### Matter of Cost

Then there is the matter of cost.

The General Dynamics contract for prototype production was $571 million. As of last June 30, the Air Force alone had obligated $882 million to the F111A, while Navy costs were above $210 million. The Navy originally contemplated spending $84 million on its version.

Pentagon sources report the unit cost of the F111A is now above $6 million, while the unit costs of the F111B are between $8 and $9 million.

The pentagon said by way of change orders to improve the capability account for 85 to 90 per cent of the total increased cost of developing the F111."

The unit cost projected in the 1963 hearing was $2.9 million.

Whereas the Defense Department once proposed buying 1,700 of the FII's Pentagon to slightly under 1,000.

To buy 800 of the FIIIA's and 150 of the FIIB's at the current unit price would cost about $5.4 billion—without spare parts or engines.

If the Pentagon bought 1,700 as originally planned, including 450 F111B's, the cost would be around $11.1 billion - again without spares.

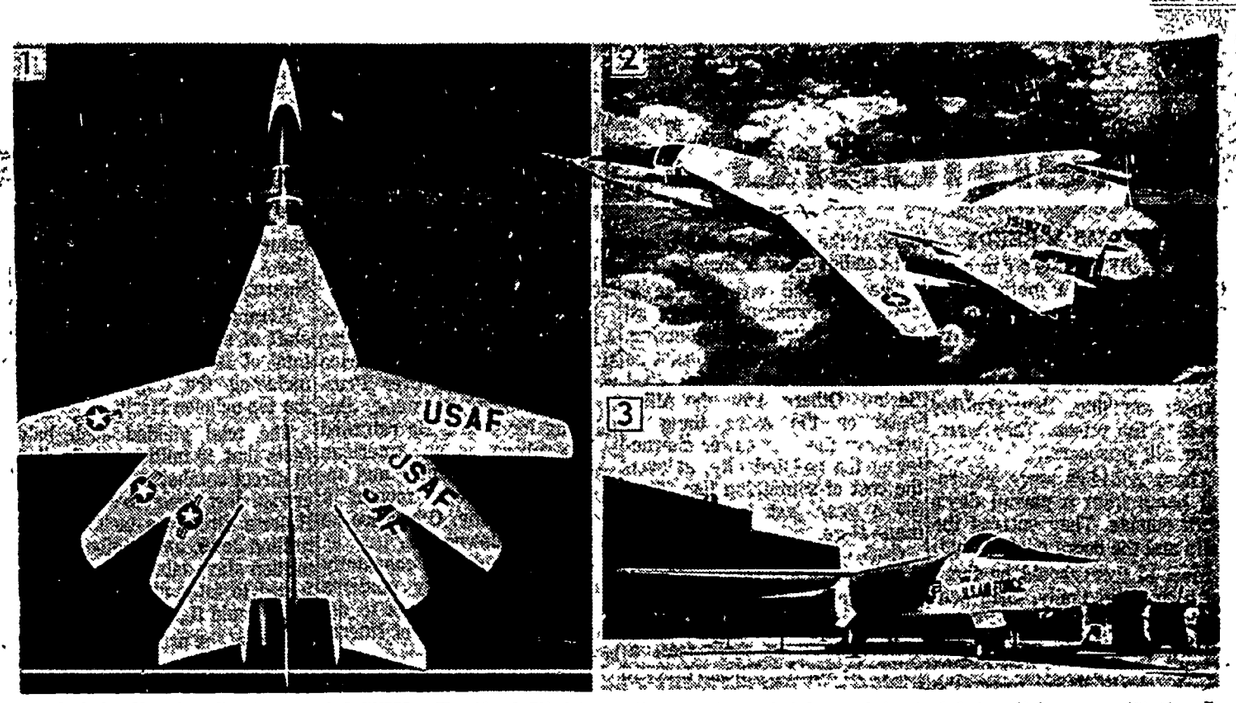

The Navy is to make a final evaluation of the F111B sometime in March or April.

With reports circulating that the Pentagon was prepared to buy 475 of the FIIIA's and 25 of the F111B's in the near future, McClellan offered an amendment to the defense appropriations measure which forbids the Pentagon from using unexpended funds to buy production models of the F111B.

It was adopted.

McClellan told the Senate: "I don't think the Navy wants the airplane."

The end of the controversy is not yet in sight.

Originally the Controversial TFX—Tactical Fighter, Experimental—came off the drawing boards about three years ago. Here (1) is the Defense Department's recently-released drawing of the plane, showing the movable-wing positions. Assembly of the first test model is anticipated later this year; (2) the F111B is the Navy's version which was flight-tested in May of this year, and (3) the F-111, which is the U.S. Air Force's version of the "TFX" (APN Photo)

## Third Time in as Many Years

# State Medical Education Services Studied Again

BY TIM WYNGAARD
Post-Crescent Madison Bureau

MADISON — For the third time in as many years, major studies are being started of Wisconsin medical education services and needs for the future.

And the studies are going to have to face up to the problems caused by the previous two studies, as well as to the pressing needs for a review of state medical services and training capabilities.

One study is being undertaken under the broad powers of the State Building Commission, and is being conducted by a team of staff analysts of the state Coordinating Commission for Higher Education and the bureau of management of the state Department of Administration.

At the same time, a team of researchers from the University of Wisconsin is starting — before the Building Commission study is begun — a study for the University on that

Angus Rothwell

system's aspects of the problems confronting the Building Commission, which is charged with appropriating funds for the construction of state facilities.

### All Aspects

The new Commission study will examine all aspects of medical education in Wisconsin, and the medical facilities that presently serve that educational function and possible additional facilities needed to adequately advance medical education.

Covered will be a proposed plan for $30 million in additions to the present state general hospital on the Madison campus of the University, the proposed shifting of that huge medical complex over a mile across the campus to a large tract available and near the Veterans' Administration hospital, and the possible construction of a medical educational facility at the Milwaukee branch of the UW.

Included will be a searching look at private medical education facilities in the state, including the state's only dental school at Marquette University in Milwaukee. Trends in future medical education will also be examined.

Purpose of the study is to determine what, if anything, is needed for the accelerated training of future doctors and other medical technicians in the state, to meet the increased demands of a rising state population of a changing make-up and of increased standards of medical attention.

"It takes seven years to train a doctor," says CCHE executive director Angus Rothwell, "so we have to look quite a way into the future in a study of this sort."

### Unfinished

The demand for the study has grown out of a $30 million bit of unfinished business that has been confronting the Building Commission ever since conflicting reports on the proposed development of the UW hospital were filed with it.

The primary report was made by a special Legislative Council study committee which spent eleven months studying the problem in 1963 and 1964.

Headed by state Senator William Draheim (R-Neenah) and Assemblyman George Molinaro (D-Kenosha), the committee reported after an extensive study that a six year $30 million dollar building program was needed for the University Hospital. The first two year phase of the program, duly included in the 1965-67 building program, was pegged at $9 million.

But another study, conducted by the UW in an effort to prepare for the onslaught of the additional building funds and the facilities that were to be constructed, was made by a private planner hired for the occasion.

The planner reported back that instead of packing more buildings into the confined area near the central campus where little open ground now remains, the University would have to pick up its hospital center and the medical education facilities that it contains and move them to the west end of the campus. The report came as a surprise, as the Legislative researchers had not been consulted.

A great amount of open space is available in that area, and as an added benefit, the veterans' hospital, with

William Draheim

George Molinaro

out that between the present site of the state hospital and the proposed location are the research, office and teaching buildings of the biological and biochemical sciences, which are intimately associated with the new medicine being taught in modern hospital schools.

Who is to say how large the campus of the future is to be, university officials ask. Perhaps it would be feasible to operate the medical campus along the length of that mile long sinew of buildings, with the two medical complexes dangling from each end.

But that suggestion leaves many unanswered questions for the Building Commission, and the state officials know it. It leaves a serious doubt that the total program cost could be held to $30 million, for medical buildings are notoriously expensive to construct and equip. If the entire school and hospital are to be moved, it is necessary to consider carefully whether the entire cost could — especially after two years delay — be met with $30 million.

If the medical complex is to be operated in two segments, the $30 million price tag might be met, but other costs of possible efficiency and economy losses must be considered. And if the medical complex is moved, the costs of remodeling or removing the present medical buildings would be considerable and must be considered as additional to the $30 million, Rothwell points out.

### High Price

With the Draheim-Molinaro study, the state went into the program expecting a high price tag. State officials thought that they had met it and were on their way to a vast improvement of medical facilities and improved and expanded education with the allocation of the additional funds — more than the budgets of some entire state agencies.

But the special UW report took them by surprise.

"It left quite a few people red in the face," a state official says.

The state is, therefore, going back over the original ground covered three years ago. The study is technically being conducted by a subcommittee of the Building Commission, but actually by a select team of state analysts.

Some competition between the state squad and the UW team is to be expected, if the difference of the reports of two years ago are any measure. The UW got the jump on the state analysts by approving the study and the assignment of the medical school staff researchers at its last Regents meeting, while official Building Commission approval has yet to be given.

But the state study will probably be more comprehensive, and in that respect, will probably carry more weight. It will have the results of a special study of nursing in the state to work with. That study is being conducted by the State Department of Nursing, with a task force headed, coincidentally, by a CCHE assistant director. And the Building Commission study will have a broader representation, being made up of members of the CCHE staff, the bureau of management and the Department of Resource Development.

An early task of the state team will be to identify the UW's role in the future of state medical education, and therefore, its building needs But it will go far beyond that.

### Study Nursing

"We are going to study nursing needs," Rothwell said. "And we are going to look at that proposed medical school in Milwaukee. We cannot do that without studying the needs of the doctors of the state, and the needs of the medical school in Madison. The proposed move of that school will have to be looked into, as will the supply of doctors that Marquette is producing.

"This whole thing is tied together, so we will have to look at the needs of practical nursing, registered nursing and the technical school production of nurses as well. So we will be looking at the private school production of medical workers, too."

Meanwhile, the $9 million included in this biennium's building program has not been touched, and is not soon going to be.

## German-Born Paratrooper

# Richter Is Hardened Vet

By HENRI HUET

BIEN HOA, South Viet Nam (AP) — Rudiger Richter is a tough young member of the crack U.S. 173rd Airborne Brigade.

What does he think is the toughest military outfit in the world?

The French Foreign Legion, naturally.

Richter comes by the opinion through hard experience.

For him, the road to Viet Nam began when his family fled the Russian army's World War II advance into Berlin. As a youth in postwar Germany, Richter joined the Foreign Legion at the age of 16 by shifting his birthday back a bit.

### Great Unit

"It was a great unit and I am proud to have served in it," Richter reminisces in the Vietnamese jungles with his new comrades.

For seven years, Richter fought in Algeria with the Legion's famed "Regiment Etrangere Parachutist," the crack 1st Paratroop Regiment which ended its career by taking on Charles de Gaulle.

That was during the final turmoil of the Algerian rebellion when many Legionnaires supported the series of anti-De Gaulle outbreaks. As a result, the proud 1st Regiment was broken up and Richter finished his days in Algeria at headquarters in Sidi bel Abbes before that, too, was lost to the Legion.

After seven years of fighting in Algeria, Rudi Richter went back to Germany as a seasoned veteran of 23 with nothing particular to do. Living in Berlin with his mother, he accepted the sponsorship of an uncle and went to the United States. His family had scattered — his brother went to France, one sister went to Sweden and the other to America.

"When I saw how people were living, I wanted to stay and decided to become an American citizen," Richter said.

"I didn't plan to join the Army again, not after seven years in the Legion, but since I planned to become a citizen I couldn't very well object when I was drafted," Richter said.

With his background as a paratrooper, Richter was a natural for the airborne and wound up with the 4th Battalion of the 173rd Brigade, arriving in Viet Nam about four months ago.

"The United States takes far better care of its men than the Legion did," Richter said, "but in geenral the Legionnaires were tougher. They were all volunteers."

### Trained Fighter

Counting his Legion experience, Richter is a trained fighter in the desert, the mountains and the jungle. He has been trained as an underwater demolition expert. He has made five combat jumps and has been decorated three times.

"I figure I will be able to do a job here," Richter said. "Anyway, I always wanted to travel."

Rudiger Richter — Experienced Fighter

## Let's Have a Strike Law Now

It was predictable that, as the public inconvenience from the machinists strike against five national airlines began to fade in memories and as the November congressional elections came closer, talk in Congress of measures to protect the public interest in labor disputes would fade away.

"The President earlier this session admitted the need for such legislation but has never gotten around to send a recommendation to Congress. The President's Congress refuses to act on its own. Both the unions and big management exert their tremendous power against any action they fear will harm their interests." reports Rep. John Byrnes of the Eighth District in an August newsletter.

Byrnes advocates that Congress "ought to begin now the search for a solution which, while protecting both unions and management, will put the public interest first."

The Byrnes plea will fall on deaf ears as congressmen go about the business of trying to get re-elected. Another shutdown of a public service industry will come, and there will be more rapidly-drafted bills paraded before Congress in hopes of forcing settlements. Byrnes is correct in his contention that the nation wants a careful examination of the difficult subject and a resulting bill protecting the public interest undertaken during a time when there is no crisis.

## County Juvenile Detention Facilities

Construction now in progress and that considered necessary in the next biennium in Wisconsin for new correctional institutions for juvenile offenders will total more than $33 millions. In addition to a boys' school now being built in Lincoln County, the State Welfare Department is proposing another such boys' school in southern Wisconsin and a school for delinquent girls in the southeastern part of the state. They are considered absolutely necessary to meet anticipated institutional populations of the 1970's.

State corrections officials remind the public and the legislature that they have absolutely no control over the number of youths in such institutions. They are required by law to receive and house all persons committed by the courts.

The only control the Welfare Department has on populations is the length of time the boys or girls are kept in the institution And because of the population pressure on present boys' schools pending completion of the Lincoln County institution, the average stay at Wales and Kettle Moraine is now between three and four months. This is proving totally inadequate, with the result that a majority of the boys entering the schools are repeaters. Some years ago when the average stay was nine months the percentage of repeaters was much lower.

There is only one other approach to the problem currently being studied. Director Wilbur Schmidt has suggested that state aids to counties for the construction of juvenile detention facilities at the county level might prove to be a better program in the long run. Not only would it lessen the need for costly state institutions, but rehabilitation treatment started at the local level might be more successful than waiting until a juvenile delinquent has become such a serious problem that confinement to a state institution is the only choice.

The state has had a long-standing policy of aiding local welfare programs, but has never granted aid for the construction of buildings necessary to house such projects. Despite constant prodding from the state, counties generally have not inaugurated programs of any consequence for the treatment of juvenile delinquents under confinement. As a matter of fact county facilities for merely the temporary confinement of juveniles are grossly inadequate with a few exceptions. Schmidt feels that state aids may be necessary to encourage counties to build such facilities.

The suggestion for such a program was made initially by the State Committee on Improved Expenditure Management, headed by W. R. Kellett of Menasha. It has also received considerable attention from a special committee appointed by the legislature to review the State Children's Code which governs the handling of juvenile offenders.

Many juvenile court judges will commit a juvenile delinquent to a state institution only as a last resort. The over-population of present institutions is also a factor in that decision. A rehabilitation program available in the local community with which the judge could maintain close contact might be one of the best weapons available to us to combat the growing number of youngsters who become serious problems for the state.

## How Many Shots Make a Drinking Driver?

Investigations of accidents in Wisconsin have shown that the majority of those involving fatalities have had at least one driver under the influence of alcohol. But recent studies on the effects of alcohol on the brain indicate that the percentage may be much higher than most of us realize.

Dr. Herbert Moskowitz of the University of California's Neuropsychiatric Institute has been conducting research on the effect of only a small amount of alcohol on individual's brains and their reactions. While he found that small amounts of alcohol — about four ounces or two drinks of vodka for the average size man — seemed not to impair his vision, hearing or time perception, there was a considerable impact upon the brain's ability to do more than one thing.

The experiments on the brain's ability to handle information were conducted through the use of earphones. The subjects were told to identify a tone hidden in noise coming through one earphone while ignoring numbers being read over the other earphone at the same time. Alcohol made no apparent difference in this test. But when the subjects were asked to identify the tone while repeating the numbers, the two shots of vodka noticeably reduced their ability to do so. Since intoxication is legally recognized as approximately that after four two ounce drinks in rapid succession, the brain has been affected long before this level is reached.

Dr. Moskowitz pointed out that driving an automobile well requires the ability to do many things at one time and, in the cases of oncoming cars, pedestrians and sudden emergencies, not all the things have been automatically learned. While legally sober and apparently not at all under the influence of alcohol, a driver may be a potential hazard.

## What Profit the Student?

Gaining an education often has been called a privilege and an opportunity. Administrators are reminding students again in these first weeks of school that not everyone is able to obtain the advantages of a high school or college education, and thus studying under competent teachers and in a democratically-oriented school system is a privilege. Teachers do not have to emphasize the fact that advances in technology and communication have made education an opportunity for the capable person to be equipped for gaining his niche in the world.

But education should also be looked upon as a form of excitement.

If education is simply something a person obtains because he is expected to, or needs to obtain a well-paying job, or doesn t wish the derogatory title of "dropout," he is gaining education for the wrong reason. Until a person is so challenged and stimulated by a subject that his curiosity enables it to become a type of academic "fun," his studies may be a bore and a necessity through which he merely plods dutifully.

This fact has been recognized by educators and administrators. But a corollary needs to be added to this maxim. The student must be involved in creating this excitement through a curious mind as much as the instructor does through an interesting presentation. The student who waits to be challenged, without preparing for his class, without coming into the course with an open mind about the subject matter and the instructor, is in for disappointment. Without an investment, there will be no return.

In the field of education and its preparing of young men and women for their places in society, the stakes are rising higher. The amount of profit which will be netted depends on each individual. The choice is up to the student.

## There's Reason Liberal GOP Has No Leader

Editor, Post-Crescent:

Your editorial of September 7th on "How Will G.O.P. Look In 1968?" is one more of your continuing tirades against the party that brought forth over 27 million votes in 1964 despite a flood of vicious accusations proclaimed by the liberals to which propaganda you succumbed by declaring for Johnson-Humphrey.

Following your announcement for the liberals you have published some 35 editorials criticizing, mind you, the very liberal Johnson-Humphrey organization you proclaimed so proudly in 1964.

In your September 7th editorial, you bemoan the fact that the so-called moderates are losing ground although you admit, as does the Council of Republican Organizations, that the so-called moderates do not have a leader! Do you not realize why a leader fails to appear? The truth is becoming crystal clear for all to see that the Johnson-Humphrey - Kennedy policies are a failure.

Who then will the mass of voters turn to? Will it be a so-called me-too moderate? What truly do you think? Furthermore the policies of the liberals are creating the type of leader the country is fast beginning to long for. Thus the opposition party is building on a strong, sensible, sane spending platform and from like-minded people will emerge a leader that the masses can turn to when the liberal bubble inevitably busts. Maybe before!

Paper Tiger

Kraft Writes

## Best Things for Viet Nam Would Be More Elections at Every Level

BY JOSEPH KRAFT

WASHI NGTON — The South Vietnamese election is an event full of hope — but not in the crude way imagined by those who see it merely as an endorsement of American policy and a defeat for the Communists.

On the contrary, it is an event full of hope because it demonstrates that, despite the crushing overemphasis on military things by the governments and armies of Washington and Saigon, there remains in South Viet Nam a spark of indigenous political life. And this spark, far from sanctioning past action, traces a prescription for the future.

Kraft

The prescription is not for more of the same — more emphasis on military action in North Viet Nam or the central highlands or the delta. The prescription is for more emphasis on political action

What South Viet Nam needs are elections galore — local, provincial, national. If possible a referendum or two might be thrown in. What is required is a series of forced choices that can precipitate out of a public opinion, still fragmented and formless, support for a government able to play a meaningful role in negotiations for peace.

NO PLEBISCITE

To grasp that difficult point it is first necessary to demolish the widespread myth that the elections were a plebiscite — a free and final choice between good and evil or communism and democracy, fixing destines for years to come. In fact, they were a test of the reach of the Saigon government, its ability to get out the vote.

And nothing shows it better than the striking paradox that arises from a close consideration of the statistics of voter-participation. For the fact is that the biggest turnous came in places cool to the government while the lowest participation occurred in places of little opposition.

Consider, for example, the case of the northern part of the country, which is administratively under Army Corps I. It is a center of hostility to the Ky government and includes the towns of Hue and Da Nang, which rose in revolt only last spring.

For precisely that reason the 1ST Corps Area is also the scene of the heaviest and most effective concentration of government troops. And this troop concentration, not enmity to the government, found expression in the voting. For with 87.2 per cent of the registered voters going to the polls, the 1ST Corps Area led the rest of the country in voter participation.

Conversely, consider the case in Saigon. It has not been a particularly active theater of opposition to the government. Moreover, because it is a major city, it is not susceptible to detailed military control. And that fact, too, found expression in voter-participation. Saigon, with 66.5 per cent of the registered voters going to the polls, was the place of lowest participation in the country.

What this says to me is that the popular will in South Viet Nam remains an unknown. It exists. And that, to me, is the great surprise of the election. But it is curtailed, broken, repressed by the military presence.

SCHOOL FOR VOTERS

The opportunity ahead is to open the door for a breakout of public opinion. And the way to do this is to develop voters, candidates and parties with confidence to express their views on meaningful issues. That confidence can come from participation in the electoral process. And that is why it would be a happy matter if the constituent assembly prepared a constitution that requires a series of futher votes — approving the basic law, then elected new officials on many different levels across the country.

The more so as the electoral process represents the truly effective instrument for dealing with the Viet Cong rebels. By boycotting the elections last week in a visible way, the Viet Cong opened itself to a visible defeat — a showing that it had nothing like a majority of the country.

With each successive election, the Viet Cong will be under steadily increasing pressure to enter the lists. The cracking that has not been achieved by military means can be achieved by continually holding out the possibility of participation in the political process. And that is how there could be developed a government that could make a contribution toward peace — a government that could eventually negotiate with the other side.

## Mason, Winnebago Real Traffic Problem

Edior, Post-Crescent:

It is Wednesday morning — 7:33. I haven't even had my breakfast yet. I have just returned from the frustrating tast of taking ny high-schooler and her friends to AHSW. I have been doing this off and on for the last six years. I have two more years to go When is the city going to get a traffic control or some police direction on the corner of Mason and Winnebago Streets?

On a windy, rainy morning like this, it is even harder to negotiate that intersection than on any ordinary morning and that is hard enough. I like to get my passengers as close to the entrance as possible — you know these girls and their hair — so this means I am headed east on Winnebago Street. You get to the corner and the cars begin to pile up behind you and some who can't see what is coming from the north or south begin to get impatient and honk their horns, and it really becomes embarrassing when you can't take your life in your hands and dash across or make a left turn onto Mason.

Another observation on traffic conditions — this one in the interest of safety. On the northeast corner of Glendale Ave. and Richmond St., there is a resident who has a clump of shrubbery on the corner of his lot which obscures the vision of the driver who is stopped at the stop sign, waiting to make a left turn onto Richmond. I know that the limit of height on shrubbery is 36 inches but when even this height keeps the driver from seeing what is coming (from the north in this instance) I do think something should be done about it. This condition necessitates the left-turning driver's pulling up across the crosswalk, which is not only against traffic regulations but impedes drivers who wish to turn left off Richmond onto Glendale. I wrote a letter to the resident of this home suggesting, that in the interest of safety, he trim this shrubbery enough to allow clear vision, and I sent a carbon copy to the Public Safety Committee of the council, but nothing ever came of it. It is all very well to talk about traffic safety, but we also have to do something about it!

## Cat Safe Thanks to Power Co.

Editor, Post-Crescent:

We have just had an experience that probably won't mean much to some people, but to any one that has ever owned a pet I'm sure they will know what I mean.

Our cat got caught up on a power pole and for two days he couldn't get down. We called the Fire Dept , but they told us he would come down when he got hungry and they refused to come and get him down. I guess paying taxes doesn't cover helping an animal in trouble. We then called the Power Co. and in the hour there were two men at our place and they brought our cat down. I was too excited and I didn't get their names but I want both of them to know just how much what they did was appreciated

It may have been just a cat to the firemen but to us it was our pet and to see him up on that pole unable to get down bothered us and our neighbors. We wish to thank the two men from the Power Co. and let them know just how much we all appreciate them taking the time out to help our pet

## Calendar Is Wrong, Fall Really Starts Day After Labor Day

BY JOHN TORINUS

My old friend Herb Bomaleski of what is now fancifully termed the United States Environmental Services Weather Bureau will dispute this, but Fall arrives in Wisconsin on the Tuesday after Labor Day, and not on Sept. 23 as the calendar has for years indicated. Labor Day is the official end of Summer, and Fall starts immediately the next day.

Torinus

It is the only seasonal change of the year which is so distinctly delineated. Winter creeps upon us gradually; in fact there's no real telling when late Fall has ended and Winter has begun. That first wave of zero weather, that first snow storm can come as early as early November or as late as January. And waiting for Winter to turn to Spring, or Spring to turn to Summer, is often a frustrating experience in our state.

But on Labor Day the accoutrements of Summer are put away. The boat is hauled in, swim suits go into mothballs and for most fishermen the rod and reel might as well be packed away too.

Next morning all is commotion as the children go back to school, Mother has to climb out of bed in time to get breakfast for a change, and Dad goes back to work with a new spirit of purpose guaranteed to last at least a week. All those projects which have been put off "for the Summer" suddenly demand doing.

This isn't to say that there isn't more beautiful weather in store in September and October. In fact it is another rule that while Labor Day weekend may often be cold and dreary, it turns warm or even hot as soon as the children are back in school. But the psychology is entirely different. A beautiful sunshiny day in the Fall one counts as a blessing, an extra dividend so to speak. In Summer such a day is taken as a matter of right. And whereas in Summer you will play hooky and get out to the golf course or your favorite lake without even a twinge of conscience, when that beautiful Fall day comes along you are more apt to look out the office window and console yourself by cursing that it's "too nice a day to be working."

Those miserable days are taken more in stride, like last Wednesday morning when the temperature suddenly began to drop after sunrise instead of rise, when the wind swung all the way from southeast to northwest and cold rain came pelting down. "Guess we've got to expect this kind of weather in Fall," we casually remark.

★ ★ ★

But there is so much of glory and excitement in Fall in Wisconsin that I at least am never sorry to see Summer go. There's the Packer game on Sundays, and it's always a special kind of Sunday morning when you start revving up for the afternoon game.

And there's the hunting season approaching with all the itches which accompany it. The ducks and geese start moving in, and grouse and pheasants start visiting along the roadways. And September isn't too early to start visiting that deer camp and getting in the firewood.

Some of the maples are already indicating a Fall of brilliant woodland color. The sumac is turning also, and there's nothing like that first crispy crunchy morning to make a fellow inhale a deep breath, suck in his belly and throw out his chest and tell himself that it's great to be alive.

★ ★ ★

When I remarked that Herb Bomaleski was an old friend I should explain that for a number of years as a cub reporter I covered the weather bureau beat, and during this time I developed some of my own theories about weather trends and conditions which didn't exactly jibe with Herb's scientific principles.

I can remember when Herb came to the Green Bay station to replace retired Fred Cone, and everyone felt sorry for Herb because the Green Bay station was regarded in the service as one of the toughest in the nation. Weather in this area is subject to a number of competing patterns, and even predicting conditions 24 hours in advance in those earlier days was a real hazard.

The weather bureau in those days was housed in one rather small office room in the Minahan Building, with a few instruments mounted on the roof which Herb would have to go up and read a number of times a day. He was a one-man staff at that time.

It's quite a contrast to the installation today out at Austin Straubel field, which occupies an entire upper floor of the old terminal building and with complicated gadgets of many descriptions mounted all over the place, all of them recording their data conveniently within the building.

I called up Herb while writing this column to refresh my memory on details, but you don't get to talk directly to the weatherman any more. When the number rings an automatic answering service takes over and reads you a complete and detailed weather report, including wind conditions on the large lakes in the area.

And now that I've become a nut on sailing and watch the forecasts intently every weekend, matching them with the actual conditions which develop, I will have to say that Herb is doing a little better now on his predictions. All the gadgetry of the Environmental Services have helped.

But Herb has to make one more change before I'll be completely satisfied. Fall does start the day after Labor Day.

## Are Ear Plugs Only Cure For Vroom of Motorbikes?

Editor, Post-Crescent:

For years I have enjoyed the luxury of a Saturday or Sunday afternoon nap. That was before the motor-bike became so popular. Now we just barely reach the sound sleep stage when VROOM — We sit bolt upright on the daybed wondering where the tornado hit. When once again VROOM. The rider has reached the corner and is now on his way back. Sometimes this goes on for hours, after all they do get over a hundred miles per gallon of gas.

Now there are quiet bikes, and we would not be allowed to drive that noisy a car, so it would seem to me that some of these kids are either tampering with their mufflers or the bikes were too noisy to begin with.

I think the laws on mufflers should be strictly enforced no matter what the vehicle. It certainly must be tough on mothers trying to keep their little children napping during this type of bedlam. Or maybe they use ear-plugs?

Smuts Made Plea in 1946

# Future of South West Africa Not Resolved 20 Years After Request

BY MAX HARRELSON

UNITED NATIONS, N.Y. (AP) — The erect, slender man with the white goatee was making an eloquent plea to the United Nations for approval of a cherished dream — annexation of a big, neighboring territory.

This, he said, was "as inevitable as was the union of Wales and Scotland with England, of Texas and Louisiana with the American Union, of the territories of eastern Siberia with the great Russian union."

The speaker, clad in his khaki field marshal's uniform, was Jan Christian Smuts, wartime leader of South Africa. The territory he wanted was South West Africa, a League of Nations mandate, and he was speaking at the first session of the U.N. General Assembly in 1946.

Smut and many of the diplomats who heard his plea have long since vanished from the scene, but the future of South West Africa remains unresolved. Along with other African issues, it is expected to dominate the assembly's 21st session opening Tuesday.

### Years of Change

The session will have before it additional questions dating back to that first meeting, but 20 years of change will be reflected in the assembly itself and in its agenda.

When it met for the first time, the assembly had only 51 members. By the end of this year's session, it will have 121. Twenty years ago there was only a handful of Asian and African members. Now they hold a majority of the seats.

Soviet Foreign Minister Andrei A. Gromyko, one of the United Nations founders, once more will head his delegation, as will the veteran Chinese diplomat, Liu Chieh, who took part in the 1946 debate on South West Africa. But John Foster Dulles, Carlos Romulo, Trygve Lie, Senators Tom Connally and Arthur Vandenburg, and Mrs. Vijayalakshmi Pandit have been succeeded by a new generation of diplomats — many from countries not in existence 20 years ago. And the assembly will deal with questions, such as a legal code for outer pace, which would have seemed ridiculous in 1946.

One of the major controversies — the seating of Red China — had not arisen at that time. It came before the assembly for the first time in 1950, a year after the Chinese Communists gained control of the mainland.

There is still no sign that this issue will be resolved, although it will be voted on this fall for the 16th time. The vote last year was 47-47 with 20 abstentions. The United States and some other countries have turned their attention now to keeping Nationalist China in rather than keeping Peking out, but no formula has been found.

The main difficulty is that both Peking and Nationalist China continue to reject the two-Chinas concept — membership for both.

A major part of the 1946 session was devoted to organizational problems, but some of the continuing questions were raised there for the first time. One of these was disarmament. The Soviet Union called for a report on the number of troops stationed on foreign territory. No progress has been made on this or on later demands for withdrawal of such troops which have figured in disarmament debates down through the years.

One of the big debates in 1946 was on a complaint about treatment of persons of Indian origin in South Africa. This foreshadowed the discussions that have rocked the United Nations on South Africa's policy of apartheid or racial segregation, which will be a major issue again this year.

The apartheid issue, coupled with the problem of South West Africa and the conflict over Rhodesia, will be debated at the 21st session of a highly charged atmosphere.

### Enlarge Court

Among other things, the African nations are expected to seek to enlarge the International Court of Justice and to oppose re-election of some judges who refused to allow the court to pass judgment on South Africa's refusal to place South West Africa under U.N. trusteeship.

Two other issues will complicate the work of the session.

One of these is the Viet Nam war, which has aggravated U.S.-Soviet relations and has been reflected in debates on disarmament and U.N. peacekeeping.

The second problem is the announced decision of U Thant not to accept a second term as secretary-general. His first 5-year term expires Nov. 3 and he is under strong pressure to reconsider. Many U.N. diplomats, including U.S. Ambassador Arthur J. Goldberg, feel that negotiations on a new secretary-general at this time are bound to create new U.S.-Soviet differences and increase tensions.

The session is expected to last until the Christmas holiday, or later.

## Douglas Succeeds Late Sen. McNamara as Conference Chairman

WASHINGTON (AP) — The Great Lakes Conference of Senators announced Thursday the election of Sen. Paul Douglas, D-Ill., as its chairman and Sen. Philip A. Hart, D-Mich., as vice chairman.

The group, at a meeting called by Sen. William Proxmire, D-Wis., chose Douglas as a successor to the late Sen. Patrick V. McNamara, D-Mich.

The conference includes senators from Minnesota, Wisconsin, Michigan, Indiana, Illinois and Ohio.

The conference voted to support legislation which would refinance the St. Lawrence Seaway Corp. and keep seaway tolls at their present levels.

## 'Great Outdoors' Better From Distance

GATLINBURG, Tenn. (AP) — Mr. and Mrs. Francis M. Bass Jr., of Nashville, didn't savor the idea of being near growling black bears which tore a car seat and ripped a gash in the Bass tent in the Great Smoky Mountains National Park.

"I think they were hungry," Bass said, as he and his wife headed for a motel.

'Revolution' of 'Confusion'?

# Despite Surface Indications, Argentina Has Little Peace

By ROBERT BERRELLEZ

BUENOS AIRES, Argentina (AP) — On a Sunday afternoon 90,000 people jammed a soccer stadium to see an important match between two local rivals.

Less than a mile away, 56,000 bet 252 million pesos, about $1.2 million, on the day's horse-racing program.

In Cordoba, Argentina's auto-manufacturing center, 1,500 employes of Kaiser Industries consumed a company-subsidized steak-and-vegetable lunch. Each paid the equivalent of 20 cents.

This image of good living, of an unhurried, uncluttered pace in a comfortable setting, is inescapable in Buenos Aires and the country's larger centers.

The last thing Argentina and Argentines evoke is rebellion. They are a peaceful people, highly literate, industrious and probably the best fed on earth.

But it's an incongruous image. For 36 years the country has had little political peace.

At the moment, Argentines are caught up in what has been proclaimed as "national revolution" by the nation's armed forces, and as "organized confusion" by some citizens.

### Latest Incursion

It began June 28 when the military overthrew the Arturo Illia government. This was the military's latest incursion into the country's political life. Military leaders have directly or indirectly controlled Argentine governments for 36 years.

The June coup aroused hardly any dissent.

A hopeful wait-and-see attitude still prevails among most Argentines, amid signs of impatience with the groping, slow pace of a revolution that still lacks definite shape and direction.

Under the circumstances, it's difficult to dispel an impression that things may be different this time, that important changes may be in the making.

Since the ouster of dictator Juan D. Peron in September 1955, the military has faced the problem of what to do with his followers. Up to now the solutions have failed to provide an alternative to Peron. Like a nagging cold that won't go away, this remains a nagging nuisance.

Although sympathizers with Peronism represent only an estimated third of the electorate, the opposing majority has failed to come up with a unifying factor to confront the mysticism that keeps Peronists together notwithstanding internal fissures.

### Had Excuse

The military excuse for overthrowing Illia was corruption and inefficiency. The consensus is that the real reason was Peronism. Having seen fresh samples of Peronist strength, military leaders are said to have reasoned they might as well move against Peronists ahead of the presidential elections three years hence.

There are rumors that internal dissension is responsible for the turtle pace of the military regime. A bigger reason is believed to be lack of a plan of action, a fault produced by the premature launching of the coup.

The military chief and president is Lt. Gen. Juan Carlos Ongania, 52.

The Ongania regime has had to move slowly in part because the path toward solving Argentina's gravest problems seems to lead inevitably to a clash with labor unions. Reorganization of state agencies in order to reduce high operational costs means paring personnel in overstaffed operations such as the national railways where daily losses run to $1 million.

The military governors touched off their most serious opposition to date by suspending university autonomy, features of which gave students a voice in school administrative affairs.

### Remove Agitation

The idea was to root out left-wing extremist agitation.

The result has been some resistance, notably in the interior city of Cordoba, where serious student demonstrations have resulted in repressive measures.

In the past, here and in other Latin-American countries, the experience has been that the use of force by de facto governments has inevitably led to more civilian defiance and violence. The view here is that the military regime will have to resort to force if it intends to remain long in power.

## Site of War Trials Revisited

# Nuernberg Jails 'Lazy Bums' Now

By THOMAS A. REEDY

NUERNBERG, Germany (AP) — It was a motley little crowd of men. The work in the vegetable garden was easy even though the sun was hot.

Not looking old or young or almost anything, they shuffled back to the prison. They were, after all, prisoners.

These nobodies were returning home from a partial day's work outside. They entered the cells and the doors clicked shut.

Most of them would be there for a short time only. Their sentence was to do some work. They were listed as "arbeitscheu". In German, that means "work shy." They were the bums of the neighborhood, the men who refuse to do a day's work — the Bowery bums of West Germany.

"They're fairly harmless but they must be taught to live and work," said the prison director.

The place where they are being "taught" has a significance these men themselves do not fully realize.

They are populating the cells once occupied by Hermann Goering, Joachim von Ribbentrop, Field Marshal Wilhelm Keitel, and the other survivors of Hitler's thousand-year Third Reich which lasted only twelve.

### Simple Jail

The Nuernberg prison where the top Nazis were incarcerated, where some committed suicide, where some won freedom in fact a score of years ago, and where some were hanged, is today a simple German jail.

Across the courtyard is a small building once called a "turner halle" which in English comes out as a gymnasium for gymnastics. It was there that 10 Nazis were hanged 20 years ago on the night of Oct. 16, 1946 — Goering cheated the hangman by committing suicide in his cell.

Now it is a workshop for prisoners. There are lathes and slabs of wood. It is full of junk. Twenty years ago it was stark and empty and a grisly gallows stood at the far wall.

Off to the right is the Palace of Justice where the trial of Hitler's lieutenants was conducted by the Americans, British, French and Russians.

In the 20 years since the historic trials the old courtroom has been completely rebuilt. The public gallery has been removed. A huge crucifix hangs over the judges' bench and that is new. The dock where the remnants of Hitler's empire sat is just about the same and the well where lawyers sat keeps its appearance.

It was here that the four powers elected on Nov. 25, 1945 to try the top Nazis on four counts: crimes against peace, war crimes, conspiracy to wage aggressive war, and crimes against humanity. The verdicts:

### Death Sentences

Death: Goering, the reichsmarshal; Ribbentrop, the foreign minister; Keitel, the chief of the armed forces; Ernst Kaltenbrunner, surviving successor to Heinrich Himmler as head of the Gestapo; Alfred Rosenberg, high priest of Nazi ideology and instigator of the doctrine that "subhumans" in Eastern Europe should be liquidated; Wilhelm Frick, minister of the interior; Hans Frank, governor general of ravaged Poland; Julius Streicher, the Jew-baiter editor of "Der Stuermer"; Fritz Sauckel, boss of slave labor; Arthur Seyss-Inquart, Austrian-born Nazi who was chief of occupied Netherlands; Col. Gen. Alfred Jodl, chief of staff, and Martin Bormann, party chief tried in absentia and never found since.

Life: Rudolf Hess, the deputy Fuehrer who flew to Scotland in May 1941, trying some sort of peace mission which never has been fully understood; Walther Funk, president of the reichsbank which had a special depository for the gold teeth ripped out of the mouths of dying Jews; Ernst Raeder, commander in chief of the navy.

Twenty years: Albert Speer, chief of munitions; Baldur von Schirach, head of the Hitler Youth and gauleiter of Vienna.

Fifteen years: Baron Konstantin von Neurath, former foreign minister, "Reich protector" of occupied Czechoslovakia.

Ten years: Karl Doenitz, U-boat commander and nominated by Hitler as his successor after the Fuehrer committed suicide in the Berlin bunker.

Acquitted: Franz von Papen, former chancellor, ambassador to Vienna and later to Turkey; Hjalmar Schacht, former economics minister and president of the Reichsbank; Karl Fritzsche, radio expert in Paul Joseph Goebbels' Propaganda Ministry.

### Most Dead

They are all dead except for Speer, Von Schirach, Hess and Doenitz. Speer and Von Schirach served their terms in Spandau Prison in Berlin. Hess, the last man in a four-power jail once built for 650 men, is regarded as slightly round the bend at the age of 72 and a logical candidate for a hospital.

The decision on whether to close out Spandau involves all sorts of four-power thinking. Some say the Russians insist on keeping this foot inside West Berlin. Others say the Allies insist on the same thing to preserve the four-power character of the isolated city, at even the cost of something like $200,000 a year just to guard one man—Hess.

Lawyers will argue forever over the validity of a "conquerer's trial" as Goering called it. Germans see it differently from others. Back on their feet, a power in world politics, economics and finance they are prone to find fault with others, apt naturally to forget their own shortcomings and above all eager to forget a shoddy past.

Students and attorneys general throughout West Germany today claim the Allies were too soft in Nuernberg. The reason for this stems from the postwar trials the Germans themselves conducted. There were two Auschwitz trials in Frankfurt, the purpose being to show the truth of that horror camp in Poland where three million people died. Free of Allied influence, free from occupation and free of all other domination, the Germans found themselves that everything about Auschwitz was really true.

This struck them so hard that they have ever since blamed the Allies for not having cleaned up everything in their path and relieving them of such a necessity.

Dr. Robert W. Kempner, once a leading official in the Russian state police who fled to America when Goering took over Prussia, has been pursuing this thinking for years. He returned to Nuernberg as an American war crimes prosecutor and today spends several months a year in Germany. Otherwise he lives in Lansdowne, Pa.

Kempner said he is constantly being importuned by students and by German lawyers to define the lasting effect of Nuernberg.

"It's really not necessary," he said. "Every courtroom in Germany is affected by the Nuernberg decisions. We hear complaints all the time that we were too soft, not energetic enough in Nuernberg. But the Nuernberg decision must give the smaller nations a feeling of security that similar things cannot happen again. Even Nuernberg terms have crept into political language. The American War Department has changed its name to the Defense Department. Now, do not forget that the primary phase in Nuernberg was that of waging aggressive war. No one today wants to be called an aggressor. That goes back to Nuernberg. The Chinese, the Russians, not even the Americans in Viet Nam, want to be called an aggressor. There is the word 'genocide,' the destruction of a race, and that came out of Nuernberg. All these things show the value of Nuernberg."

Kempner was one of an Allied staff of about 1,000 who tried a total of 199 Nazis at Nuernberg including the original trial of the top-echelon Nazis.

The trial yielded such bald facts that 10 million people died in direct combat, 12 million otherwise lost their lives through Hitler's directives including six million Jews, and another seven million slave laborers were subjected to fates not even a computer could figure out.

Most of the principals are gone but one of the things that remains is the legend of Goering.

Of him, Maxwell Fyfe commented: "He was the most formidable witness I ever cross-examined."

Goering's influence began, visibly, when the trial started. The four-power tribunal asked the defendants how they pleaded to the four-count indictment, guilty or not guilty. Goering set the pace by saying: Not guilty in the sense of the indictment."

The others parrotted that.

They went to their executions, all save Goering. He committed suicide 90 minutes before he was to hang, at midnight Oct. 16, 1946.

U.S. M. Sgt. John C. Woods, now dead, was assigned to perform the hangings in the jail's gymnasium, starting at one minute after midnight.

At 10:30 p.m. an American guard found Goering dead from cyanide poison. But the hangings proceeded, later than scheduled.

At 4 a.m. the bodies of the 10 who were hanged plus Goering were rushed out of the prison complex in U.S. Army ambulances. They were taken to Munich, cremated in the city crematorium and the ashes were spread in the Isar River.

Goering left three letters behind. The four-power commission ordered them impounded forever, never to be made public.

### He Was Scolded

Several days after this happened, this correspondent met a translator who was needed to tell the Allies what Goering had written in German. One letter was to Col. Burton Andrus, the American commandant of the prison. It scolded him, but praised his soldiers.

In effect, Goering wrote: "You shifted my cell from time to time. For you to have a system was for the reichmarshal to understand it. I had three pills. I permitted you to find one in my gear at Montfort (in Belgium) and one in my pomade jar. The third onen was hidden anally, sometimes in my navel. Sometimes in my toilet. I understood German plumbing and you didn't. It was weighted with lead and would not flush down. Sometimes it was even in my jacket pocket."

To his wife, Emmy, he wrote what any man would write to his wife. Earlier, in August 1946, he had told Emmy "I will not hang," but she misunderstood it to mean he believed in his acquittal.

To the German people, he wrote an admonition to get along with the Western powers because he promised them they would fall out with the Russians in due time.

None of the Nuernberg defendants holds any rank today as a martyre or as a hero. The prison officials still refer to them as "Die Prominente", — The Prominent — which spares them the need to use the word Nazi. On the streets, any discus-

One-Fourth of World's Blind

# India's Cheap Glasses May Cause Blindness

CALCUTTA, India (AP) — Step into a dusty little shop in any India town and you can quickly get a cheap pair of spectacles—and perhaps a blinding case of trachoma or glaucoma.

Government statistics reveal that of India's 500 million people, 4.3 million are blind, an estimated quarter of the world's blind. Eye specialists claim thousands of unsanitary, unlicensed "optic houses" are partially to blame.

The trachoma control unit of India's Health Ministry says trachoma, a highly contagious form of conjunctivitis, and glaucoma may be passed on by shopkeepers selling eyeglasses.

The root of the problem is that India does not have nearly enough qualified opticians.

Here in Calcutta, with a population of about 6.5 million, there are about 50 opticians with proper training. In rural areas, where 75 per cent of the population lives, the ratio is worse.

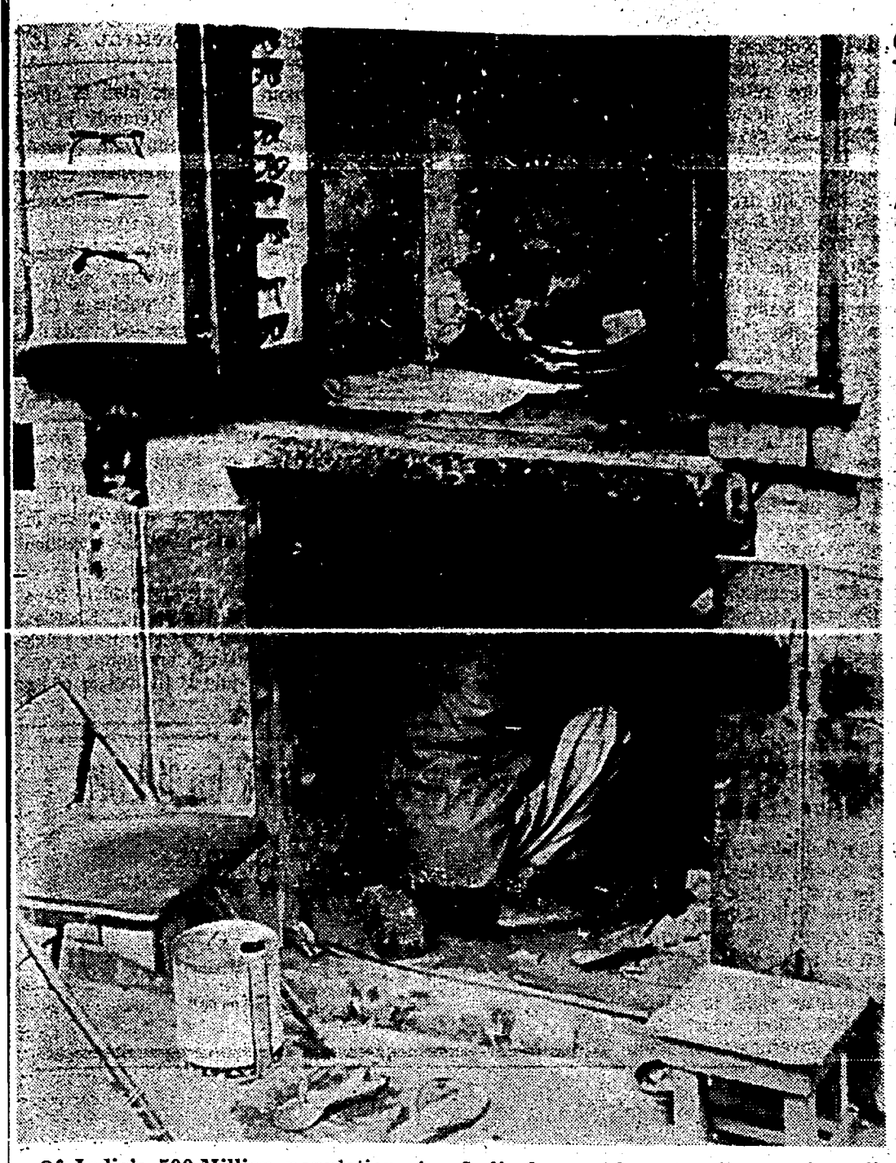

Millions of Indians who feel their eyesight failing are forced into the dusty little shops where "scientific examinations" entail fitting one pair of spectacles after another until objects across the road become "clearer."

Unfortunately, most of the "technicians" who grind the lenses have had no formal training. They simply practice a trade passed down from their fathers, using equipment outdated long ago.

Many eyeglass salesmen set up shop on sidewalks near bazaars, railway stations or any spot that will draw a crowd. All this has placed an impossible burden on qualified opticians. They have thousands of requests for help so most take orders only from eye specialists — whose fees are far too high for the ordinary Indian.

India's central government has asked all states to legislate eye quacks out of business and is studying the possibility of national legislation to help fight eye diseases.

But until enough qualified opticians are available, the sidewalk salesmen will continue to do booming business.

**Of India's 500-Million** population, 4,300,000 are blind, an estimated one-quarter of the world's blind. The country's health ministry claims that trachoma (a highly contagious form of conjunctivitis, or "pink eye") and glaucoma (which involves a hardening the eyeball) may be transmitted by shopkeepers selling eyeglasses. The root of the problem is that India does not have nearly enuogh qualified opticians. Here, in Calcutta, a sidewalk salesman does a booming business. He "scientifically" fits a pair of eyeglasses on a customer. His customers sit quietly until (when the proper lenses "work") objects across the road become "clearer." (APN Photo)

**Most of the So-Called** technicians who grind eyeglass lenses in Calcutta, India, have had no formal training. With a population of 6½ million, the city's trained opticians number only 50. The untrained simply practice a trade passed down from their fathers, using heirloom equipment. Here, a "technician" in a musty sidewalk "shop" grinds lenses for a customer. India's central government has asked all states to legislate eye quacks out of business, and is studying the possibility of national legislation to help fight eye diseases. (APN Photo)

## May Not be Eased Until 1970s

# Air Force, Navy Face Grave Shortages of Young Pilots

By SEYMOUR M. HERSH

WASHINGTON (AP) — The Air Force and Navy are facing what some military officials describe as a severe shortage of young pilots — a shortage they said may not be eased until the early 1970s.

In a series of interviews, top officers said the shortage is largely due to two factors: the increased U.S. commitments in Viet Nam and the increased demand for trained pilots in the booming airlines industry.

The situation is so serious, some sources said, that within the past two years an estimated 2,000 qualified but nonflying officers — many of them in key administrative positions — were ordered back into the cockpits.

It was learned that the matter is receiving the top attention of Secretary of Defense Robert S. McNamara, who is now considering an expanded Air Force training program. Current programs will boost the number of pilots 30 years old and younger by approximately 75 per cent over the next nine years. The defense secretary will be handed a similar proposal from the Navy soon, qualified sources said.

### High-Priority

"This has been a high-priority subject," one defense source said. "I don't think anything is higher on the secretary's list."

Despite the over-all shortage, top military officials emphasize that all manpower needs in Viet Nam and in the Strategic Air Command are being met. But they concede that elsewhere, things often are not up to par.

The immediate facts are these:

—Thousands of Viet Nam pilots are scheduled to be rotated back to the United States this year and must be replaced. Officials indicated that some pilots may have to return for a second tour unless the picture changes by 1969.

—The Air Force is planning more extensive use of the F4 Phantom jet, which requires two pilots. In addition, the Air Force hopes to begin using a two-pilot version of the F111 as soon as production of that new jet begins.

—The heavy stepup in the air war. In one day last week, U.S. pilots flew 150 missions over North Viet Nam involving at least 450 planes and 387 individual sorties over South Viet Nam. Last Sunday pilots set a record by flying 170 attack missions in North Viet Nam.

—Through Thursday, a total of 211 Air Force personnel and 38 Navy men, most of them presumably pilots, were officially reported as missing in connection with the Viet Nam war.

—Many more pilots are needed and used on training missions stemming from the many adjustments qualified pilots need before going to Viet Nam and after being rotated back for U.S duty.

### Less Re-Enlist

On top of all this, the Air Force and Navy report a drop in the pilot relistment rate, much of it stemming from airlines recruiting.

Reflecting the concern over pilots, the Air Force and Navy recently surveyed sample groups of resigning officers to determine the impact of airline recruiting efforts.

The Air Force study showed that 60 per cent of its senior pilots intended to become commercial pilots after separating from the service. A similar survey in 1964 showed that only five per cent of the resigning officers planned to join an airline.

"We expect this trend to continue as a direct relation to the airline need," the sutdy concluded.

The Navy reported, in response to a query, that about 67 per cent of its pilots who resigned in the fiscal year that ended last June 30 ended up working for the airlines.

A spokesman for the Air Transport Association, which accumulates data on airline pilots, said about 7,000 pilots have been hired since 1964 when the industry began experiencing huge growths in passenger service. About 70 per cent of the airline pilots are recruited from the service, he said, adding that the commercial demand for pilots will continue at least through 1968.

### Why Go?

"Why should they risk going to Viet Nam when they can work for $15,000 and be safe?" he asked.

To combat this manpower loss, service officials have begun motivation and other studies to determine why officers leave the service at certain ages and at certain points in their careers.

Although Pentagon officials are reluctant to talk about it, there's another reason for the lagging re-enlistment rates: A few pilots in Viet Nam have turned in their wings rather than fly in the war.

But top officers say that fear of Viet Nam duty is not a major factor. As one put it: "In any outfit you're going to find the working boys and the gravy boys. As soon as the gravy congeals, the gravy boys want to get out."

For the loss of such officers, it was made clear, the Navy and Air Force feel no regrets.

But Gen. John P. McConnell, Air Force chief of staff, recently told Congress that the "rate of officers voluntarily leaving the Air Force increased from 4.4 per cent in fiscal year 1965 to 6.2 per cent in the second quarter, fiscal year 1966."

And the Navy reported that all indications show that its current retention rate for officers is declining, although it did not supply any specific figures. One Navy officer put the situation more bluntly: "One of the big problems in the Navy is keeping pilots in."

### Defends Mac

A Defense Department official defended McNamara's present and past policies on pilot training, saying there is no shortage now that amounts to anything more than a question of the number of pilots now serving in noncombat positions.

After World War II, he explained, "many excess aviator requirements were developed by the services to accommodate the large number of pilots left over."

When these services talk of pilot shortages, he added, they are including the aviation requirements built in to many nonflying jobs. What's needed, he said, is not so much talk about shortages but a careful Pentagon analysis of the aviation requirements for all staff jobs to determine how and why they were developed.

Citing pilot training boosts totaling about 1,100 for the Air Force and Navy from 1965 to 1966, the official said, "It is not clear at this point that the approved pilot production program is not adequate."

But Navy Comptroller W. R. Carter recently told a Senate Appropriations subcommittee that the Navy's total pilot requirement is 15,986, compared to a total of 14,536 officers on hand — a 1,450 pilot shortage.

"However," Carter added, "in the young pilot area, lieutenants and junior, the requirement exists for 9,231 pilots as compared to an inventory of only 6,617."

Officers said that in terms of numbers, the Air Force is meeting all of its pilot requirements — about 38,500 officers now draw flight pay. Both the Navy and Air Force say that losses from all sources — including resignations and retirements — are within planned attrition rates.

### Some Don't Fly

But numbers don't tell all the story: Many qualified pilots have important desk jobs in the backup components of the Air Force, such as personnel research and public information, and do not fly.

Adding to the services' pilot problems, however, is the fact that their training camps are now operating at or near full capacity. The Air Force expects to turn out more than 2,900 jet pilots this year and the Navy about 2,200, considerably above their production last year.

At present training rates, the Navy estimates its shortages in junior grade pilots will not be overcome until the early 1970s.

Air Force sources estimate it will take at least two years, along with more training bases, to turn out a satisfactory number of young pilots.

Authoritative sources said that the Air Force training program now awaiting McNamara's approval calls for the addition of two more training bases, bringing the total to 10.

The Air Force plans to couple the hoped-for boost in pilot trainees with new techniques for cutting training costs. Officials estimate it costs about $8 million to open a training school and about $20 million to maintain it a year.

The cost of training jet pilots has been estimated at as high as $500,000 over two years with later per-pilot flying costs fixed at about $500 an hour.

A spokesman said the Air Force is studying the feasibility of doing more training under simulated flying conditions and washing out trainees quicker.

### No Expansion

The Navy, while it has yet to present its training requirements to McNamara, is not planning to request new training bases, sources said, but will seek instead to expand and improve its present facilities.

Another serious facet of the pilot shortage has been the Viet Nam-connected training demands. Some squadrons of the Tactical Air Command have turned themselves into replacement training units, sources said, to handle the great flow.

"We have to take pilots who have been flying such planes as B47s and retrain them to fly the F4 and F105," one officer said. "Then we have to take the F100 pilots and retrain them to fly B52s." The F4, F100 and F105 are jet fighters in wide use in Viet Nam.

"We're perpetually training—even though most of those already are pilots. It's not a desperate situation—but it's hard for us to figure it out."

Some Air Force officers are bitter at the present lack of trained young pilots, asserting that in 1961 and 1962 the Defense Department cut back their long-term training requests for 1965 and 1966 from 6,400 to 4,700.

"Now," said one officer, "we can't do anything for the next two years except return nonflying pilots and younger officers skilled in valuable areas to the cockpit."

In the past two years, he added, 1,700 officers have been returned to flying duty. "This is painful to the Air Force," the officer said.

### Unfair Trade

"These people are highly skilled and we're replacing them with second lieutenants just out of ROTC or OCS (Officers' Candidate School)."

The result amounts to a vicious circle, he said, "because unless young officers can see the opportunities to have a rounded future—a chance to work in systems commands or personnel and become staff officers of the future—he says to himself: "Since I'm going to be a pilot all my life, I might as well go into airlines."

Somewhat similar sentiments were voiced in a recent Senate hearing by top Navy officers.

Adm. David L. McDonald, chief of naval operations said, "We have relieved almost every flying aviator from such jobs as being an aide or an administrative assistant. We unfortunately also have taken some from postgraduate schools. By doing these things we have sort of filled the gap until our new pilot training rate can catch up."

"The only other thing we could possibly do that I know would be to call in selected Reserves."

McDonald also told the senators that the Navy is meeting its Viet Nam flying obligations by "letting the Atlantic Fleet periodically furnish some squadrons and some pilots so that we do not overexpose" the pilots in Viet Nam.

Vice Adm. Paul H. Ramey, deputy chief of naval operations, voiced an objection about the pilot shortage: "Much to my chagrin they took one of my aides away who is a naval aviator and gave me an NFO (nonflying officer)."

McNamara's defense analysts have sharp answers for these complaints.

There's nothing wrong, one official said, with taking some officers out of desk jobs in wartime and putting them into planes. "This is a hard-headed department," he said. "Our attitude is: We pay for these fliers and they're volunteers—all of them—so why not use them?"

### Why Not?

"Why shouldn't we ship the Atlantic Fleet carriers and fliers to Southeast Asia?" he said. "Why should the men in Viet Nam be the only ones to share the experience?

"And how can we justify an admiral's aide—a million-dollar pilot," he added, "running around getting coffee when there's a war on?"

One official acknowledged there is some dislocation of pilots in the United States and that big boosts are now being considered in Air Force and Navy training for 1968. He emphasized, however, that all personnel losses up to now are within acceptable programmed attrition limits.

New refinements in computer uses and programming have been developed, he added, that should insure an adequate supply of pilots in future years regardless of contingencies.

"Don't be left with the pretension that everything is all right," the official cautioned. "It's tough—but we're staying on top of it."

## How's Your AUTObiography?

*By Sy*

(The following questions sent in by interested readers have been answered by area representatives of the Wisconsin Motor Vehicle Department under the leadership of license examiner John Sybeldon.)

**WHAT EVERY WISCONSIN DRIVER SHOULD KNOW:**

About passing: Remember that passing on the right is permitted only if it can be done in safety and without driving off the pavement, and then only (1) when the overtaken vehicle is about to turn left, (2) if there are two or more traffic lanes in your direction of travel, or (3) on a one-way street or a divided highway with two or more available lanes.

* * *

**QUESTION:** How does Wisconsin compare with other states in the Midwest in regards to fatal accidents?

**ANSWER:** On the basis of miles traveled we can see how our own traffic accident death toll compares with those of our immediate neighbors. This is based on deaths per 100 million miles of travel: Iowa 6.0, Wisconsin 5.4, Minnesota 5.2, Michigan 5.2, and Illinois 5.0.

* * *

**QUESTION:** What is the basic rule for safe following distance?

**ANSWER:** One vehicle length for every ten miles per hour of speed.

**QUESTION:** How far away from a turn should a driver signal his intention to turn?

**ANSWER:** Signal of intention to turn must be given continuously during not less than the last 100 feet before turning. At higher speeds this should be increased for a safe turn.

Questions on driving may be sent to Sy in care of the Post-Crescent or directly to the Driver License Division, Motor Vehicle Department, 517 N. Appleton St., Appleton.

## Ancient Artifacts Found in Israel

JERUSALEM (AP) — A Hebrew University archaeological team has uncovered a cache of artifacts dating to about 600 B.C. at historic Tel Lachish in Israel. The find includes rare Hebrew clay seals, used for sealing papyrus documents. A team from the University of North Carolina is assisting in the exploration.

Retiring U.N. Official at Odds With U. S. Policy

# U Thant Sees Danger to World Peace In Concept That Viet Nam Is Holy War

By MILTON BESSER

UNITED NATIONS, N.Y. (AP) — Secretary-General U Thant declared today he sees nothing but danger to world peace in any concept that the Viet Nam conflict is a kind of holy war between the forces of communism and democracy.

In a statement sharply at odds with the Viet Nam policy proclaimed by President Johnson and other U.S. administration officials, Thant said he remains convinced the basic problem in Viet Nam "is not one of ideology, but one of national identity and survival."

"I see nothing but danger in the idea, so assiduously fostered outside Viet Nam, that the conflict is a kind of holy war between two powerful political ideologies," he said.

### Annual Report

Johnson, Secretary of State Dean Rusk and other high administration officials have stressed that the United States is in South Viet Nam to help repel Communist aggression from the North. They contend an end to that aggression, including subversive activity in support of the Communist Viet Cong, would end the war.

Thant's views were given in the introduction to his annual report to the 117-nation U.N. General Assembly, which opens its 21st session Tuesday.

In a gloomy tone he summed up the problems facing the delegates — the slowdown on disarmament talks, failure to come to grips with issues barring agreement on peacekeeping procedures, the widening gap between developed and developing countries, and the serious situation in Africa. He blamed most of the lack of progress on the Viet Nam crisis.

His report came at a time when pressure was being put upon him by the United States and virtually the entire U.N. membership to change his mind about stepping down when his five-year term expires Nov. 3.

When he announced his decision Sept. 1 not to offer himself for a new term he made plain that concern over Viet Nam was a major consideration. In a speech Thursday he advised the U.N. membership to get on the job of finding a successor.

In his report to the assembly he declared the Viet Nam crisis was the major obstacle impairing international cooperation needed to resolve the crucial issues confronting the United Nations.

He said he had done his best to help in efforts to reduce escalation of the war and to move it to the conference table.

### Power Politics

"In doing so," he added, "I have been increasingly distressed to observe that discussions of the matter have by and large been dominated by consideration and analysis of the power politics involved, and that there has been much less concern for the tremendous human suffering which the conflict has entailed for the people of Viet Nam and also for the people of other countries involved in the fighting. My heart goes out to them."

He declared survival of the Vietnamese people must be seen as the real issue, to be resolved "not by force but by patience and understanding, in the framework of a willingness to live and let live.

"If this approach can be accepted on all sides — and the moral influence of governments and peoples outside the immediate conflict can help to bring this about — I believe it should be possible to reach a settlement which would end the suffering in Viet Nam, satisfy the conscience of the world at large and remove a formidable barrier to international cooperation."

Thant summed up the year between this and the last session of the assembly as one in which disappointment outweighed modest gains made in some directions.

He noted that the India-Pakistan conflict over Kashmir had been calmed with the aid of the United Nations, but added that tensions had heightened and violence had erupted elsewhere.

### Critical of Powers

He was critical of the major powers, saying they had not "during this period shown themselves able to rise above the suspicion, fears and mistrust that spring from their different ideologies and from their different conceptions of the best interests of the rest of the world."

He said the rich nations had not risen "above their concern for the continuation of their own prosperity, nor the poor nations above the deadweight of their chronic poverty and their anachronistic social structures."

He criticized the U.N. special committee appointed to resolve the dispute over peacekeeping procedures for issuing a "negative report." He said "it not only shows the continuing failure to agree on basic principles, but also reflects a reluctance to come to grips with the problem."

In the field of disarmament he called for quick agreement on a treaty to ban the spread of nuclear weapons and also on a treaty banning all nuclear tests, including underground tests now permitted under the limited test ban treaty.

### Specific Plan

He warned that if underground tests result in a unilateral technological breakthrough in either offensive or defensive nuclear weapons capability "it could upset the existing uneasy balance of terror, and lead at once to a new and greatly accelerated nuclear arms race."

He came up with a specific proposal — that an appropriate U.N. body "explore and weigh the impact and implications of all aspects of nuclear weapons, including problems of a military, political, economic and social nature relating to the manufacture, acquisition, deployment and development of these weapons and their possible use."

"To know the true nature of the danger we face may be a most important step towards averting it," he declared.

In reference to the policy of apartheid in South Africa — denounced in the United Nations for years — he asserted that the five permanent members of the Security Council and the main trading partners of that country "have a special responsibility, as well as the means to persuade the South African government to abandon its present course, and seek a solution consistent with the charter of the United Nations and the resolutions of the Security Council and the General Assembly."

On the Rhodesian issue, he suggested that Britain will need to take "further and bolder measures, even though they may be more difficult now to carry out than they would have been some months ago."

### No Other Course

As for South-West Africa, now under South African rule, he said he saw no other course for the United Nations than to pursue its search "for constructive measures which will help the people of South-West Africa to exercise their right to self-determination, and which will make the government of South Africa the willing partner it should be in this undertaking."

In the field of aid to the developing countries, he urged the General Assembly to "bring its attention still more positively to bear on strengthening what must be a worldwide attack on poverty."

He said the leaders of the industrialized world must bring their own people to face the fact "that the future of the world will be largely determined by the extent of their effort to promote progress and to defeat despair in the developing nations."

## Knowles Hopes Kennedy Pleased By State Scenery

WAUWATOSA (AP) — Gov. Warren P. Knowles, against whom Democrats plan to offer Sen. Robert F. Kennedy in the contest for campaign appeal, says he hopes Kennedy enjoys the color of a Wisconsin autumn.

The Republican governor, commenting Thursday night at a Wauwatosa Republican Club meeting on scheduled visits by Kennedy and other Democratic leaders this weekend and in October, remarked:

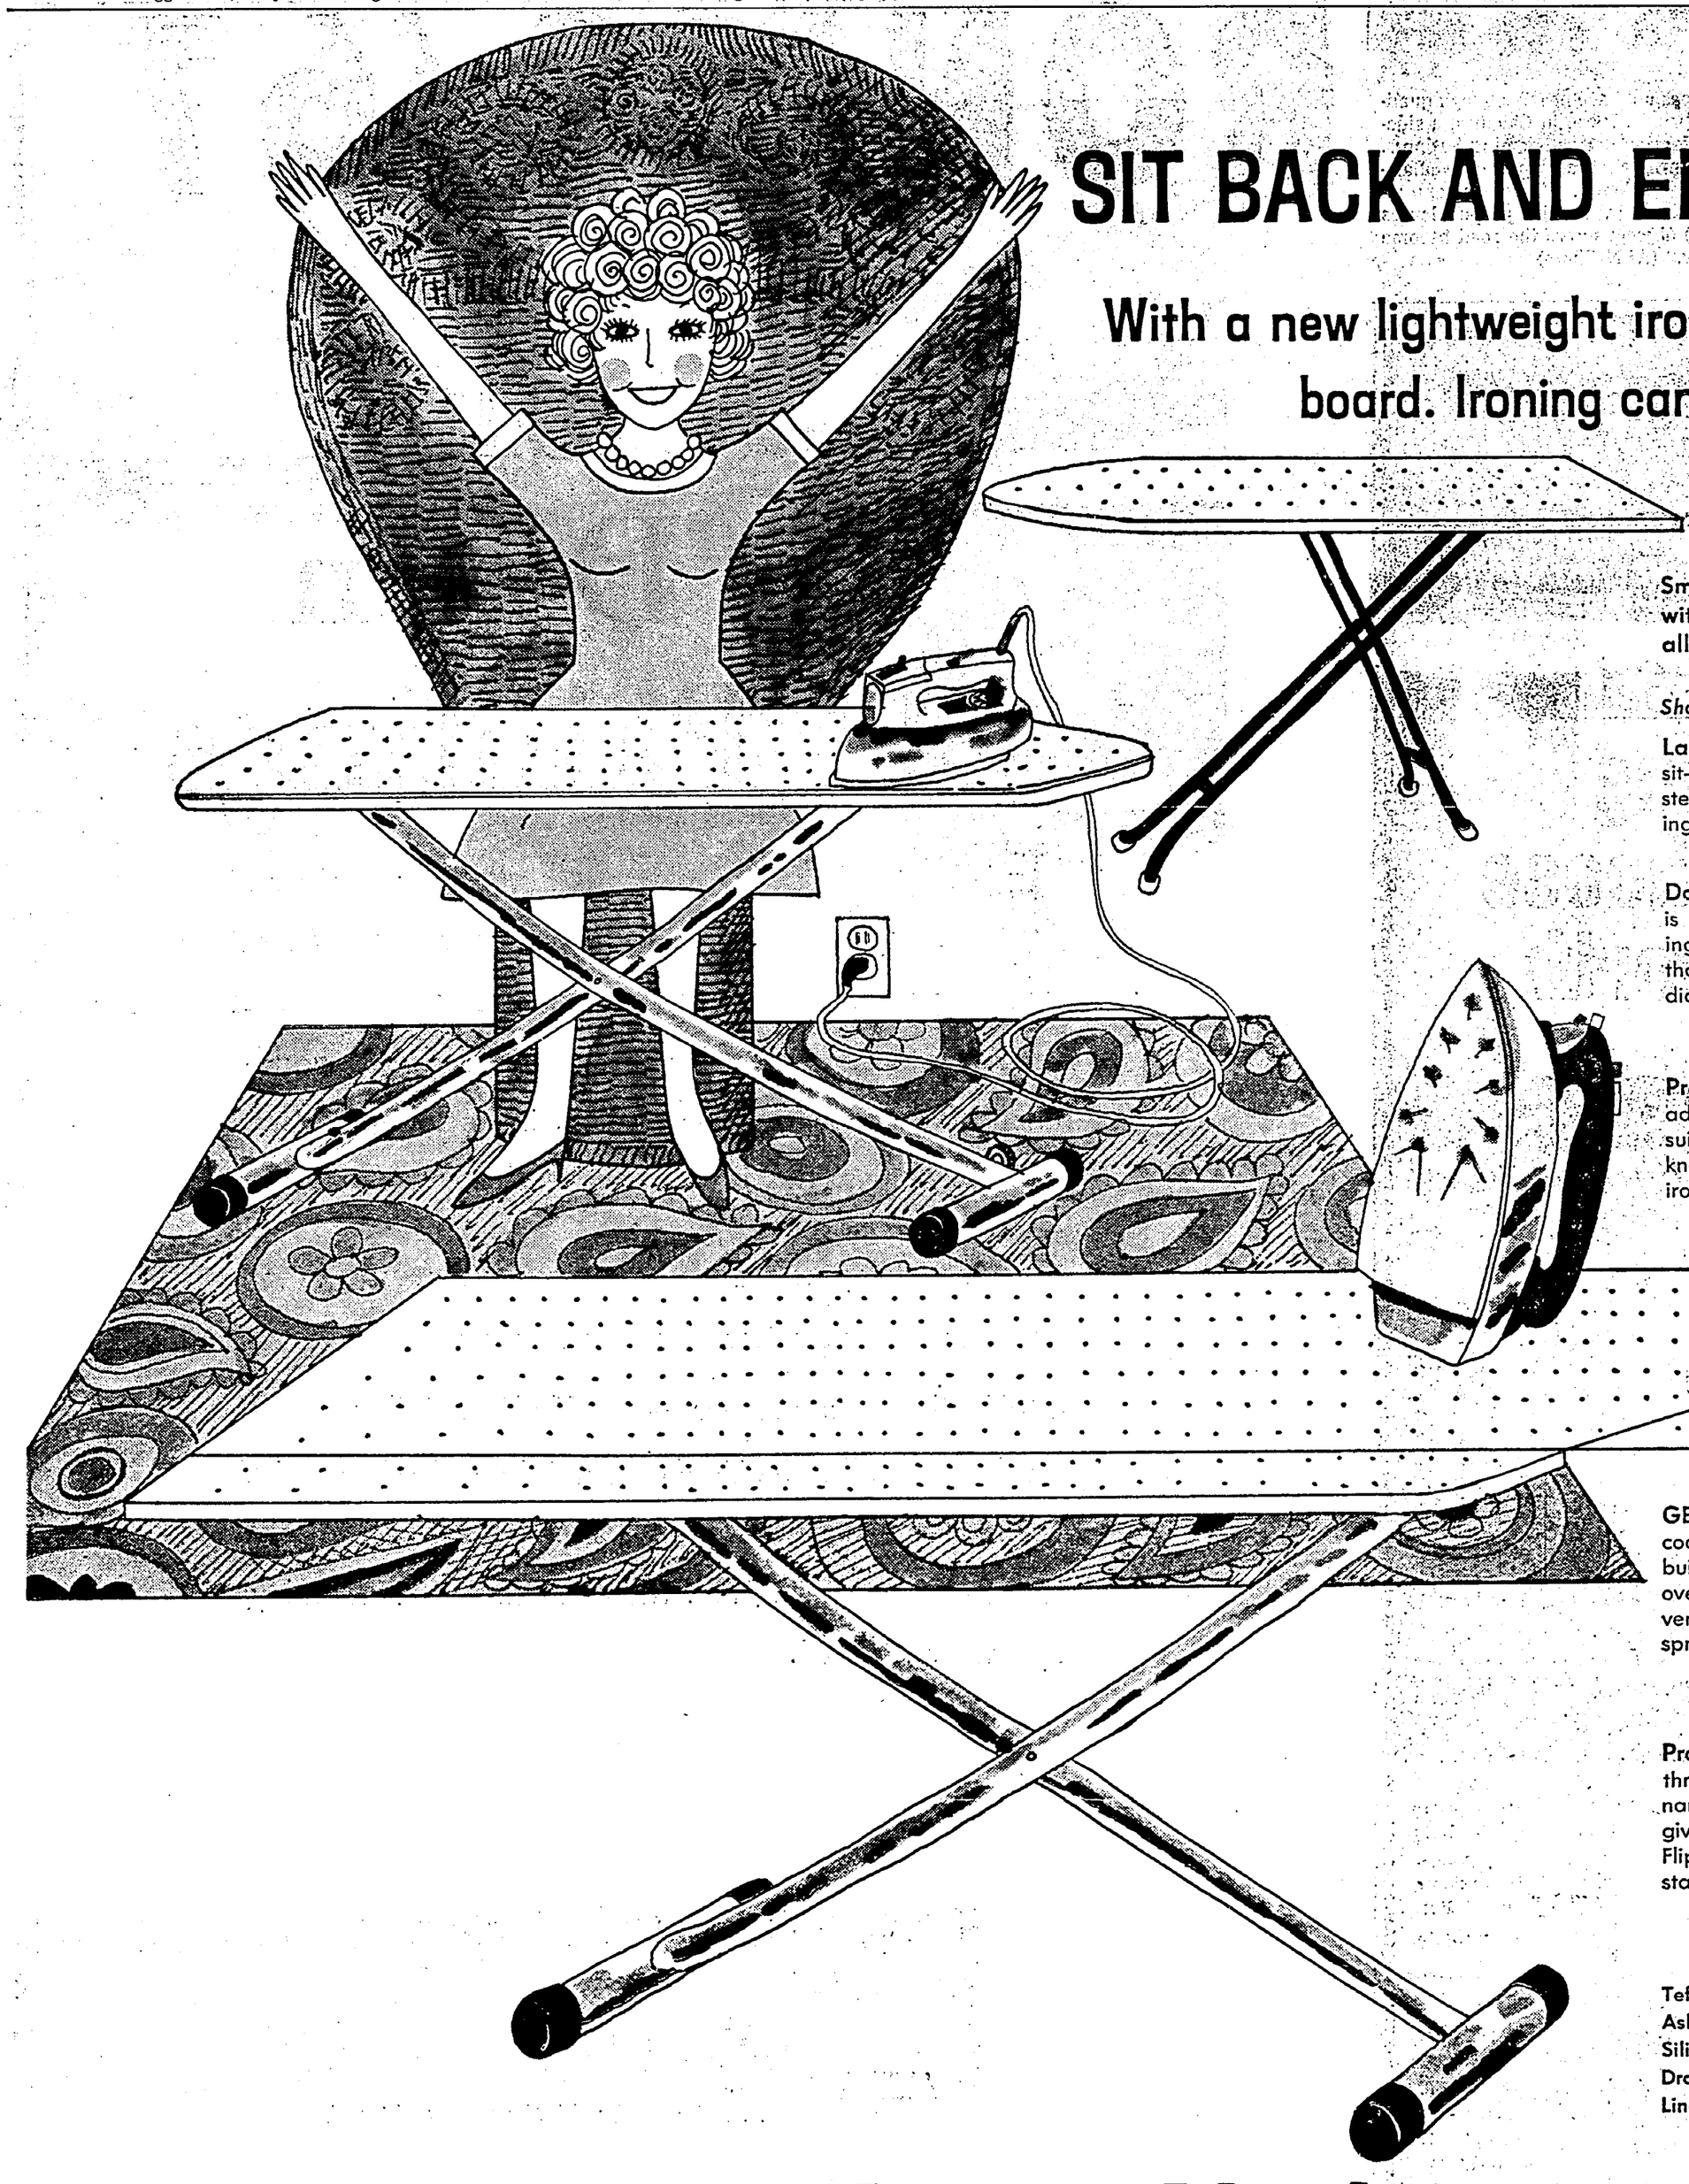

"I am not concerned about attacks or about a candidate who believes it is necessary to bring in outside campaigners in order to attract public attention and news.

"We are always glad to have tourists in Wisconsin," Knowles said. "These people who come into Wisconsin are going to enjoy the state at the height of its colorama."

## the BIG NAME in TELEVISION

## the ORIGINATOR of RECTANGULAR Color TV

## BUY a MOTOROLA Color TV Set NOW

## While Selections Are at Their Best!!

THE NEW FLIGHT OF COLOR TELEVISION — Motorola has done so much to bring you truly modern Color TV. Every set has a big Rectangular picture in a slim cabinet. Space-age solid state reliability at 17 critical points, too. And, they all have Hi-Fi Color Tubes for exciting Color — brilliant Black and White. Besides all this, these sets have a power transformer chassis, tint control, automatic demagnetizer and color indicator light. See Motorola's new flight of Color TV today.

As Low As **$3.50** Per Week After Down Payment

Smart Contemporary styling in select hardwood veneers and solids with an applied Walnut grain finish.

SPACE-AGE RELIABILITY!

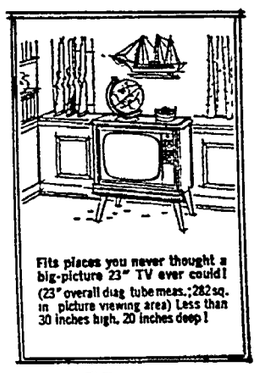

**$189.95**

8U704C

### MOTOROLA BIG-SCREEN CONSOLETTE

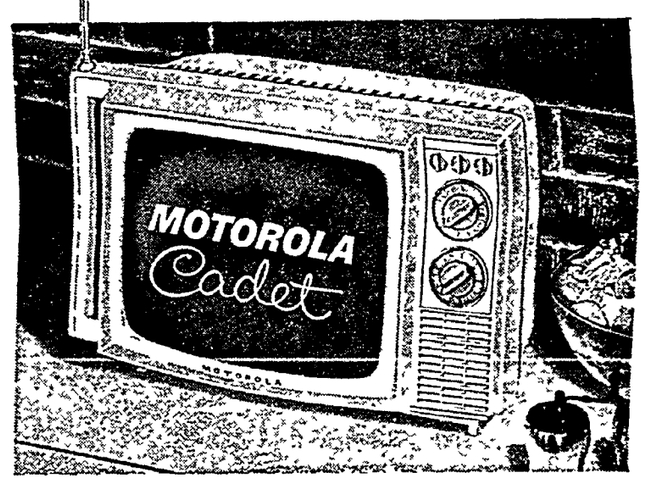

- X-11 Solid State Signal Sensor — 11 tiny, long-life transistors replace tubes in critical signal receiving area — for reliability, performance, precise control of TV signal!
- Solid State UHF Tuner
- Custom-Matic pre-set VHF Tuner
- Built-in UHF-VHF antennas
- Lighted channel indicators
- All 82-channel Reception
- Front speaker, front controls.

**Full One Year Guarantee**—Manufacturer's guarantee covers free exchange or repair of any component proven defective in normal use. Arranged through us. Labor extra.

Fits places you never thought a big-picture 23" TV ever could! (23" overall diag tube meas.; 282 sq. in. picture viewing area) Less than 30 inches high, 20 inches deep!

### MOTOROLA 12" Portable TV

Fits places like kitchens, bedrooms, bookcases — because the antenna is up front in handle. 12" overall diagonal tube measure; 74 sq. in. picture viewing area.

**$89.95** 12BP72B

## Teens! NOW STEP-UP TO SOLID STATE STEREO

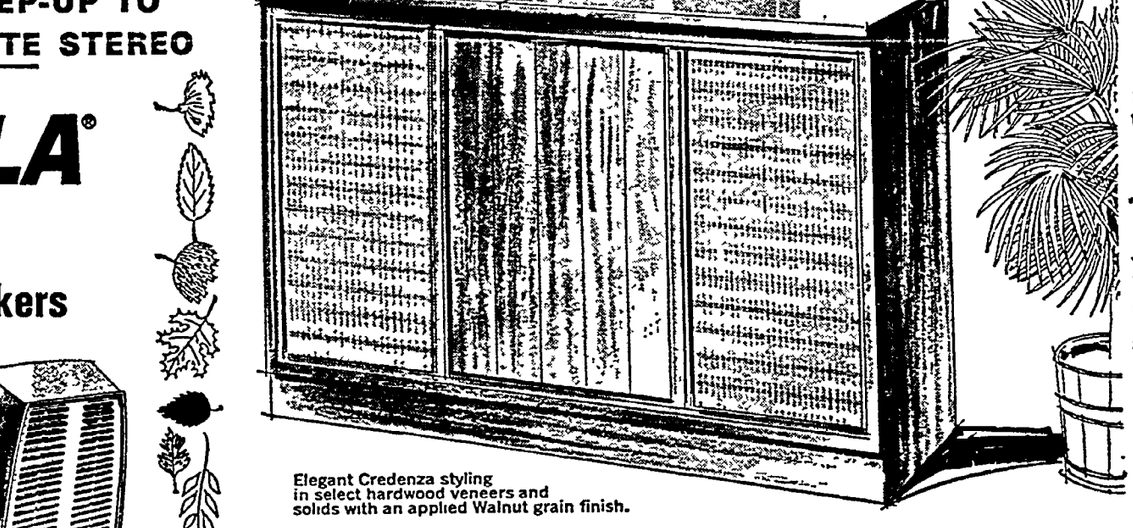

### MOTOROLA® PORTABLE with detachable speakers

**$69.95**

Model PP205

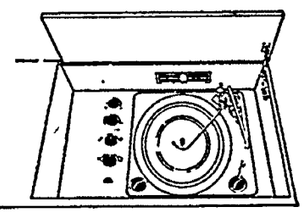

- Speakers separate up to 20 ft. for true stereo sound
- Solid state amplifier system—instant play—no tubes to burn out
- 45 RPM turn-table adapter • Plays all 4 speeds
- Automatic record changer • Tone control and right and left volume controls
- In Charcoal Brown or Honey Beige

Elegant Credenza styling in select hardwood veneers and solids with an applied Walnut grain finish.

### *4-speaker solid state stereo... in beautiful Credenza styling...*

- Solid state amplifier system—instant play, no tubes to burn out
- Stereo dual-speakers with cross-over network (two 8" woofers, two 3½" speakers) for fine sound
- Feather-Trac tone arm with "Audio Lens" see-thru cartridge and Diamond/Sapphire styli
- Headphone jack • Record Storage

4-speed automatic play with stereo audio control panel—treble, bass, balance, loudness controls!

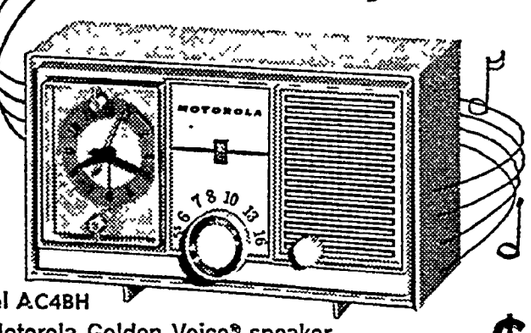

*Full Year Guarantee on all parts. All components are guaranteed for ONE FULL YEAR against defects in material and workmanship. Motorola Inc.'s guarantee covers free exchange or repair of any component proven defective in normal use. Arranged through us. Labor extra.*

**This Newcomer 25-Inch** rectangular screen color television set, Zenith's Casablanca, combines the Spanish influence with overtones of Italian and French future design. The Mediterranean-styled cabinet is fashioned from oak veneers and select hardwood solids finished to a dark, dark brown. In this room setting, red is a regal color and a desirable contrast to the furniture's dark look.

*'Super Compacts' Are Mass Produced*

# Color Television Sets Come in Sizes Suitable for Any Family

There's good news for families planning to purchase a new color television set but hesitate because of home space limitations.

Fresh for 1967 is the first line of 21-inch (overall diagonal tube measure of 226 square inch picture viewing area) rectangular color TV receivers to reach retail stores.

These "super compact" color television receivers feature a rectangular 21-inch picture tube, second in the family of rectangular color tubes developed by Motorola. In 1963, this firm introduced the first domestic, mass produced rectangular color television in a 23-inch (overall diagonal tube measure of 274 square inch picture viewing area) screen size.

Rectangular color picture tubes are rapidly replacing round tubes in the television set manufacturing industry because of the shorter front-to-back dimensions which make possible slim, trim cabinets. Homemakers across the country have hailed the availability of these smaller scaled color TV cabinets, which are much more "at home" in the living room.

Motorola designers had the apartment dweller and small home resident importantly in mind when they styled the 21-inch rectangular color TV line. This group of receivers was planned to be attractive particularly to those seeking smaller dimensions in screen size, cabinet and cost, as compared with larger screen sizes now available.

**Listening Earphone**

The 21-inch rectangular "super compact" series of three table models and five consolettes starts with the CT-606C—the Granville — a brown color metal cabinet table model with a manufacturer's suggested list price, optional to dealer, of $429.95. This unit is 17⅛ inches high, 25¼ inches wide, and 20 inches deep, including the tube cap. A private listening earphone is included with this and the other two table models in this series.

An attractive, scuff-resistant vinyl covering on a metal cabinet enhances the appearance of the CT607C — the Montrose — also a table model. This unit comes in choice of walnut grain finish or mahogany grain finish on the vinyl covered cabinet.

Top-of-the-table model group is the CT608C — the Elmhurst — with its genuine walnut veneer and solids cabinet with oil walnut finish providing an attractive furniture piece that can be located on a shelf, table or roll base which is available at extra cost.

All cabinets of the consolettes are constructed of select hardwood veneers and solids.

Consolette model CU610C — the Conway — offers contemporary styling with a soft-shaped edge to the slightly overhanging cabinet top, tapered legs and a crisp, molded base rail. A choice of applied walnut grain or applied mahogany grain finishes is offered with this model.

Early American styling is available in the CU611C — the Vermont — and is identified easily with the turned legs, wide base rail accenting molded lineal detail and overhang top edge. The cabinet has an applied midwest maple grain finish.

Italian Provincial styling is also offered in the 21-inch rectangular color TV series with model CU612C — the Verona — whose cabinet embodies recognized details of this popular classic Italian style and has an applied Mediterranean mahogany finish.

Graceful French Provincial styling is seen in the CU613C — the Deauville — with hand carved legs with scroll feet and pads and shaped base rail with wide, molded detail at the upper edge with French carving beneath the molding. This cabinet has an applied French Provincial fruitwood grain finish.

For those who prefer a swivel-base cabinet, for ease of turning to various viewing angles for different seating situations, Motorola offers the CS615C — the Braddock — with a contemporary styled cabinet available in choice of an applied walnut grain finish or an applied mahogany grain finish.

Among the many features of the 21-inch rectangular color television series, viewers will find a color indicator light which indicates when a color signal is being transmitted and lighted channel indicators. These models also have a solid state UHF tuner, pre-set VHF tuner and a 3-IF amplifying system.

## Inmates Volunteer to Leave Cells, Fight War

GRANITE, Okla. (AP) — Rejected once by the Defense Department, 19 state reformatory inmates have asked again to inmates have asked again to serve in the armed forces in battle areas, asking for waivers for their criminal records so they can serve.

Motorola's rectangular color television uses solid state components at 17 vital points for space age solid state reliability.

*Unique Undertaking*

# Color TV Product of Much Research and Cooperation

BY JOSEPH S. WRIGHT
President, Zenith Radio Corp.

Even though color receiver production schedules have been stepped up substantially in 1966 and color tube facilities are busy around the clock, consumer demand for sets will continue to race ahead of supply even into next year.

Major changes in home entertainment patterns, like the soaring demand for color TV, don't happen over night. Zenith and other members of the electronics industry began preparing 25 years ago for the day when this most complex of consumer products would move into millions of homes.

Back in 1940, full-scale research in color TV was well underway in Zenith's laboratories. Experimental color programs were broadcast over the company's own TV station. Except for a break for full-time war work, our research and development of receivers and color picture tubes continued for more than 20 years before the company believed the product was ready for the market in the fall of 1961.

But in those early years before color was ready for the living room, it took a major cooperative effort on the part of the TV industry working together as the National Television System Committee (NTSC) to develop the present compatible color system.

**Major Role**

Zenith pooled its know-how and full technical resources in this total industry effort and played a major role in the NTSC development of workable color broadcasting standards. Our experimental TV station in Chicago began to broadcast this new type of color TV in 1950 as part of company's contribution, along with the talents of engineers and scientists, to the NTSC color system later approved by the Federal Communications Commission.

This unique all-industry undertaking culminated in October, 1953 when 13 manufacturers participated in demonstrations before the FCC. Of these, Zenith was one of three companies far enough along in color technology to demonstrate sets with chassis and picture tubes of their own design and manufacture.

Our concentrated research efforts paid off again the following year when a Zenith-developed rectangular color picture tube was demonstrated in Chicago, the first of its type in the industry.

All these man hours and millions of dollars in research and engineering were pointed to the day when the company would put on the market color TV receivers with reliability and performance comparable to black and white TV.

**More Money**

With perfected sets ready for the market, commitments were made for additional millions of dollars for new plants, facilities and skilled people. Currently, in an important expansion move that is planned to help us keep pace with the growing consumer demand for color sets, we are equipping another new plant for use as a second highly automated facility for the manufacture of color television picture tubes. Scheduled for completion in 1967, it will bring our color tube capacity to approximately two million units annually.

But in the dynamic electronics industry, you can never be satisfied, because the American TV viewer is looking for something new and better every time he shops. Today, at Zenith, engineers and scientists are looking ahead to the future, to the shape of the color sets of the 1970s and 1980s. In our color TV research and engineering laboratories, they continue to study ways to improve present color sets and to develop new ways to bring color pictures to the homes of the future.

In the meantime, the most sophisticated consumer product ever made for the home is proving to be the most wanted new product for the home. And there is no end in sight to the publics demand for color TV.

## Mercury Hits 110 on Normal Day

PRESIDIO, Tex. (AP) — A bulky, red-faced rancher came out of a grocery store, dumped supplies into his pickup and wiped a forefinger under his hatband. "Mighty hot," he said.

"It sure wouldn't surprise me any if it hit 110 again today," said Oliver Harper, hardware merchant and official weather reporter.

It was almost a normal day in Presidio, by default the hottest town in thle United States.

"We're feeling the heat a little more than usual," Harper said, "because it's humid. Clouded up and rained 14 drops last night."

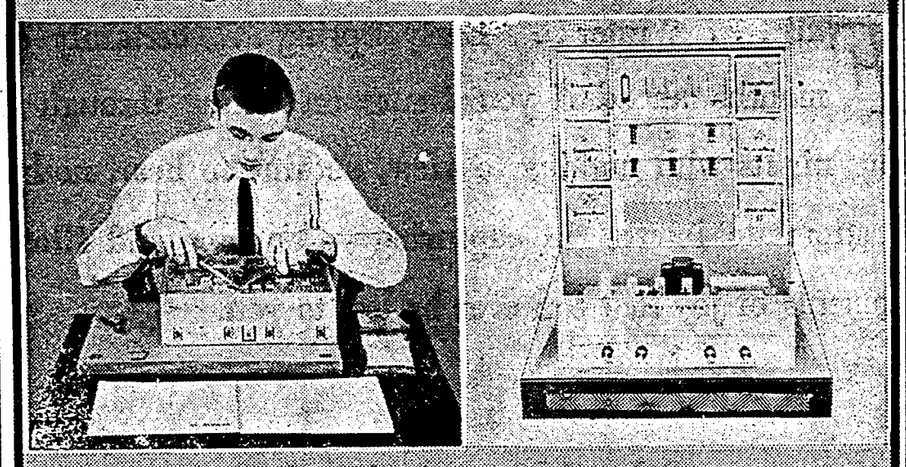

In 1943, the government decided it needed a weather reporting station on the Mexican border halfway between Del Rio and El Paso. Harper and his wife agreed to become weather reporters.

**No Reporters**

Day after day, Harper turns in the highest reading in the nation. But, he said, that's only because some hotter towns don't have weather reporters.

"Some places in California and Arizona could skin us alive every day." No doubt that's true. Presidio's record is 117 degrees, six below the Texas record of 123 in Rio Grande City. California's Death Valley once recorded 134.

Console at Both Ends of Sofa

# Concert Hall Reproduction 'Engulfs' Listener to Stereo Set

Stereophonic music at your fingertips is now available with General Electric's new "chairside" stereo.

Designed as two end tables which can be placed at either end of a sofa or chair, the units provide truly balanced stereo sound as the listener sits in the "in-between" zone engulfed in waves of sound.

Contemporary in styling, the two units are surfaced with fine walnut veneer over hardwood solids. This rich furniture styling and cabinet construction is designed specially to minimize distorting sound vibrations.

By simply lifting the lid of the control console, the listener has access to a precision sound control center. Directly below is the roll-out changer. Full-width record storage is provided in the second chairside cabinet.

### Speaker System

Each end table has a studio-tone speaker system for true concert hall reproduction. Two 12-inch super woofers of 30 to 1,000 cycles are combined with four three-inch tweeters (11,000 to 18,000 cycles).

The chairside's jam-proof Tonal 1 changer is equipped with an 11-inch heavy duty turntable with repeat-play option, and counterbalanced tone arm with gram adjuster and three-gram stylus pressure. Its G.E. diamond stylus carries a lifetime protection guarantee against defectiveness or wear.

The precision sound control center offers a base boost to assure proper distribution of bass and treble sounds for listening pleasure, and a contour switch enabling listeners to converse in normal conversational tones at the same time they enjoy background music.

The solid state General Electric amplifier offers low power consumption, long life and instant sound. Forty watts of peak music power (20 watts, E.I.A.) provide the finest in listening pleasure. A pilot indicator light glows when the amplifier is in the "on" position.

### Minimum Drift

General Electric's synchro-fine AM-FM-FM solid-state stereo tuner assures wide-range station selection with minimum drift. Electronic switching shifts automatically from FM to FM stereo as the broadcast signal changes. A built-in AM directional antenna provides the finest in reception for fringe areas.

Plug-in connections are provided in the chairside stereo for use with General Electric's Porta-Fi transmitters and one or more Porta-Fi receivers. These lightweight speakers can be plugged into any 110-volt outlet to reproduce music and radio programs from the chairside without unsightly wiring or the necessity for custom wiring.

The chairside has a conveniently located auxiliary speaker control center for added listening flexibility. This includes right and left extension speaker jacks, a three-position speaker control switch, tape playback jacks, tape record jacks and stereo phone jacks.

A Stereo Console With dual purpose is General Electric's new "chairside" combination which takes the form of two end table units designed to flank a sofa or lounge chair. One unit contains a roll-out record changer and top-mounted controls for AM/FM/FM stereo tuner. The second unit provides convenient record storage.

### Small Consolation For Primary Loser

PHOENIX, Ariz. (AP) — John McLaughlin lost a close race Tuesday for the Democratic nomination for state treasurer.

"Don't worry, honey," his wife told McLaughlin by telephone, "Terry was elected treasurer of the Bluebirds today." The Bluebirds is an organization of young girls.

Terry is 6.

Check Quality, Reliability, Value

# Smart Shopper for Color TV Follows Guide, Buys Wisely

More people than ever before will be purchasing color television receivers this year and the smart shopper will set up some guidelines to be sure his buying selection is a wise one, advises S. R. Herkes, vice president and general manager of the consumer products division, Motorola, Inc.

In what is certain to be the industry's record year in color TV sales, at least 3 million sets will be sold in 1966, meaning that close to 7 million color receivers will be in use in the nation's homes by the end of this year. The TV receiver manufacturing industry sold some 1.4 million color sets at the wholesale distribution level in 1964 and 2.25 million last year.

"If you plan to climb aboard the color TV bandwagon, by all means, shop and compare color sets," Herkes advises. "Visit retailers whose reputations as fair-dealing businessmen are unquestioned. Be certain that the salesman shows you the entire line and be sure you see a selection of brands.

"Ask for explanations of the features on different models, on different brands. On the latter point, ask to see those brands whose names mean something to you, manufacturers whom you are certain stand solidly behind their product. Check out each brand on quality, reliability and value.

Some of Features

"These are some of the features to look for:

"—Have the salesman demonstrate the color controls.

"—Be certain that you understand how to operate various controls for tint, video peaking, the color hue and intensity.

"—Ask the salesman to point out sets that have a color indicator, an electronic device which, when fine tuning is adjusted properly, automatically signals when a color program is being transmitted.

"—Having acquired a list of various models, along with an explanation of the various features available and different price ranges, be certain you are informed about the manufacturer's guarantee on the set. This is the producer's indication to you of the confidence he has in the reliability of his product. Be sure you understand precisely what the guarantee covers.

"Next, turn to styling. It will be helpful to the salesman to be informed on where you intend to locate your set in the home and the decor of that part of the home. If you haven't shopped for a color set recently, you may be in for a pleasant styling surprise.

Furniture Stylings

"—Then check out the various furniture styling now available in color TV cabinets. French or American? Spanish? Contemporary? Pick your furniture decor and you probably will find a color set cabinet to blend with that period.

"—Cabinet finishes also should be checked carefully, as often there will be a choice of finishes on the style in which you are interested.

"Consider for a moment the countless hours of pleasure that have been provided by the black and-white set, the thrilling sports events, public affairs programs, the educational offerings that are available to the discerning viewer.

"Some critics dwell on the trite in television but there is much that is good and appealing to the viewer. Add the new dimension of realism — color — and perhaps you'll understand why the industry finds that a color TV boom is underway."

A Favorite Anywhere is the battery-operated portable television. This 12-inch set offers maximum flexibility plus convenience for today's TV viewers on the move. The set is equipped with a built-in battery charger and snap-on face cover.

Color Television

# Special Meter Removes Guessing From Tuning

A new color tuning meter that takes the guesswork out of fine tuning is one of the key new features of General Electric's 1967 line of large screen color sets.

Included in the line are new 19-inch table and consolette models, G.E.'s first entries in this screen size category; four 23-inch consoles, and three 25-inch consoles.

The color-tuning feature, called meter guide tuning, is designed to assist television viewers with all fine tuning — color, black and white, UHF and VHF. When adjusting the fine-tuning knob, the viewer watches for maximum needle deflection on the color tuning meter. This tells him his set is properly tuned, permitting the best possible color for his signal area.

Used in conjunction with G. E.'s exclusive color coaxial antenna, the meter is the latest in a series of G.E. innovations designed to alleviate color tuning confusion. Another innovation in the 1967 color line is a new automatic, flesh-tone stabilizer that improves flesh tones for more realistic color viewing.

Furniture styles of the new G.E. models reflect the increasing interest in Spanish styling, as well as continued high demand for Early American and Danish modern.

A new 19-inch table model offers contemporary styling in a vinyl-clad steel cabinet with walnut grain finish. One of the new added convenience features is its roll-around stand.

Four 23-inch consoles in another series cover the range of popular furniture styles, in fine wood cabinetry; walnut veneer in Danish modern, maple in Early American, chery veneer in French Provincial, and pecan veneer in Spanish Provincial.

In the deluxe series are three 25-inch sets that feature the exclusive "hide-and-see" drop-down door. Models are walnut veneer in contemporary styling, cherry in Early American, and pecan in Spanish Provincial.

## State Can't Halt Shooing of Geese

MADISON (AP) — Wisconsin law may handicap its threat to arrest federal game agents who chase geese out of Horicon Marsh.

Harold Hettrick of the state Conservation Department, said hazing of geese in Wisconsin is a violation only when it is done during a hunting season and can be proved to aid hunters.

Hettrick, acting chief of the law enforcement division, said federal officials had indicated their hazing of Canada geese would be limited to the closed season before Wisconsin hunting starts Oct. 8 and he said the hazing probably would not violate Wisconsin law.

Last week James Smaby, Wisconsin Conservation Commission chairman, said state wardens would be ordered to arrest federal officials if they shooed the geese away from Horicon.

Hettrick said the department was keeping an eye on the situation to make sure the law was not being violated, but he added that no plans had been formed to make any arrests or actually interfere with the hazing.

Federal officials said they would start chasing the geese Thursday morning in order to increase the number of the birds in the flyways, but Wisconsin officials claim considerable crop damage will result if the geese are spooked out of the marsh.

The hazing issue is part of a running battle between state and federal officials over geese hunting regulations in Wisconsin this fall. State officials object to the lower quota for Badger hunters and say this, like the hazing, will result in flocks of geese gorging in farmers' cornfields, particularly in the Horicon area.

Mercury Switch, Stopwatch

# Electronic Device Helps in Catching Unwary Speeders

Everyone knows what radar is and does.

It's that thing that police are always using to catch unwary speeders.

Radar, however, often gets blamed for catching speeders who actually were 'caught' by another device. The device, used extensively this summer by Appleton police when their radar system was in for repairs, consists merely of a stopwatch device which determines whether a driver travels a short distance in too quick a time.

The device is simple, police insist, unlike the more complicated workings of a radar system.

Two tapes, or rubber hoses, are placed a short distance apart on the road to be surveiled. When the motorist's vehicle hits the first tape, a mercury switch starts a stopwatch, which has been located where the policeman stands guard.

The watch continues to run until the front wheel of vehicle goes over the second tape, which point the watch is stopped. An easy reference is available on the watch's dial for the patrolmen to determine whether the driver was exceeding the maximum limit.

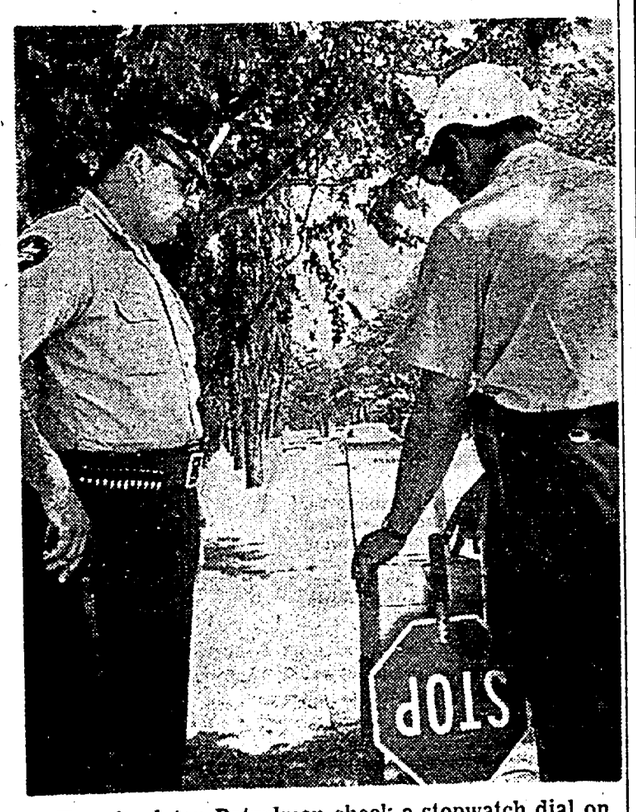

In Appleton, police place the two tapes about 68 feet apart, although the device is arranged to work precisely at 66 feet. Police "give" motorists the extra two feet normally, rather than split hairs and make an arrest for a 1 m.p.h. speeding violation.

Thus, while a motorist would travel about 66 feet in one second if he were traveling 45 mp.h., he could be doing a couple miles per hour faster and still not reach the second tape in less than the allowable one second.

Police, warn, however, that motorists should not try to test the generosity of police, who admit that a "benefit of the doubt" for the motorist is the only fair thing to do. Also, less complaints are made by motorists when they are told they were traveling 40 in a 25 zone. They thought they were traveling 42 or 43, which might net a larger fine.

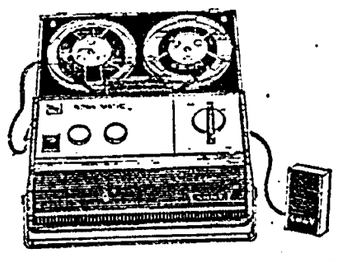

Police have said the only way the device can fail if for the stopwatch to be defective, but the watches are checked frequently to make sure there is no deficiency. If there is any defect in the system, they say, it is to the benefit of the speeding motorist, although even then it's quite minute.

Which is about as much a benefit as the speeder deserves, if any at all.

Two Appleton Patrolmen check a stopwatch dial on W. College Ave., as approaching cars start the timing mechanism by driving over a tape several hundred feet down the road. Patrolmen Frek Kerk, left, and Gary Kilby make sure the 25 m.p.h. maximum speed is maintained. (Post-Crescent Photo)

Receptionist Sandra Rushton works in front of the modern communications system in the new Appleton YMCA on Lawrence St. The equipment, installed by Mares Electronics, Inc., provides a complete music and announcements network through the building. (Post-Crescent Photo)

*'New York Philharmonic in Living Room'*

# Business 'Perfect' for Firm In Field of Communications

From a locked-in area at the state medium security prison at Fox Lake, one man can control the entire communications and electronic system of the prison.

If a guard in a certain area picks up a telephone .. and hesitates as much as 10 seconds before dialing, a prison-wide alarm will sound.

If an object weighing more than 50 pounds gets within three feet of the outside wire fence, a guard inside can tell that an escape may be in the offing and where, within 200 feet along that fence, it can be met.

But all electronic devices at the prison were not installed for security reasons. Prisoners with a bent for electronics, for instance, are able to operate their own radio station, complete with disc jockeys. Hopefully, the inmates will be able to put such experience to good use when they get out.

The electronics system at the prison is one of many installed by the Appleton firm of Mares Electronics, Inc. The firm specializes in "custom-making" communications networks in schools, industries, hospitals and the like, but every so often has the chance to install "gimmicks," as some of the prison devices may be classified.

**Annual Increases**

Harold D. Mares, president of the company, admits the rise to success in his field has been astronomical. "Business is perfect" he says of the field he began in Appleton only nine years ago. The "business" has listed 30 to 35 per cent volume increases during each of the previous five to six years, Mares said.

While Mares Electronics specializes in serving the industries and schools with communications systems, there also is somewhat of a demand for its services in private homes. Last year Mares said, six high fidelity systems were installed in Appleton-area homes, with the starting price set at $2,500 each.

"We can practically reproduce the New York Philharmonic in the living room," Mares said of the admittedly "real exclusive" systems. One home recently had equipment installed which cost $8,000. "The equipment is the Cadillac of the industry," he added.

Mares Electronics serves a 23-county area, bounded around Fond du Lac on the south and Michigan on the north. More than 200 sound systems have been custom-made by the firm, with most of them installed by Mares.

**Business Directory**

A partial list of companies serviced by Mares in Appleton alone would read almost like a business directory: Aid Association for Lutherans, Appleton Sewerage plant, Appleton Coated Paper Co., Appleton Public Library, Appleton Police station, Butte des Morts Country Club and right down the alphabet.

Lawrence University has Mares-serviced equipment in its football bowl, recently restyled Memorial Chapel and Music-Drama Center. Lambeau Field in Green Bay has a system installed and operated by Mares. Kimberly High School, termed one of the finest school facilities in the country, uses a complete communication system installed by Mares. The new Appleton YMCA contains complete communications equipment installed by the firm.

Mares Electronics' main job, Mares said, is to purchase the basic equipment, restyle it to fit the particular job and install and service it.

The firm has two full-time salesmen, four installation men and one serviceman. In addition, the firm provides a "shop on wheels," a small truck that allows servicemen to work as far as away as the Upper Michigan peninsula without having to return to Appleton for parts or working space.

One man has the job of just "calling on the existing market" in searching for new business. Others seek business in new establishments.

There are times when Mares Electronics is asked by the State Industrial Commission to check the ambiant noise level in industries to ascertain whether employes are working under noise conditions that might be harmful to their health. Employes at times complain to the commission of a fear of impending deafness and it is Mares' job to determine whether noise is so strong as to require a change in working conditions.

Noise in industry also must be considered by Mares when it installs a communications system that is supposed to be heard by all employes. Usually, Mares said, the system must produce a sound that is six decibels over the ambiant noise level at the plant. It is the firm's job, of course, to find out what the noise level is.

Music distribution is being taken care of in increasing numbers, Mares said, due, in part, to a federal government study that showed employe production to be higher when they have a chance to listen to music during working hours. Production can be increased 15 to 20 per cent, Mares said of the government study, especially in industries where women are employed.

Mares, not one to discount statistics, uses a sound system in his own office, staffed by two female employes. A visitor to the plant, situated just northwest of the Prospect Avenue-U.S. 41 overpass, will enter to discover soft music before he discovers anything else.

**Flashing Numbers**

Hospitals have been quick to pick up the new idea in communications. A quiet system of paging nurses and doctors has been installed in some hospitals by Mares. The system consists of flashing numbers in the hallways, each number designating the code of a nurse or doctor who is wanted.

Gimmicks, such as mentioned above at the prison, also are available in industry. Mares is installing one now thtat is similar to the prison warning system. If a watchman in the plant picks up a telephone, a warning siren will sound throughout the plant. The watchman may then use the same telephone device to make a plant-wide announcement of a fire, impending explosion or other emergency.

Closed circuit television sets also are used in industry, and enable one man to watch a gate or supervise operation of several machines. Many businesses use Mares-installed dial telephone systems for complete in-plant communications. In these cases, however, Mares must install its own telephone receivers, as the system is not connected to the outside Bell network.

The list of uses and number of users is practically endless, and Mares, who once ran the only purely - electronic firm north of Milwaukee, is quite happy to have gotten into the right business in the right place at the right time.

# Knowledgeable Stereo Fan Can Build Own Set

**Putting Together Component Parts Will Save Money**

While most people prefer to buy ready-built package stereo sets sold in most appliance stores, a growing minority, the "hi-fi-stereo bugs," prefers to assemble its own system with each separate component selected on its own merits.

A better system for the money usually is the result of components building but to be successful, the component fan needs to have a fairly good knowledge of how his system operates and what the capabilities of individual parts should be.

The average component system consists of a broadcast turntable, or a record changer, stereo power amplifier with built-in or separate preamplifiers, two speaker systems and as extras a stereo tape deck, AM tuner or stereo FM tuner.

Total cost of a good component system, dependent on just how high quality the builder desires and whether he wants kits or ready-built parts, can range in price from less than $10 to well over $10,000.

**Manual Turntables**

The component fan interested in a truly high fidelity system often will shun record changers for FM-boradcast quality manual turntables, ranging in price from $60 to $300. Those who prefer changers usually will spend $40 to $100, with some of the higher-priced models nearing the quality of lower-priced turntables.

In the Fox Valley, the component buyer has a wide range when it comes to choosing the heart of his system — the power amplifier. He may prefer what is known as an integrated stereo amplifier, a real combination package, including two power amplifiers — one of each for each channel and all on one chassis.

Speakers usually cause the average audio equipment shopper more problems than any other component, according to many hi-fi experts.

Here are some simple guidelines for shopping for a satisfying speaker system:

Do not ask the audio salesman about a speaker's frequency response. Five minutes of listening to a speaker will give you more information about it than you could possibly obtain from technical descriptions. Another question not to ask is how many speakers there are in a particular system. More speakers do not necessarily make for a better system.

Speakers always should be compared at the same loudness . . . direct comparisions will almost always cause the louder of two speakers to sound better. When judging a speaker, make sure you near a representative sampling of musical material — including solo piano and voice as well as large-scale orchestral music. Spectacular records, particularly discs and gimmick records, give you little or no basis for critical comparison of speakers.

The first impression of a speaker — whether it is bright, dull, rich or thin — may be based on the characteristics of the recording, not those of the speaker. It is sugested you listen to more than one kind of program material before you dismiss any speaker for sounding bad.

# Black-and-White Film Leaving Movie Scene

***Still Used for Special Moody Effect; Most Hollywood Features Now in Color***

By BOB THOMAS

HOLLYWOOD (AP) — The current movie world? Color it many - hued. The black - and white film is becoming as extinct as the nickel cup of coffee.

Every feature movie being shot in Hollywood this week is in color. With one or two exceptions, all American films in production abroad are in color. A survey of major companies discloses only six black-and-white movies among those in current release, completed or in production.

Not too many years ago, film companies made a big thing of advertising that a movie was in color. Nowadays it's taken for granted that virtually all except art-house movies will be tinted.

**TV The Cause Again**

What caused the decline and fall of the black and white movie? One of the principal causes is the same factor that has brought other changes to the film industry: Television.

Says a TV official: "All three networks are in complete color this season, and our major entertainment is feature movies — five of them on prime time each week. Our viewers would feel cheated if we played a black and white movie.

"The movie producers have gotten the message. They know their features in color will be much more valuable for resale to television."

Producer-director George Seaton cites other reasons for the swing to color. "In Germany, a color film automatically draws a 45 per cent rental while a black and white film gets only 43 per cent. The same formula applies in other countries, and it can make a big difference in a total gross.

"Also, drive-in theaters prefer color films, which show up more clearly on outdoor screens. Dark, moody black-and-white films tend to become obscure in drive-ins."

Critics have long argued that the garish hues of film color mitigate against dramatic mood. It is significant that the year's biggest dramatic hit, "Who's Afraid of Virginia Woolf?" is in black and white.

Producer Ernest Lehman explains the reasons. "I felt that the drama would have played differently in color; it would not have had the same power and realism. Dialogue, somehow sounds different when the film is in color.

"Since the action took place entirely at night, there seemed little reason for color. Also, I think Elizabeth Taylor would not have looked quite real in color; the makeup we had to use to age her would have showed."

Color advocates argue that life itself is in color, and that black and white photography is unrealistic. They also point out that the once-brilliant tones of color film can now be muted for effects of mood.

George Seaton expects that the black and white film will remain with us, and rightfully so. Says he: "Color is expensive; it adds about 25 per cent to the cost of a movie."

# WLUK's New Studio Geared To Aid Color

## Completion Expected In Late November At Site Near Arena

GREEN BAY — A television studio "geared entirely to the color concept" is nearing completion just east of the Brown County Veterans Memorial Arena.

The building, being constructed by WLUK-TV, Channel 11, will more than quadruple the floor space at the station's present working area, now situated in a location on Cherry Street and another on Madison Street.

Planned for incorporation in the building, which is expected to be completed in late November, are the latest facilities for local color projection, including equipment for immediate local showings of color movies, video tapes and advertising and other slides.

According to WLUK's chief engineer, Marsh Williamson, the location near the arena was planned with the hope of using arena facilities for live telecasts. Also available on land owned by the parent Post Corp. of Appleton is surrounding acreage which would permit an "outside studio," Williamson said.

### Lighting System

Williamson cited a new and larger lighting system and the tremendous increase in floor space as the two most favorable attributes of the new station. Extra lighting is required for color productions, he said, and the room and lighting units themselves will be available in the new building.

The building will contain three floors, with two above ground level. The upper floor is designed for office space, the ground floor for production studios and the basement level for news and film processing, storage and wire access areas.

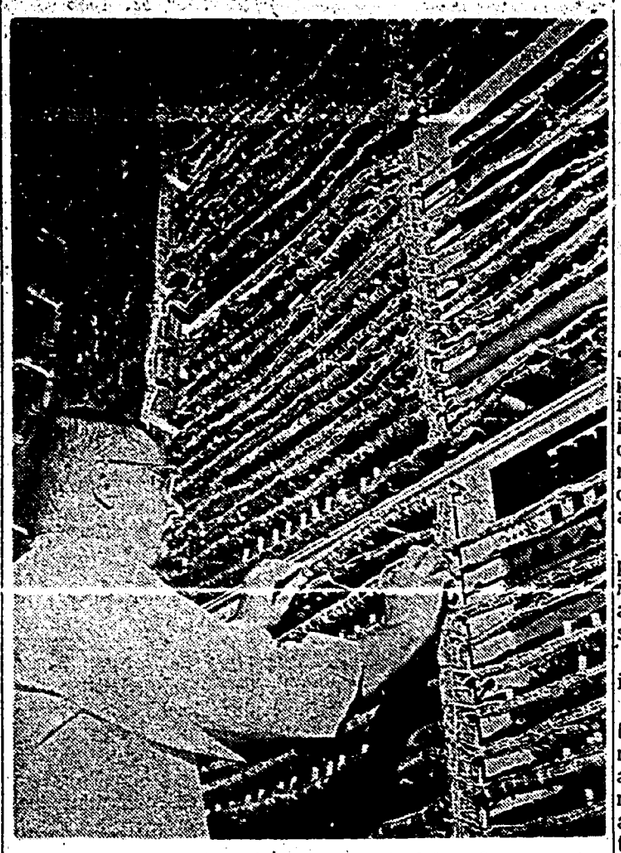

The total floor space in the building will be 25,000 square feet, Williamson said, compared to the 5,500 in the present facilities. The studio alone will be twice as big as the present one. Its 50 by 70-foot measurements will make it considerably larger than the other Green Bay stations and even compare favorably with studio space in larger cities, Williamson added.

### New Turntable

Planned for the studio is a turntable to be 20 feet in diameter, permitting stage settings and advertisements to be set up in the studio while it is in use. Pushing a button will rotate the table to put the new setting in place before the cameras.

The micro-wave "dishes" on the roof of the building, used to transmit pictures from the studio to the transmitter on Scray's Hill east of De Pere, will be concealed in a large sign, Williamson said. The dishes normally protrude above the building, without any cover.

The building should be able to accommodate WLUK for many years to come, but "if ever needed," Williamson said, acreage on the present site provides plenty of room for expansion.

Wisconsin Telephone Co.'s supervising foreman in Appleton examines some of the great quantities of electronics equipment on the plant's fifth floor. The equipment here is for long-distance switching, which automatically enables a caller to "find" an open line immediately to any place in the country. (Post-Crescent Photo)

*Eventually Plans Complete Automation*

# Wisconsin Telephone Co. Fast to Find Use for Latest Electronics Equipment

Wisconsin Telephone Co. is "just beginning to tap all the possibilities" for using electronic devices and systems, according to an official of the Appleton office, but already has a vast network of wires which enable a customer to talk practically anywhere at anytime.

Nation-wide, the Bell Telephone Co.'s system of automatic instantaneous hook-up reaches about 98 per cent of telephone subscribers.

What it means is the following:

A person can pick up a telephone in Seymour, dial the number "one," the three-digit area code and seven more numbers and be connected with a party, for instance, in a small town in California.

### 'Tied Up' Line

A "problem" might arise in that a line is tied up somewhere along the way, but this doesn't faze the system. When the impulse leaves Seymour, it goes to Appleton via one of many open lines. If no open lines are available, it may go to Green Bay instead.

From Appleton or Green Bay, the impulse will be routed to Los Angeles through Milwaukee, automatically. If, however, no lines are free on that route, it may go to Madison, to Chicago, or practically an infinite number of combinations before reaching the small town outside Los Angeles.

The important thing to the caller is that there is no noticeable delay during all the switching. During one split second, an electronics system may discover that the Milwaukee-Los Angeles, the Madison-Los Angeles, the Chicago-Los Angeles and perhaps the St. Louis-Denver lines are all busy. Such an occurance is not likely with the great number of lines connecting these large cities, but, if it were to happen, the "system" would keep trying until it found a way to get the call in Seymour connected with the person outside Los Angeles.

### Automatic Connection

The system works as the caller is dialing. When the digit "one" is dialed, the Seymour caller is connected automatically with the fifth floor long-distance switching equipment at Appleton. The next three numbers would be the area code. While the caller is dialing the final seven digits, the system already would have begun trying to find that open lines to Los Angeles.

The line would no doubt be "found" well before the caller had finished dialing. Chances ar that the system had decided on its "first choice," that is, Seymour - Appleto - Milwaukee Los Angeles, but it may have gone another way.

The firm is always looking for ways to improve its service. Already it is using new transistor equipment in carrier systems to provide power for calls. Vacuum tubes were the order of the day previously, but they frequently burned out, so the new means was sought. A transistor tube has never burned out and company officials can't even begin to estimate how long one will last.

The transistorized equipment also allows for better service by the company, as one "bay" contains 600 channels for calls, whereas previously one contained 40.

### Self-Monitoring

In addition, the new equipment is self-monitoring and automatically sends out a warning when something has gone wrong. Use of the old vacuum tubes, necessitates a check every three months to see if the system contains enough power to get the voice through.

Possibilities are unlimited for the telephone companies to expand, especially with the advent of transmission through use of satellites. While Harold Bartell, supervising foreman at the Appleton telephone office, admits that solid state transmission through wires and undersea cables presently is the best means of sending a call, extended use of the overseas lines may force a caller's call to be routed through the "second choice," the satellite.

Wisconsin Telephone Co. has plans calling for an eventually completely electronic office, containing no moving parts. The Appleton office changed to the dial system in 1948 and has been adding on since. Demand will determine the exact extent of further advances, Bartell said.

*Less Jittery*

# Content More Likely if Spouse Smokes Cigars

If a girl is looking for a contented married life, she'll do better to wed a cigar smoker than a cigarette smoker. The man who enjoys a stogie is less jittery than chain-smoking cigarette addicts, and not as dull and stodgy as the pseudo-philosophers who puff away on pipes.

Secretaries who use a pencil to dial their telephones are usually the biggest chatterboxes in the office, but I can't figure out why.

### Frustrated Cops

Scratch a detective and you'll find an actor. There are more frustrated Hamlets among Manhattan detectives than among the membership of Equity, the theatrical union. And some of them are better performers than those who get huzzas on Broadway.

The ambition of every tuna in the ocean must be to make a luncheon sandwich of a housewife some day.

The only man in America who can fool more people than a smart politician is a dumb weather forecaster.

The plots of television programs have become so predictable that the only fun left in watching the idiot box is to see how the commercials come out.

### Small Wardrobes

Half the guys you hear claiming they lost their shirt in the stock market probably never had much of a wardrobe in the first place.

Never lend money to a man under 40 who gets his fingernails trimmed by a barber shop manicurist. He's a bad risk.

Why do so many modern executives, in signing their names, leave an undecipherable scribble that looks like the marks left by a cskittish heh? They pompously say it's because of the pressure they're under. Yet the signature of Abraham Lincoln remained clear and legible throughout the terrible ordeal of the Civil War.

It's time for a man to go on the wagon when he starts trying to place long-distance calls through a fire alarm box.

An old-fashioned husband is one who can remember when his wife took the cake out of the oven instead of the refrigerator.

Nothing looks as lonesome as a backyard swimming pool on a rainy day in October.

# Obsolete Laws Often Stay on Books Despite Uselessness

Over a period of 42 years, the crime committed most often in Washington, D. C., was selling ice cream cones.

In 1921, as a health measure, the sale of ice cream in less-than-pint containers was forbidden. Yet, for years, millions of less-than-pint cones were sold in brazen defiance of the law. They were licked in plain sight by residents, tourists, congressmen, perhaps even Supreme Court justices. Not until 1963 did Congress finally end the scandal by repealing this obsolete law.

In Elko, Na., crime ran even more rampant. A 1918 ordinance, passed during the great flu epidemic, required everybody to wear a flu mask in public places. Not until 1964 did the city council let people breath easier by revoking the ordinance.

Don't laugh! In Wisconsin a statue exists which requires the owner or manager of any public building ro provide cuspidors which must be cleaned and disinfected at least once a day. A violation of this law is punishable by a fine up to $100 or a jail sentence of not more than six months.

Hundred of such laws remain on the books in various communities around the country. How does this happen?

The reason is simple: there is far more incentive to put a law on the books than to take it off. As the original stimulus for a law fades away, people gradually lose interest in it. No one obeys, no one complains, no one prosecutes.

Yet, these dead letter laws may do real harm. For one thing, they may breed disrespect for law itself. Accordingly, as part of a broad drive to modernize criminal law, bar associations and other attorney organizations are trying to clean out these legal anachronisms.

It is not an easy job. But it is a job well worth doing. No law should remain on the books for no better reason than that it has been forgotten.

First in Phonograph Industry

# Portable Stereo for Listener 'On the Go'

PITTSBURGH — Exciting, on-the-go stereo listening takes on a new dimension this season with portable sets utilizing Alcoa extruded aluminum components — a "first" in the phonograph industry.

Providing lighter weight and presenting an attractive, slim, modular look RCA Victor's Apartment and Mark I stereo instruments — the latter combining an AM-FM receiver and a phonograph — are being offered as the top portable line in the 1967 market.

The record players' cabinets are produced from three aluminum extrusions, and two auxiliary speaker boxes are made from a fourth.

The main case and two speaker frames of each model are converted into rectangular boxes by mitering, bending and welding the one open corner of each extrusion. Additional tack welds are added at the other corners for rigidity. The parts are pre-punched to accept accessory parts, such as latches, handles and feet.

**Cemented in Place**

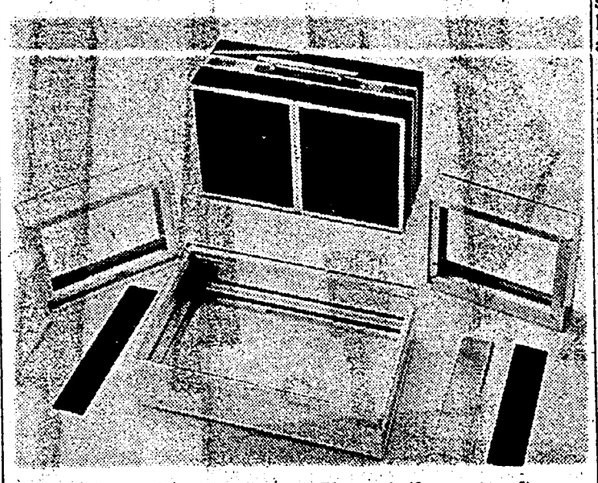

Inside the main case are two aluminum extrusions cemented in place to accept the mounting of the record changer, turntable and controls.

The aluminum frames are polished and anodized, with selected areas covered with black or walnut-grained vinyl before hardware accessories are attached. At RCA's Indianapolis plant, final assembly includes attachment of speakers to the back of the aluminum frames, and installation of record changer, control panel and related electronic components.

RCA chose aluminum extrusions for both appearance and functional requirements. "In appearance, we have the sharp details of the three-dimensional design configuration with a rich satin finish," noted Tucker P. Madawick, RCA's manager of industrial design. "In function, we have the combined structural rigidity necessary for support of the total instrument as well as the added bonus of low-cost tooling."

Weight of the aluminum extrusions in each model is about 16 pounds. Total weight of the set is only 42 pounds. For moving or storing, the speaker boxes are attached to the top of the set, giving an appearance of fine luggage.

Added features of the sets include a six-speaker sound system, with each speaker unit housing a nine-inch duo-cone and two 3½-inch tweeters; 24-watt stereo amplifier, turntable speed adjustment, and magnetic tone arm lock.

**These Basic Aluminum Shapes** (foreground) are transformed into the attractive stereo portable phonograph (background) which resembles a piece of fine luggage. The main record changer housing (center) is composed of three extrusions and the speaker cases of one. The black anodized parts are used in the set's interior. The small pieces are used to mount the record changer and related electronic components. The aluminum is by Alcoa; the stereo by RCA Victor. (Alcoa Photo)

# 'TV Room' May be the Bedroom

Color television is on the move — upstairs, even out of the house. For behind the scenes of the current color boom a whole new set of viewing patterns is starting to emerge, one in which the bedroom, not the den, may well wind up as the new "TV room."

Given the choice offered by a portable color set, today's sophisticated viewers are inclined to let the routines of living dictate where and how they'll watch television. More often than not it turns out the lion's share of viewing time is split between bedroom, dining room and kitchen.

The trend to multi-room viewing, started by some of the smaller black-and-white portables, began moving into the color field late last year.

Among families owning one or more other sets, the color portable seems likely to wind up doing permanent duty in the master bedroom.

Other families let the children take turns keeping it in their rooms. Some reported putting it in the guest room when entertaining visitors.

Now We Salt Hurricanes

# Control of Weather An Ancient Pastime

NEW YORK (AP) — People have been trying to do something about the weather for a long, long time.

Undeterred by the continuing prevalence of hurricanes, floods, droughts, unmanageable snowfall and heat waves, they are still trying.

American scientists who hope to salt a hurricane's tail with silver iodide may fairly claim precedent extending back into the mists of time.

If Greek mythology is to be credited, one weather-warper who really had it made was Aeolus, the god of the winds. Aeolus gave Ulysses winds of all kinds neatly tied up in a leather bag to help his boats along on the Odyssey.

More recently, the Aborigines of the Greater Antilles and the Bahamas — they were called Arawaks — had a wind god named Hurukan, from which came the word hurricane.

The Arawaks believed the hurricanes to be Hurukan's children, and that if he were properly propitiated he would keep the kids under control.

Finnish wizards of old used to sell wind to hardy mariners. The wind was tied up in three knots. Let go the first one and a nice, moderate wind came up. Release the second and there was half a gale. And mind the third: a hurricane.

The tale is told of making wind in New Guinea by striking a wind-stone with a stick — once over lightly for a friendly breeze, a hard rap for a real blow.

Scottish witches raised the wind by dipping a rag in water and beating it a magical three times on a stone, with a chant:

"I knok this rag upon this stane

"To raise the wind in the divellis name,

"It sall not lye till I please againe."

Natives of Tierra Del Fuego — on the tip of South America — throw, or used to throw, sea shells against the wind to make it stop. From the looks of the country, this technique could stand improvement. The wind blows so much in Tierra Del Fuego the trees grow on their knees.

# Colorful Picture Is Not Produced By Simplicity

## Tubes Made in Rooms as Clean As a Hospital

Whether you already own a color television set or are giving thought to buying one in the future, you may be fascinated by some of the complex and delicate operations that go into making that colorful picture on the screen.

Mass production of a color TV picture tube is an extremely exacting process. In contrast to the single electron "gun" which lights up the phosphors on the inside face of a black-and-white tube, a color tube has three guns to control the electron beams that produce the three primary colors — red, green and blue — on the face of the tube.

Each of these guns must send its electrons only to phosphors (in this case, tiny dots) that will respond by producing red, green or blue at the right intensity. If, in certain areas, electrons from the blue gun strike red or green phosphors, the various colors in those areas will be impure.

The more than a million phosphor dots on a color TV tube screen are placed to an accuracy of 10 microns — about 4-10,000 of an inch. The more accurate the placement, the better the final picture.

### Hospital Clean

Color picture tubes, for example, are manufactured in a room that's as clean as a hospital operating room. Employes entering the room must walk over a shoe-scrubber and through an air shower to remove dust! The water used in the highly automated manufacturing operations is treated and filtered to make it 10 times purer than double-distilled water.

The million-plus color dots are put on the face of the tube by a complicated photographic process. Rigid quality controls include more than 50 electrical tests before the tube leaves the factory.

Color TV executives are confident of the future of the color TV industry. This year, it is estimated that the industry will top the 3 million mark in color tube sales. Before the end of the 60s, annual industry color sales of 5 million-plus can be anticipated.

The Florence Is a New Admiral 25-inch color television set with tilt-out controls and power tuning. Styled in Italian provincial with pecan veneers, this model has a suggested list price of $695.

*Consoles, Portables*

# Phonograph Sales Enjoying Big Year

Television is not the only attraction these days in home electronics, as stereo high fidelity phonographs also are enjoying strong business.

A year ago portable phonographs were leading the stereo sales parade, possibly a reflection of purchases by youths and young marrieds. This year, the tide has turned and consoles are ahead of portables. As with color television, careful attention to cabinet styling and popular furniture finishes is paying off in the public's interest in the long, low stereo phonograph consoles.

The advent of transistorized "solid state" engineering in stereo phonographs has proved popular to music lovers. Tuning conveniences, such as the location of an audio master control center on the inner side of the cabinet lid, making stoop over tuning in the cabinet well unnecessary, also have proven popular with hi-fi fans.

Even the venerable and valuable home radio is getting increased attention from home electronics manufacturers' design and engineering staffs. Transistorized solid state units are frequently replacing the vaccum tube radios.

With these radios, there are no tubes to burn out. Because transistors require very little operating power, heat is reduced considerably over that generated by tube sets. This reduction in heat helps increase the reliability of components.

Cabinet styling also is constantly being given a fresh approach in radios and neater, slimmer units are resulting. The furniture look of wood veneer and hardwood solids radio cabinets aso is proving popular with today's home decorators.

## National Temperance Group Elects President

CHINA LAKE, Maine (AP) — Dr. Merrill McFall of Columbus, Ind., has been elected president of the American Council on Alcohol Problems, a temperance group.

## VFW Having Trouble Giving Away Stickers Backing War Effort

SOUTH KINGSTON, R.I. (AP) — The Veterans of Foreign Wars ordered 1,000 stickers reading: "Back the Boys in Viet Nam."

But according to Michael J. Signorelli, VFW post commander, only seven of 80 business firms contacted put up the stickers. Signorelli said the reason given was fear of offending shoppers.

*Without Loss of Fidelity*

# Device Made by 3M Turns Whole Ceiling Into Speaker

Do not be surprised if the next time you stop at your friendly tavern, the bar starts making noise like a record player. It is not necessarily time for you to leave.

Many taverns, offices and stores are picking up a new idea in electronics developed by 3M Corp. of Minneapolis. The device manufactured by the firm is an object about the size of a softball split in half. It is screwed into almost any large object — about the only exceptions are glass and stone — and a wire is attached to an outlet on a phonograph.

What happens then is somewhat startling, as the entire object the device is attached to acts as if it were a phonograph speaker.

### Attached to Ceilings

Taverns have picked up the idea and turned long bars into speakers. Businesses are attaching the device to ceilings and walls and producing background music without any "speakers" out in the open.

The idea — "very unique," according to Isaac M. Merizon, president of Modern Business Machines, Inc., of Appleton, which handles the 3M line — is a new one this year.

Merizon insists that use of the device does not cost in loss of fidelity. Its range, of course, is limited, but a normal-sized office could utilize just one, whereas previously three speakers might be employed. It costs $24.95.

Another piece of background music equipment available at Modern Business Machines is a self-contained tape recorder, with a starting price of $350.

The apparatus, according to Merizon, "never wears out," thus allowing for an unlimited number of hours of listening. The tapes are entirely enclosed. When one is to be played, it is merely placed in position, much as you would put a record on a turntable.

The tape threads itself. In addition, if several are desired to be played in succession, they can be stacked one on top of the other, also as records are. When a tape is finished, it is "flipped" aside and the one atop it falls into place, threads itself and begins playing.

The tapes come complete with music on them, although selections can be recorded by an individual. As many as 17 to 18 tapes may be put on the recorder at one time, allowing for the equivalent of 200 to 300 long-playing records, all without changing.

## Accounting Class At UW Center

A University of Wisconsin Extension course in cost accounting as applied to manufacturing enterprises will be taught Tuesdays, starting Sept. 27, at the University of Wisconsin Fox Valley Center.

While the course, titled "The Use of Cost Accounting for Planning and Control I," will be geared primarily for those in manufacturing operations, people in government, hospitals and retailing may enroll with the consent of the instructor, Stanley Koziol of the UW Extension Commerce department.

Prerequisites for the course are an introductory course in accounting or equivalent practical experience and an understanding of financial statements. The course will run from 7 to 9:30 p.m. on Tuesdays through Nov. 22.

Among topics the course will cover are principles of accounting for cost control, basic records and procedures, problems of overhead costs and how to interpret and use cost reports. Fee for the course is $32. More information about the class may be obtained from the University Extension office at the Fox Valley Center.

# Black-White Sets Still 'In'

## New Line of Portables Cost Less Than $100

General Electric, which last year created a sensation in the color television field with a 24-pound portable color set, is now making news on the black-and-white front with a line of transistorized TV portables that starts at under $100.

GE says its new line of Trans-Portable receivers — three 12-inch sets and one 16-inch model — have been designed specifically to meet the diverse viewing patterns of today's more active Americans.

With transistorization, all the Trans-Portables feature instant warm-up and increased reliability. The leader model at $99.95 suggested retail is believed to be the first 12-inch transistor TV set introduced by a major U.S. manufacturer at a price under $100.

Next in line for the viewer who wants his television with him, regardless of where he goes, is a battery-operated model in ivory. The set comes with optional rechargeable battery pack and optional charger.

Still another 12-inch Trans-Portable is the ebony — colored, battery-operated set that adds convenience to maximum flexibility with a built-in charger and snap-on face cover.

Finally, for the viewer who wants all this and a larger picture too, a 16-inch set, in ebony, includes a built-in charger, dipole antenna, earphones and earphone jack for private hearing.

Emphasizing the new line's transportability, GE offers both boat and car mounting brackets as an added convenience. The boat mounting brackets are of non-magnetic, stainless steel with triple-chrome brass fittings, typical of the hardware demanded by boating buffs. A boat battery cable kit also is available for customized installations. And for use on sea or land vehicles, there is GE's unique auto-marine antenna.

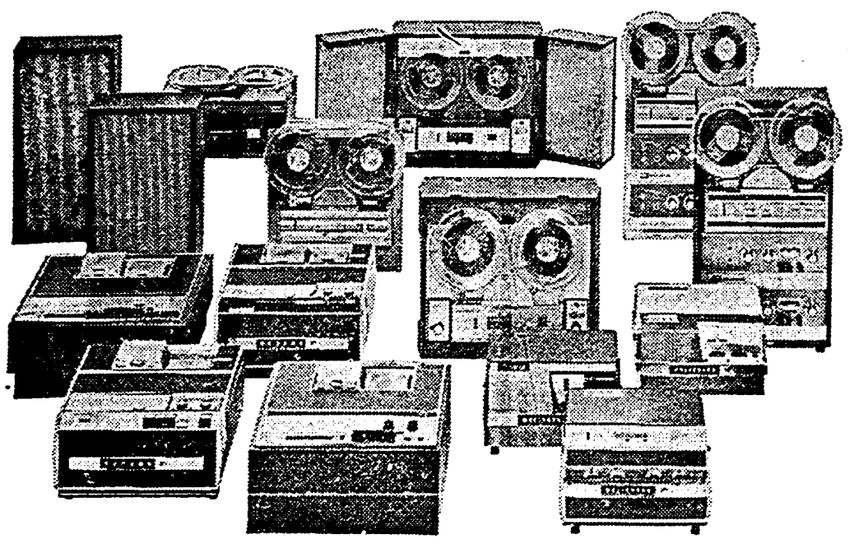

The three 12-inch sets weigh less than 15 pounds apiece, while the 16-inch model is less than 20 pounds.

# *A room of their own*

# To Grow In

BY JEAN OTTO
Post-Crescent Womens' Editor

A child's room is his own special home within the home. When he's just learning to develop friendships with youngsters down the block it's a place to play, to keep his toys, to learn neatness and to feel pride in caring for things that are his own.

Later, a child's room is a quiet place to study, a 'shelf' for stacking his hobbies, his interests, his dreams. A room that speaks his personality and fills his need is a sanctuary from the pressures of school competition and family bustle that every child needs occasionally, for it is only when he's alone that a child can find himself.

## *Should Serve Child*

Furniture designers and decorators are taking increasing note of a child's need, in our times of conformity, to find his own identity. A room need not be expensively furnished, or filled with costly knick-knacks. The point is that the furnishings be what the child needs and uses, that he feels they suit him, that he can be comfortable and himself in his own special corner. A room filled with things that require special care and cautious handling may look elegant when mother shows friends through the house, but it doesn't serve the child who lives there.

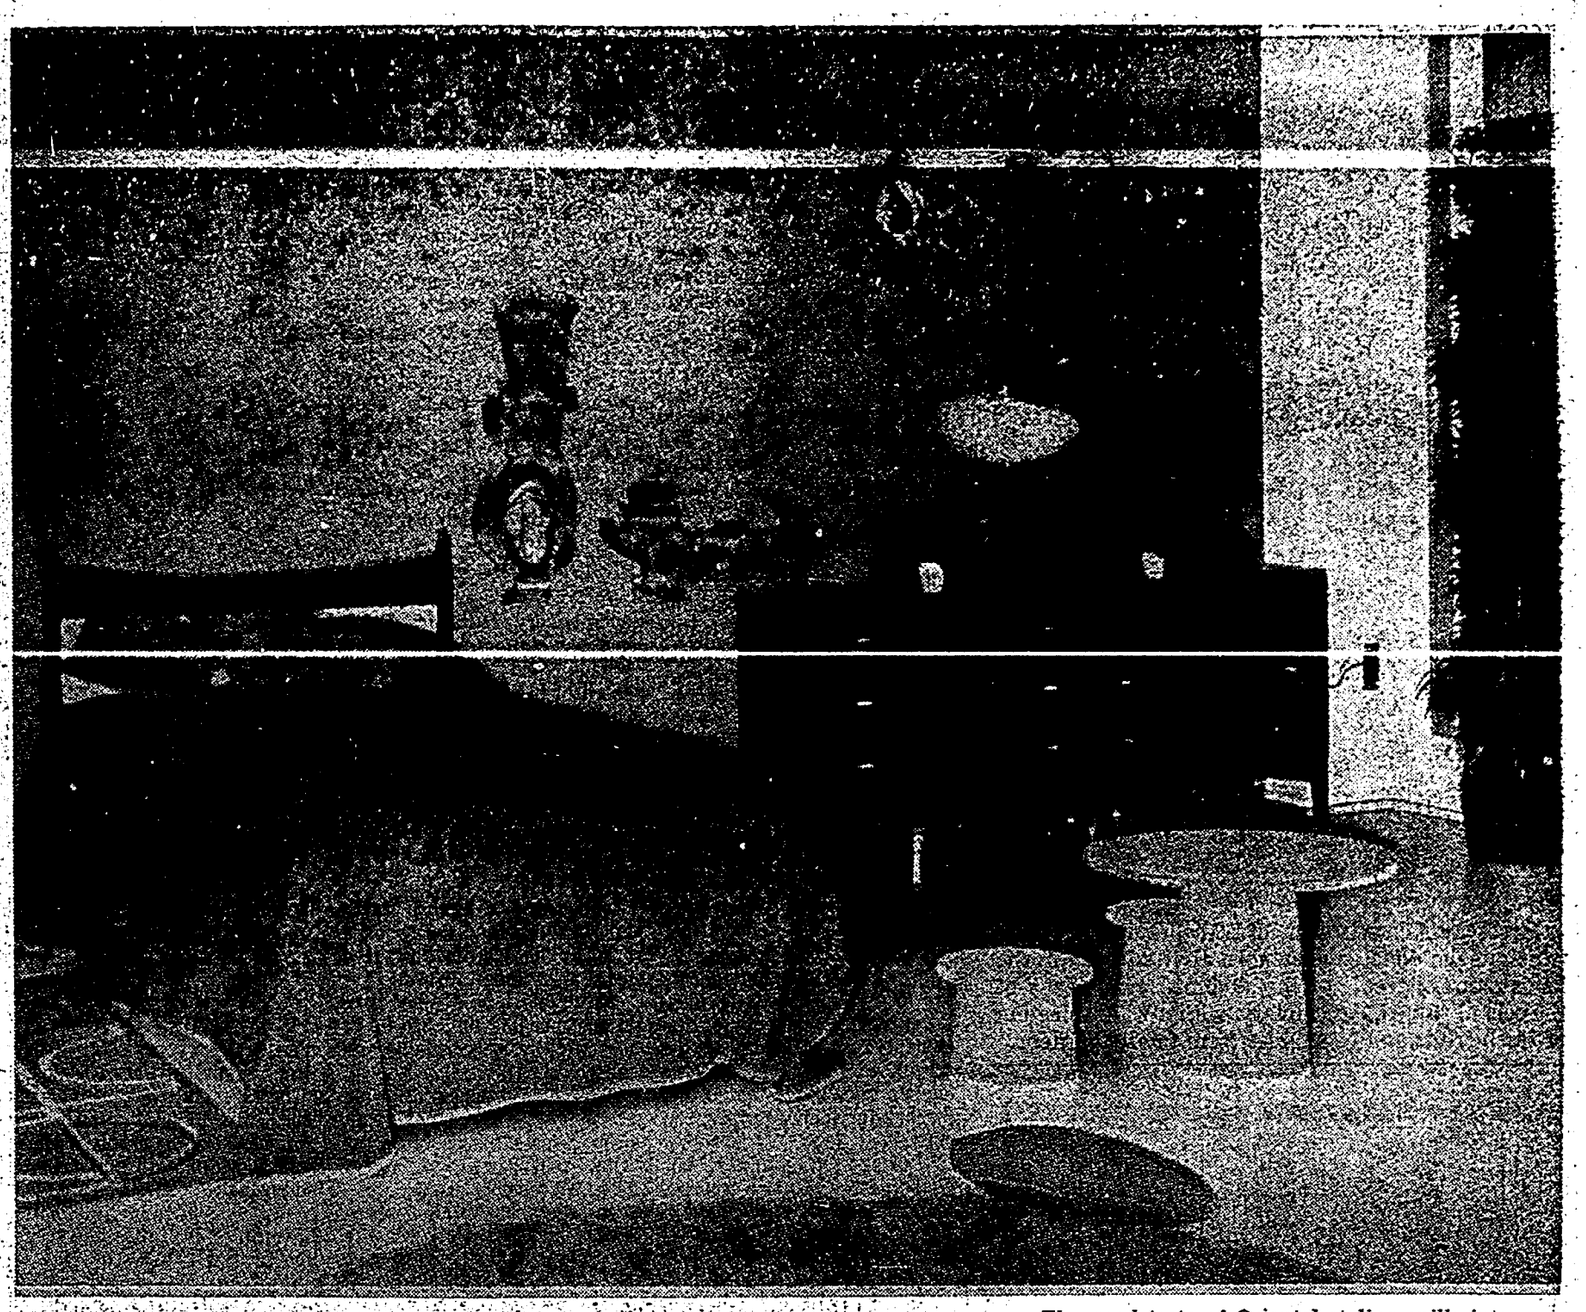

Important to remember when deciding how to furnish or redecorate a child's room are the size of the furniture pieces, how furnishings will adapt to his needs as he grows and his needs become different, and how easily the decor can be changed or freshened.

A child's room need not be without personality. Designers advise parents not to be afraid of color. Children like to be gay and vibrant shades can keep their spirits bright. Unusual combinations, such as pink and orange, or purple and blue, can give a child's room a look that is distinctly different and his own. Let him help decide. If he has a favorite color, make use of it somehow in the room.

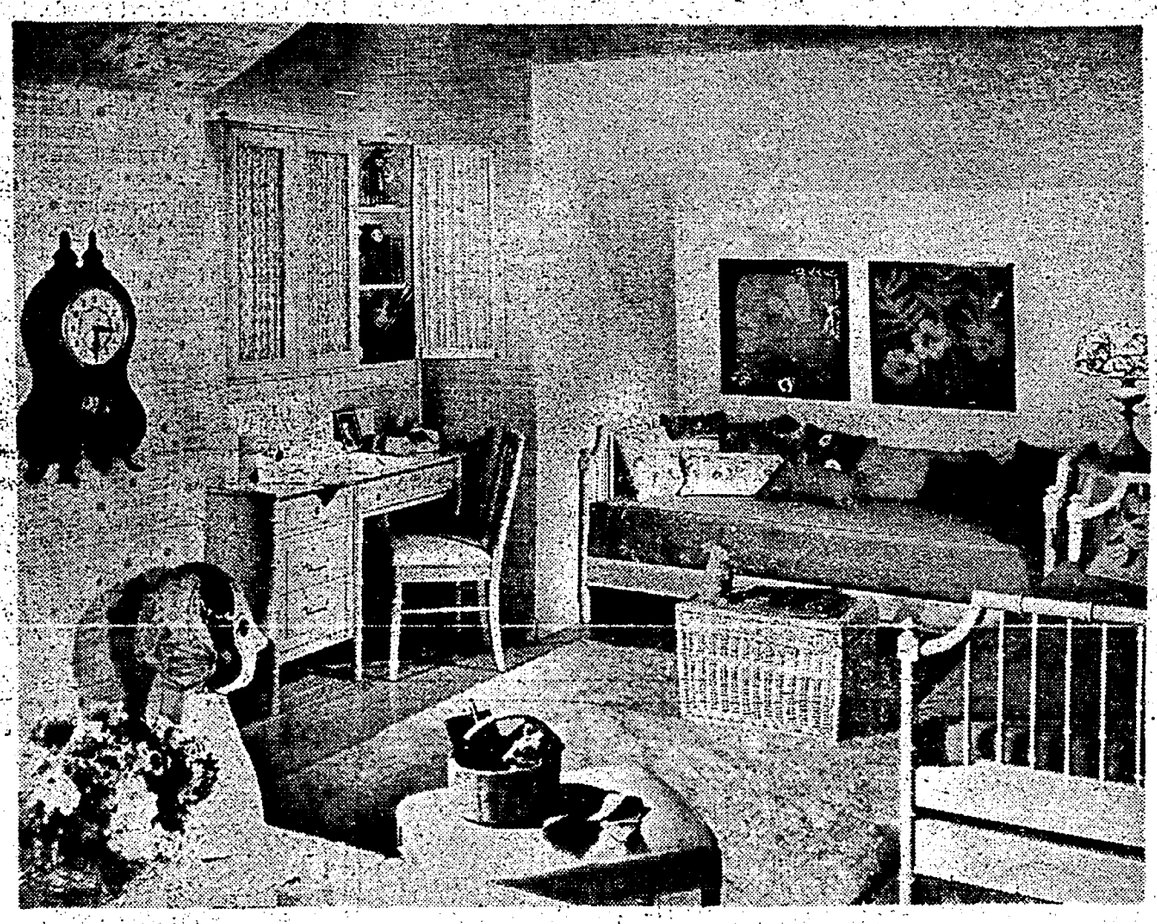

## *Flexible Use*

Choose furnishings that will easily convert to his needs through the years. If dad is handy with woodworking tools he might fashion some simple stools, such as the mushroom shapes, shown here, to serve as table and chairs. Such items are not so costly they cannot be discarded, or put to other use, as the child outgrows them.

Simple furnishings that can be accessorized according to the child's age but still serve their basic function of storage are the best choice. Lamps, pictures, bedspreads can all help change the look of a room as a child grows, while the furniture continues to serve handsomely through the years.

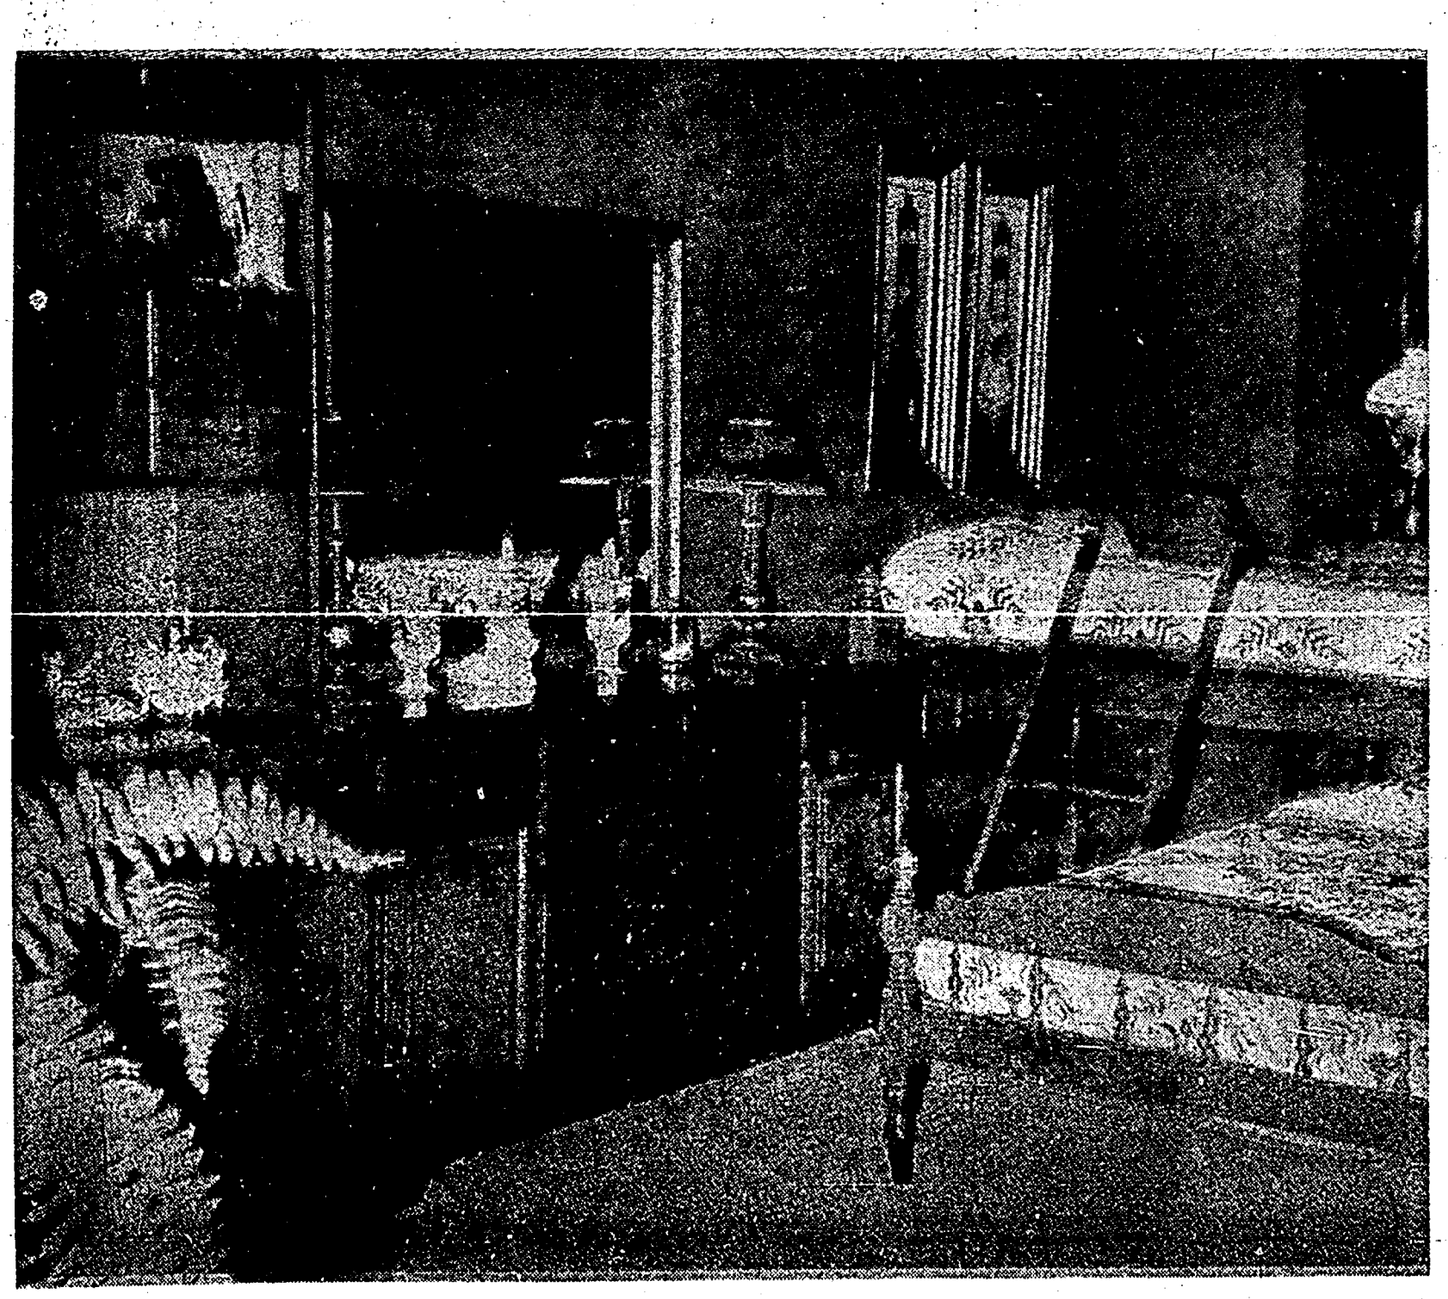

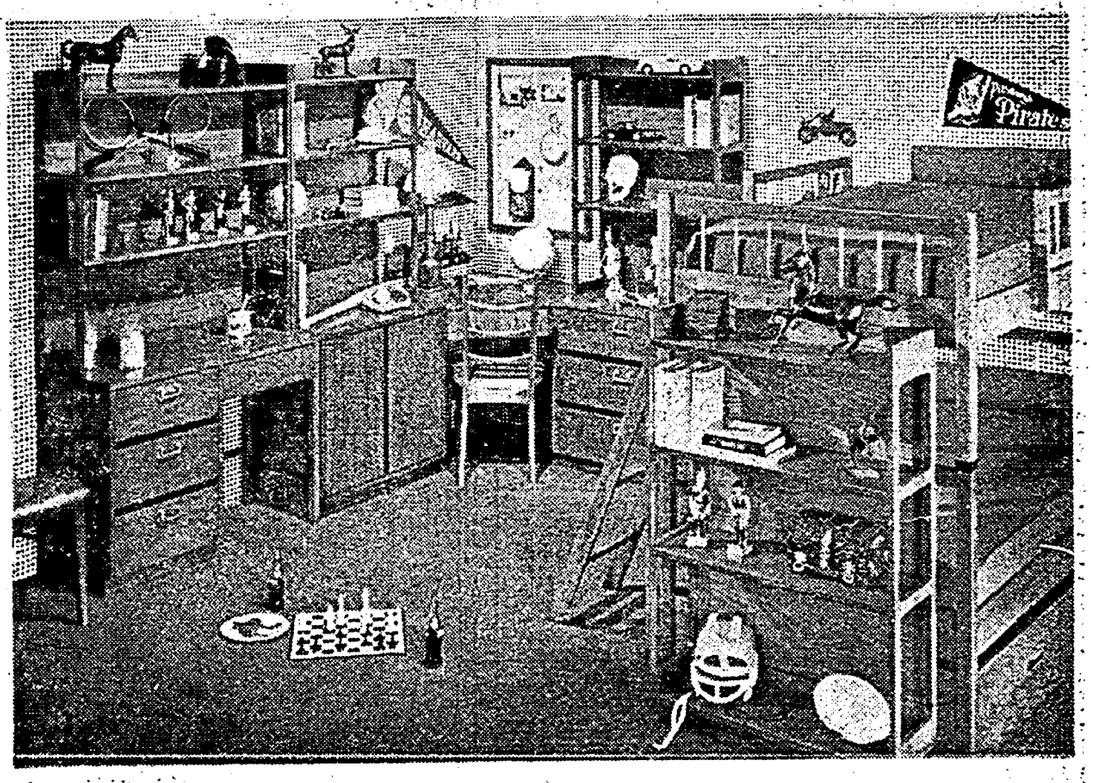

*The good taste of Oriental styling spills into the child's world in the bedroom setting above, styled by Childcraft and shown at the American Furniture Mart in Chicago. The bed headboard is caned, and the spread is felt. The shelves above the chest are pecan and a Japanese lantern follows the theme. The use of orange and pink is unusual and gay. Wall decorations can easily be changed as the child grows.*

*A room that sparkles with color will delight the heart of a girl. At left, lemon yellow furniture is trimmed with white; yellow, gold and white are used in the wallpaper; the floor is lacquered in peppermint pink; pillows are pink, yellow, orange and multicolor. Daybeds were the answer to providing seating space and room for an overnight guest. Everything in the room is washable. The furniture is part of the 'Allegro" collection by Thomasville Furniture Industries.*

Post-Crescent Color Photos

*Floor area is preserved in this room for a growing boy by making the best use of wall space. There is storage enough to please anyone, from bookshelves and desks to chests beneath the bunk beds. It is part of the Lenoir House group created for Young America.*

*A room that could accommodate a child from his early years right through high school was designed by Baumritter Furniture Co. in a solid maple collection it calls 'Kling'. The breakfront-desk combination provides storage and work space and the trundle beds take a minimum of floor room. The spreads are quilted Pennsylvania Dutch design.*

# Miss Grimes Plans December Wedding

Dr. and Mrs. William S. Grimes, 105 S. Meade St., have announced the engagement of their daughter, Joan Marie, to James Patrick Gallagher. He is the son of Mr. and Mrs. Thomas Gallagher, Groton, N.Y.

The couple plans a Dec. 31 wedding. Both are graduates of the University of Dayton, Dayton, Ohio. The bride-elect teaches at McKinley School, Appleton. Her fiance is attending Officers Candidate School, Fort Dix, N.J.

# Miss Mach Bride of F. J. Becher

NEENAH — Miss Judith A. Mach, Appleton, became the bride of F. James Becher, 1415 Henry St., at 12:30 p.m. Saturday at St. Margaret Mary Catholic Church. The Rev. Leonard Ott officiated at the double ring ceremony.

The bride is the daughter of Mr. and Mrs. Stanley C. Mach, Hilbert. Parents of the bridegroom are Mr. and Mrs. Florian A. Becher, Hortonville.

The bride chose Mrs. Ronald Mach, her sister-in-law as maid of honor. Bridesmaids were Mrs. Edmond Majewski and Miss Suzanne Becher.

Ronald Mach, a brother of the bride, attended as best man. Groomsmen were Edmond Majewski and Vincent Mach. Gary Mach and Jack Seegers shared ushering duties.

Kemps Photo

*Mrs. F. J. Becher*

The couple greeted guests at a reception at the Terrace Motor Inn, Appleton.

The bride, who attended Wisconsin State University-Whitewater, is employed at Aid Association for Lutherans, Appleton. Her husband is with American Can Co.

After a trip to the southern states, the couple will reside at 1415 Henry St.

Pechman Photo

*Mrs. Verstegen*

# Double Ring Ceremony Performed

KAUKAUNA — Miss Lois Mae Van Dyke became the bride of Gary E. Verstegen at 1 p.m. Saturday at St. Nicholas Catholic Church, Freedom. The Rev. Alfred Hietpas officiated at the double ring ceremony.

The bride is the daughter of Mr. and Mrs. Alvin H. Van Dyke, route 1, Kaukauna. Parents of the bridegroom are Mr. and Mrs. Ernest Verstegen, 717 N. Wilson St., Little Chute.

Mrs. Patrick Landreman, a sister of the bride, attended as matron of honor. Bridesmaids were Miss Janet Verstegen, Miss Anna Baeten, and Miss Christine Steger. Miss Ann Verstegen was junior bridal attendant.

Mr. Patrick Landreman, brother-in-law of the bride, performed the duties of best man. Groomsmen were Thomas Schuler, Roy Vandenberg, and Richard Van Dyke.

Edward Diedrick and Roman Salm Jr. seated guests.

The couple was honored at a reception at Hotel Seymour, Seymour.

The bride, is employed at Conkey's Book Store, Appleton. Her husband is with Gidings and Lewis Machine Tool Co.

After a wedding trip to northern Wisconsin, the couple will reside in Kimberly.

# Couple to Reside in Milwaukee

KIMBERLY — Daniel G. Skell, son of Mr. and Mrs. Marti Skell, 226 Lincoln St. claimed Miss Connie Faye Green as his bride Saturday in a noon nuptial ceremony at St. Patrick Catholic Church, Madison. The Rt. Rev. Msgr. Peter J. Skell, uncle of the bride, officiated.

The bride, daughter of Mr. and Mrs. Walter Green, Sextonville, chose her sister, Miss Diane Green, as her maid of honor. Bridesmaids were Mrs. Paul Nelson and Miss Mary Jane Skell.

Thomas Skell was best man for his brother. Attending as groomsmen were Walter Green and Robert Schumacher. Ushering duties were performed by Fred Feivor, Maurey Skell and LaVerne Acketz.

A reception was held at the Twilite Club, Madison. After a honeymoon in the southern states the couple will reside in Milwaukee.

The bride is employed by Bon Don, Inc., Madison. Her husband, a graduate of Wisconsin School of Electronics, Madison, is employed by Johnson Control, Milwaukee.

# Winter Lunches Begin in Summer

Mrs. Ray Albrecht and Mrs. Walter Falck decide which of the donated vegetables they will use in the day's menu. Parents of the students and friends of the school supply the cafeteria with a wide selection of fresh fruits and vegetables from family gardens.

BY LUCY CRAIG
Post-Crescent Staff Writer

"No, dressing, please!"

"May I have lots of peas?"

"Gosh, it sounds like we're in a restaurant, not a school lunch room." These are typical statements, heard every day in the cafeteria of Fox Valley Lutheran High School.

As Mrs. Walter Falck, Mrs. Elroy Umnus and Mrs. Ray Albrecht, the three cooks at the school can testify, there is nothing hungrier or harder to please than a high school student. However, these three women devote many hours every week to preparing and serving foods that will provide appetizing and nutritional meals for the teens. Early hours, hectic mornings and hot work have become a way of life for these women.

Unlike many high schools, public and private, the majority of the food that is served the students at FVL is homemade or home-grown. "In many ways, I guess it would be a lot easier to open a can or a package," says Mrs. Falck, "but I honestly feel nothing is as good as something right out of the oven or garden."

**School is Fortunate**

Mrs. Falck and the students are fortunate. There are plenty of people, parents of the students and friends of the school, who see to it that the kitchen receives products necessary for such a program to exist.

"During the summer, our kitchen is often very crowded with people willing to work. They help us with such things as freezing fresh, in-season fruits and cleaning butchered chickens. They donate fresh vegetables and fruits from their gardens and orchards. Few things are more delicious than a fresh juicy tomato." One couple periodically brings to the school bushels of onions, tomatoes, cucumbers, potatoes and beets.

Approximately 290 students are fed in the cafeteria five days a week. A typical meal includes baked chicken, peas, mashed potatoes, dressing, bread and a canned fruit for dessert. Because of foods donated to the school, the per-student cost of such a meal is only 30 cents.

**Freshly Baked Bread**

Instead of relying on packaged bakery foods, Mrs. Falck and her staff make their own breads and desserts. The smell of baking bread quickly spreads throughout the school, wheting the appetites of both student and teacher. "The more we make, the hungrier students get. The 24 loaves of bread we baked this morning won't last very long. We'll soon be at it again."

The school's kitchen facilities are new and the room is brightly lighted, making it a nice, airy place to work.

From the time we get here in the morning until we leave at night, we're constantly on the go."

To keep things flowing smoothly, we cannot wait around for someone to tell us what must be done," says Mrs. Albrecht.

In addition to the three cooks, approximately ten students work during the two lunch hours. "They are a good bunch of helpers," says Mrs. Falck. "They certainly make the lunch hours less hectic."

Of course it is hard to please everyone, all the time," smiles Mrs. Falck, "There is always someone who isn't happy." However, judging from the empty plates returned to the kitchen and an enthusiastic "The food's delicious," from one student, Mrs. Falck has little to worry about.

**Summer Months Are Busy** for cooks and volunteer workers in the kitchen of Fox Valley Lutheran High School. Their tasks include freezing in-season fruits and vegetables and, as shown above, cleaning and freezing freshly butchered chickens. At left, Miss Nyra Jane Rieckmann, a student worker in the kitchen, slices the first of many loaves of freshly baked bread to be served with the meal. (Post-Crescent Photo)

# Western Honeymoon For Couple

St. Paul Evangelical Lutheran Church was the setting at 2 p.m. Saturday for the wedding of Miss Janet Mae Arnold and Donald D. Spaude. The Rev. F. M. Brandt officiated at the double ring ceremony.

The bride is the daughter of Mr. and Mrs. Wilmer Arnold, route 2, Appleton. Parents of the bridegroom are the late Mr. and Mrs. Herbert Spaude.

Mrs. Roland Young, a sister of the bride, attended as matron of honor. Bridesmaids were Mrs. James Felton, Mrs. Byron Wendt, Miss Susan Spaude, Mrs. Maynard Kettner and Mrs. Loren Otto.

James Felton, a brother-in-law of the bridegroom, performed the duties of best man. Roland Young, Byron Wendt, Leroy Arnold, Maynard Kettner and Loren Otto were groomsmen. Guests were seated by Steven Spaude and Stewart Arnold.

The couple was honored at a reception at the Pine Castle Ballroom, Seymour. The bride is employed at Integrity Mutual Insurance Co. Her husband is with Hardwood Products Corp., Neenah.

After a wedding trip to the western states, the couple will reside in Black Creek.

# New Field Director for Scouts

## Mrs. McKay Works With Adult Leaders

BY GLORIA BABLER
Post-Crescent Staff Writer

"Support the Girl Scouts," suggests a colorful poster strategically placed opposite the desk of Mrs. James McKee who has been doing just that for the past 10 years. She is newly appointed field director for the Fox River Area Girl Scout Council.

"Oh, yes, I like my job," the mother of three says quickly with a smile. "Right now I'm becoming familiar with the office and acquainted with this area," she explains, "glancing around her quarters at 111 W. North St. She commutes daily from her Oshkosh home.

The educative program begun by Julia Low in 1912 has fascinated Mrs. McKee since her own Girl Scouting days in Lexington, Ky. When her daughter Katie, now 15, became interested in scouting, Mrs. McKee once again put on a green uniform, this time as an adult leader.

**Scouting Daughters**

Another daughter, Laura, is in Brownies. The youngest McKee, Sarah, began kindergarten this fall. Although there is no scouting program for girls under seven years of age, Mrs. McKee suspects Sarah will join her mother and sisters when she becomes eligible.

There are four age groups in the Girl Scouts of America, who number three and one half million. In the United States one out of seven girls is in scouting. The Wisconsin ratio is one of five.

Second and third grade girls are eligible for membership in the Brownies. Junior troops include fourth through sixth graders. Cadettes are comprised of the junior high level girls and senior scouts from tenth grade and beyond.

**Assists Adult Leaders**

According to a January survey, there are 6,200 scouts in the Fox River Area Council. Assisting them are 1,181 adult leaders. Mrs. McKee's primary job is to work with adult leaders and supervisors in the five county area of Shawano, Menomonee, Waupaca, Outagamie and Winnebago.

As field director she will advise team chairmen and help them find and train adult leaders to work with troops in the area schools.

**Aiding Association Heads**

"They're important people," Mrs. Macey McKee says softly. "They are the heart of the whole thing. If you don't have good team leaders you suffer because you just don't have the time to do the kind of job team leaders can."

Mrs. McKee also works closely with each of the eight associations directors in the Fox River area who advise team chairmen and help plan area scouting events.

A graduate of Brown University, Providence, R.I., Mrs. McKee majored in linguistics. Later she attended graduated school at the University of Michigan, Ann Arbor, Indiana University, Bloomington, and Louisiana State University, Baton Rouge.

Listed in the 1963 "Who's Who in American Education," Mrs. McKee views the Girl Scout program as primarily educative in nature and format.

"Scouting is different from teaching school," she notes. "The girls are not forced to come and they appreciate what you do, whether they realize it or not. You can see the results of your efforts right away — good or bad."

Older girls learn to teach younger girls through scouting activities, she points out, adding, "They sometimes can learn more from women other than their own mothers. Scouting helps develop a sense of responsibility."

The girls also learn cooking techniques and outdoor camping skills. "Some of the senior scout opportunities just make me drool," she says slowly.

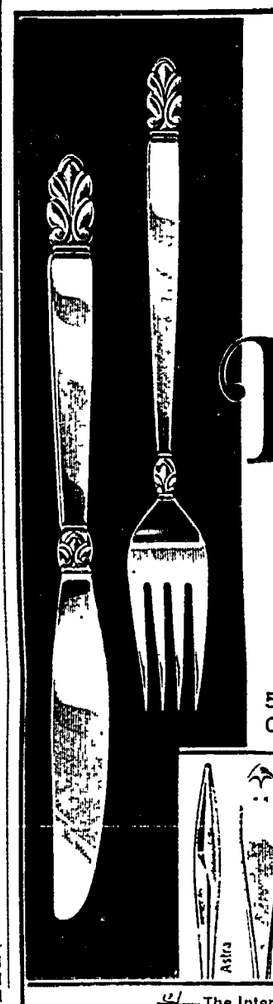

"The most wonderful people in the world are in scouting," remarks the field director of a program she strongly endorses. "When I go to meetings I feel as though I know other leaders even if we've never met before. We all share something in common. Scouting is contagious."

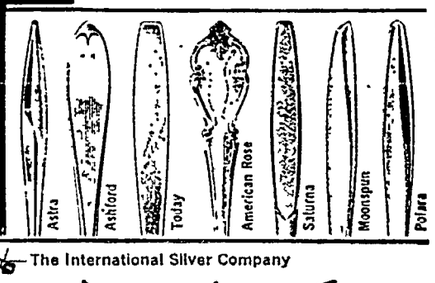

Supervising and Assisting 1,181 adult Girl Scout leaders in the Fox River area is the job of Mrs. James McKee, new field director for Shawano, Outagamie, Winnebago, Menomonie and Waupaca counties. She began her duties Sept. 1. She is shown above, left, talking with Miss Colleen Meyers, Girl Scout program service director. (Post-Crescent Photo)

Your Problems

# Daughter Feels Father Puts His Job Before His Family

BY ANN LANDERS

DEAR ANN LANDERS: I'm a girl — 13 years old. My father travels. This is what I am writing to you about.

Dad was away from home on my last birthday. He was away on my birthday again this year. He was gone on my brother's birthday and also on Mother's Day. We were sure he would be

Landers

home for Father's Day but he didn't make it. He was also out of town on his own birthday, which was last Tuesday, and on his and Mom's wedding anniversary, which was yesterday.

What would you say is more important to my father, his family or his traveling?— Idaho Fall Girl.

Dear Girl: Why does your father travel? Is he a tennis bum, or a beach-comber? Or is he selling on the road to make a living for his family?

If he is selling on the road to make a living for his family I can tell you that his job is far from easy.

Do you think he enjoys being away from home on your birthday or on Father's Day or his own anniversary? The next time you start to feel sorry for yourself, Kiddo, shed a tear for your father. He rates compassion, not carping criticism.

* * *

DEAR ANN LANDERS: My husband and I have been married 15 years and this terrible habit he has is getting worse.

Whenever we eat in a restaurant Mel leaves the table at least three times to go visit at another table. It doesn't matter that we have invited one or two couples to be our guests. The moment Mel sits down his eyes comb the room for someone to go over and sit with.

It wouldn't be bad if he stayed away five or ten minutes, but he is gone for 25 minutes at a time. I usually have to go get him so the waiter can take his order—and then I have to look for him agan when his food arrives. It's very embarrassing.

Mel just loves it when someone says, "You certainly are popular. You know everybody." I'm sure that's the reason he runs all over the place. Will you say something on this subject, please? — M. Barrassed Wife.

Dear Wife: The man who is genuinely popular doesn't have to run all over the room. people come to HIM.

* * *

DEAR ANN LANDERS: Our daughter's three-year marriage ended in divorce. Under the property settlement, the wedding gifts from the wife's family were to be kept by her. The gifts from the husband's family were to be kept by him.

The sterling flatware came from both famlies so it was agreed that our daughter would keep all the flatware and give her ex-husband some other items in exchange.

Several of the ex-in-laws asked her to give back their silver gifts. I felt this was rock bottom, but she complied with their requests and did not ask her ex-husband for anything in return.

My question is this: Should wedding gifts be returned after three years? Should our daughter have ignored the request of L.R.M.

Dear L.R.M.: Emerson described your daughter's former relatives when he said, "Things are in the saddle and they ride mankind."

Wedding gifts need not be returned if a marriage fails. People who ask the return of gifts are such slobs that I wouldn't want anything in the house to remind me of them.

* * *

Is alcoholism a disease? How can the alcoholic be treated? Is there a cure? Read the booklet "Alcoholism—Hope and Help," by Ann Landers. Enclose 35 cents in coin with your request and a long, stamped, self-addressed envelope.

Ann Landers will be glad to help you with your problems. Send them to her in care of this newspaper, enclosing a stamped, self-addressed envelope.

A First Visit to a dentist calls for many explanations, and Sara Couillard, daughter of Mr. and Mrs. James Couillard, has questions for Dr. Robert Burns, Kimberly. The Outagamie County Dental Auxiliary is again pointing up the importance of early dental care by sending letters to children of the county as they reach their third birthday anniversaries. (Post-Crescent Photo)

Letters to Pre-Schoolers

# Dental Auxiliary Continues Project

Better dental health for preschool children is again the goal of the Outagamie County Dental Auxiliary, following through its project of sending letters to children in the county as they observe their third birthday anniversaries. The program, assisted financially by the Dental Society and the Public Health Nursing Service, was initiated in February, 1965, during the observance of National Children's Dental Health Week.

The letters call attention to the importance of deciduous, or 'baby' teeth, dental care at an early age, regular checkups, good eating habits and toothbrushing.

Names of the children are obtained by the auxiliary from the register of deeds office. The letters are prepared at the beginning of each month. About 10,000 will have been sent by the time the three-year program is completed.

The Auxiliary has undertaken the project in the belief that early dental care may help children avoid more extensive problems as the child reaches school age. The program has been cited in the National Journal of the American Dental Association.

# Meeting Notes

The Fox Cities Chapter of the National Secretaries Association (International) will meet for dinner at 5:45 p.m. Tuesday at the YMCA.

* * *

The Appleton Junior Woman's Club will meet at 8 p.m. Tuesday at the Outagamie County Bank.

* * *

* * *

The Knights of Columbus Ladies will meet at 8 p.m. Wednesday at the Columbus Club. A business meeting and social hour are planned.

# Mountain Climbing

Continued from Page 6

mentally exhilarating. You are in a world of your own," he explains enthusiastically.

Mr. Smith and his wife, a graduate of the University of Wisconsin, Madison, will return to England Oct. 2 where they will live in Hamshire, 30 miles southwest of London, until his military discharge in December.

The blue-eyed visitor notes that a person becomes accustomed to heights only by actual climbing. "As you become more competent and confident of your own ability not to fall you begin to overcome a natural fear of height," he feels. "You must become accustomed to it."

His wife, LuAnn, had never climbed a mountain until she met her husband. "We went climbing in Scotland on our honeymoon." she recalls. "We got lost coming down and had to climb up again and choose a different descent. I was tired," she adds with a quick smile.

Commuting across continents to climb mountains is a chosen way of life for the young man who feels he really hasn't done much traveling... "compared to all the places there are to see."

This viewpoint is applicable to mountains, too.

# College Activities

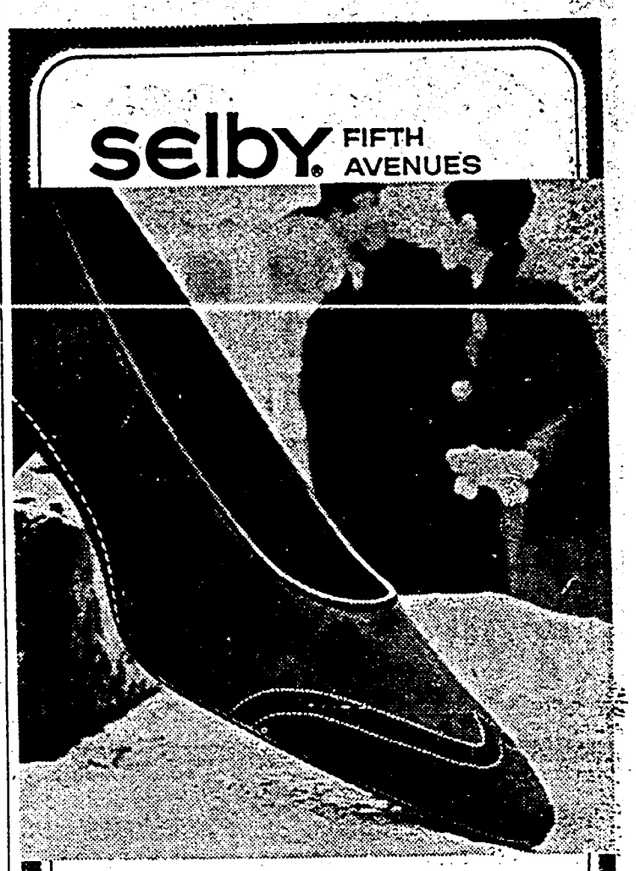

Miss Susan Speel, daughter of Mr. and Mrs. Lawrence M. Speel, 1130 E. Moorpark Ave., was recently initiated into Alpha Gamma Delta, international sorority for college and university women, at Wisconsin University-Whitewater.

* * *

Miss Joanne Bystrom, daughter of Mr. and Mrs. Dale Bystrom, 1414 N. Richmond St., is a member of the recent graduating class of Presbyterian St. Luke Hospital School of Nursing, Chicago, where she will be employed.

Post-Crescent Photo

Mr. and Mrs. Roy Smith, left, look at sketches and diagrams of Mt. Alpamejo in Peru which Mr. Smith climbed this summer. His wife is the former LuAnn Hogman, daughter of Mr. and Mrs. Martin Hogman, 105 River Drive. At right, Terry Burnell, a member of the British climbing expedition is shown on the north ridge of the mountain, 19,000 feet above the Peruvian terrain.

**The Lead Climber,** at right, used fixed ropes on the north ridge as the expedition moved closer to the summit. Below, a climber starts carrying food and supplies up the ice fall. The climbing pictures were taken by Mr. Smith.

# Peak Thrill in Mountain Climbing

BY GLORIA BABLER
Post-Crescent Staff Writer

"Mountain-climbing is more than a hobby to me, it's a way of life," observed the red-bearded Briton who spent the summer climbing 20,100 feet above the Peruvian terrain to the summit of Mt. Alpamejo.

With five other men, including a British television director, Roy Smith, son-in-law of Mr. and Mrs. Martin Hogman, 105 River Drive, flew from London to Peru via New York and Miami to ascend "the most beautiful mountain in the world."

He and his wife, the former LuAnn Hogman, are visiting her parents in Appleton.

**Captivated by Peaks**

"I haven't seen all the mountains in the world, but Mt. Alpamejo is the nicest I have seen so far," Mr. Smith acknowledges.

The Yorkshire native has been intrigued by snow-capped peaks since he was fifteen years old. His enthusiasm hasn't waned with the years for, since then, he has climbed hundreds of mountains in Europe, Iceland, East Africa, and now, Peru.

"I met people who climbed mountains," he explains. "Slowly but surely I was drawn into the net. Once you begin, you can't stop climbing."

**Testing Equipment**

Although his initial attempts started in the Scottish Highlands, Mr. Smith began serious climbing while he was stationed in East Africa as a surveyor with the British Army. There he climbed Mt. Kenya and Mt. Kilimanjaro, of which novelist Ernest Hemway wrote.

The Peruvian expedition was formed to test mountain climbing equipment and supplies for British manufacturers. British television director, Ned Kelly, filmed the entire sequence. His cameras and film contributed to the ton and a half of equipment which the climbers transported 250 miles inland from the Peruvian coast and then carried to the base and col camps they established in their upward trek.

The 3,000 pounds consisted mainly of food, heavy clothing, 6,000 feet of rope, ice picks, tents and heavy boots. The six-weeks' eating supply was hydrated food especially designed for high altitudes by a British firm.

Before ascending the mountain, the team hired 25 mules to transport the equipment to base camp, a location which is as close to the mountain a person can get without actually climbing. The transportation took four and one-half days.

**Appealing Scenery**

The countryside was dotted with abandoned Inca ruins and terraced mountains. In one remote valley the climbers encountered a group of 30 people, "cut off from the rest of the world," Mr. Smith recalls.

In base camp the six-member expedition investigated the mountain side and mapped out the route it would follow in the 35 day ascent to the summit. Then the Englishmen carried loads of equipment to a different location, always moving supplies forward to establish col camp, 18,000 feet above sea level.

The final trek to the summit took ten days. During this time three climbers worked continuously chopping ice and fixing ropes. The other two carried supplies up and later joined their partners at the top.

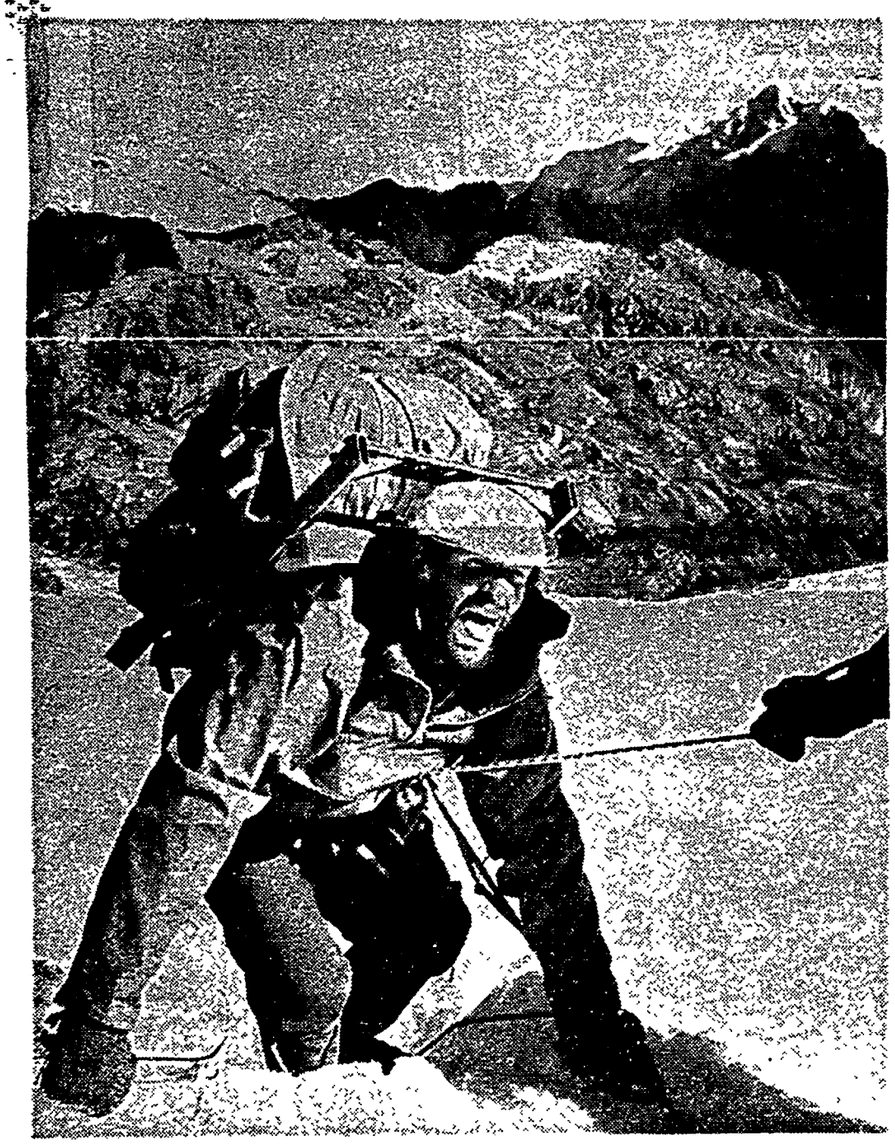

The weeks of preparation were climaxed July 10 when Mr. Smith reached the summit. Heavily clothed and equipped with ice picks and a camera, he took pictures from the 20,100 peak and descended so the British TV director could film the sequence.

"Ned's effort was probably the greatest," Mr. Smith points out. "He was a director and had done little climbing before. It was quite different from his studio."

Why does anyone want to climb a mountain?

"Probably because they like to do it, spontaneously answers the British Army member. "It's a chance to get away from everyday life and return to a more natural way of living. It is physically and

Continued on Page 7

**During the 20,100** foot ascent, the climbers, above, ate food specially prepared for high altitudes by British firms. At left, television director, Ned Kelly, is pulled up the north ridge with ropes. Mr. Kelly filmed the expedition for a British broadcasting company.

## Meeting Notes

DARBOY — The sisters of St. Ann Catholic School will be honored at a food shower by members of St. Anne Altar Society at 8 p.m. Wednesday. Mrs. Clem Boucher and her committee will be hostesses. Harry O. Hoehne, Premontre high school teacher, will speak on "Discipline is Everybody's Business."

* * *

A prize will be given to the member with the most original paper costume when the Women of the Moose meet at 8 a.m. Wednesday at Moose Hall. Mrs. Earl W. Bates is chairman. Assisting her will be Mrs. Claire Baumann, Mrs. Austin Tucker, Mrs. Ervin Werner, Mrs. Harold Liemer and Mrs. Charles Lewis. A luncheon will be served after the meeting.

* * *

St. Joseph Missionary Society will sponsor a card party at 2 p.m. Sept. 25 in the school cafeteria. Prizes will be awarded at each table. A luncheon will be served.

The bride-elect is employed by Green's Pharmacy. Her fiance is employed by United Grocers Inc., Little Chute.

# Margaret Sanger's Legacy Is Gaining Acceptance

### Family Planning Assumes World-Wide Importance

EDITOR'S NOTE — Last Sept. 6 Margaret Sanger, pioneer in birth control, died in a convalescent home in Tucson, Ariz., only a week before reaching the age of 83. But she lived to see much of the world accept her view that family planning is a basic human right. Here Dr. Alan F. Guttmacher, president of Planned Parenthood-World Population, assesses her impact on our world.

BY ALAN F. GUTTMACHER, M.D.
President, Planned Parenthood-World Population

NEW YORK (AP) — There will be other great women, but never a second Margaret Sanger.

Her impact on contemporary life is so great that perhaps like an atomic explosion it should be measured in units of megatons.

**Supreme Court Decision**

It was she who convinced America and the world that control of human conception is a basic human right and like other human rights must be equally available to all.

It was she who defied the police and persuaded the courts with a thesis, which has now gained full recognition in a recent Supreme Court decision, that birth control is personal and not legal business.

This was no ordinary woman.

To fully appreciate the impact of Margaret Sanger on her times one must first establish the setting in which she began her work. Women did not have the vote and were to wait another decade before they got it.

**Old Adage Challenged**

The old adage "the rich get richer and the poor get children" had been challenged as early as 1823 by the English working man, Francis Place; after Place and others in this country and abroad temporarily took up the cudgels

But Margaret Higgins Sanger was the first person in the world to devote a full time career to the rather restricted goal — democratization of birth control. She was singularly well-endowed and prepared for the task. She was a bright, witty, attractive, dynamic, titian haired woman who received strong paternal genes from Patrick Higgins, a brilliant, iconoclastic, self-educated, well-read, freethinker, a tombstone cutter in northern New York.

**Meager Finances**

Margaret looked forward to college but since family finances were meager she compromised by getting her nursing degree from the White Plains Hospital in New York. She knew firsthand genteel poverty from her own childhood and she knew the tribulations wrought by a succession of unplanned, unwanted pregnancies. Her career as a visiting nurse brought her to the slums of New York. She witnessed deaths from abortion and she saw babies abandoned or die from neglect. All these things deeply affected a sensitive, intelligent woman.

**Unwanted Pregnancies**

In 1912 Mrs. Sanger decided to devote her life to emancipating women from the servitude of unwanted pregnancies. She prepared for her career in 1914 by going abroad to study contraception in England and Holland which were more advanced in the field than America. While working in the library of the British Museum she coined the term "birth control." Mrs. Sanger was practical idealist. She enrolled as early backers of the movement women of financial substance and men of prominence. In 1916 she flouted the repressive birth control statues of New York State by opening the world's first birth control clinic in the slums of Brooklyn. The raid by the police nine days later and the closing of the clinic with the destruction of its records is an oft told tale.

**Rebel With Cause**

Margaret loved a fight. She was a rebel with a cause. What this great woman accomplished in her life can never be forgotten.

The main accomplishments were:

She established the control of conception as a basic human right and as such a right should be equally available to all.

She proved that the practice of birth control was not a legal matter but a highly personal matter. A point of view which the Supreme Court sustained in June 1965 in its now famous case "Griswold and Buxton vs. the State of Connecticut."

She educated the medical profession into the realization that conception control was a medical matter, a public health measure of first importance.

The debt of the world to this great, courageous lady is beyond measure She gave to all families the legacy of children by choice rather than chance and she gave to the overpopulated, starving nations of this harassed world the ray of hope that they can stem the avalanche of hungry mouths before it is too late.

Those of us who have inherited the leadership of the birth control movement from Margaret Sanger feel an awesome sense of responsibility to her. The task she started is not yet done and it must be finished.

According to recent studies there are still four million women of reproductive age in America who lack birth control and must get it from voluntary or tax-supported sources.

The global need is overpowering and each year becomes greater. Mankind is witnessing a critical race between the stork and sufficiency of food, space, education — the quality of life.

Who will win? Perhaps due to Margaret Sanger the stork will have its wings clipped in time.

## Ceremony Performed Saturday

MENASHA — Wedding vows were exchanged by Miss Sandra Jean Seelow and Anthony C. Shulfer in a 2 p.m. ceremony Saturday at St. Patrick Catholic Church. The Rev. John Egan officiated at the double ring nuptial rite.

The bride is the daughter of Mrs. Walter Seelow, 818 Reed St., Neenah, and the late Mr. Seelow. Parents of the bridegroom are Mr. and Mrs. Clarence Shulfer, 320 Bond St., Neenah.

Roger F. Seelow, route 2, Neenah, escorted his sister to the altar. The bride was attended by Miss Linda Marie Pansy, maid of honor, and Miss Rosemary Schulfer and Miss Dawn Anderson, bridesmaids.

Duties of best man were performed by Thomas Ciske. Michael Shulfer and Frederick W. Seelow were groomsmen. Guests were seated by Gerald P. Seelow and James Furkis.

Zenefski Photo

Mrs. Shulfer

A reception was held at the Silver Dome Ballroom, Greenville. After honeymooning in Canada, the couple will live at 818 Reed St., Neenah.

The bride is employed by the Northwestern Electrotype Co., Menasha. Her husband is employed by Jersild Knitting Mills, Neenah.

Sharon Hawley

## Betrothal of Miss Hawley Announced

HORTONVILLE — Miss Sharon Lee Hawley and Keith A Krause are engaged. The announcement was made by her parents, Mr. and Mrs. William C. Hawley, route 1, Hortonville. He is the son of Mr. and Mrs. Arthur Krause, route 1, Hortonville.

The bride-elect is employed by Northern State Bank, Appleton. Her fiance is employed by the Wisconsin Telephone Co., Appleton.

The House of the Week

# Chalet Charm Features Modest Home

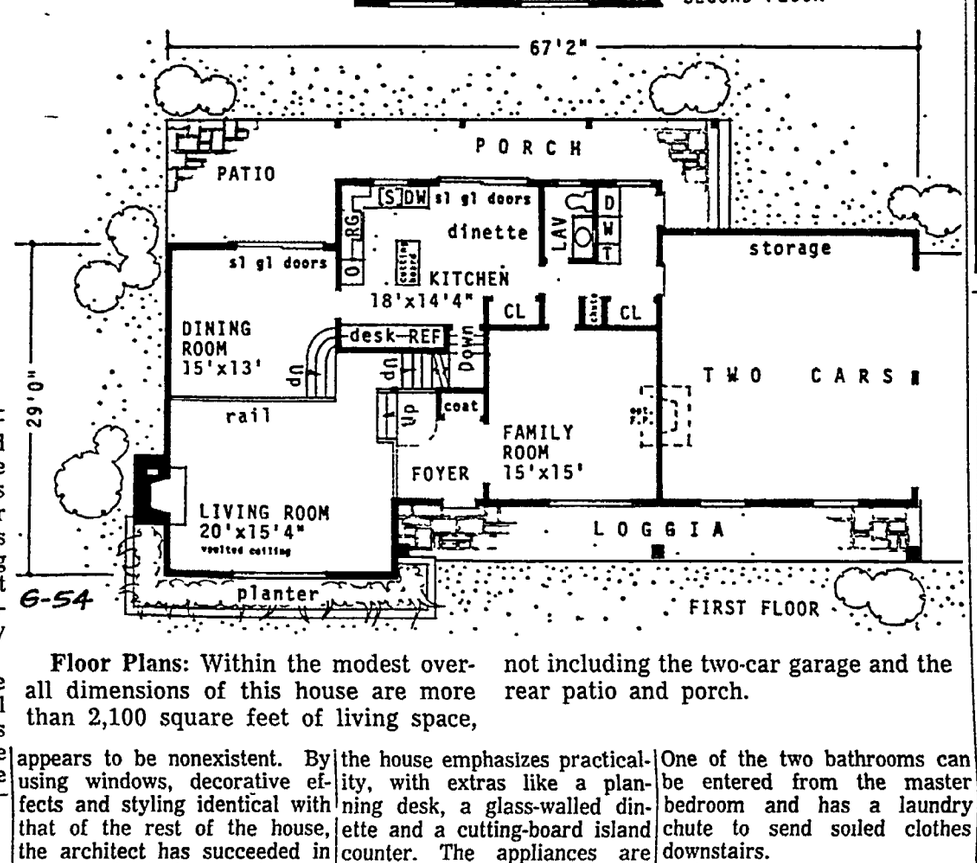

BY ANDY LANG

Attractive variety in exterior designs is always more evident in areas of high - priced homes. When it is desired to create a distinctive house of moderate size in a community of modest homes, chalet styling is often the answer.

Architect Derick Kipp has given a fine example of what can be accomplished in this direction with an Alpine version of a multi-level house. It is different without being too different and what women might call cute without being too cute. It gives the appearances of being bigger than it actually is. And there is a considerable amount of living space—nearly 2,100 square feet of it—within its over-all dimensions of 67 feet two inches by 29 feet.

*Design G-54 has a living room, raised dining room, kitchen, dinette, lavatory, laundry room, foyer and family room on the first floor, with a habitable area of 1,310 square feet, not including the two-car garage. There are three bedrooms and two bathrooms on the second floor, adding 785 square feet of living space. Over-all dimensions, which include the garage, are 67 feet 2 inches by 29 feet.*

The artist's rendering of the exterior ilustrates the eye appeal of this type of design. It has charm written all over it. Note how, from the front, the garage appears to be nonexistent. By using windows, decorative effects and styling identical with that of the rest of the house, the architect has succeeded in giving a basically small house greater width in an economical manner. The attractive planter at the front of the living room extends a bit past the house and adds further width.

**Floor Plans:** Within the modest over-all dimensions of this house are more than 2,100 square feet of living space, not including the two-car garage and the rear patio and porch.

### Small Stairway

From the entry foyer, there is a smal, invitting stairway up to the living room, with an open-railed view. Another rail and a curved stair blend the upper living room with the dropped dining room, adding a touch of glamour ordinarily found only in larger houses. From the diamond-paned window in the living room to the sliding glass doors in the dining room, there are more than 28 feet of unobstructed view, plus the rear patio, to which those sliding glass doors provide an entrance. A fireplace and open - beamed ceilings, typical in chalet styling, add warmth and an atmosphere of livability.

On the other side of the foyer is a family room, square in shape and informal in feeling. The kitchen at the rear of the house emphasizes practicality, with extras like a planning desk, a glass-walled dinette and a cutting-board island counter. The appliances are grouped in L-shaped fashion for convenience. The dinette area of the kitchen has sliding glass doors leading to a rear porch.

### Laundry Area

Adjacent to the kitchen are the laundry area, a lavatory, an entrance to the rear porch and an entrance to the two-car garage and storage section.

Each of the three upstairs bedrooms has plenty of wall and closet space. In addition to the closets in the bedrooms, there are two linen closets. One of the two bathrooms can be entered from the master bedroom and has a laundry chute to send soiled clothes downstairs.

All in all, Design G-54 is for a moderate-sized family that needs a moderate-priced home and yet wants many of the bonus features generally found in houses in high-income areas.

## 'Instant Growth' Puts Plant at Right Level

Raising plants to desired levels for indoor or outdoor decorative effects can be done simply with the help of inverted clay pots. Use the empty clay pot, turn it upside down, place the plant on it, right side up and you have "instant growth."

## Geranium Plants in Saucer Cluster Color

An attractive way to achieve a cluster of color is to group three or four small, but bright, red geranium plants in one large 12 or 14-inch clay saucer. Used as a centerpiece for outdoor dining, or a front door "welcome mat," you can change the individual clay potted plants in the saucer to vary color designs.

* * *

The Appleton Firemen's Auxiliary will meet at 8 p.m. Monday at Number Four Fire Station. New officers will be elected.

## Summer Skin Care

It is easy to have a smooth lovely complexion, despite the skin-coarsening effect of summer. The pores open much wider in the heat so it's essential that they have free movement to open and close without being clogged. Protect from cosmetic pigments, dust, and powder by smoothing on your oil of Olay. This will also protect the complexion from harsh sun rays and will give the skin a cool, milky bloom even on the hottest days. Your druggist can supply you with oil of Olay for your personal needs.

## College Activities

Miss Sharon Kay O'Leary, daughter of Mr. and Mrs. Daniel F. O'Leary, 1220 George St., spent three weeks in Europe this summer as a member of the LaCrosse State University Singers. The group presented concerts in Berlin, Coblenz, Frankfurt, Wurzburg, Munich, Paris and London. The singers made a recording for Radio Free Berlin and two television appearances. They returned to LaCrosse, Monday.

## *Welcome Program, Tea Scheduled For New Pastor*

OSHKOSH — A welcoming program and tea in honor of the Rev. Thomas V. Asuma, new pastor of St. John Evangelical Lutheran Church, will be held at 2 p.m. today at Wicklund Hall at the church. All parishoners are invited to attend.

Other activities at St. John Church this week include a council meeting at 7:30 p.m. Monday, the first meeting of the Mr. and Mrs. Club at 7:30 p.m. Tuesday and a women's guild meeting at 2 p.m. Wednesday.

# *Life Too Tenuous to be Smug*

Do you have comfortable feeling of being pretty much in control of things? Millions of people felt that way one year ago today, but here's what happened during the past 12 months:

13,200,000 drivers were involved in accidents, causing 49,000 deaths.

More than 481,000 marriages ended in divorce or annulment.

An average of 3,225,000 people were unemployed.

163,413 Americans suffered personal bankruptcy.

Approximately 40,000 Americans learned they had diabetes, even more were told they had heart disease, and 550,000 people discovered they had cancer.

More than 1,500,000 Americans — who once seemed erfectly normal — were placed in institutions for mental illness.

"So what," you might say, "this doesn't mean that any of these things will happen to me."

Maybe not — but it makes you think, doesn't it?

**Major Peril**

Psychologists say that when we make money on the stock market, score top grades on an exam, or make any gratifying achievement, the achievement becomes a hazard because it tends to make us smug. We forget that the aid of a friend, a parent, a teacher, or a business associate may have helped make it possible. We're tempted to face the world without our allies — a major peril — for when we abandon them, insecurity follows on the heels of satisfaction, and happiness becomes that evasive thing just around the next corner.

Dr. Oswald Hoffmann of radio's The Lutheran Hour describes this state of mind as "the after-effect of materialism where there is often a deep, gnawing feeling, a rubbing uncertainty about life and the world." Dr. Phillip Polatin, noted psychiatrist, finds that this shift in perspective may result in anxiety. "Our happiness," he says, "stems from the satisfaction of our emotional requirements, yet few of us take time to study what these requirements are."

**Progressive Society**

Disillusion has many causes and a variety of effects. Both religious leaders and psychologists are trying to understand why there's a staggering rise in personal tragedy in the context of a progressive society which promises greater riches and leisure to a growing number of people.

Psychiatric research into such problems as the increase in auto accidents, divorce, and job loss shows that many of us experience confusion and a sort of "flatness" after achieving or acquiring something we wanted badly. Free from pressure and the invigorating drive that went into our efforts, we may find we've lost sight of why we originally wanted what we now have. Many of our needs, especially those we don't fully understand, remain intact and we feel cheated by our own attempts to satisfy them.

**Anger and Resentment**

Anger and resentment compound our frustration and may be directed, without our being aware of it, against the object of our success. We may take it out on the people who helped us, or seek to destroy our "success" in some other way.

Studies sponsored by insurance companies, the National Research Council, the Industrial Board of Great Britain and other organizations estimate that 80 to 90 per cent of all accidents are psychological.

Norman Lyes in his book, "A Psychological Approach to Accidents," says, "Fellings overpower safe driving habits." It is the belief of Dr. Franz Alexander, director of the Institute for Psychoanalysis in Chicago, that "most accidents are unconsciously intended."

**Unconscious Need**

Remembering that the contributing factor in a disturbingly larger percentage of all accidents is an unconscious need to have an accident, is there anything you can do to avoid it? Yes: take a good look at yourself; engage in some self-examination; don't blink away what you see. If you've been flirting with danger, try to understand why.

Will your marriage be another casualty? Statistics say there's a pretty good chance of it, as the country's divorce rate climbs to the highest in the world; one out of every four marriages is dissolved. When crises come and the marriage relationship is strained, many forget the positive and often solid basis upon which their marriage was actually built, and seek the easy way out — divorce.

**Where Trouble Lies**

Indifferent to or unaware of what's really at work in us (where the trouble usually lies), we tend to blame both the institution of marriage and our marriage partner. Dr. Edmund Bergler in his book Divorce Won't Help says, "The futility of divorce can be established clinically: the second, third and nth marriages are but repetitions of previous experience. The partner is charged — but that is the only difference."

Can we avoid the mistakes and cut down on our losses? The answer, says a leading psychiatrist, Dr. Smiley Blanton, lies in recognizing the truth about ourselves. Dr. Blanton says, "Nine times out of ten, when people come to me tormented by guilt, racked by anxiety, exhausted by unresolved hate, it is because they don't know the truth about themselves."

**Count Your Blessings**

Dr. Hoffmann suggests that in addition to learning about yourself, you remember your mate: "Count your blessings and take careful note of the good qualities of your spouse — the qualities which first attracted you. Keep up the interests which first brought you together — don't just drift away in preoccupation with everyday living."

If the difficulties become too great, Dr. Hoffmann advises: "A marriage counselor can be of inestimable value — if you seek help in time. A competent third party, like a well-qualified pastor, can be objective and still be the friend of both husband and wife. And you can see yourselves for what you really are, with the weak spots revealed and the strong points indicated."

**Pressure Toward Productivity**

Most of us are caught up in what psychologists call "pressure toward productivity" where earnings are a measure of success and conformity is a "must." Many make the mistake of judging themselves by society's broad and ever-changing standards. Dr. Polatin says: "We all have a tendency to judge ourselves this way and drive ourselves to conform, forgetting that an equally important measure of our success is our happiness."

**Self Knowledge Necessary**

Happiness can never come from success alone; it must result from finding the working niche in which we belong, performing our tasks among co-workers and in a setting we enjoy and respect. This is a simple fact which most people fail to realize.

According to Dr. Polatin: "Not all of us have the self-knowledge necessary before we can seek our proper niche in the working world." A consequence of this is dissatisfaction which psychologists say is at the base of the major cause of job loss: absenteeism.

Tensions and strains (often the byproducts of success) account for — and more often cause — half of all health problems which trouble people. Illness as an escape from situations we find hard to face is a device known to all of us, and psychologists warn we often make wrong decisions because we choose to ignore the anxious stirrings of self-knowledge.

Stage Replay of Title Game Today

# Packers and Browns Clash

BY ART DALEY
Post-Crescent News Service

CLEVELAND — The second and final act of the now famous 2-part play, "Two Sundays in Titletown," will be staged in giant Municipal Stadium this afternoon.

The opening act — Packers vs. Colts in Milwaukee last weekend — was a smashing success when Green Bay waltzed home with a 24 to 3 triumph.

Act II send s the Packers against the Browns. Curtain call is 12:30, Green Bay time, and a crowd of over 80,000 will be on hand.

These two games, of course, are the replay of the original stage play, which was such a hit in Green Bay's Lambeau Field last Dec. 26 and Jan. 2. The Packers beat the Colts, 13-10, in sudden death overtime and then the Browns, 23-12, in regulation time.

This is a new season and Packer fans have been wondering about their squad, which looked so good in dumping the Colts eight days ago.

There is no question but what the Packers have improved over a year ago, and the manner in which they handled their No. 1 opponent in the Western Division offered considerable proof. However, this must be recalled: The Packers were extremely unhappy with Colts for the way they screamed after they lost in the sudden death game.

**Pride in Talent**

As a result, the Bays were real ferocious vs. the Colts. They have no particular quarrel with the Browns and the Packers' inspiration will have to be based strictly on their pride in their own talent — and getting off to a good start in the 1966 championship race.

There's an unusual about this year's Packer-Brown game. The Jim Taylor-Jim Brown rivalry will be missing. Though the Pack's Jim toned down his desire to beat out his famed fullback rival, Taylor always was at his best against the Browns.

Brown has retired, and Taylor currently rates as the best fullback in football, which is quite a reputation to live up to right there. Taylor picked up 76 yards vs. the Colts.

The departure of Brown puts some suspect on the Browns' offensive operations. The Browns maintain that they won't become a passing team, despite Frank Ryan, Paul Warfield and Gary Collins, and they played it "straight" in walloping the Redskins last Sunday.

The big test will come if the Packers start bottling up Ernie Green, Leroy Kelly and Nick Pietrosante. Then, the Browns might lean more to the pass. They always pushed the rush with J. Brown in the lineup.

The Packers seem to be geared for passing themselves, although Bart Starr will work whichever attack produces the most yards. The Packers are blessed with power on the ground and in the air, what with Taylor, Paul Hornung, Boyd Dowler, Max McGee, Carroll Dale and Starr. The two major problem guys will be Warfield and Collins and the key figures will be Bob Jeter (on Warfield) and Herb Adderley (on Collins). Adderley hasn't forgotten the championship game when Collins faked Herb out for a TD catch.

The Packers will be going for their fourth straight payoff win over the Browns. They whipped them in Cleveland in 1962 by 49-21: 28-21 in 1964 in Milwaukee: and 23-12 in the title game.

## 3 Teams Share Little 9 Lead

### Denmark, Hilbert, Reedsville Post Second Victories

Denmark, Hilbert and Reedsville scored their second straight football victories Saturday to remain tied for the Little Nine Conference lead.

Defending co-champion Denmark handed Wrightstown its first loss, 26-0. Reedsville stopped Shiocton, 20-0. Hilbert beat Hortonville, 25-12. Winneconne whipped defending co-champion Freedom, 46-0.

Denmark scored 19 points in the first period, with two of the touchdowns coming on passes from Marty Schweiner. He hit Darrell Hansen on a 10-yarder and connected with Bruce Meyer on a 52-yard play. Wrightstown posted a 7-4 edge in first downs but never got inside the Vikings' 25.

Sophomore Dennis Korn scored three touchdowns — on runs of 36, 50 and two yards in Winneconne's win. Russ Allen added a pair — on sprints of 80 and 24 yards. The other scores came on runs of 9 and 12, respectively, by John Baitinger and Reed Winkenwerder. Don Flanagan kicked four extra points.

The Wolves, who broke away to a 20-0 first quarter lead, also had two touchdowns called back. Freedom reached the Denmark 10 early in the game but was contained. Winneconne had many standouts on defense, including Roger Rozek, who intercepted two passes. Allen gained 170 yards in 12 carries and Korn had 112 in 10 as Winneconne posted an over-all yardage edge of 275 to 34.

A 59-yard run by Jerry Foytik set up Reedsville's first TD, scored by LaVonne Dietrich on a 2-yard dive. The Panthers added to their 6-0 lead by driving 65 yards after the third quarter kickoff. Mike VandenAvond passed to Ken Schuh for a 25-yard score. In the fourth, VandenAvond hit Scott Mulhaney for a 21-yard TD play. Ken Isley kicked two PATs.

After a scoreless first period, Hilbert's Jim Mueller recovered a Polar Bear fumble on the Wolves' 40 and 15 plays and one roughing-the-kicker penalty later John Palmbach bulled into the end zone from three yards out. Mike Rossmeier blocked a Hortonville punt shortly after and Harlan Hackbarth scored on a quarterback sneak from a yard out.

A Hackbarth-to-Marvin Propson pass made it 18-0 before Hortonville found the range on a 64-yard pass play from Dick Tennie to Ron Tiedt. Hackbarth added the last Hilbert tally on a 1-yard sneak and Hortonville followed in the fourth period with Jay Cordy's plunge from a yard out.

Stops Cadets in FVCC Opener

## St. John Wins, 20-13

GREEN BAY — The Dutchmen came to play football, so did the Cadet defense but the offense put on a 4-act comedy series as Little Chute St. John spoiled Premontre's debut in its new home field, 20-13, Saturday afternoon in a Fox Valley Catholic Conference opener.

The Cadets lost the ball twice on pass interceptions and fumbled eight times, losing the ball four times. In addition, a high pass from scrimmage on a punt sailed into the end zone and punter Ernie Barbeau picked it up but was tackled by a host of blue shirts for a safety.

The Dutchmen turned three fumbles and a pass interception into scores. All four Cadet errors occurred within the Premontre 30-yard line.

The Cadets marched 75 yards for their first score with just over two minutes remaining in the half. Sophomore Mike Brunmeier threaded the needle to Jules Lefebvre for a 42-yard scoring strike after Dave Hoppe started the drive with a 28-yard run around end.

With four minutes left in the game, the Cadet offense again attained life with mostly second and third stringers. Premontre marched 82 yards to paydirt.

With first and goal on the 2-yard line St. John held them to 1-yard gain in three plays. On the fourth play, Ken Baungart bolted into the end zone for the score.

He fumbled on the play but the score counted. For the most part the Cadet line was being pushed back.

Little Chute recovered a fumble early in the first period on the Cadet 26 and moved to the seven where the Cadet defense held and Dennis Locy booted a field goal. Midway in the period, the Cadets fumbled again and the Dutchmen recovered on the nine but again the Cadet defense rose to the occasion and Locy booted another, again from the 12-yard line after the Dutchmen stalled on the seven.

In the third period, the Dutchmen recovered a Cadet fumble on the 28 and moved in to score with "Oscar" Schuler going over left tackle from the two. In the final period, Chuck Peters picked off a Brian Bengtson pass on the Cadet 29 and on the second play of the final period Marv Vande Hey went in from the 1-yard line.

Ernie Barbeau, with two carries for 39 yards was the leading Cadet rusher while Schuler led Little Chute with 38 yards in 19 attempts.

## Georgia Tech Wins Over Texas A&M

ATLANTA (AP) — Lenny Snow led a Georgia Tech football comeback by scoring three touchdowns in the second half Saturday which carried the Yellow Jackets to a 38-3 conquest of Texas A&M.

The Aggies led 3-0 at the half in the opener for both teams before the fleet junior halfback put some fire in the Tech attack.

Snow scored on runs of 7, 3 and 7 yards and set up Tommy Carmichael's 33-yard field goal with a 15-yard burst to snuff the Aggies' bid for an upset.

Sophomore quarterback Larry Good threw two touchdown passes in the last minute to make a rout of the battle in which the Aggies did not manage a first down in the second half.

## Wyoming Stops Air Force, 13-0

AIR FORCE ACADEMY, Colo. (AP) — Rick Egloff's crafty passing and scrambling running got the job done Saturday in Wyoming's 13-0 football triumph over Air Force.

The Cowboy quarterback and co-captain passed for both touchdowns, with his 38-yard run leading the way to the second score.

6 Men on Pass Coverage

## Brunh Cites UW Aerial Defense, Ball Control

MADISON (AP) — Wisconsin Coach Milt Bruhn, under fire after an ashen 1965 season, got a passing grade from his boss for the Badgers' 20-10 opening victory over Iowa State Saturday.

"Nice going, coach," said Athletic Director Ivy Williamson as he stuck his head in the door of Bruhn's office. "Can't win them all if you don't get the first one."

Bruhn cited a stingy pass defense and success in ball control for stemming the Cyclone aerial attack and bringing victory.

The Wisconsin coach said his players stayed on the ground deliberately to keep the ball away from "a team as dangerous as theirs." He used six men on defense for pass coverage.

Wisconsin allowed quarterback Tim Van Galder only seven completions and intercepted three of his passes, marching to a score after every theft. Van Galder, a senior from Madison whose late father, Clark, was Bruhn's backfield coach last year, tried only 20 passes, well below his usual number.

Iowa State Coach Clay Stapleton added, "I thought we threw too much against their defense."

Wisconsin dropped two linebackers back on pass coverage to aid four deep defensive backs in containing the Cyclones and added further insult by scoring both its touchdowns through the air.

The decisive one came late in the first half as sophomore John Ryan rolled out, waited and finally found Bill Fritz behind two defenders in the end zone for a 14-yard scoring play.

"Ryan was looking for him all the way," said Bruhn, "and Fritz finally broke himself loose. We tell our boys when they get to the end zone there's not much use going further so keep working in there."

The first touchdown pass was a 16-yard toss to Lynn Buss, a Wausau sophomore who had never made a catch in varsity competition before.

"One of our coaches," Bruhn recalled, "asked him how many passes they threw to him in high school. Buss said 'they threw to me twice in three years and I dropped both of them.'"

Tom Hadley matched the par 73 card to carry a 2-stroke lead into the second round of the Dual County Golf Tournament at Winagamie today. Chuck Bayer ranks second with 75. (Post-Crescent Photo)

## Hadley Leads Tourney by 2

### Shoots Par 73; Chuck Bayer in Second Place

Thanks to an even-par performance, Tom Hadley carried a 2-shot lead into today's final round of the Dual County Golf Tournament over the rolling Winagamie Golf Course.

Hadley's closest pursuer is Chuck Bayer, reigning Appleton City champion. Bayer, playing early Saturday, notched a 38 on the outgoing nine and came back with an even par 37 on the incoming track for 75.

Hadley slipped to a 1-over par 37 going out, but cruised over the back side 1-under the card for a 73. Hadley's card showed two birdies — the 465-yard 11th and 535-yard 17th — and two bogies — the 185-yard eighth and 370-yard 12th — and 14 pars.

Grouped at 76 were Appleton's Dennis Babb and Oshkosh's Jim Schumacher and Dale Egnoski. NEWGA Amateur ruler R. A. (Bob) Martin was alone at 77, with southpaws Rick Backus and Jim Hulsizer at 78.

Mike Reinert, of Oshkosh, led A Flight with a 76, including a 1-under par 36 on the back nine. Another Oshkosh shotmaker, Jerry Daun, posted a pair of 40s to command a 1-shot lead over Bob Zarter in B Flight.

The C Flight lead was shared by Bob Below, Jr. and Tim Wainscott, a pair of Twin Cities' promising 14-year-old linksmen, with 83s. Wainscott's 83 includes an eagle deuce on the 270-yard 10th hole. Ray McClone is their closest pursuer with 86.

Butte des Morts clubmates Otto Sherry and Wally Weber set the D Flight pace with 88 and 90, respectively, while Bob Bartelt's 95 was the best effort in E Flight.

## Wildcats Blitzed By Florida, 43-7

### Spurrier Connects on Three TD Passes, Boots Two Field Goals

GAINESVILLE, Fla. (AP) — Steve Spurrier passed for three touchdowns and kicked two field goals Saturday in leading Florida to an impressive 43-7 intersectional football victory over Northwestern.

Outweighed by the Big Ten team, Florida used superior speed and Spurrier's pinpoint tosses for a rout in what was expected to be a close game.

Richard Trapp, a junior speedster, caught two touchdown passes and started another jrive with a 32-yard run.

A bunch of sophomores meshed into the Florida nucleus of veterans with the result of a far more impressive team than the one picked before this season opened to be middle bracket in the Southeastern Conference.

The 40,056 spectators whooped and cheered at the prospect of a good season as the Gators — sprinked with inexperience — performed with the skill of a veteran combination.

The Wildcats marched 73 yards to its only touchdown at the start of the second half but made no other serious threat.

Although Spurrier passed for 219 yards, he sat on the bench about one third of the offensive time while his understudies — Harmon Wages and Kay Stephenson — carried on, and they each engineered a touchdown drive.

## Nebraska '11' Squeaks Past TCU, 14-10

LINCOLN, Neb. (AP) — Nebraska's Cornhuskers throttled Texas Christian's ground game Saturday, seized a 7-0 first quarter advantage and nursed it to a 14-10 intersectional football victory before a record 60,974.

A nine-play, 63-yard first quarter drive opened Nebraska scoring, halfback Charlie (Choo Choo) Winters churning seven yards with a pitchout from Bob Churchich for the touchdown.

Early in the second period, a pass interference call gave TCU the ball on Nebraska's 16. A P.D. Shabay pass to David Smith converted the break into a touchdown.

Taking the ensuing kickoff, Nebraska moved 78 yards on 16 plays, and a 10-yard Churchich pass to junior end Dennis Morrison put Nebraska ahead to stay.

## Miller, Staub Score Three Runs as Astros Rout Philadelphia, 11-2

HOUSTON (AP) — Norm Miller and Rusty Staub each drove in three runs Saturday, leading Houston to an 11-2 victory over Philadelphia Saturday.

Miller hit his first major league homer in a six-run third inning, a three-run blow, while Staub singled across a run in the first and doubled home two more in the third. Bill Heath contributed four hits to the Astros' 17-hit attack.

POST-CRESCENT
Sunday, September 18 Page C12

## Boyajian and Ryan Throw Touchdown Passes in 20-10 Season-Opening Triumph

By KEN HARTNETT

MADISON, Wis. (AP)— New-look Wisconsin, with sophomore John Ryan firing a decisive 14-yard scoring pass, and a revamped defense rising repeatedly to the occasion, beat down Iowa State 20-10 Saturday in a nonconference football opener.

Ryan's scoring shot to Bill Fritz with 64 seconds left in the first half gave the comeback-bent Badgers a 14-10 halftime lead.

The Badgers' revamped defense, ninth last season in the Big Ten, took over from there to dampen the explosive passing combination of Tim Van Galder and Eppie Barney—the most productive in the Big Eight a year ago.

Three times the Badgers picked off Van Galder passes. Each time hurt the Cyclones—who were seeking their first victory over Wisconsin.

Recovers Fumble

One of the interceptions—by Dave Berg—came in the end zone after the Cyclones had driven to the one yard line in a series that started when Ted Tall recovered a fumble by Lynn Buss at the Wisconsin 33 early in the second period.

Wisconsin drove back up field from its 20 after that to add to the Badgers 14-10 lead with the first of two Tom Schinke field goals—a 20-yarder. Schinke, who also added a 32-yard boot late in the last quarter got the Badgers going in the first period when he intercepted a Van Galder pass intended for Barney at the Iowa State 34.

Wisconsin took the lead eight plays later as John Boyajian rolled out at the 16 and passed to sophomore Buss at the five.

Buss crashed over from there, taking defender Dave Mayberry into the end zone with him.

The Cyclones capped a 50-yard march with a Tom Busch 23-yard field goal after the Badgers stiffened to halt three running plays inside the five.

Iowa State quickly rebounded to take a 10-7 lead as Les Webster bolted over from the one on fourth down after a 26-yard punt by Wisconsin's Don Schaffner.

With time running out in the half, Ryan took over the slumbering Badgers' offense. Moving the team from midfield, the cool sophomore connected with Tom McCauley on a 35-yard pass play to the 14.

Over anxious receivers dropped two of his passes before Ryan found Fritz behind the secondary deep in the end zone.

The final interception — by Gary Reineck—came in the last period with the score 17-10 and Van Galder leading the Cyclones to a first down on the Wisconsin 27.

Reineck raced 31 yards to the Iowa State 49 with the ball and set up the first Schinke field goal.

The Badgers' defense got help from Iowa State in checking the third period drive that ended with Berg's interception in the end zone.

With a fourth and one at the one-foot-line, Iowa State was late in breaking out of the huddle and was penalized five yards for delay of the game.

The Cyclones tried to score from the six on a tackle eligible play to John Chism but the ball bounced off a tangle of players and Berg grabbed it before it hit the ground.

Wisconsin ran into similar problems with a third down and goal at the one late in the final period.

Instead of a touchdown, the Badgers had to settle for Schinke's second field goal.

Wisconsin, in beating Iowa State for the fifth time in a series that began in 189,ahad5 series that began in 1895, had a host of heroes.

Buss picked up 53 yards in 14 carries and Vic Janule had 52 in the same number of trips. McCauley caught three passes for 54 yards. Standouts on defense were tackle Tom Domres, linebackers Sam Wheeler and Bob Richter, and Eric Rice, and the entire secondary excelled.

Wisconsin, fumble and interception prone throughout the dismal 1965 season, lost the ball only once on a fumble and gave the ball away only once on an interception.

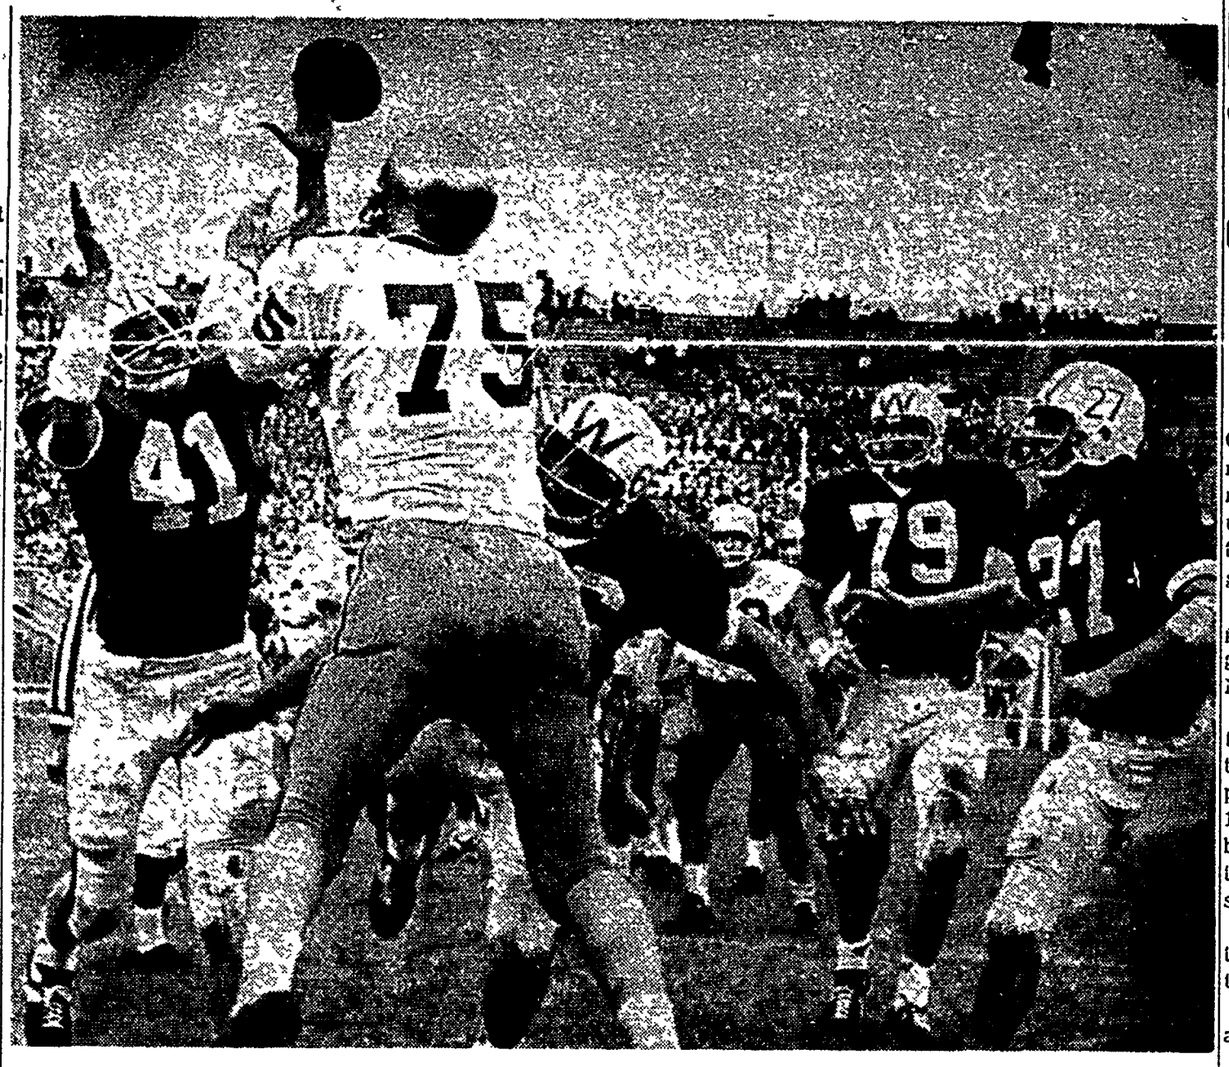

Coach Milt Bruhn, who barely kept his job after the 2-7-1 season last year, succeeded in his game plan — ball control.

The Badgers got off 68 plays in the game, including 53 on the ground. Iowa State had the ball for 57 plays, 37 of them rushes.

### Win Chain Ends at 10

## Lourdes Tips Xavier

BY JUDY RUSSELL
Post Crescent Staff Writer

OSHKOSH — Pandemonium reigned supreme here Saturday night as Lourdes High School, the scrappy underdog, who failed to give up, dug in and upset defending champion Appleton Xavier, 6-0, in the opening game of the Fox Valley Catholic Conference season.

A superb defensive display caused havoc for the Hawks all night as a terrific pass rush and an alert secondary kept Lourdes in the game until the Knights could put together a successful offensive drive.

The break came with 4:52 left in the game when John Phair recovered quarterback John Wennings's fumble after a big rush. Eight plays later, Lourdes QB Randy Walter passed to halfback Jim Purtell, who churned and twisted through the Hawk secondary for 20 yards to the Xavier 15.

Three plays later, halfback Paul Kraemer, a workhorse for the Knights, pulled an 11-yard Walter pitch in the right corner of the end zone. Walter's try for the extra point was blocked, but Lourdes had revenge, at last, over its top rival.

Xavier reached the Knight 15 in the third period, but Rick Purtell intercepted Wenning's pass. It was one of two steals for Purtell, who played an outstanding game, along with Tom Nevers, Phair, Ron Ruetten and Frank Seckar.

Xavier had trouble getting a sustained drive going because of fumbles and incomplete passes. The Hawks lost Wenning briefly with a leg injury in the second half. Xavier pass interceptions were made by Tom Heinritz, John Grosser and Steve Rechner.

Xavier attempted to rally in the final minute but penalties and incomplete passes prevented the Hawks from moving.

Gets First Win

It was Lourdes' first win in three starts, over-all, this season.

For Xavier, it was the first loss in three starts and halted a 2-season winning streak at 10 games. Lourdes also stopped the Hawks' FVCC victory streak at 13 games. Xavier's only other conference loss in 36 games was a 7-0 decision to Menasha St. Mary in 1964.

Xavier posted a first down edge of 12 to 7 and had an unofficial total yardage margin of 161 to 149.

## Alou Triggers Braves' Win Over Reds

ATLANTA (AP) — Felipe Alou smacked a home run, scored another run and drove in a third, leading the Atlanta Braves to a 3-1 victory over Cincinnati Saturday night.

Alou led off the Braves' first inning with his 30th homer, singled in the sixth and scored on Joe Torre's pop-fly double, then delivered a run in the seventh with a sacrifice fly.

The Reds scored in the third on singles by Tommy Helms, Pete Rose and Lee May.

Don Schwall picked up the victory with relief help from Clay Carroll. Joe Nuxhall was the loser.

## Hurricanes Turn Back Colorado

BOULDER, Colo. (AP) — Stailed by two key interceptions in the first quarter, Miami's Hurricanes ran up 21 points in the second period that decided their 24-3 victory over Colorado Saturday.

Two Bill Miller-to-Jerry Daanen touchdown passes put Miami ahead in the second quarter, and the Hurricanes frosted their cake with 12 seconds left in the half when tackle Bob Tatarek recovered Colorado quarterback Bernie McCall's fumble in the end zone.

## Chisox Down Orioles, 3 to 1

### Preserve Victory In the Ninth With Triple Play

BALTIMORE (AP) — The Chicago White Sox pulled off a triple play in the ninth inning Saturday as they defeated the American League-leading Baltimore Orioles 3-1 behind Jerry Adair's three-run homer. The loss was the Orioles' sixth in their last eight games.

The Orioles went into the ninth trailing 3-1, but they threatened when consecutive coubles by Dave Johnson and Paul Blair put runners at second and third with none out.

Tommy John then got Andy Etchebarren to hit a grounder to first baseman Tom McCraw. McCraw stepped on first for one cut, then fired to shortstop Adair, catching Blair in a run-nown between second and third. Adair tagged Blair near third for the second out, and Johnson suddenly broke for the plate.

Adair fired to the plate, and catcher John Romano flipped to John who tagged Johnson on the baseline for the game-ending out and a triple play.

Frank Robinson hit his 45th homer for the Orioles in the first inning, but former Oriole Adair connected in the fourth after Tommie Agee singled and Pete Ward walked.

## Bucs Snap Dodger Winning Streak as Clendenon Stars

### Pittsburgh Moves to Within 2½ Games of League Lead

LOS ANGELES (AP) — Donn Clendenon brought Pittsburgh from behind with a three-run homer in the seventh inning Saturday as the Pirates snapped the Los Angeles Dodgers' eight-game winning streak 9-5.

The victory lifted the second-place Pirates to within 2½ games of the Dodgers in the National League race.

Clendenon's smash against the left field foul pole came at the expense of Phil Regan and pinned the loss on Bob Miller, 4-1. Miller was lifted after Roberto Clemente walked opening the seventh and Willie Stargell singled.

The Pirates went on to clinch the triumph with four runs in the eighth inning.

Clendenon's homer wiped out a 3-2 Dodger lead.

## McCovey Hits 3 Homers as Giants Win, 6-4

### 2-Run Blast in 10th Off Miller Topples Mets

SAN FRANCISCO (AP) — Willie McCovey's third homer of the game, a two-run blast in the 10th inning, lifted the San Francisco Giants to a 6-4 victory over the New York Mets Saturday.

McCovey connected against Larry Miller after Willie Mays singled with one out and moved to second on John Stephenson's passed ball. The homer, over the right field fence, was the big first baseman's 33rd of the season.

McCovey, whose homer Friday night was the longest ever hit at Candlestick Park, connected off starter Dennis Ribant in the fourth inning and again in the fifth.

One Out Away

The Mets were one out away from beating Juan Marichal for the first time and winning their first season series in their five-year history.

But with two out in the ninth, Jim Hart batted for Marichal, who is 17-0 against New York, and drove a Miller pitch over the left field fence for his 33rd homer, tying the game 4-4.

The Mets had forged ahead 4-3 in the eighth. Bud Harrelson, who beat the Giants Friday night by stealing home, started the inning with a single. Then with two out he stole second and continued to third on catcher Tom Haller's wild throw into center field.

Al Luplow followed with a blast over the right field fence for his second homer of the day.

Ken Boyer and Luplow hit consecutive homers off Marichal in the sixth, cutting the Giants' lead to 3-2.

## Pennings Nips Springs, 12 to 6

### Squires' Merline Scores Pair of TDs In FVCC Lid-Lifter

FOND DU LAC — Quarterback John Merline scored a pair of touchdowns to lead De Pere Abbot Pennings to a 12-6 conquest of Fond du Lac St. Marv Springs Academy here Saturday night

The game marked the Fox Valley Catholic Conference opener for both clubs.

Merline tallied Pennings' first marker in the opening period on a 7-yard run.

Coach Tom Griefenkamp's Ledgers retaliated in the second canto to knot the count at 6-6 when Joe Klinzing scored from nine yards out on a run.

Pennings added the clincher in the fourth period with five minutes left in the game on Merline's quarterback sneak from less than one yard out. The Squires had had fourth and less than a yard to go when Merline scored the winning TD.

## Mickey Wright Leads by Four in Englehorn Open

CALDWELL, Idaho (AP) — Mickey Wright, carding a 68 following a record 65 Friday, blasted to a 133 and a four-stroke lead after the second round of the $10,000 Shirley Englehorn Open at the Purple Sage Golf Club Saturday.

**La Crosse Fullback Warren Baer** is pulled down by a horde of Wisconsin State University-Oshkosh tacklers in their game at Oshkosh Saturday. The WSU-O contingent includes Ken Heiner (10), Jim Kramer (86), Bernie Barribeau (24), Don Mohong (25) and Dan Torrison (62). La Crosse guard Bill Riberich is 55. La Crosse won in the SUC opener for both teams, 14-7. (Post-Crescent Photo)

### Indiana Bows to Ohio School, 20-10

## Matte Leads Miami Victory

BLOOMINGTON, Ind. (AP)—Aroused Miami of Ohio took Indiana University's football team apart Saturday with a chopping 20-10 upset in the season opener for both clubs.

Indiana, favored by a touchdown against its Mid-American Conference foe, used up all its offense in 54 seconds of the third quarter and never could cope with the cunning running of Miami quarterback Bruce Matte.

There were 17 points scored in 67 seconds of the hectic third period, but the Redskins weren't to be denied victory in the game they'd been pointing toward since last spring.

Passed Sparingly

Matte, a 195-pound quarterback, directed the Miami offense. He used the forward only sparingly but was at his best on the option play as the bewildered I.U. defense was caught time and again trying to stop the elusive Matte.

The Redskins drew first blood in the game on Joe Kozar's one-yard plunge with 7:03 left in the first quarter. The score climaxed a 49-yard drive that used 12 plays.

Neither team could score the second quarter and the Redskins took their 7-0 lead into the dressing room, brim full of confidence.

For 54 seconds of the third quarter, it looked like Indiana was about to awaken and win some prestige for the Big Ten Conference.

Moved 64 Yards

With quarterback Frank Stavroff and end Bill Couch combining on some fast plays, the Hoosiers moved 64 yards in 10 plays with Couch catching a five-yard pass from Stavroff for the score. Dave Kornowa kicked the extra point that brought a 7-7 tie with 9:02 remaining in the period.

John Eickstead hit the Ohio team's Jim Shaw so hard on the ensuing kickoff that the Redskins' halfback dropped the ball and Cordell Gill pounced on it for the Hoosiers. Three plays failed to gain a first down from the Miami 22 but Kornowa then kicked a 41-yard field goal to give I.U. a brief 10-7 advantage.

Bob Glover put heart back into Miami with the kickoff, returning it 86 yards for a touchdown and Al Moore's extra point made it 17-10 with 7:59 left.

# KING-PIN capers

By Jim Harp

The 1966-67 bowling season is underway and the outlook is nothing but bright.

More teams and leagues are participating, Appleton will be host for the men's state tournament next spring and the area is in for a bigger and better Bowl-O-Rama with (some surprises) next April and May.

Main purpose of this column is to bring to bowlers some of the sidelights and happenings which go on at the lanes but do not make the headlines. High scores will always receive recognition in the regular sports pages, but King-Pin Capers is designed for the unusual things.

Therefore, league secretaries should make a note of difficult split, cleanup, triplicates, unusual game sequences, strikes or splits in succession and the like. A note to The Post-Crescent addressed to the King-Pin will be all that's necessary to get it in the Sunday column.

* * *

**Women keglers have started the season off in great fashion as they have recorded two national honor counts already.**

**Virginia Tegen had a booming 632 in the Women's Classic League at the 41 Bowl and Irene Koeller had a 607 at Donaldson's Lanes, in Clintonville. Virginia had a 244 game with the big series while Irene came within one pin of a triplicate with games of 202, 202 and 203.**

* * *

Susie Lundberg came within a whisker of getting a national honor count on the first night of bowling in the Women's Classic League at the 41 Bowl as she fired a 599 series.

Susie missed the head pin on a 1-2-4 setup in the final frame of the last game to finish short of the mark. She had 248 game with the big series.

* * *

**One of the best games in the area was the 265 by Jerry Mignon in the American Legion League at Little Chute's Recreation Lanes. Mignon started that game with seven strikes in a row.**

* * *

Betty Kolosso had an all spare game of 173 while bowling in the Alley Cat League last week.

Delores "Dee" Breuer recorded an all spare game in the Wednesday Afternoon Coffee League at the 41 Bowl. She finished with a 177.

* * *

**Clarence Lautenschlager had a 145 triplicate in the Appleton Lutheran League at Hahn's Lanes last week.**

**Vesper Steenis missed a triplicate by one pin with games of 116, 116 and 117 in the Wednesday Coffee League.**

* * *

Here are some of the top split cleanups reported in the early pin action:

Anna Harris, 6-7-10, Wednesday Coffee League; Joy Burhandt, 4-6-10 and Gladys Zielinski, 6-7-10, Hit and Miss League; Ken Theis, 6-7, Fraternal League; Marilyn Everts and Joan Schaenzer, 6-7-10, Hortonville Women's; Bill Lesselyoung, 6-7, Builder's League; Mary Bunn, 6-7-10, Tag-a-Long League; Ardis Brandt 6-7-10, Pill League.

* * *

Personal Report: Well, this marks another season at trying for my first 600 series in league play. King-Pin has come close in the past, but never quite achieved the mark. If the first two weeks of the season are any indication it looks like a long, cold winter. Fellow sportswriter Terry Galvin has offered a $5 bet that I do not get a 600 this season and I have until next Thursday to take him up on it. Do you think it would be a good idea?

## Eagles' Poage Out for Rest of Campaign

PHILADELPHIA (AP) — Split end Ray Poage, the Philadelphia Eagles third leading pass receiver last season, will be sidelined for the rest of the National Football League season with a knee injury.

Poage will undergo surgery next week, according to Dr. James Nixon, the team physician.

# Michigan Rips Oregon State In Opener, 41-0

### Ward, Fisher Score Pair of Touchdowns In Non-League Win

By BERNIE KENNEDY

ANN ARBOR, Mich. (AP)—Speedy Carl Ward and bulldozing Dave Fisher each scored a pair of touchdowns and led Michigan to a 41-0 victory over Oregon State in the football season opener for both teams Saturday.

The Wolverines, who last defeated Oregon State in the 1965 Rose Bowl game, scored the first two times they had the ball with Ward carrying 16 yards for the first touchdown and a yard for the second.

Michigan added its third touchdown with less than a minute remaining in the half with Fisher going in from a yard out. Another one-yard plunge by Fisher in the final quarter closed out the scoring.

Ernie Sharpe went three yards for another Michigan touchdown in the third quarter following an exchange of fumbles.

Sub quarterback Dennis Brown combined with end Jim Berline for a 26-yard scoring pay with two seconds remaining for the Wolverines' final score.

Oregon State's only scoring threat came after the third Michigan touchdown. Paul Brothers completed two passes to bring the Beavers to the Michgan 25 and a pass interference call put the ball on the seven. Brothers last-second pass into the end zone to Bob Grim was high.

## Army Gridders Win, 21-6, Over Kansas State

WEST POINT, N.Y. (AP)—Army scored two touchdowns in the final minutes of the fourth quarter Saturday and made new coach Tom Cahill a winner with a 21-6 verdict over Kansas State.

Until the waning moments the Big Eight club, loser of all its 10 games last season, trailed by only a point, 7-6. Then two quick Army touchdowns put the game out of reach of the visitors who did not arrive here until 3 a.m. because of plane troubles.

Two long runs by halfback John Peduto, and the fourth quarter passing accuracy of sophomore quarterback Jim O'Toole offset a generally lackluster performance by the Black Knights.

Virginia Tegen authored Appleton's first national honor count of the 1966-7 bowling season when she boomed a 632 set in the Women's Classic League at the 41 Bowl Wednesday. (Post - Crescent Photo)

## Cepeda Stars As Cardinals Tip Cubs, 6-5

CHICAGO (AP) — Orlando Cepeda lashed a two-run double in the eighth inning, sparking a three-run rally that boosted the St. Louis Cardinals to their seventh straight victory, a 6-5 triumph over the Chicago Cubs Saturday.

Cepeda, who doubled ahead of Mike Shannon's seventh-inning homer, snapped a 3-3 tie in the eighth by doubling after walks to Ed Spiezio and Curt Flood. Cepeda then scored on Shannon's double.

Griese Hurls 3 TD Passes

# Purdue Rips Ohio University

LAFAYETTE, Ind. (AP) — Purdue had to take the wraps off passer Bob Griese to make up for its sputtering ground game and put down stubborn Ohio University 42-3 Saturday in its opening football game.

The Purdue defense had trouble in the first half with the Bobcat runners, especially Bob Houmard and Wash Lyons, but the Boilermakers put a brutal rush on Ohio's sophomore quarterback, Ron DeLucca, and broke up his passes when he got them away.

Purdue led only 7-3 going into the final minute of the first half.

Griese threw three touchdown passes and completed 17 of 21 tosses for 230 yards. DeLucca connected on only four of 15 for 29 yards.

The Boilermakers pulverized Ohio in the second half and scored each time they got the ball. Sophomore fullback Perry Williams went over twice, on a one-yard plunge and a 47-yard screen pass from Griesen.

The Bobcats never crossed mid-field in the second half and made only four first downs after the intermission.

The Purdue substitutes scored the last touchdown under the direction of quarterback Jim Klutcharch, with Bob Baltzell going over on a 12-yard end run. Klutcharch completed two passes without a miss in the drive.

## Navy Scores 27-7 Triumph Over Boston College

ANNAPOLIS, Md. (AP) — Navy found a new offensive punch Saturday in juniors John Cartwright, Terry Murray and Rob Taylor and rolled to a 27-7 opening football victory over Boston College.

Cartwright, who had difficulty passing as a sophomore quarterback, showed finessee and skill as he completed 13 of 22 tosses for 148 yards, nine of them to split end Taylor for 113 yards.

He also ran four times for 53 yards, scored one touchdown and passed 18 yards to Murray for another.

## Vikings' Bedsole On Injured List

MINNEAPOLIS - ST. PAUL. (AP) — The Minnesota Vikings placed tight end Hal Bedsole on the injured reserve list Saturday, and the former Southern Cal star will undergo knee surgery Monday.

A Viking spokesman said it is assumed Bedsole is lost to the Vikings for the season. Veteran Red Phillips will replace Bedsole for today's Viking - Baltimore game here.

## AHS Sophomores Win Opener, 6-0

The Appleton High School sophomore football team stopped Green Bay East, 6-0, here Saturday in its season opener.

A 10-yard pass, Bob Birkholz to Mike Reddy, on the last play of the first half, capped a 56-yard scoring drive. Standouts on defense for the Dick Pike-coached Junior Terrors were Don Knaack, Wally Day and Leo Anderson.

## Indians End Loss Streak, Tip Tigers

DETROIT (AP) — Joe Azcue drove in four runs and Steve Hargan pitched a four-hitter as the Cleveland Indians snapped a six-game losing streak by defeating Detroit 6-2 Saturday.

Azcue slammed a three-run homer off reliever Orlando Pena, and also had a double and a sacrifice fly. Rookie Jose Vidal's first major-league hit, a second-inning triple, also contributed to the Indians' scoring.

## Penn State '11' Tops Maryland

UNIVERSITY PARK (AP) — Penn State, cashing in on the running of quarterback Jack White and the defensive play of sophomore guard Mike Reid, scored a come-from-behind 15-7 opening game football victory over Maryland Saturday.

Penn State's winning margin came on a field goal by Tom Sherman and three safeties, two of them credited to Reid, a high school standout from Altoona, Pa.

# Titans Drop Opener 14-7

## La Crosse Intercepts 3 Passes; Falaschi Scores Winning TD

BY DON CASTONIA
Post-Crescent Staff Writer

OSHKOSH — Three pass interceptions, one in the final two minutes of play, killed Oshkosh State University hopes of an opening game win as La Crosse State University edged the Titans, 14-7, in the State University Conference opener for both teams.

Ed Cretens picked off a Larry Cramberg pass on the La Crosse 5-yard line with just 1:58 remaining to end Oshkosh hopes. The Indians then ran out the clock. Barry Schockmel ended an early Oshkosh drive, intercepting a pass on the 7-yard line on the second play of the fourth quarter. Oshkosh had driven down to the La Crosse 20 in both instances.

La Crosse quarterback Rocky Falaschi kept Oshkosh off balance most of the game with his rollouts off the belly series, gaining 64 yards rushing, including an 8-yard scamper with the winning touchdown in the third quarter.

The Titans ground game was slowed considerably in the second half when full back Myles Strasser was injured. Strasser had bulldozed for 54 yards in the first half before leaving the game with a foot injury on the last play of the half.

The Titans had started strong, scoring the first time they had the ball but then lost their spark until the final quarter, when it was too late.

After forcing a punt following the opening kickoff, Oshkosh took over on its own 24 and marched 76 yards in 14 plays to score with Ned Gatzke taking an 11-yard pass from Cramberg for the touchdown. Cramberg added the extra point.

La Crosse was contained until midway through the second quarter. Starting on their own 29, the Indians marched 71 yards in eight plays with Warren Baer going the final five yards. Dan Meinert added the first of two extra points.

Falaschi was the big thorn in the drive, gaining 16 yards on three keeper plays and passing to Grady Steensrud for 27 more yards.

A good punt return by Steensrud to the Oshkosh 44 set up the second La Crosse touchdown in the third period with Falaschi going the final eight yards on a roll-out.

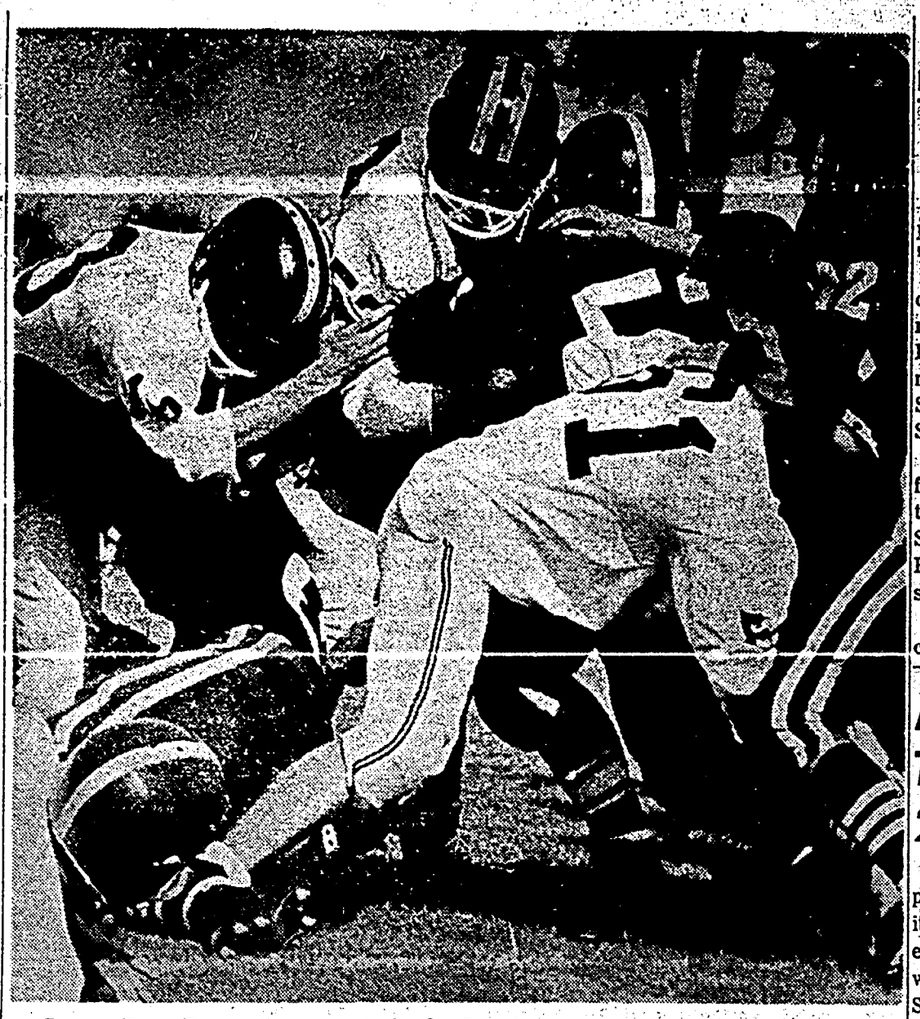

Oshkosh's last-ditch effort started on its own 16. The drive appeared doomed before it got moving when Cramberg was forced to punt after the first series of downs. However, La Crosse was detected holding, giving Oshkosh a first down on its 36.

Cramberg promptly connected with Greg Carlson for a 17-yard gain to the La Crosse 47. After three running plays moved the ball to the Indians' 32, Cramberg passed to Ron Hayek for 11. A running play picked up two more and then the interception ended Titan hopes.

Steensrud's punting also kept Oshkosh in the hole much of the afternoon. He punted out of bounds inside the 1-yard line in the fourth quarter and had punts roll dead on the 5- and 16-yard lines in the third and fourth periods.

Green Bay Premontre quarterback Pete Lukowitz, left (10), fails to get anywhere against the Little Chute St. John defense in their game at Green Bay Saturday. The two Cadet blockers are Jim Locatelli and Gene Barcz (61). The Dutchmen brigade includes Vic DeBruin (below Lukowitz), Leon Biesterveld (53) and Tim Hartjes (22). The Dutchmen upset Premontre, 20-13, in the FVCC opener for both teams. (Mike Van Susteren Photo)

## Iowa Makes Nagel's Debut 31-20 Success

### Podolak Scores Twice Against Arizona Gridders

IOWA CITY, Iowa (AP) — Iowa unleashed a balanced running and passing attack coupled with an at times stingy defense and made new coach Ray Nagel's debut a 31-20 success over Arizona Saturday in an intersectional football battle.

The Hawkeyes, loaded with sophomores and inexperienced players, showed surprising poise in hammering through the Wildcats' rather weak line for touchdowns two of the first three times they had the ball.

Quarterback Ed Podolak, a sophomore, directed the attack two-thirds of the way and wound up plunging over for two touchdowns himself and passing for another.

Iowa's other quarterback, junior Chuck Roland, who saw only limited service a season ago, scored the other on a seven-yard scamper in the third quarter.

The triumph snapped an eight game losing streak for the Big Ten's cellar dwellers of last season.

Arizona didn't get hot until after the game had already been decided. The Wildcats, who had difficulties on the ground, were successful through the air in the fourth quarter.

Reed drilled a 23 yard pass to halfback John Greth climaxing a 75-yard march that began in the closing seconds of the third quarter.

After the Hawkeyes' Bob Anderson had kicked a 22-yard field goal with 5:23 left, a series of short Reed passes, mostly to Greth, carried Arizona to the 29, where Brad Hubbart broke around left end and raced for the touchdown.

Only 12 seconds remained when Reed fired a 20-yard strike to halfback Paul Wargo for the final score.

## Yancey, Brown Lead Tourney

### Nicklaus Fires 65 In Portland Open, Trails by 5 Strokes

PORTLAND, Ore. (AP) — Cool Pete Brown and consistent Bert Yancey took the third round lead in the $50,000 Portland Open golf tournament Saturday as second round leader Bob Goalby fell a stroke behind.

Brown scored his second eagle of the tournament on the way to a three under par 69 and a 54 hole total of 204. With him at 12 under par was Yancey, who fired his third straight 68 on the 6,436 yard Columbia-Edgewater course.

Billy Casper, a three-time winner at Portland, repeated his fine 67 of opening day and was tied with Goalby for third. Goalby shot a 71 Saturday after two straight 67s.

However, defending champion Jack Nicklaus gave the crowd its biggest thrill. After two lackluster rounds of even par he opened up with five birdies on the first six holes and finished with a 65.

Brown, the 30-year-old Los

That left him five strokes behind going into today's final round on the par 72 course.

Brown, the 30-year-old Los Angeles pro who has been in contention all the way, dropped in short birdie putts on the second, 10th and 11th holes.

Eagles No. 12

Then he eagled the 510-yard 12th with the No. 3 wood drive and a 10-foot putt. 3

At that point, he was 14 under par. But he went over on two of the last three holes, being buried deep in a trap on the par-three 16th and then hitting short on his approach to the 394-yard 18th hole.

It rained during the afternoon round, and Brown said the weather bothered him.

Yancey, 28 - year - old Florida pro who has been putting magnificently throughout the tournament, chipped in from 25 feet for one birdie and made short putts for the others.

Best shot of the day was a hole-in-one on the 130-yard eighth hole. Australian Bruce Crampton did it with a No. 9 iron.

## Washington Gridders Tip Idaho, 19-7

SEATTLE, Wash. (AP) — Washington's Huskies brewed up a redhot football combination of pass and run Saturday to overwhelm Idaho's Vandals 19-7 after spotting the visitors an early touchdown in the intersectional season opener.

A hefty Vandal team that was expected to keep Washington fighting all the way manufactured only one sustained drive.

Early in the second period the visitor from the Big Sky Conference launched a drive that carried 84 yards in a dozen plays.

Most of the yardage was gobbled up by 248-pound fullback Ray McDonald, but the payoff came when quarterback John Foruria flipped a 25-yard scoring pass to speedy end Manny Murrell.

Junior quarterback Tom Sparlin got the Washington offense into gear midway in the second quarter.

Kaukauna Piles Up 353 Yards

# Ghosts Top Raiders

BY ED VAN BERKEL
Post-Crescent Staff Writer

KAUKAUNA — Making the most of a strong running game the Kaukauna Ghosts rolled to a 20-0 Mid-Eastern Conference win over Two Rivers in the home opener here Saturday afternoon.

The Galloping Ghosts seemed to move the ball almost at will between the 20-yard stripes as they piled up 353 yards, 304 by rushing, but the Purple Raiders seemed to stiffen in the shadow of their goal posts and limited Kaukauna to two TD's by the offensive unit.

A strong Kaukauna defense, meanwhile, limited the Raiders to 129 yards, 56 coming on the ground. The Raider passing attack was also fairly well stymied as the alert Ghost defense picked off three errant aerials. Two fumble recoveries by the Raiders halted promising Kaukauna drives.

The winners lost little time in setting the stage for things to come as they received the opening kick-off and promptly marched 74 yards to score with less than three minutes gone in the game.

Two line thrusts by Lee Nimmer picked up eight yards when John Van De Hey, quarterback, tossed a strike to Pat Kavanaugh good for 38 yards and a first down on the Two Rivers 34-yard line. Marty Van Zeeland fumbled on the next play, but Kaukauna recovered for an 11-yard gain and another first down. Nimmer then broke off tackle and scampered 23 yards to score. Van Zeeland kicked the PAT.

Late in the first half Lee Mueller hit Joe Hoffman with a 31-yard aerial as the Raiders began a march from their own 36 yard stripe. The losers marched to Kaukauna's 12-yard stripe where three passes fell incomplete and one running play garnered nothing to give Kaukauna possession with about two minutes left.

The Ghosts moved to the Raider 20 in nine plays before time ran out in the half. Van De Hey, runing from his quarterback spot, accounted for 47 yards in the late march.

**Kaukauna Dominates**

Kaukauna completely dominated the third quarter, but were unable to push over a TD despite running up six first downs. The Raiders had the ball for six offensive plays and two punts in the entire 12-minute span.

Pete Rayome of the losers recovered a fumble by Bill Derricks shortly after the start of the final period to halt a Kaukauna march on the 12-yard line. The Raiders moved the ball to the 20-yard stripe before being forced to punt, but Hammen returned the punt to the Raider 37 and the Ghosts began their second TD march.

Nimmer ran for 11, Van De Hey picked up three, Bay added eight and Bill Derricks then broke clear for a 10-yard scamper to score and Kaukauna led, 13-0.

The tally came with 5:19 left in the fourth period and Ghost partisans breathed a little easier. On the first play following the kickoff, Nimmer intercepted a Mueller pass and returned to the Raider 48. Three running plays netted nine yards and the Raiders regained possession on their own 39 with 2:25 remaining in the game.

Van De Hey pulled a "Bob Jeter act" two plays later, timing a sideline pass perfectly, taking it from the intended receiver and scampering 45 yards untouched for the third Kaukauna score with 2:12 remaining. Van Zeeland's kick was good.

Unofficial statistics:

## Kaat Posts 24th Victory as Twins Beat Yanks, 4-2

NEW YORK (AP) — Jim Kaat scattered seven hits, joining Sandy Koufax as the only 24-game winners in the majors, as Minnesota defeated the New York Yankees 4-2 Saturday.

Kaat, who lost 10, singled during a four-run Minnesota uprising in the sixth that put the game out of reach. Ted Uhlaender scored the first run on a wild pitch, two more scored on a ground rule double by Rich Rollins and another on Earl Battey's single.

Pass Beats Sevastopol

# FVL Gains 6-0 Win

BY TIM PETERMANN
Post-Crescent Staff Writer

SEVASTOPOL — A stingy defense and a well-executed 2-minute drill carried Fox Valley Lutheran High School to a 6-0 non-conference conquest of Sevastopol High School here Saturday afternoon.

The Foxes' hard-nosed defense yielded but 52 yards on the ground and broke up all 10 Sevastopol passes in helping FVL to its second win of the season against no losses.

The only score of the game came on a 34-yard pass from Dave Tiedt to Howie Korth on the last play of the first half.

With less than two minutes remaining, the Foxes took over on downs on their own 18 after halting Sevastopol's most serious scoring threat of the game.

In just nine plays, quarterback Dave Tiedt engineered an 82-yard drive to paydirt.

Carries 3 Times

Korth carried the first three times in the series. He lost three and picked up five the first two times and then reeled off a 14-yard gainer on a reverse for a first down.

After an incomplete pass, sophomore John Hannemann rambled 21 yards on an end sweep behind a covey of blockers.

Tiedt threw incomplete twice more and then on third down hit Hannemann with a safety valve for 11.

On first and 10 at the 34 with :05 left in the half Tiedt hit Korth all alone on a crisscross pattern for the score.

FVL kept the Pioneers in the hole the entire third quarter and when a Sevastopol punt went only 18 yards Fox Lutheran had possession on the Pioneers' 30.

Fox Valley marched down to the five where Korth fumbled and Sevastopol recovered.

The Pioneers were again forced to punt and FVL took over at the midfield stripe.

Four plays later, Korth took the ball on an end run and sprinted 45 yards for a touchdown only to have it called back because of an illegal procedure penalty. The drive died after the penalty.

Sevastopol threatened twice more, but on the first occasion Jeff Volkman intercepted a pass and returned it 15 yards. The second time the interior line batted down three passes and stopped a run for minus six yards.

Korth topped all rushers with 49 yards in 16 carries in addition to his one pass catch. Volkman ran for 41 yards on 13 carries and Hannemann had 46 yards rushing and passing.

Paul Mueller led in receptions with four for 48 yards. Tiedt completed six of 12 for 93 yards and no interceptions.

In two contests thus far, the FVL defense has given up only six points and allowed only 130 net yards.

UNOFFICIAL STATISTICS

| | FVL | Sev |

## Marion Hands Thunderbirds 26-7 Defeat

IOLA — Defending co-champion Marion High School opened its Central Wisconsin Conference football season Saturday with a 26-7 win over Iola-Scandinavia.

Halfback Tom Brandenburg opened the scoring with a 2-yard run and later added a TD on a 2-yard sprint. Jim Braun added a Marion touchdown on a 45-yard run and passed seven yards to Tom Jolin for a score.

With the score, 26-0, against them, the Thunderbirds scored on a 35-yard pass play, Chuck Koehler to Bruce Meagher.

## New Officers For Oshkosh Yacht Club

OSHKOSH — A sure sign of fall and the end of the sailing season here is installation of officers by the Oshkosh Yacht Club on Cup Night.

Held recently at Oshkosh Country Club, the 1966 Cup Night saw installation of Donald Stoll as commodore with Richard Meyer as vice commodore, Mrs. Jerry Hale as secretary and Mrs. Lincoln Foster, treasurer.

Robert McGuire was named to the board of directors to serve with Jack Haverty and Vernon Frohrib.

Skippers ending the season as class champions were Jack Schloesser, Class E; Tom Meyer, Class M senior, and Jud Hirschberg, at 14, the youngest skipper ever to win the club's Class M junior award. His older brother, Larry, was awarded the club trophy as best crew.

Other trophies presented on Cup Night included the most improved skipper award to Tom Hyde and the outstanding sailing school sailor award to Jack Young.

## Packy Paquette Out for Season

SUPERIOR (AP)— Superior's Packy Paquette, who was recently named Associated Press Wisconsin high school football "Player of the Week," will be out for the rest of the season after suffering a broken ankle bone Friday night while Superior defeated Bloomington, Minn., Lincoln, 27-0.

Paquette, a 6-foot-1, 185-pound halfback, scored one touchdown and passed for another before being injured in the second quarter. In the first three games this year Paquette, a senior, had scored eight touchdowns.

## Steelers' Hoak May Miss Today's Game

PITTSBURGH (AP) — Pittsburgh Steeler halfback Dick Hoak was hospitalized Saturday with what was diagnosed as acute intestinal upset and will probably miss today's National Football League game here with the Detroit Lions. c

The Steelers said Hoak would be replaced by Jim (Cannonball) Butler or Bob Smith.

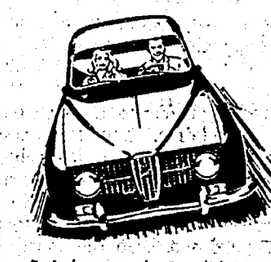

## St. Norbert Wins Over St. Cloud '11'

ST. CLOUD, Minn. (AP) — Tom Schoen of St. Norbert College blocked three St. Cloud State punts and St. Norbert turned them into two touchdowns and a safety Saturday, as the De Pere, Wis., school notched a 20-7 victory.

Scoring for the victors were Schoen, a defensive end, on the safety, Dave Schoenwetter from the one-yard line and Dick Hilger on a ten yard pass.

John Thienlen scored St. Cloud's only touchdown on a two yard plunge.

Cowboys Meet Giants in Cotton Bowl

# Colts Eye Comeback Against Vikings

By JACK HAND

Green Bay faces its second showdown game in two weeks today at Cleveland and if the Browns don't do better than Baltimore, the Packers can start scouting the American Football League for the super bowl game.

The Packers' defense picked off three of Johnny Unitas' passes last week in an impressive 24-3 victory over the Colts. Coach Vince Lombardi has the defending champs primed for a rousing rematch with the Browns, the team they beat for the National Football League title last year.

Because Chicago and Los Angeles played Friday night, there are only six games on the Sunday NFL schedule. Dallas, which drew a bye last week, gets into action against New York in the Cotton Bowl and San Francisco, tied by Minnesota last week, is idle this go round.

In addition to Green Bay, 1-0, at Cleveland, 1-0, other Sunday games will have New York, 0-0-1, at Dallas, 0-0, Washington, 0-1, at St. Louis, 1-0, Detroit, 1-0 at Pittsburgh, 0-0-1, Baltimore, 0-1, at Minnesota, 0-0-1, and Atlanta, 0-1, at Philadelphia, 0-1.

## Red Sox Score Fifth Straight Victory, 3 to 1

BOSTON (AP) — George Thomas and Carl Yastrzemski cracked solo home runs in powering the Boston Red Sox to their fifth straight victory Saturday, a 3-1 decision over California.

Thomas led off the third inning with his fifth homer and, after Joe Foy lined out, Yastrzemski hit one into the left field screen for his 16th home run.

Southpaw Dennis Bennett, battling back from shoulder surgery last April, evened his record 3-3 with relief help from John Wyatt. Bennett allowed only five hits, including a home run by Bob Rodgers in the seventh, before retiring.

in the Eastern Conference, will Dallas, boomed as a title hope show its new big play offense, featuring Mel Renfro, Don Meredith and Bob Hayes in its opener after sweeping five exhibition games.

John Unitas

### Depend on Morrall

The Giants, who tied Pittsburgh in a battle of fumbles, must depend on Earl Morrall's passes. A big crowd is expected to jam the Cotton Bowl to greet the Cowboys.

The Colts, derailed by the Packers, hope to get on the right path at Minnesota with Unitas still needing two TD passes to tie Y. A. Tittle's lifetime record of 212. The Vikings got only 10 pass completions from Fran Tarkenton but scrambled to a 20-20 tie in San Francisco and should be better in their home opener.

The surprising Detroit Lions, upset winners over Chicago last Sunday, will send Milt Plum and Tom Nowatzke after the Steelers and will give Bill Nelsen a big pass rush. Bill Austin's rebuilding Steelers hope to surprise the Lions with rookie Bill Abury and Nelson's tosses to Gary Ballman.

St. Louis is home for the second straight week with Otto Graham's Redskins as the opposition this time. The Cardinals rallied to beat Philadelphia in their opener on a Jim Bakken field goal after Johnny Roland aroused the offense. The Redskins who led the Browns at the half but faded fast, hope to hold on this time.

Atlanta's new Falcons and the Eagles, both beaten in their openers, will be shooting for a first victory at Franklin Field. The Falcons lost an exhibition game 9-7 to the Eagles Aug. 1 when a bad pass from center cost them a chance for a field goal on the final play. Tim Brown, a 10,000-yard man, will test the Falcons' defense while Randy Johnson attempts to pick holes in the Eagles.

## Oklahoma Beats Oregon, 17 to 0

NORMAN, Okla. (AP) — Wingback Eddie Hinton scampered 63 yards with an Oregon punt to start a third quarter scoring rampage that pushed Oklahoma to a 17-0 football triumph over Oregon Saturday.

Later in the period, the Sooners put together two quick scores on a 23-yard field goal by sophomore kicking specialist Mike Vachon and a quick two-play drive after Oregon fumbled the kickoff.

Kombrink, Lischner Star

# Minnesota Succumbs To Missouri, 24 to 0

COLUMBIA, Mo. (AP) — Missouri's new quarterback, Gary Kombrink, used pinpoint passing to break open the game, then turned it over to power runner Barry Lischner to wrap up a convincing 24-0 victory over Minnesota Saturday.

Missouri was fortunate to escape with a 3-0 halftime edge. The Golden Gophers dominated the half with the running and passing of quarterback Curtis Wilson and had an 82-yard touchdown pass to end Ken Last nullified.

A 42-yard field goal by Bill Bates with just 1:14 left provided the halftime edge.

But the Tigers, Sugar Bowl champions, struck swiftly from the second half kickoff 71 yards in six plays, with Kombrink pulling the trigger on a 10-yard pass to end Jim Juras and a 46-yarder to halfback Earl Denny to set up the touchdown.

**Contained in First Half**

Charlie Brown, Missouri's squirmy halfback who had been well contained in the first half, got the nine-yard touchdown. Bates kicked for a 10-0 bulge.

End Dan Schuppan and tackle Bill Powell swarmed Wilson for a loss on Minnesota's first possession, and the Missouri pass defense held Wilson without a completed pass on the next one.

Then the Tigers moved 61 yards for the clinching touchdown. They rammed the ball down to Minnesota's eight yard line, with the 206-pound Lischner battering 25 yards in four trips, knocking down friend and foe alike.

Missouri switched to a bit of trickery to get the touchdown. Kicker Bates, an ex-quarterback, took a lateral from Kombrink, then flipped an eight-yard running pass to split end Chuck Weber alone in the end zone.

NEW LOOK!

Handsome new Fleetside . . . one of 26 all-new Chevy pickup models for 1967!

Here's the brand new '67 Chevy pickup! It's strikingly new in styling (if it looked any better we'd have to stop calling it a truck!). Lower, sleeker, its trim appearance puts many cars to shame—and so does the bump-smoothing ride!

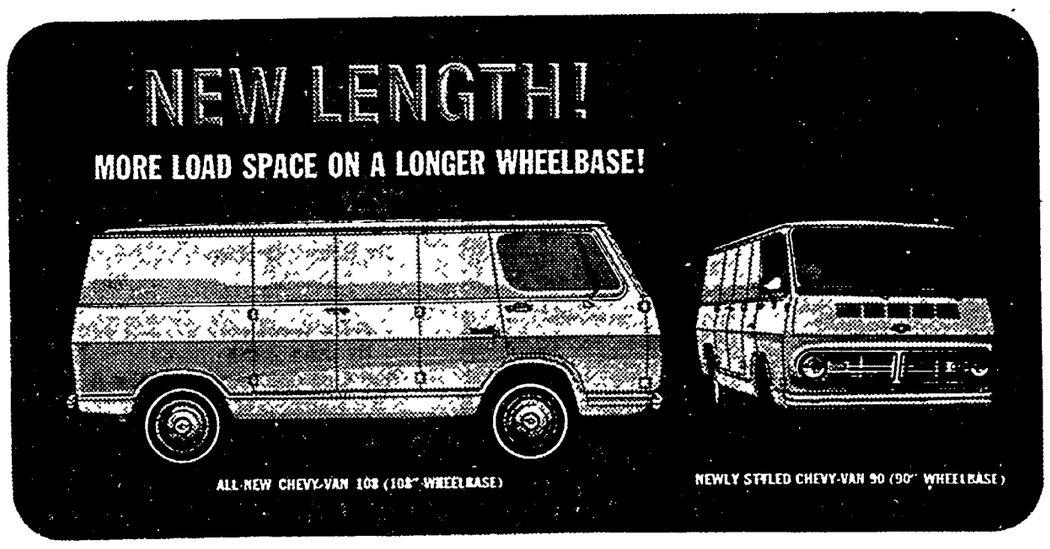

And this one's a tougher truck, too. Resists rust better with new fender skirts, undercoated wheelhouses and new body sheet metal that eliminates many welded joints.

There's a new all-steel pickup box, also, with full-depth double-wall side panels and tailgate. And a new tailgate latch that can be operated with one hand.

For more pleasant driving, the attractive new cab interior is color-keyed to the exterior paint. And for driving safety, there's better visibility plus added features such as padded instrument panel and sun visor, dual master cylinder brake system and others.

So bring on your tough jobs (and your camping trips!). The new '67 Chevy pickup looks so good and is built so well you can use it for almost anything!

A BRAND NEW BREED OF CHEVY TRUCKS FOR '67!

New Chevy-Vans in two sizes for '67 . . . new V8 power, too!

Now you can get a long low-cost Chevy-Van (as well as the regular size)! All new for '67 is the Chevy-Van 108 with 108" wheelbase and whopping 256-cubic-foot load space. Or pick the Chevy-Van 90 with 209-cubic-foot cargo area. Both sizes offer sharp new styling and a smoother ride. Both can be equipped with hustling V8 power. And both can be had in Sportvan versions.

As you can see, there's a brand new breed of Chevy trucks at your Chevrolet dealer's, so stop by soon!

# NOTES and NOTIONS

John L. Faustian

More than a few persons were willing to bet—and some no doubt did—that Jimmy Brown would end his self-imposed retirement before Cleveland's date with the Packers. Well, the Browns face the Packers today, and Jim will be conspicuous by his absence from the lineup. He evidently was pretty serious about his retirement announcement about two months ago. He could, of course, re-examine his decision before the 1967 season—although Cleveland is throwing a "Farewell Day" shindig for Jim Oct. 16 (which is an open date for the Browns). It's just possible some of the Cleveland players are anxious to prove that they can win without their great fullback and that the Browns are more than a 1-man team. Actually, it's possible that Brown's absence might not make too big a difference either way today because the Packers had far better success in containing Brown than any other team.

Brown

* * *

**Vince Lombardi was awarded the game ball last Saturday instead of such outstanding on-the-field performers as Caffey, Jeter, Willie Davis, Starr, etc. And why not? He had masterfully prepared the Packers for their meeting with the Colts—an opener upon which an unusual amount of stress had been placed. He carefully guided the Packers through the "cold war" phase of preparations—letting the Colts do the talking and the boasting while he avoided the pitfall of a meaningless word duel. And, for the "hot war," the Packers were magnificently ready, tactically and emotionally. Lombardi's pattern of exhibition season strategy becomes clearer now. Both he and the players wanted to win the All-Star game—and they did so in no uncertain terms. Vince played the next four exhibitions in a low key. Pre-season victories are fine but no longer a "must" as they were in the early Lombardi years. Conditioning and timing for veterans and experience for newcomers were his major 1966 objectives. The Packers didn't have to prove themselves in pre-season play—they were the champions, after all—but their rivals wanted badly to win for the prestige value. But, when the Packers had to be "up" for the first of a number of regular-season showdowns, they were ready.**

Lombardi

It's being said that Baltimore's John Unitas is now strictly a "game plan" quarterback, rather than playing the gambler's role, at which he excelled. That still remains to be seen, of course, but in the crucial Packer opener, Unitas was pretty much the orthodox signal caller. In fact, he went for the "bomb" only once—although Jimmy Orr's absence may have had something to do with that. But, Unitas stayed away almost entirely from Herb Adderley's side of the field (Herb having been a thorn in his side before), and his insistence on passing to the other side led to the interceptions and spectacular runbacks of Lee Roy Caffey and Bob Jeter. In addition, Unitas' consistency in throwing for his prime receiver, Ray Berry, also proved fatal. The Packers' Bart Starr alternates receiver like no one else in the league, and this keeps defenders from keying on any individual.

Without much doubt, the liberal employment of a number of receivers keeps the Packers' Boyd Dowler from being at or near the top in NFL receiving. Dowler, the catcher, like Starr, the pitcher, is under-rated and frequently overlooked at "all-star time." Dowler, for example, was added to last season's Pro Bowl squad only after one of the selections couldn't make it. If I could have my choice of any receiver in the NFL to go after a pass that could seal a "must" first down or decide a game, I'd pick Dowler. He was virtually impossible to cover on the six he hauled in against the Colts.

* * *

**The Eagles' Timmy Brown, one of the few all-star-caliber players who ever slipped away from the astute Lombardi, last Sunday reached the rarefied atmosphere of 10,000-yard territory. This career figure is for combined net yards in rushing, pass receiving and kick returns.**

* * *

While Green Bay's Bill Curry made his first pro start last Saturday when he filled in for Ken Bowman at center, he was no stranger at the snap-back position. Last year, Curry centered the ball for virtually all of Don Chandler's place-kicking. Though the spotlight is on the holder and, of course, the kicker, neither one can do much with his specialty unless the center produces a good snap. The field goal was a big weapon for the Packers last season, and Curry played a major though unsung role. As far as assuming his new responsibilities for calling the blocking at the scrimmage line against the Colts, Curry said, "The other four offensive linemen helped me with the calls and steadied me all the way. Ken Bowman was a big help, too. He talked to me on the sideline."

* * *

**Ron Lass, who has just completed an active year as Appleton Little League president, once pitched against the Green Bay Packers' Ray Nitschke in the Chicago High School Suburban League. Nitschke, who weighed only 185 at the time, was a hard-hitting fullback on the football team in the same era, Lass recalls.**

* * *

Before leaving on the Lawrence University European tour, Mrs. Werner Witte asked us to thank everyone who made the new Witte Field press box possible. In the excitement of the dedication, she says she forgot to thank those who contributed to the memorial fund and students who worked on the edifice. AHS has waited a long time, indeed, for its own football field—and it has turned out to be a top-notch site. Everyone was especially struck with the perfect turf—virtually like a putting green—the maintenance crew readied for the season.

* * *

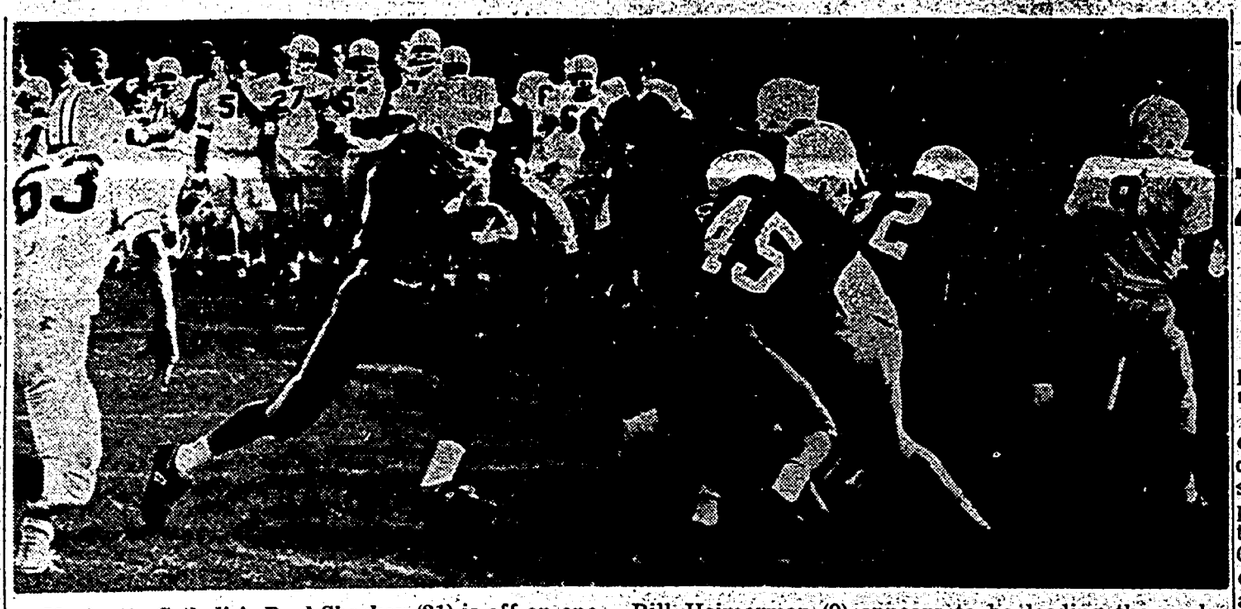

**Louis Hemauer, former Stockbridge and Menasha St. Mary athletic star, tied a record late in the Florida State League campaign when he won his 13th game in 14 decisions—for a brilliant .929 pace. Hemauer pitched for Leesburg.**

## Ballinger, UW Tennis Star, Ruled Ineligible

MADISON (AP) — Big Ten tennis singles champion Todd Ballinger has been dropped from the University of Wisconsin because of classroom failures.

Tennis Coach John Powless said Ballinger had been ruled academically ineligible and had lost his appeal to be reinstated at the university.

Ballinger won the Big Ten No. 1 singles crown last spring as a sophomore by upsetting Michigan's favored Karl Hedrick in the final match. The tennis standout is from Leawood, Kansas.

**Marinette Catholic's Paul Sharkey** (21) is off on one of his many long runs in the third period of Saturday's Fox Valley Catholic Conference game against St. Mary at Menasha's Calder Stadium. The Zephyrs' Dennis Runnoe (63) tries to catch up with him while teammate Bill Heimerman (9) appears to be leading the pack. Cavalier blockers are Stan Gruczynski (45) and Rudy Cardin (22). Sharkey scored six touchdowns and ran for 259 yards in a 46-13 win. (Post-Crescent Photo)

# Cavaliers Trounce Zephyrs, 46 to 13

## Sharkey Scores 6 Touchdowns, Gains 259 Yards on the Ground

BY GEORGE MANCOSKY
Post-Crescent Staff Writer

MENASHA — An awesome display of offense, featuring a dazzling piece of running and scoring by Paul Sharkey, propelled Marinette Catholic Central to a 46 - 13 Fox Valley Catholic Conference triumph over St. Mary here Saturday afternoon.

Sharkey, senior fullback, put on the greatest one-man offensive show in the 3-year history of Calder Stadium. His achievements included:

1. Six touchdowns on runs ranging from five to 87 yards.

2. A rushing total of 259 yards in 17 carries for an average of almost 15 yards per try.

3. Nine pass completions for another 137 yards and one touchdown.

4. A pass for one extra point and a punt which stopped dead on the St. Mary two-yard line.

Finding plenty of running room around the ends and between tackle and end, the Cavaliers rushed for 363 yards and added another 177 in the air. The total was a massive 540 yards.

With Jim Jensen, who gained more than 220 yards for St. Mary in the first two games, out of action because of a knee injury, the St. Mary ground game was ineffective.

**Throw 34 Passes**

The Zephyrs only managed 23 yards by rushing and had to resort to an overhead attack which saw them put the ball in the air 34 times, with 12 completions good for 224 yards.

Junior halfback Bill Heimerman provided most of the Zephyrs' offense, gaining 35 yards by running and 159 on pass receptions. He was on the receiving end of Mike Heroux's two touchdown passes, covering 47 yards on the last play of the first half and 92 for a fourth period score.

In all, Heimerman made six receptions for 159 yards and he accounted for all the scoring by adding the extra point on a run.

**Cavaliers Score Early**

The scoreboard didn't register 0-0 very long as Marinette marched down the field from its 49 with the opening kickoff, tallying in five plays. Sharkey boomed over from the 10. The point was missed.

The Cavalier speedster went around left end on the first play of the second period for a 21-yard score. His pass for the extra point failed.

Later in the second stanza, he climaxed a 56-yard drive by going around end from the five. Corky Slawinski added the point.

Jim Simon intercepted a Sharkey pass on the Cavalier 47 with eight seconds left in the half. St. Mary's first throw was incomplete but Heroux hit Heimerman down the middle on the second for the score. The extra point made it 19-7 at halftime.

**Long Screen Pass**

A 5-yard run by Sharkey and his 41 yard touchdown pass to Steve Sequin acounted for two Cavalier scores in the third period.

St. Mary halted an advance on the one early in the final frame. After getting to the eight on two running plays, Heroux hit Heimerman on a screen pass on the eight and the latter stiffarmed a couple of tacklers and outran the rest for a 92 yard score, one of the longest in St. Mary history. The point was missed.

A 37-yard run by Sharkey with 4:43 left to play and his longest dash of 87 yards with 1:46 remaining concluded the scoring.

| | | | | |
|---|---|---|---|---|
| Marinette Catholic | 6 | 13 | 13 | 14—46 |

## Beliveau Signs With Canadiens for '66-7

MONTREAL (AP) — Big Jean Beliveau, captain and star center of the champion Montreal Canadiens, has signed his 1966-67 contract with the National Hockey League team. He came to terms after a short meeting with general manager Sam Pollock Friday.

# Oilers Boast Top Defense This Season

## Houston Faces Jets Today in AFL Contest

By MIKE RATHET
Associated Press Sports Writer

Last year Houston's defense would have had trouble with the big, bad wolf. A huff and a puff and down it went.

"The line was just being blown out of there," Coach Wally Lemm explained. "They were just too small."

But the Oilers aren't small anymore with the addition of two mammoth defensive tackles — 6-foot-9, 315-pound Ernie Ladd and 6-5, 270-pound Pat Holmes. The only thing small now is the opposition yardage.

**New-Found Strength**

But the Oilers' new-found defensive strength will get its severest test so far this season when they tackle the Jets at New York today in a battle for the Eastern Division lead in the American Football League.

In other games today, Kansas City is at Oakland, Miami at Buffalo and Boston at Denver.

With Buffalo's two-time champs already showing two losses the Houston-New York game will be watched for a true indication of the strength of the only remaining undefeated teams in the Eastern Division.

Houston allowed 191.6 yards rushing and 176.4 yards passing a game last year compared with 53 and 149 in two games so far this season. And Lemm leaves no doubt that Ladd and Holmes have made the big difference — particularly against rushing.

troller.

**Offense Gets Chance**

"We've taken care of the problem of being too small with the addition of Ladd and Holmes," Lemm said. "And when your defense can stop the opposition, it gives your offense a better chance to gain ball control — and it takes ball control to win games."

Lemm must be right. The Oilers are 2-0 and have scored 76 points. The opposition has scored seven.

Offensively, the Oilers haven't changed too much. George Blanda, the 39-year-old quarterback, still flings that ball around but with Sid Blanks back — he was out all last season with a leg injury — the Oilers have a stronger running game.

Ode Burrell, the little 185-pound halfback, is the No. 4 man in the league in rushing and No. 7 in receiving, giving the Oilers one of the most versatile backs in the league.

Court decision, in a suit brought

**Gimpy-Legged Namath**

The Jets will have gimpy-legged Joe Namath starting at quarterback but will have to pull their running game together to get by the Oilers. Fullback Matt Snell, the big gainer, was not impressive in New York's opening 19-14 victory over Miami.

The Chiefs announced their intention of challenging for the Western crown by mauling Buffalo 42-20 as Bert Coan had a sensational day at halfback and Otis Taylor showed why the club let last year's No. 1 flanker, Frank Jackson, go to Miami in the expansion draft.

**No Consistent Offense**

The Bills, who have been unable to put together a consistent offense with quarterback Jack Kemp suffering with a sore arm, might be able to get started against Miami. The Bills are making one important change, inserting Arkansas rookie Bobby Crockett at split end in place of Glenn Bass.

The Dolphins, who are going with rookie Rick Norton at quarterback, plan to start two former Bills — fullback Billy Joe and flanker Bo Roberson. Joe and Roberson were shipped to Miami in the expansion draft.

# MSU's Strong Ground Attack Rips North Carolina, 28-10

## Apisa and Jones Score on Long Runs in Non-Conference Opener

EAST LANSING, Mich. (AP) —Michigan State, frustrated in the air, put together a devastating ground attack Saturday as it wore North Carolina State down and won an intersectional opener 28-10.

North Carolina State, which grabbed a 3-0 lead midway in the second period on a 49 yard field goal by Harold Deter, could do little else as MSU's infantry went to work. The visitors finally got a touchdown with just seconds left.

The MSU running attack varied from the powerhouse galloping of Clint Jones to the outside slants of fullback Bob Apisa and the nimble scampering of quarterback Jimmy Raye. All scored.

Jones' score came on a 39 yard smash. He brushed off four tacklers as he churned in his way across less than four minutes after North Carolina posted its field goal. The drive covered 60 yards in six plays.

North Carolina State held MSU to a 7-3 halftime lead but the second - ranked Spartans dominated play the rest of the way.

MSU picked up a couple of touchdowns in the third period as North Carolina State could not muster a first down.

**Apisa Scores**

One came on an 80-yard, five-play drive capped by Bob Apisa's 37-yard scamper with a pitchout from Raye.

The other was on a 22-yard drive started after North Carolina State, practically smothered in its back yard, punted to its 36. Jess Phillips returned to the visitors' 22. Six plays later, Raye sneaked over from the one-yard line and Dick Kenney kicked his third conversion to make it 21-3.

MSU's ground attack rolled along unchecked in the final period. An eight-play, 74-yard drive was climaxed when Frank Water dove over from the one. Kenney's perfect barefoot conversion kicking made it 28-3.

Michigan State ground out an awesome 360 yards on the ground while holding North Carolina State to 27 yards. The visitors fared a little better in passing as they completed 11 of 15 passes for 154 yards while Michigan State got a mere 36 yards on seven completions in 17 tries.

# Trojans Down Texas, 10 to 6

## Winslow Stars as Passer and Scores 9-yard Touchdown

AUSTIN, Tex. (AP) — Roy Winslow's pinpoint passing shook up Texas in the first half Saturday, and ninth-ranked Southern California held off a Longhorn comeback for a 10-6 victory in the college football opener for both teams.

The intersectional battle, matching two recent national champions was seen by a national television audience.

The junior quarterback, the most accurate passer in Southern California's history, also scored the Trojan touchdown on a nine-yard sweep, diving across the end zone flag after faking out Longhorn defenders.

Tim Rossovich, who put the Trojans on the scoreboard with a 23-yard field goal in the first quarter, kicked the conversion.

The Longhorns scored from the USC three when sophomore quarterback Bill Bradley faked a handoff to Chris Gilbert and trotted in for the touchdown. His attempted two-point conversion on a pass was intercepted.

## Carroll Wins in Final Minute

BELOIT (AP) — Carroll College pushed a 60-yard drive into pay dirt Saturday to tie its football game with Milton in the final 54 seconds, then made the extra point count for a 20-19 victory.

Scott Meyer's 11-yard run took the ball over the goal line for the 19-19 tie.

The extra point was kicked by Jim Mathews, a Chicago Lane Tech graduate playing his first college game.

## *Women Learn It's Not Women's World*

TRENTON, N.J. (AP) — A man from Little Rock, Ark., won first prize for crocheting over 24 women at the New Jersey State Fair on Saturday.

Carlon Winston Pryor was awarded the top prize for two doilies he submitted by mail.

Work of Leon Travanty, Milwaukee

# One-Man Oil Painting Show Opens Wednesday at Bergstrom

**A One-Man Exhibition** of oil paintings by Leon Travanty, Milwaukee, will open Wednesday at Bergstrom Art Center, Neenah. Travanty is shown below at work in his studio. Above is one of the paintings now hanging at Bergstrom. It is reminiscent of his familiar "Intermission."

NEENAH — A one-man exhibition of oil paintings by Leon Travanty, Milwaukee artist whose work has been widely displyed in national and regional shows, will open Wednesday, Sept. 21, at the Bergstrom Art Center, 165 N. Park Ave.

Travanty, who has been teaching at the School of Fine Arts of the University of Wisconsin-Milwaukee since 1964, will be honored at a reception Sunday afternoon, Sept. 21, from 3 to 5 p.m. at the Art Center.

**Two Degrees**

The artist obtained his B.A. and M.A. degrees from the Layton School of Art and Cranbrook Academy. His work is included in such public collections as the Bergstrom Art Center; the Milwaukee Art Center; Layton School of Art; the Marine Bank, of Milwaukee; South Bend Art Center, South Bend, Ind.; Evanston Township High School, Evanston, Ill., and the Ansul Co., Marinette.

He has had one-man shows at the University of Wisconsin, 1963; Wisconsin State College, Stevens Point, 1964; Wahington Federal Bank, Miami, Fla., 1963; Dunbar, Chicago, 1961, and the Layton School of Art, 1960.

He has participated in national group exhibitions for paintings, drawings and prints at the National Academy of Design, New York; Philadelphia Academy of Art; Detroit Institute of Art; Butler Institute of American Art; Boston Fesival of Arts; Carnegie Institute, Pittsburgh; Drawings, U.S.A., a traveling exhibition, St. Paul Art Center; Ultimate Concerns, drawing shows; Ohio University; Columbia Museum of Art, Columbia, S.C., and Ball State College National drawing shows, Muncie, Ind.

**Regional Shows**

He has been represented in regional exhibitions sponsored by the Chicago Art Institute; Walker Art Center, Minneapolis; Wisconsin and Illinois State Fairs, and the Marine Bank.

He displayed graphics at a seven-man show conducted at the Jewish Community Center of Milwaukee, in 1965, and received purchase prize at the Renaissance Wisconsin '65 invitational Exhibit of Wisconsin Art.

In conjunction with the Travanty show, thhe Bergstrom Art Center will display jewelry by Charles Dix, of Delafield. The joint exhibition will continue through Oct. 30.

## Greek Theater Had Woes

BY GENE SCHROEDER

YPSILANTI- Mich. (AP)—A 2,400-year-old tragedy opened and closed the Ypsilanti Greek Theater's first season this summer. The box office wrote its own tragedy.

"We lived from week to week on the brink of financial disaster," said a spokesman for the theater, the world's first major professional group regularly producing Greek drama in English.

The theater split its 12-week season between alternating productions of Aeschylus' Trilogy, "The Oresteia," starring Dame Judith Anderson, and Aristhophane's comedy, "The Birds," featuring Bert Lahr.

Despite acclaim by Broadway critics and others, most performances drew 700 persons or less, and the 1,900-seat theater never was a sellout.

**Sales Brisk**

Ticket sales to out of state customers were brisk, but the expected turnout of theatergoers from the nearby Detroit area failed to materialize.

Each payday, the cast wondered whether there would be enough money to meet the payroll.

"Somehow," said a theater official, "we managed to come up with the money every time— but it was a weekly succession of miracles."

Still, the sponsors haven't given up hope of making a permament institution of the Ypsilanti Greek Theater.

They plan to seek foundation money to underwrite construction of a $3-million theater, but first funds will be sought to pay off the inaugural year's deficit which is expected to approach $200,000.

"Before we could go after foundation grants," said a spokesman, "we had to be able to demonstrate that we could complete an entire season without folding. We may have been on shaky financial ground all summer, but we did finish out the season.

"And if we can meet our break even point of 65 per cent capacity houses next season, we'll be in an even stronger position."

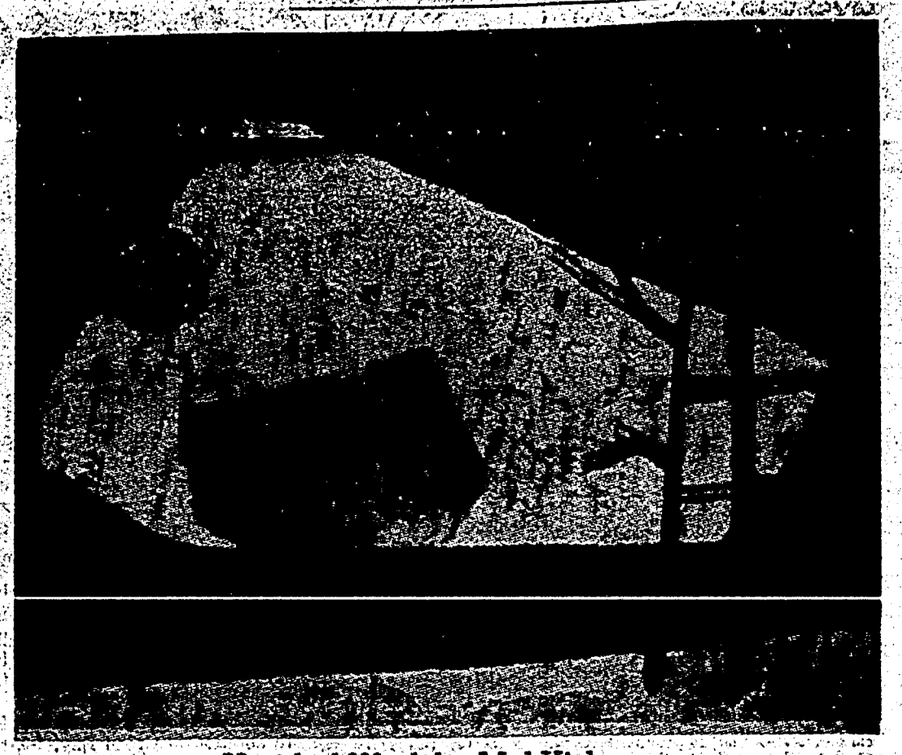

With the help of $300,000 pledged in a public fund-raising drive this year, sponsors built a modern version of a classical Greek open air theater on the Eastern Michigan University baseball diamond.

**Donated Field**

The university donated use of the baseball field, but after each season, the stage must be dismantled.

Ypsilanti businessmen, some of whom were cool to the original idea, have become enthusiastic supporters of the theater. Hotels, motels and most restaurants have reported up to 70 per cent increase in business during the 12-week season.

Said the Ypsilanti Press in an editorial: "Artistically, culturally, as entertainment, educationally — in every sense except box office—the Ypsilanti Greek Theater has been a smashing success."

Untitled Work by Mel Kishner

'What You Say' Most Important

# Kishner's Talk Highlighted Tuesday's AGA Meeting

A lecture-demonstration by a noted Wisconsin illustrator and landscape painter, and dedication of the newly-decorated Wolf River Nature Room of the Home Mutual Building, 1101 W. Foster St., highlighted Tuesday's meeting of the Appleton Gallery of Arts.

Mel Kishner, staff editorial illustrator for the Milwaukee Journal since 1940, told A.G.A. members and their guests that "I don't think it's how you paint: it's what you say that's important."

The annual Wolf River Art Exhibit and Workshop, held in conjunction with the Wolf River Planning Commission, is being conducted today in the mall of Valley Fair Shopping Center, on State 47. Hours for the exhibition today are from 10 a.m. to 5 p.m.

In the course of his talk, Kishner painted one of his characteristic Wisconsin landscapes, using casein and a painting knife, and discoursed on his philosophy of art as a "highly creative, personal thing."

An artist may be understood by many or few persons, Kishner said, "but if by none, he's missed the boat. . .How the artist goes about it doesn't mean a thing. What results is what matters."

**Last Thing**

The "last thing in the world he cares about," he added, is "the story". Personally, he is most concerned about spatial patterns — and how space relates to texture.

This relationship — the relationship of color and the relationship of space — is what gives him pleasure, he said.

These are the things that make a painting."

There are "too many bad painters today," he said. In order to be a good artist, the painter must:

1) Be discriminating.

2) Have the courage of his convictions.

3) Ask himself: "Whether I like this or not — is there something there that's really worthwhile?"

Current trends into "gimmickry" are very difficult to evaluate, he said. "Gimmicks come and go so fast that one is out as soon as you've seen the exhibition."

Terming optical illusions "fun and games — not art," he compared the pop artists of today to the theatrical sign painters of yesterday. Pop artists are doing nothing, he asserted, that was not done by the Dadaists of half a century ago, with their junk sculpture.

"The leaders of the so-called avant garde are not really leading. Instead of being in front, they're out behind somewhere. . .The task of the avant garde is to explore. To imitate is not necessarily the answer."

**Must Know Tools**

Only after an artist truly knows the tools of his trade, Kishner said, can he be "creative as he pleases." The speaker noted he feels it necessary "to research into non-objective paintings of the day, and to explore the abstractionists and the abstract-expressionists."

In addition, in order to keep his skill, he also goes into the field of "fool - the - eye" or super-realistic paintings.

In conjunction with his talk, Kishner displayed a number of his paintings, two of which are reproduced on this page.

In his address of dedication for the Wolf River Nature Room, Gordon Bubolz, president of Home Mutual Insurance Co., paid tribute to the efforts of Miss Phyllis Davidson, Appleton artist who executed a 342-square-foot mural on one wall of the new community room.

"We created the Wolf River Nature Room," said Bubolz, "to give impetus to an artistic reproduction of the early rustic features of the region, and to impress on all our visitors the magnitude of our wonderful heritage. The handiwork and mode of living more than a century ago adds to our own cultural heritage."

Miss Davidson's mural portrays the rapids of Menominee County, fishing and boating areas with all of the tributaries of the Wolf, and the placid lakes of the southern end.

The room itself was designed by Hans Lorenz, with an aim toward capturing the mood of the Wolf River area. The paneling was taken from an old red barn, recently torn down in the area.

Beams and wooden pegs are from the same barn, taken from the John Schindler farm, just south of Appleton. Pebbles under the mural were hand-picked from the shores of the Wolf, and a hand-made lamp in the corner was fashioned out of clay from the banks of the Wolf.

Antique farm implements and Indian artifacts, some more than 100 years of age, are also on display, and more are being sought for the room.

J. M. A.

## New Whitney Will Become Old Whitney

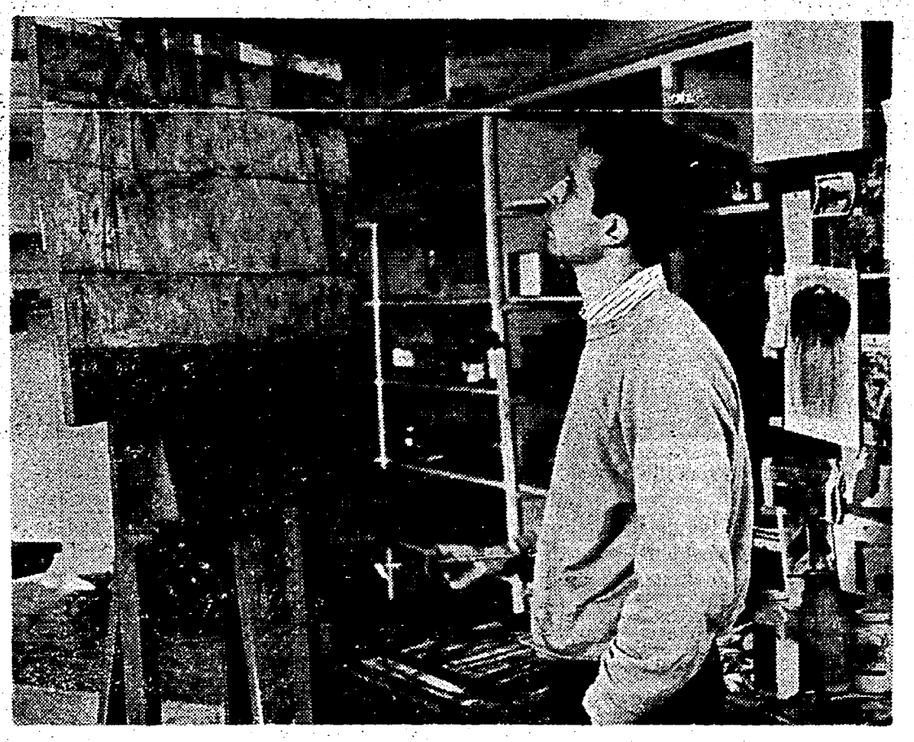

NEW YORK, (AP) — The new Whitney will become the old Whitney — only more so — when it settles down in its large new home this fall.

That is, the Whitney Museum of American Art, which since 1949 has concentrated on the 20th Century, will resume its role of surveying all American art from Colonial days to the present — which was its original function.

The change in policy will be keynoted by a big show, "Art in the United States," when the museum opens its new building on Madison Ave., at 75th St., on Sept. 27. The exhibit will span American painting and sculpture from the country's early days to the 1960s.

The Whitney was opened at a Greenwich Village location in 1931, and from 1954 until June was on West 54th Street.

For years it has been celebrated for its "Annuals," in which it pioneers the recognition of contemporary American artists.

## Art Institute Gets Major Brancusi Work

CHICAGO — A major sculpture acquisition, "La Negresse Blanche," by Constantin Brancusi, has been announced by Charles C. Cunningham, director of The Art Institute of Chicago.

The white marble head which stands on its original base of black marble, Caen stone and wood is signed by Brancusi and dated 1928. It is on display in the lobby of the museum. "The acquisition is a splendid addition to the already distinguished group of Brancusi sculpture in our permanent collection," Cunningham said. Other pieces include: "Ancient Figure," 1906-08; "Sleeping Muse," 1910; "Two Penguins," 1914; and "Leda," 1923.

This is the second and final marble version of the same subject by Brancusi. The first marble version was made in 1924 and is currently in the Arensberg Collection in the Philadelphia Museum of Art. The Art Institute's piece was originally acquired from the artist by Miss Helena Rubenstein, presumably prior to 1930, and remained in her collection until it was disbursed last winter.

**Famed Artist Pablo Picasso** donated to Chicago the design for this model of a 50-foot abstract sculpture that will be erected at the city's Civic Center Plaza. Several private foundations will pay the $300,000 to erect the statue. The five-story figure will be made of steel. Puzzled city officials say the design could be that of a perched bird or a woman's head. The model shown is 42 inches high. (AP Wirephoto)

Gift of Detroit Doctor

## Bergstrom Art Center Offers Wheel Chair for Visitors' Use

NEENAH — An additional service at the Bergstrom Art Center here is now being offered to visitors; that of the use of a wheel chair, the recent gift to the Neenah Museum from Dr. Howard C. Hoyt of Detroit.

The chair has been given in memory of Dr. Hoyt's wife, Helen Allerton Hoyt, sister of Mrs. H. B. Tollette of Neenah.

"It is customary in many of the larger museums throughout the country to provide chairs for those visitors who find walking or standing difficult; and to be able to provide this accommodation at the Bergstrom is indeed gratifying," states Charles M. Brooks Jr. executive director at the Art Center. The chair is being placed inside the front foyer convenient to the entrance.

A special ramp was incorporated in the entrance design of the new wing so that handicapped persons can be driven directly to the ramp thus providing privately owned wheel chairs easy access to the Art Center.

The current art exhibitions at the Bergstrom are the one man show of oil paintings by M. J. Kitzman, and a group of oil portraits by Lorraine G. Trester, in addition to the permanent collection of paintings and glassware. The open hours are 1 to 5 p.m. each Wednesday, Thursday, Saturday and Sunday. There is no admissio fee.

## Appleton Bank To Exhibit Watercolors

Appleton State Bank's lobby will become an exhibition hall for watercolor paintings this week. The world-famous watercolors of Roy M. Mason will be shown.

Mason, a National Academician, is a sensitive interpreter of nature's scene. His watercolor paintings capture the mood and feeling of almost every aspect of the colorful outdoors.

Viewing hours of this free exhibition are the regular banking hours of Appleton State Bank. If one cannot get to the bank during the regular hours to see the watercolors, the bank invites those interested to view the paintings from the sidewalk in front of the bank.

A limited number of Roy M. Mason prints will be distributed by Appleton State Bank during the exhibition.

Untitled Work by Mel Kishner

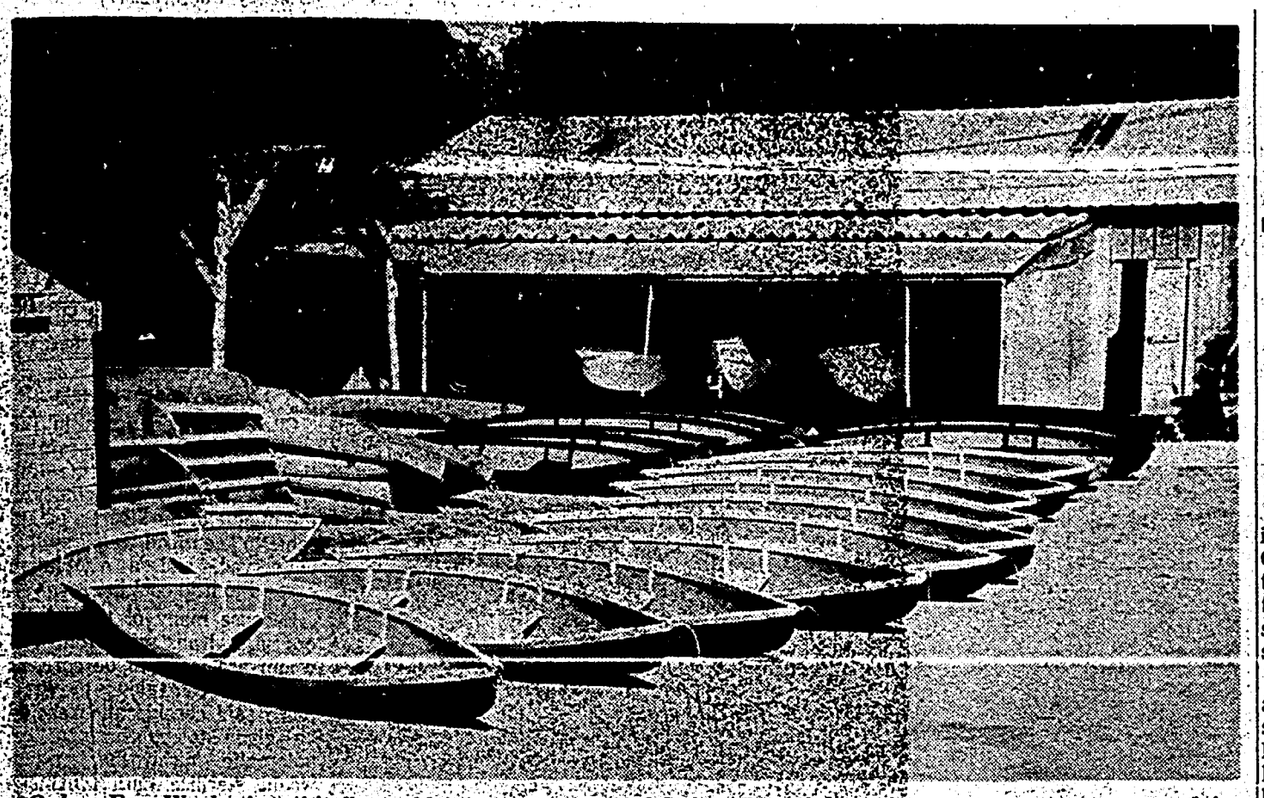

## Museum Reception

OSHKOSH — A reception for Andrew Krance, whose artworks are exhibited at the Oshkosh Public Museum, is scheduled from 2:30-4:30 p.m. today at the Museum.

Krance, of Madison, is the son of Mr. and Mrs. Casimir Krance, Oshkosh. His show continues through Oct. 22.

**Only a Few Weeks Ago** this fleet of boats was carrying happy vacationers down the Crystal River but now they are on the banks as summer draws to an end in the Waupaca Chain O' Lakes area. With the passing of Labor Day the tourist season comes to an end in this mid-Wisconsin beauty spot and the tourists return to their homes and schools. The boats shown are Crystal River boats at Ding's Dock. (Post-Crescent Photo)

# Past Summer 'Best Ever,' Tourist Business Reports

## Chain O' Lakes, Waushara County Resort Owners Jubilant; Credit Success to Long, Hot Season

Post-Labor Day profit-counting by Waushara and Waupaca County Lake resort owners, trailer campsite operators, cottage rental agents and provisioners is producig smiles of satisfaction.

Businessmen of the lake areas agree it was an excellent season — possible the best ever. Hardly a day passed when the lakes were not crowded with boats, water skiers and fishermen. Cottage owners who rented living quarters seldom displayed the 'vacancy' sign. Bookings were far above normal and the selection of cottages for the latecomers was slim indeed.

Advisers in the City of Waupaca information booth experienced a hectic summer. A flood of inquiries were received and answered by G. H. Stordock secretary of the Association of Commerce, and others who aided tourists at the booth. In many cases long distance telephone calls had to be made to confirm reservations because of the great demand for accommodations.

At Wild Rose, the situation was similar. An information booth worker declared, "We were almost inundated with inquiries as to the better camp, vacation and cottage sites in our area. We handled a greater volume of business than we ever had before. . . . It was a very good season." Touristry was a million dollar business in Waushara County and far greater in Waupaca County with its glamorous Chain O'Lakes.

The demand for lake front property could not be filled by real estate agents and private sellers. Records of building permits issued this summer confirm reports from long-time residents that those who did buy property did not waste any time starting construction. The rapid development of housing on the Pine River is a prime example.

That the summertime vacation "industry" reached a new peak is an opinion agreed upon by those who enjoyed the fringe benefits as well as by the principal beneficiaries.

The tavernmen, grocers, garagemen, riding academy operators, night club owners, fishing tackle salesmen and others beyond the lakeshore shared in the windfall.

The many Boy Scout, Girl Scout, Campfire Girls, church and commercial summer camps attracted a sizeable percentage of the vacationers. Hundreds of youngsters, counselors and religious leaders from distant communinties journeyed to the two counties.

The overflow crowds on weekend nights at dance halls, like the Casino, and capacity crowds during the week gave a clear indication of the number of teenagers and young adults in the area.

Representative of the view of the 1966 season is a statement by Walter Piekarz, proprietor of the Pearl Lake Tavern, a commissary, swimming beach and boat rental business in the Town of Leon. He said, "This summer was a good one. In the number of bathers, boaters and stop-off tourists, we set a new high."

**More Scuba Divers"**

"Too, we enjoyed the patronage of scores of scuba divers, a sport rapidly developing in this deep lake. The divers came here from many communities of Illinois and Wisconsin, and we find the Scuba, underwater sport developing into a major adjunct in the swim-fun-boating-fishing fun of this lake.

"Additionally," Piekarz relates, "we have many, many sauna baths, built by the Finnish people who loom large in the Pearly Lake coloy of summer regulars. This is something now being taken up in wholesale throughout the country, but we've had sauna baths here for many years, and many came here to see these baths in operation, to get ideas as to how to build one for themselves."

Law enforcement officials were also pleased. Lake patrolmen had their hands full with the heavy boat traffic, but the accident rate was not too far above that of years when far fewer boats were on the water.

**Joe Feeds His Pet** doe, in a pen near his house. The elderly white tail also shakes hands or hooves, as the case may be, with her master. She has given birth to 10 fawns on the farm since Joe has owned her. (Post-Crescent Photo)

# Otto Bytof Named to New Firm's Board

### 50 From Wisconsin File for Business To Insure Lenders

Otto Bytof, Appleton, has been named to the proposed board of directors for the National Mortgage Insurance Corp., a new organization which will insure lenders from loss by nonpayment of mortgage loans.

Fifty realtors and businessmen from Wisconsin have filed articles of incorporation for the business, which will begin selling 750,000 shares of common stock at $2 a share next week.

The corporation will commence business when it acquires $1.35 million from the sale of stock after obtaining a certificate of authority from the Wisconsin Department of Insurance.

**Small Equity Cases**

The type of insurance handled by the firm is used by lenders principally in cases where the borrower's equity in the property is small.

Richard J. Bourguignon and Rudolph A. Jaeger of Green Bay are also members of the proposed board of directors.

The operation of the business is similar to the Federal Housing Administration (FHA) but, unlike the FHA, the company does not insure the full face amount of the mortgage loan. The corporation will satisfy its obligations to the insured lender by paying 20 per cent of the claim and relinquishing any claim to the property or by paying the full amount of the claim and taking title to the property.

# Democrats Try to Resolve Troubles After Bitter Battle

## Committee Passes Resolution Congratulating Patrick Lucey

Post-Crescent Madison Bureau

MILWAUKEE — The covering of deep wounds within the state Democratic Party was attempted here Saturday in a resolution of the organization's highest committee congratulating Lt. Gov. Patrick Lucey in his victory in the bitter gubernatorial primary battle.

The Democratic Administrative Committee's resolution also praised defeated candidates David Carley, Dominic Frinzi and Abe Swed for their efforts to win the nomination to face incumbent Republican Gov. Warren P. Knowles in November.

The resolution was introduced by Mrs. Janet Lee of Madison, sister of Sen. Gaylord Nelson. Carley, a long-time Nelson follower, had appealed to the senator in vain for primary aid and had issued a last minute blast at Nelson for failing to come to his assistance in the campaign.

**Carley Absent**

Carley, the Democratic national committeeman, was not present at the meeting of the committee of which he is a member.

The resolution states that with the primary over, all emphasis must be directed at defeating Knowles who is generally regarded as the favorite in the race.

The committee also demanded that all state radio and television stations stop using recordings of Knowles' voice in public service announcements or be faced with demands for equal free time from the Democrats.

State party chairman J. Louis Hanson said that the "thinly veiled" campaign efforts for Knowles sponsored by industry and Chambers of Commerce under the guise of "We Like it Here" public service advertisements may be challenged by the Democratic Party before the U.S. Internal Revenue Service. Hanson said the advertisements may not be proper business expenditures.

**Campaign Workers**

He also reported that many of the workers in the Carley campaign organization have gone to the assistance of local and congressional candidates, and have been lost to the Democratic Party. Some have gone to work in Lucey's campaign as well, Hanson said.

The state chairman commented that from all appearances he feels that two Democratic statewide candidates will not actively campaign for office this fall. After the meeting Hanson declined to identify the candidates but generally regarded as the weakest members of the Democratic team are secretary of state nominee Cletus Johnson and treasurer candidate Eugene Lamb.

Hanson and Assemblyman Frank Nikolay of Abbotsford defended a policy of the legislative campaign committee which directs campaign funds into only those races where Democratic legislative seats are in danger or where there is a chance to take a seat away from the Republicans.

Funds are not greatly needed in some races, they said, while the extra money made available can, in fact, win seats.

"I don't think that there is any question that Bert Grover (Assemblyman from Shawano County) needs help," Hanson said.

**Fund-Raising**

"He is running where Franklin Roosevelt didn't carry the county and where Lyndon Johnson carried it by only five votes."

Hanson also reported that another major fund-raising dinner is scheduled to be held in Milwaukee in late October for Lucey. Main speaker is expected to be either one of the Kennedy brothers, Humphrey or

Joe Zitzelsberger's 'Friends'

# Farmer Lives Alone but Thousands Visit Him to View Lively Menagerie

BY DAVID GIFFEY
Post-Crescent Staff Writer

CHILTON — Joe Zitzelsberger lives alone on his 170 acre farm in Calumet County . . . almost alone.

"I wish I knew how many thousands of people have visited here in the last 12 years," he said last week after conducting a tour of his pride and joy, Hook Hill Peafowl and Deer Farm.

"I tell ya'," he said of his animal farm, in a confidential manner, "It would be a little bit lonesome here without it."

"There isn't a day goes by but what three or four carloads of visitors stop in here."

**Decided To Raise Peacocks**

Joe has lived on the farm for 40 years. In 1954 he decided to raise peacocks and deer. Since then his menagerie has expanded to include wild geese, monkeys, parrots, raccoons, mynah birds, 25 deer, shetland ponies, foxes, skunks and three Mexican burros.

He once owned an elk bull but had to get rid of him when the animal started to break fences on the farm. The bull's antlers mesured more than seven feet from tip to tip.

Joe immigrated to the United States from Germany with his uncle in 1902. He was 13 years old at the time. He worked for room and board with farmers in Wisconsin and spent five winters in lumber camps in the northern part of the state before the family settled down on the farm south of Stockbridge.

**Scatters Corn**

During the past 40 years, Joe said, "We made a lot of improvements here." Thirty acres of boulder-ridden hills were cleared. Stone fences enclose several fields of the farm.

Most of the white tail deer run in a 10-acre woodlot. Joe scatters kernels of corn along the fences when he wants them to show off for visitors.

Considering the thousands of visitors he has greeted and guided around the farm, Joe's enthusiasm has not dwindled. Last week, he drove a tractor through his fields attempting to show one visitor a two-day-old shetland colt.

**"Hi Joe, Hi Joe"**

The mynah birds are caged in the house and are on a first-name basis with their keeper. They whistle and cackle constantly and occasionally rattle the window panes with a shrill "Hi Joe, Hi Joe."

The farmyard is filled with sheds housing Joe's animals and birds. His favorite, an old doe that has given birth to 10 fawns on the farm, is kept in a pen near the house. She eats from Joe's hand and is not at all frightened of strangers.

Some of the animals are more cautious. Bedlam breaks loose in the monkey house when visitors approach. They will winter in the farm home's basement. The red foxes are rather bashful.

**Get Cold Feet**

Joe admits the peacocks "are a little bit touchy." They require warm shelters in the winter and get "cold feet" if they walk in snow. They are native to sunnier states than Wisconsin.

Five skunks are kept in a small shed next to the parrots. Joe trapped and "deodorized" the skunks. He doesn't hunt but box traps most of the smaller animals himself.

He presently holds deer, game and fur farm licenses enabling him to keep the animals and birds.

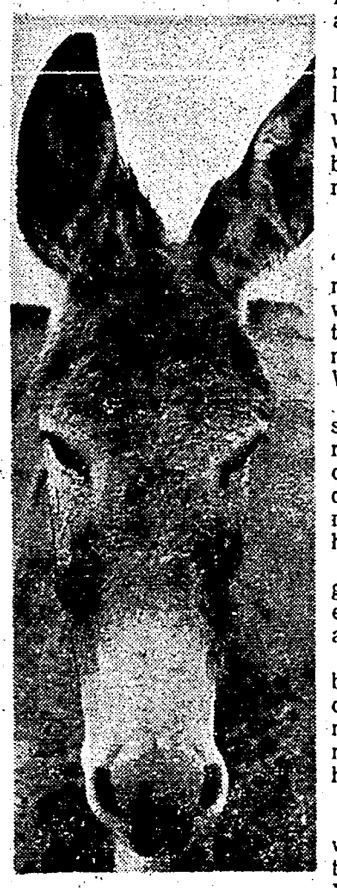

Joe delights in showing his boarders to any visitors, and does so without expecting any returns. Children make up his most appreciative audiences, he said.

**New Zealand Visitors**

Visitors from all over the world have somehow passed through the animal farm. Six New Zealanders toured the farm this summer. Last year, Joe recalled, two missionaries from India looked at the menagerie.

Joe is as fascinated by the tourists as he is with his animals.

"I don't have to go anywhere to learn about other people," he said. "They come here."

**A Quizzical Mexican** burro, one of three owned by Joe Zitzelsberger, peered intently into the camera lens last week at the Hook Hill Peafowl and Deer Farm on a bluff overlooking Lake Winnebago in Calumet County. (Post-Crescent Photo)

# Commission Is Sought County Resource Plans

## County Park Board Will Offer Madison Planning Firm's Study at Monday's Session

CHILTON — Calumet County Park Commission will recommend to the county board at its Monday session that a five-man county resource planning commission be established.

This decision followed Friday's park commission meeting, at which a report developed by Candebub, Flessig and Associates, Madison planning firm, was studied.

The report contained six categories in which the planning firm felt the county would gain by updating conditions. The report described improvements and developments necessary to receive government aids and grants for sewer and water systems.

A detailed study of the population, economy and existing land usage, valuation of landscape beautification; a study of the existing road system, and a detailed study for updating the 1948 zoning ordinance and subdivision regulations including the standards for new developments were recommended.

It was the planners' opinion it would take two years to complete a comprehensive plan. Although a cost estimate was not available, the firm had prepared similar plans for Jackson County at a cost of $48,000, and Jefferson County, at a cost of $56,000.

Of the total cost, the federal government would pay two-thirds.

The park commission will further recommend that once the planning commission has been established, it should be empowered to consider problems presented, confer with other planners and select a firm to proceed with the comprehensive plan.

The county board decided the comprehensive plan should be considered during its August meeting, and referred the matter to the park commission for study and recommendations.

# Two Injured in Auto Crash

Two persons were injured about 2 p.m. Saturday in a collision on U.S. 10 at Manley Road, two miles east of Medina.

Taken to St. Elizabeth Hospital by Larry's ambulance were Mrs. Edwin M. Huntoon, 38, route 1, Waupaca, driver of one car, who received minor bumps and bruises, and a passenger, Patricia Minton, 19, also of route 1, Waupaca, with facial lacerations and a possible concussion.

Driver of the second car was Otto Zchaechner, 77, Medina, who Outagamie County police said, was eastbound on 10 when he turned in front of the westbound Huntoon car.

Damage to the two vehicles totaled about $900, police said.

Tank Landing Ship

# USS Outagamie County Back Home After Viet Nam Tour

SAN DIEGO — After nine months in the Western Pacific and the Viet Nam war zone, the tank landing ship USS Outagamie County, named for Outagamie County, is home.

The 21 year old, three-war veteran, left San Diego last December on one week's notice — fully loaded with cargo for South Viet Nam. This was her second deployment in a year, having returned from a previous trip in August of 1965.

Outagamie County arrived in Viet Nam in late January and started nine weeks of intra-coastal operations between Saigon, Cam Rahn, and the shallow water ports of DaNang, Phan Rang and Chu Lai.

After a brief rest and upkeep period in Subic Bay in the Philippines, she returned to South Vietnam for eight more weeks of continuous operations.

She left the war zone and after an extended upkeep period, again in the Philippines, returned home via port visits to Yokosuka, Japan and Pearl Harbor.

Her record: 12,000 tons of cargo and 600 troops delivered to battle areas along three-fourths of the Viet Nam coast.

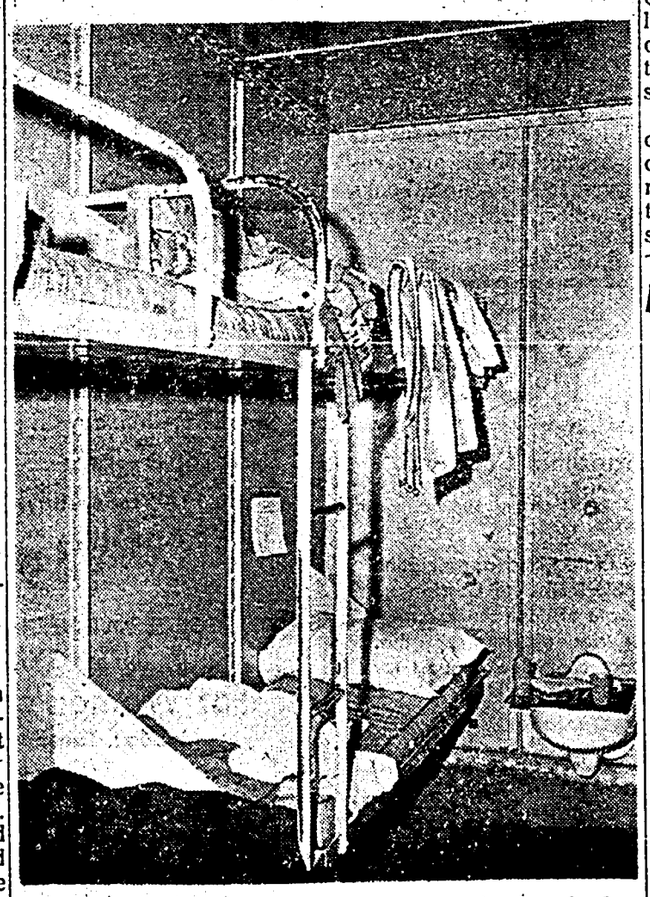

The 4,000-ton ship has been commanded by Lt. Charles W. Cullen, San Diego, since October 1965.

## Firemen Answer Two Calls Friday Evening

Several units of the Appleton Fire Department were dispatched at 8:30 p.m. and again at 10:40 p.m. Friday.

Firemen first went to Ace Floor Covering Co., 514 W. College Ave., where they found that a small fire in wiring had been extinguished shortly before their arrival.

A smoke smell brought firemen to Karras Restaurant, 207 N. Appleton St., two hours later. Firemen found no fire.

**Each of Two Cells** for Huber Law prisoners is designed to sleep eight men. The prisoners sleep "feet to feet" in bunks stacked against the walls of the tiny cells. (Post-Crescent Photo)

*Plan to Remodel Held Up*

# *Outagamie Jail, Dreary, Inadequate*

Huber Law prisoners in Outagamie County jail end the work day by sitting down to supper at a long table in a dimly-lit room. The table is five feet from the room's only toilet.

Many times, eight Huber Law prisoners must sleep in the same eight-by 14-foot cell. They sleep "feet to feet" in four sets of bunk beds stacked against the walls of the dark cell.

July and August temperatures in the jail kitchen often top 100 degrees.

A committee that recently published the results of an extensive study into the handling of juvenile delinquents in Outagamie County, noted that detention rooms in the county jail are "appallingly inadequate."

Water often seeps through the fourth floor roof during heavy rains and at times during the winter. The water collects in large puddles on cell floors and sometimes runs through into third floor offices.

Those are some of the conditions set forth by supervisors, law enforcement personnel and interested citizens who are pushing for major remodeling of jail facilities.

The Outagamie County Board was to have considered a resolution last week calling for a three-wing addition to the courthouse. Improved and expanded jail facilities constituted a major portion of the plan that was to have been submitted by the county board's public property committee.

However, the resolution was not presented. It was learned that three property committee members were successful in efforts to hold it back temporarily. Some supervisors have felt that a program for expanded courthouse area parking must precede any action on remodeling.

The latest proposal, carrying with it a $525,000 price tag, is one of several remodeling plans drafted by architects in recent years. None of the plans has met board approval.

There has been no major work done on jail facilities since the courthouse was constructed in 1941, it was learned.

The Citizens Juvenile Detention Committee of Outagamie County, in a report issued in March, reflected special concern over the county's detention facilities which includes two 18 by 16 foot rooms, one for girls and one for boys. Each room is equipped to accommodate three or four persons.

Each has a concrete floor, toilet and shower. There is almost no privacy. A single light is recessed, under screen, in the ceiling. A bench stands in front of a table.

Sheriff Calvin Spice said he would like to see the juvenile quarters divided to allow segregation of first offenders and those being held for minor offenses, from the "hardened delinquents" and those being

# State Mental Hospital Reports 10 Per Cent Increase in Admissions

## Attribute Hike at Winnebago Facility to Additional Services

WINNEBAGO — The admission rate at Winnebago State Hospital (WSH) has risen 10 per cent in the past year.

"This means that we are doing a job," said Dr. Darold Treffert, superintendent of the mental health community which serves 27 counties, as he analyzed current population figures. "We could have kept our patient population down if we were not introducing new services here, such as the children's services and the alcoholic treatment unit."

"The upturn of the population at WSH also means that personal physicians are recognizing the excellent diagnostic and treatment services available at WSH, the public is being informed about the new role WSH plays in arresting mental illness and the patient knows that he or she can get help," a clinic official said Friday.

**100 More Than 1965**

The resident patient population on June 30, this year was 723, 100 more than one year ago on the same day. Highest patient population was 1,180, recorded on July 1, 1956. This was reduced to 1,090 by September 1962. The decline was attributed to new drugs available in the field of mental illness

In 1962 a rather steep decline in resident population began. By June 1, 1965 population count had dropped to 634, a record low.

"This patient load reduction is confusing because population was declining while admissions were rising," Dr. Treffert cited. "There were a number of reasons for this. In the 1963-65 biennium we obtained a substantial increase in staff and budget. We added 100 positions. The more personnel we have the more treatment we can give and the more treatment we can give the more people we can discharge."

**New Treatment**

During this period there were also changes in the philosophy behind treatment. For example the parallel treatment concept, which involved a patient seeing the same doctor during the entire time at the hospital, was instituted. 'After-care' planning and more community resources enabled patients to be discharged sooner.

"These are some of the factors which pushed the resident population down in spite of the fact admission rates rose," Dr. Treffert explained.

While the admission rate rose nearly 10 per cent over the last year, 2,030 patients were admitted. Of this number 1,016 were first admissions. The remainder were readmissions and transfers from the county hospital system. A few weeks ago patients were admitted into the geriatrics unit who had been at WSH 40 years ago, Treffert said.

**Length of Stay Unchanged**

The fact that admission rates are up 10 per cent has not changed the length of stay of patients. The admission rate on the children's unit changes very little. Here the patient stays an average of 10 months. The average length of an adult's stay is three months.

Two new treatment services introduced during the past four years are the principal reason for the rising population this year according to the superintendent. The children's service, opened four years ago, receives an average of 150 admissions per year.

The alcoholic treatment unit opened Oct. 1, 1965 and in the past 11 months 363 patients have been admitted to the unit In the period from 1964-66, 202

# PSC to Hear Protest on Phone Rates

## 2 Shawano County Customers Charged Extra After Transfer

Post-Crescent Madison Bureau

MADISON — The authority of the Urban Telephone Corp., Clintonville, to apply foreign exchange service rates to two customers in the Town of Seneca, Shawano County, will be tested in a hearing held by the state Public Service Commission.

Six persons in May requested their telephone service be transferred from the Tigerton exchange to the Gresham exchange of the Urban Telephone Corp. of Clintonville, Waupaca County.

In June the state commission announced that the company had agreed to cover the area in which the six persons lived, and said that four of the persons would be charged the normal exchange rate. The remaining two customers, the state agency said, would be charged a foreign exchange rate and certain construction charges incurred in the installation of the desired facilities

**'Foreign Exchange'**

A foreign exchange rate is charged for service furnished from an exchange other than the exchange normally serving the area in which the customer is located.

To obtain Gresham service Roy Schultz and Frank Giese were charged $9.65 and $50.05, respectively, plus an additional service charge of 75 cents a month above the normal rate.

Assemblyman Herbert Grover has protested the additional charges to the two Seneca residents, and the state agency has scheduled a hearing in the Shawano County courthouse at 10 a.m. Sept. 23.

## Appleton Sea Scouts Guests on Weekend Cruise Aboard Tugboat

Members of the Sea Scout Ship 11, Northern Light of Appleton, are cruising on Lake Michigan and Green Bay waters this week-end aboard the tugboat Rubel, a Sea Scout ship from Sturgeon Bay, as guests of Pete Krauss.

The ship will visit lake ports as well as Chambers, Strawberry, Gills Rock, and Adventure Islands.

It anchored at Washington Island Saturday night, and will return to Appleton late this evening.

Larry R. Hahn, skipper of Ship 11, is in charge of the cruise, assisted by Vincent Berg, advisor of Post 1, Appleton.

## Valley UW Student Cited by Publication

Konrad Ebisch Jr., operator of the planetarium at the University of Wisconsin Fox Valley Campus, has been cited for his work, in the September issue of "Sky and Telescope," national astronomy magazine.

Ebisch, a sophomore at the Fox Valley campus, is the son of Konrad Ebisch Sr., assistant professor of geography there.

## Continue Search for Sunken Submarine

HAMBURG, Germany (AP) —British and German naval vessels with electronic gear searched the North Sea Saturday night for the sunken German submarine Hai (Shark).

The sea was calm for the first time since the small World War II U-boat sank in a gale Wednesday night with 20 men aboard. One crewman survived and was rescued. Seven bodies have been recovered.

A German navy spokesman said the day-long search had failed to locate the hull, but would be continued through the night.

**"We Like It Here,"** Ed (Corky) Haydn sings as his wife, Gerda, packs their bags to go on to other Wisconsin cities. Corky, who recently finished a three-week engagement at the Club Terrace, has played his guitar through 40 states, Mexico and Canada. His Wisconsin night club schedule has included Appleton, Fond du Lac, LaCrosse, Rochester and Stevens Point. He hopes his Milwaukee agent will bring him back to Wisconsin soon after his October trip to Oregon. (Post-Crescent Photo)

*They 'Like It Here,' Too*

# Wandering Minstrels Laud State For Its 'Non-Sanpaku' Atmosphere

"Our home is the road, and we like it here and there and everywhere, but especially here."

This was the answer given by Gerda and Edward (Corky) Haydn to the question, "How do you like Wisconsin?"

Corky recently finished a three-week stand as guitar and vocal soloist at Club Terrace. From there he and his wife went on to LaCrosse and Stevens Point.

The other reason Corky and Gerda like Wisconsin is that it is one of the easiest places in the world to be "non-sanpaku."

Readers of the book, "You Are All Sanpaku," will know what the Haydns are talking about.

Published in 1965 by University Books, Inc., the book was written by 75-year-old Japanese scientist Sakurazawa Nyoiti, known in the Western world as George Ohsawa.

Basically, sanpaku is described as a condition in which the white of the eye can be seen between the pupil and the lower lid as the subject gazes directly forward.

"Symptomatically," Corky says, "the sanpaku can be recognized by his chronic fatigue, low sexual vitality, poor instinctive reaction, lousy humor and inability to sleep soundly. He lacks precision of thought and action, is susceptible to disease and prone to accidents."

One of the remedies for sanpaku, according to the book and the Haydns, is change of diet. A non-sanpaku diet is built basically around natural, whole, unpolished brown rice, which the macronutrients (people on this special diet, according to Gerda) call the perfect food. The book says that white rice is just as good, but it takes five times as much to give the effects of the brown.

There are many other foods listed in the book, mostly vegetarian, with recipes for proper preparation. The preparation is as much a key to feeling good as the food itself. Gerda emphasized.

"Every program needs an attractant," Gerda said, "and since Ed and I are firm believers in the fact that other people should be interested in macrobiotics, here is a popular recipe that may spark interest." The recipe is for hangovers.

"Take a small teacup and pour enough soya sauce to fill one-tenth of the cup. Add boiling-hot coarse green bancha tea and serve."

Gerda also recommends, as does the book, a cup of this mixture the night before to head off a hangover. Anyone who tries this recipe the morning after may be more amenable to other aspects of the macrobiotic regimen, she feels.

The catch is that you have to know how to make bancha tea, a course green tea is the base. It is available by mail from New York, and the address of the Ohsawa Foundation is in the introduction of the book.

Ed Haydn came to Wisconsin at the urging of a fellow-entertainer who wrote to New York saying, "Come to Wisconsin. You'll love it." After one week here, Corky wrote his wife to close their apartment in Greenwich Village and "come on out."

In his letter, Corky wrote paragraphs about the clean, fresh Wisconsin air, the magnificent trees, the beautiful sky "in which you can actually see white, white clouds not obscured by grey dust."

**Natural Things**

He also told her she would be entertained by night club audiences that really talk about natural things like horses, pigs and cows, riding, hiking, swimming and boating. "They have the space for these things here," Corky wrote.

Corky has traveled with his guitar through 40 of the 50 states, and had long engagements at the Harrah's Clubs at Lake Tahoe and Reno. He spent a year and a half at the Grandview Gardens in Los Angeles' Chinatown.

"From Wisconsin we go on to the West coast," Corky said, "but it will be a thrill for both of us if our agent can book us back in Wisconsin because as your slogan says.

"We like it here "

*Century of Merchandising*

# Store Changed but Location Hasn't

BY PETER GENIESSE
Post-Crescent Staff Writer

NEENAH—Just a year after the Civil War ended and months following the establishment of Neenah's first paper mill, a German immigrant opened a retail shop on Wisconsin Avenue.

The small store carried such items as plows, horse harnesses and the newest thing in wood stoves. The bill of fare has changed at Krueger's since its founding a century ago. But the location hasn't — nor has the ownership.

William Krueger settled in the Town of Clayton in 1849 and decided to try his hand at farming. Some 17 years later, he moved into Neenah and opened a hardwware store to serve the needs of both the farmers and the builders of the young community.

The ownership of the store has been kept in the family for the 100 years and now James Webb, a great-grandson of the founder, is president of the firm.

**Steel Ranges**

Cooking demonstrations and promotions brought in the era of the steel range before the turn of the century as the founder's two sons, H. F. and M. W., took over the operations. One Neenah resident was lucky enough to win an expense-paid trip to Europe in 1898 as a result of a cooking contest at the store.

A tin shop was added and, as the holding increased, the family decided to incorporate in 1906. One of the first things the board of directors voted to do was put an iron cuspidor in the store.

The board meetings were held in the store on Sundays and, after inventory checks of the store, the group reviewed plans for the future over a cup of coffee in Barnett's Drug Store.

Two horse - drawn wagons formed the delivery fleet in the early days with horse barns located behind the store.

The hardware store line expanded to include sporting goods, silverware and toys when H F 's sos, William H. and Carl F. entered the operation. James Webb, the grandson of the founder, became president in 1940. When he died six years ago, his son, also James, took over.

The present boss at Krueger's only dates back to the push for electric refrigerators in the 1930's.

*Grandson of Little Chute Woman*

# Returns $21,965; Given Reward, Police Citation

LITTLE CHUTE — Frank K. Koehn, 20, Almond, son of Frank Koehn, formerly of this village, and grandson of Mrs. Clara Koehn, 316 S. Monroe St., received a double reward for honesty after he found a little green box containing $21,965 in a Minneapolis park this summer.

Koehn was walking home from work when he noticed the small green box in the grass and saw a $5 bill poking out. Upon opening the box he saw it contained bundles of $5, $10, $50 and $100 bills.

He ran back to the shoe store where he worked and he and the manager locked the door and went in the back room to count the money. They then placed the money in a shoe box, tied it tightly and Koehn called police. At first the police refused to believe him, but finally sent a squad car to the store to pick up Koehn and the money.

Police learned that the money belonged to a 76-year old man who took it with him when he went for a walk and absent-mindedly left it in the park. Koehn said he returned the money for two reasons.

"My dad always said there were two things he couldn't stand — a liar and a thief. I figured I'd be both if I kept the money."

Koehn received a $600 reward from the wife of the man who lost the box and a plaque from the Minneapolis Police Officers Federation, only the fourth such citation made by the group. Two of the others were made for heroism and one for assisting a policeman.

*Vending Machines Take Over*

# Canteen Brings End of Courthouse Coffee Pots

A small "restaurant," opened this week on the ground floor of the Outagamie County Courthouse, already is doing a big business.

The "restaurant" actually consists of four vending machines, two tables and a few chairs in a newly remodeled room that still smells of fresh paint. The room once housed the Dairy Herd Improvement Association staff and equipment.

Now it is quarters for a lounge designed for courthouse employes. The lounge reportedly is a long-time request of the Courthouse Employes Association. Remodeling work started some time ago.

**Hot-Cold Food**

One of the four vending machines dispenses hot and cold foods ranging from apples to jello and macaroni salads to Spanish hamburgers. A dime will bring a cup of hot coffee or chocolate from the second in the line of machines, while the third serves up cold drinks.

The fourth machine makes change to operate the other three. Cigarette, candy bar and sweet roll vending machines will be added early next month, as will new furniture.

The new "canteen" as it is identified by a hall marker, has seen heavy use in the few days it has been open. There has been no announcement of its opening.

Members of the Outagamie County Board's property committee, meeting Thursday, toured the canteen, then returned to formal session and ordered County Executive Secretary Alvin Woehler to issue a directive that effective Oct. 1, all office coffee pots will have to go.

It has been the practice in many offices to have either a percolator or a container of hot water handy for regular or instant coffee during routine breaks.

Department heads now will be formally advised that the canteen will replace the back room coffee pots.

A schedule of canteen use by respective departmental employes desiring coffee breaks reportedly will be devised.

Spiritual, Moral, Physical Needs

# Appleton Salvation Army Corps Activities 'Complex'

"A Love for God and a practical concern for the needs of humanity" is the motto of the Salvation Army, and the Appleton corps is one of thousands across the world diligently working to fulfill the meaning of these words.

To many persons, the Salvation Army is synonymous with the well-known kettles at Christmas time but in reality the scope of the corps' activities is complex.

"Our principal reason for existing is to meet the spiritual, moral and physical needs of man," Lt. Booth Wood, commanding officer of the Appleton corps, said.

This is done through a widely diversified program, designed for children, youths and adults of all ages.

**Youth Program**

The youth can participate in religion classes, youth training and leadership classes as well as summer camping. For each group, special materials, visual aids and leadership helps have been published by national headquarters.

"We also have a young people's legion which provides fellowship in a healthy atmosphere," the commander said. Typical activities include swimming, hiking and bowling.

The junior legion program for children from 6 through 11 years of age, teaches crafts and group play, combined with basic Christian ethics.

**Group Performance**

"We also have a singing group for this legion which teaches the basic techniques of group performance," Lt. Wood said. "We were able to start this," he said, "because there is local leadership here — a person who can take over when we leave the area."

And on Sunday there are Bible classes. "The simple but adequate surroundings are suited to our people and their families," the commander said, adding that underprivileged tots, as well as the children of the leadership personnel, are always welcome.

"This, we think, is important because every parents who cares, wants his child to receive this important religious training," he added.

The adults of the community, too, benefits from the local corps. The Ladies' Home League, with 32 enrolled members, provide an opportunity for fellowship and education for "Mrs. Housewife, USA," as Mrs. Lt. Wood puts it. Here women can participate in discussions on family budgeting, basic family diet, home safety and demonstrations on fine silverware and table settings.

**Men's League**

A new group is the Men's League, also organized for fellowship purposes. The 15 men enrolled so far, have already built a slot car track for one of the youth groups, Lt. Wood said.

But welfare "rendered in the name of God," as the motto reads, is a major function of the whole salvation army operation.

In the past year there have been aids to 190 transients. The aids include meals, clothing, lodging and medicine.

"Eight of these people even accepted placement in an institution which will deal with their specific problems," Lt. Wood said.

Limited case work and services to local families and individuals — "mostly people who don't qualify for assistance from a government agency for one reason or another" — is also provided.

**Visit Shut-Ins**

At Christmas, 100 families received food and nearly 80 children were able to attend a Christmas party, some for the first time in their lives, through the efforts of the local corps.

More than 500 shut-ins and people in institutions were visited by members.

The Appleton corps also operates the thrift store, which provides an important self-help program, according to the commander.

Operated by Mr. and Mrs. Hubert LaMaide, the store provides for the needs of those who must stretch their budget over large families.

"We feel it is not only our responsibility but our privilege to serve the community," Lt. Wood said. "But there are some things in which the community can be of help to us also."

**Seek Enlistees**

People should encourage those who may be able to use our services to come to us; they could also assist with this work of mercy by encouraging potential leaders for the corps to enlist, he said.

The Appleton Corps is assisted by a 21-member board of directors, headed by K. K. DuVall Jr., whose function it is to advise the local commanding officer and interpret the community to him and the corps to the community.

"We are encouraged by the prospect of another year of meaningful service made possible by the support of the Appleton people who are so generous to the United Community Services," DuVall said.

"It is through this generosity that we can look forward to the next 100 years, with encouragement," Lt. Wood concluded.

About 90 Members of Five Salvation Army Corps attended a brigade meeting Friday in Appleton and heard Capt. Jack Keyte, Manitowoc, speak on "Living the Blessing," at an open-air meeting. Communities represented included Appleton, Sheboygan, Manitowoc, Green Bay and Oshkosh. (Post-Crescent Photo)

# Kagen Seeks National Study On Education

### Claims Teachers Should be Able to Gauge Attainments

GREEN BAY — Taxpayers in this area are curious to know what they are getting for their money spent on education, Dr. Marv Kagen said here Saturday.

The Appleton physician and 8th District congressional candidate said education ought to have a "barometer that would provide information similar to the kind the gross national product supplies for our economy." In a talk to the Baker's and Confectionery Union, Local 180, at the Labor Temple here, Dr. Kagen said a national assessment of learning would provide local teachers with "a report card on how they are doing in their work of developing our most vital natural resource."

"I am strongly opposed to setting up any kind of national standards for what or how local schools should teach," Dr. Kagen said. "But a national sampling of the level of educational attainment would give our teachers here an important gauge.

**"No Obligation"**

"Although local teachers would be under no obligation to try to match teaching here with teaching elsewhere, I suspect that our forward-looking educators would be very interested in seeing the results that a national survey would give."

Dr. Kagen said plans for a national educational attainment survey are underway. The proposed survey, he said, would sample knowledge of various age groups in the areas of reading and language arts, mathematics, science, vocational arts, social studies, fine arts and citizenship.

"Last year alone new school buildings cost $6 billion," Dr. Kagen said. "With this kind of investment in physical facilities, it makes good sense to find out how efficiently and wisely we are educating the young people and adults who study in our schools.

Seymour's Tim Jensen

# State's Youngest Sulky Driver Ends First Season

BY PAT DUFFEY
Post-Crescent Staff Writer

SEYMOUR — A father's love and concern for horses has been passed on to his son and today, Tim Jensen, 16-year-old son of Mr. and Mrs. Wayne Jensen, route 3, is the state's youngest licensed driver of harness race horses.

Although associated with show horses prior to purchasing their trotter, "Spud's Sally" three years ago, the Jensens had not formally become involved with the racing circuit.

Last spring Tim passed the license qualifying test of the U.S. Trotting Association and got his racing baptism this summer at Beaver Dam. It wasn't until the fourth weekend on the circuit that he won his first race.

He grabbed his first win at Monroe in the trot with a time of 2:13, not far off his horse's previous summer record of 2:12.3 set with his father driving.

**Weyauwega Race**

He found competition to his liking, raced at Neilsville in rain and mud, took on the veterans at Amherst, but he had one of his shining hours at Weyauwega. He finished a close second to "Shawnee Jim" which had previously qualified for the Illinois tracks with a 2:07 in Chicago earlier in the season. Spud's Sally was clocked at an unofficial 2:08.

Tim shaved the family record to an official 2:12 at De Pere where he took firsts in both heats of his trotting class. He compiled a season record of five firsts, eight seconds and a third as compared to the previous year when his father compiled four firsts, two seconds and four thirds.

For the Labor Day weekend the Jensens traveled to Norway, Mich., for the annual racing classic which attracts horses from lower Michigan.

Jensen picked up a first and second the first day and Tim, not to be outdone, scored a second and first the next day.

**Big Purse**

None of the county fair circuit races match the $1,000 purse of the annual Michigan contest, but competition and interest in the sport in each county is keen.

Jensen is a director of the Wisconsin Breeders and Harness Horse Association.

The Jensens couldn't race at the Outagamie County Fair this summer due to an earning limit placed on horses entering the trotting class. But they have gained much respect for the track and its facilities.

Races at Seymour this summer were open to non-winners of $700 in their particular class while normally a $2,000 and $3,000 limit is set. Competition is stiffer at Seymour because the dash system used at Chicago is employed. Each class has single heats instead of two heats as at most county fairs. It necessarily attracts more entries.

**Contest Rules**

Drivers must abide by a number of rules during races. At most county fair races there is only one judge while big tracks station judges at strategic points along the track.

Tim has no qualms about racing against older, more experienced drivers, but found the challenge appeals to his competitive spirit.

Racers, like prize fighters, maneuver for advantage. In the pocess they can "box in" and "park out" their opponents by positioning their sulkie carts to prevent a driver from pulling out and going ahead.

Once the drivers enter the final turn they can not change position. That's why in some races fans will see the horses racing for home in a line extending from the inside rail across the track toward the spectator stands.

The Jensens have started training another horse, "Melody Gypsy" which they purchased earlier this year at an Elkhorn auction. The horse comes from Illinois breeding stock and is said to have turned in some fast times in training.

Both Jensens attributed much of their success to a Seymour blacksmith, John Kissinger. They praised Kissinger's talent for shoeing horses and improving the horse's gait in the process.

The Jensens have adopted unusual training techniques. Tim, last winter, jogged his horse on a track in back of their home near Seymour. It took a little extra bundling to cope with the 20 below zero weather at times, but the faithful training continued and paid off in a horse in top condition this spring.

In early spring the training scene shifts to the harness racing oval at the Seymour fairgrounds. Practice sessions are conducted daily with special emphasis on hard training on two of those days in preparation for weekend racing events.

Although the "silks" have been hung up for the season, daily practice sessions with the horses after school will keep Tim's imagination stirring with thoughts of his second season next summer. Meanwhile, memories of an exciting summer gone by are still fresh.

The Season Is Over and Tim Jensen, Seymour, the state's youngest licensed harness race driver, prepares to hang up his "silks" and return to the school books after his first season on the state circuit. (Post-Crescent Photo)

# Jail Facilities Criticized

CONTINUED FROM PAGE 1

detained for more serious violations.

Persons using the jail kitchen say it should be considerably larger.

**Kitchen Improvements**

Cited as other needs in the small kitchen were a preparation table to replace the tiny wooden table that now stands in the middle of the floor, a steam table to keep food warm until it is served, and a ventilation system to help cool the room.

Because many of the prisoners are transients, some of whom are found to be carriers of highly contagious diseases, Spice said consideration should be given to purchase of an automatic dishwasher which would sterilize eating utensils better than the wash-by-hand method now being used.

The cook and trustees assigned to her use a divided sink that is as small or smaller than the type found in the kitchens of many homes.

**Huber Law Prisoners**

Huber Law prisoners, who are allowed to work on the outside during the day and then are confined nights and weekends, eat their meals and spend much of their free time in the "bull pen," a 12 by 16 foot room containing a long table, benches, toilet, washbasin and shower.

They sleep in two cells each designed to accommodate eight persons. There was no Huber Law provision when the jail was built. Huber Law prisoners now are quartered in facilities intended for security cells — facilities that are much the same as those across the hall which house the "lockup" prisoners.

At times, when the Huber Law population tops 16, the prisoners are quartered in the boys juvenile detention cell.

**Dormitory Facilities**

Some supervisors and law enforcement personnel have proposed dormitory-type facilities for Huber Law inmates who, it is contended, are prisoners, but still are men who put in a day's work and are proven trustworthy.

A larger visiting area is cited as another need in the jail. Visiting time now is limited to 15 minutes. Only a prisoner's immediate family is allowed in the visiting room. The restrictions were imposed primarily because of lack of space, it was learned.

The need also has been expressed for a receiving cell where new prisoners could be placed before going to their cells. Such a facility reportedly would allow jail personnel to better determine the specific needs of individual prisoners. It would also be easier to discover prisoners who are potential disease carriers, Spice said.

With the right combination of prisoners, the jail will accommodate up to 45 persons. The number could drop to 35 with a mixed variety of male and female juvenile offenders, along with prisoners requiring solitary confinement, and Huber Law prisoners.

There were 38 prisoners, including five juveniles, at noon Saturday.

# Democrats Try To Wipe Out Party Strife

CONTINUED FROM PAGE 1

President Johnson, according to Hanson.

With a dinner scheduled Oct. 25 in Milwaukee for State Senator Martin Schreiber, candidate for lieutenant governor, the Lucey event will bring to eight the number of major fund-raising dinners held by the Democrats during this campaign. The emphasis on dinners as a fund-raising device has been necessitated both by the long primary battle and by an internal revenue service ruling and a later Congressional act which prohibited tax deductions for high priced corporate advertisements in dinner program booklets.

## Firemen Extinguish 2 Menasha Grass Fires

MENASHA — Firemen were called to two grass fires within a half hour of each other Saturday afternoon, both believed started by children playing with matches.

The first call, received shortly before 4 p.m. was at the railroad tracks in the rear of Butte des Morts Junior High School. The second was at the railroad crossing at Plank Road.

Lt. Col. Donald Raiche

Retiring After 24 Years

# Oshkosh Guard Unit Honors Lt. Col. Raiche

OSHKOSH — Men and officers of the 2nd battalion, 127th Infantry, Oshkosh National Guard unit, honored their commander, Lt. Col. Donald Raiche, with a pass-in-review parade Saturday afternoon.

Lt. Col. Raiche, who lives at 320 W. Forest Ave., Neenah, will be retiring late this winter. The review was held now to take advantage of the mild weather.

Participating in the program were Maj. Gen. John A. Dunlap, commander of the 32nd Division, and members of the division staff.

Guard units from Oshkosh, Ripon and Berlin participated in the parade in addition to the Oshkosh VFW Band.

Lt. Col. Raiche has commanded the 2nd battalion since April 1, 1963, and has been a member of the Red Arrow Division since April 23, 1947.

When he retires, Lt. Col. Raiche will have completed more than 24 years of service.

He enlisted in the Army Nov. 30, 1942, and was commissioned a 2nd lieutenant Aug. 13, 1943, after graduation from officer candidate school at Ft. Lee, Va.

During the second World War, Lt. Col. Raiche saw action in Normandy, Northern France, the Ardennes, the Rhineland and in central Europe. During most of the period, he was with the 4009th Quartermaster Truck Co. He was promoted to his present rank in 1955.

A native of Neenah, Raiche graduated from Neenah High School in 1932. He is employed in the main office of Kimberly-Clark Corp.

# Court Hearing Tuesday On Milk Pricing Suit

### Injunction Filed Against Freeman by PMP, Fond du Lac Farmer Charges Illegal Action

FOND DU LAC — A hearing is scheduled for Tuesday in Federal Judge John W. Reynolds' court on an injunction filed against Secretary of Agriculture Orville Freeman by a Fond du Lac farmer and the Pure Milk Products Cooperative here.

The injunction, filed Sept. 1 in the U.S. District Court of the Eastern District of Wisconsin, contends that Freeman took illegal action last April when he placed a 24-cent per hundredweight price reduction on class one milk bound for Milwaukee, Madison and nine other Midwest markets.

Class one milk is the Grade A variety used for bottling purposes.

The 24-cent reduction was part of Freeman's recently-imposed supply-demand adjuster which is used to determine the minimum milk price that can be paid the farmer by the processor.

**Replaces Chicago Order**

Freeman's supply-demand adjuster takes the place of the Chicago Milk Order which terminated April 30. The old ruling, set in 1951, was designed to have the price of Class one milk fluctuate with supply and demand.

Sen. Gaylord Nelson (D-Wis.) has urged Freeman to drop the supply-demand adjuster, ". . . in view of the large numbers of farmers quitting dairying every day in Wisconsin and the continuing decline in milk production . . ."

Nelson said in a letter to Freeman that in view of the continuing drop in milk production, "it doesn't make sense" for the agriculture department to keep a negative pricing factor in effect.

Dr. Arthur Miller, a Pure Milk Products Cooperative economist, explained that the reduction imposed by Freeman was a permanent one and leaves no room for flexibility.

The Sept. 3 Dairy Industry Newsletter stated that the suit was being brought against Freeman because the supply-demand adjuster is not authorized by law

OSHKOSH AREA
MUSICIANS!!!
There are presently vacancies in the string sections and some wind sections of the OSHKOSH CIVIC SYMPHONY.
*Anyone interested in playing with the orchestra this season are requested to contact either of the following:*
Harold W. Arentsen, Conductor-manager, 235-8122
Robert Messner, President, 231-8069
Or write to either of the above, % Oshkosh Civic Symphony, P.O. Box 522, Oshkosh, Wis. 43901
*Rehearsals are held in the Orchestra room at the Senior High School on Eagle St., on Tuesday evenings.*

THANK YOU!
To the People of Outagamie County's 3rd Assembly District
I wish to express my sincere thanks and appreciation to the voters of the 3rd Assembly District of Outagamie County for their overwhelming vote of confidence during the Primary Election. I will make every effort to keep that confidence that I may have your continued support for Re-Election on November 8, 1966.
ERWIN W. CONRADT
Republican
3rd District Assemblyman
Authorized and Paid for by Erwin C. Conradt, R. 2, Shiocton, Wis.

tax free income

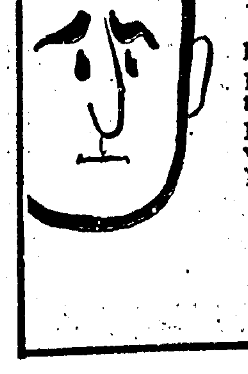

Why pay federal taxes on all your income? If you're in a high income bracket, consider federally tax-exempt municipal bonds, now available at the highest yields since the 1930's. Many people overlook the tax advantages of these historically sound bonds, keeping all their reserves in savings accounts or certificates of deposit. If you're in a 33% tax bracket or higher, the return on tax-exempt municipals betters most taxable income by a substantial margin. Why pay more taxes than you have to? For free information, mail the coupon below.

MANPOWER PROBLEMS?

When competition for skilled labor runs high, small firms find that a well conceived pension plan will help them to compete with the larger corporations for high-grade employees. May we explain this and other advantages of an insured pension plan with New England Life?

# University Dean Says Rise in Farm Product Prices Long Overdue

## Tells Cattle Producers U.S. Agricultural Surplus Is Dwindling

ARLINGTON — "The rise in farm product prices is long overdue, and it is about time farmers got a more equitable share of our affluent society," Glen S. Pounds, dean of the University of Wisconsin College of Agriculture, told state beef producers here Thursday.

Pound, speaking at the first beef day meeting at the state experimental farm here said, "We are getting a bright new image. Never again will we see the surpluses of 30 years ago."

More than 400 beef cattle producers and others associated with the livestock industry attended the gathering.

"America is in a real sense short in agricultural raw products," he warned, pointing to limited government stocks of wheat and feed grains. In addition, corn imports have been halted and dairy cattle numbers are down, he noted.

**School Needs Facilities**

Although the state's livestock industry is a $400 million business, the university is sadly lacking in physical facilities with which to pursue its related animal science program.

Pound promised to push for better facilities, noting that budgetary requests had been made for them.

The Arlington farm is a 2,023-acre complex about 20 miles north of Madison. Twelve departments of the University of Wisconsin College of Agriculture, especially the departments of agronomy, plant life, veterinary medicine and animal science, use the farm's facilities. A big asset at Arlington is the uniform soil which is essential for basic research, according to Arlington director Don Peterson.

Researchers and the college try out new ideas on the farm complex. If experiments look good they are tried on other university experimental farms in the state, Peterson said.

"After a product is termed a success it is marketed and proceeds used to help offset the cost of the farm." However, he continued, "We are not operating with the intent to make money for the state since some of our tries are not successful."

**Various Revenues**

Money for the farm is received through the university's budget, the U.S. Department of Agriculture and other federal agencies plus independent research agencies like the Wisconsin Alumni Research Foundation and the Rockerfeller and Ford foundations.

The farm is not complete, Peterson said, "We are still developing facilities as we are eased off of our land in Madison. We hope to get enough funds in the next few years for the necessary expansion."

The present land and improvements were made possible by money obtained from the sale of 600 acres of the Hill Farms in Madison. No tax money was needed.

Don Peterson, Left, director of the University of Wisconsin Experimental Farm at Arlington, confers with John Mc Nett, manager of the University of Wisconsin-Platteville farm, during the State Beef Day at Arlington. (Post-Crescent Photo)

*Ladies Should Reduce, Too*

# Males in 4 Valley Counties Overweight by 685 Tons

Special to The Post-Crescent

Male residents of Outagamie, Calumet, Winnebago and Waupaca counties will have to knock off 685 tons if they want to follow the current trend of having trim figures, according to recent surveys by the Public Health Service and the American Medical Association.

In order to get down to what doctors call "desirable weight," men in Outagamie County will have to lose 247 tons. Other reductions necessary are 57 tons in Calumet County, 284 in Winnebago and 97 in Waupaca.

The average man is nearly six pounds heavier than his father was at the same age. For the 26,000 males older than 25 in Outagamie County, this increase amounts to 156,000 pounds. The 6,000 men in Calumet County who are older than 25 weigh 36,000 pounds more than their fathers, and Winnebago County's 29,000 men are 179,000 pounds heavier than their fathers.

Males more than 25 in Waupaca County total 10,200, and their weight increase equals 61,000 pounds.

**Should Weigh 149**

Studies show that the average male in the United States older than 25 currently weighs 168, but he should be down to 149 for optimum health.

Assuming local men correspond to the national figures, this represents an excess of 494,000 pounds in Outagamie County, 114,000 in Calumet, 568,000 in Winnebago and 194,000 in Waupaca.

Local women have the same problem, but not to the same degree. Although women are lighter than their mothers were at their age, they still need to reduce.

Among Outagamie County women, for example, those age 25 or more average 145 pounds. The recommended weight is 131 pounds. Those in the 18 to 24 group average 129 pounds, or about 10 pounds more than doctors think is best.

What to do about the problem?

**Exercise Important**

Cutting down on food intake is considered the best means of reducing. Exercising is also important, according to the American Dietetic Association.

The AMA has prepared a table to show the amount of physical activity necessary to dissipate calories contained in various foods.

To burn up the 350 calories in a hamburger sandwich, for example, would require 67 minutes of walking, or 43 minutes of bicycle riding, or 31 minutes of swimming.

An ice cream soda, which has 255 calories, would take 49 minutes of walking, 31 of bicycling, or 23 of swimming.

Combining a cutback in food intake and a regular exercise schedule is an a slow but effective means of reducing.

# WSU-O Plans New School

## Council to Discuss Specialization in Social Work Area

OSHKOSH — Development of a School of Social Work at Wisconsin State University-Oshkosh will be discussed Wednesday when members of Oshkosh Community Council open their fall season with a luncheon meeting at the Raulf Hotel.

Guest speaker for the meeting will be Prof. Dale Hardman, assistant professor in the university's department of sociology.

Prof. Hardman completed his undergraduate work at the University of Utah at Salt Lake City and received his master's degree from Brigham Young University, Provo, Utah. He holds a doctor of education degree from the University of Illinois.

His talk to the council will deal with future plans for a social work specialty at the university here. His experience includes 13 years of social work in the field of corrections.

Presiding at Wednesday's session will be the Rev. E. A. Koch, president of the council.

# Wool Growers Vote Friday on Referendum

## Proposes Increase In Deductions for Marketing Program

OSHKOSH — Deadline for voting in the referendum on the wool market-promotion program is next Friday, Walter Weideman, chairman of the Winnebago County Agricultural Stabilization Committee, reminded Winnebago County farmers.

An "eligible voter" is one who has owned sheep or lambs six months of age or older for at least 30 consecutive days since last Jan. 1. Ballots may either be mailed or brought into the ASCS office in person.

The referendum proposal is to increase the deductions from 1 cent to 1½ cents per pound on shorn wool and from 5 cents to 7½ cents per hundredweight on unshorn lambs.

The proposed new agreement will be approved if it is favored by at least two-thirds of the producers voting or by producers having at least two-thirds of the volume of production represented in the total vote.

Weideman said that any eligible producer who has not received his ballot should contact the ASCS office.

# Byrnes Flays LBJ 'Yes-Men' In Kaukauna Talk

KAUKAUNA — Rep. John W. Byrnes renewed his criticism of "Johnson yes-men" congressmen and candidates in a campaign speech here Saturday afternoon.

"We have a President so busy playing politics and a Congress so full of Johnson rubber stamps that we are getting no leadership. We are drifting and dreaming with the Democrats in power in Washington," the congressman told a meeting of Byrnes workers at the home of Joseph Steger, Kaukauna Volunteers for Byrnes Chairman, 1509 Glenview Ave.

"We are fighting a long bitter war and the Democrats are unable to devise, or even agree upon, a policy for bringing it to an end with honor. Prices and interest rates are going up alarmingly and the Johnson administration and Congress — instead of fighting inflation — feed it with fantastic increases in spending and deficits. A recession threatens when the bubble bursts. Crime is increasing; riots and civil disturbances are taking place daily. We can't keep shoving these problems under the rug forever."

# J. C. Penney Lists New Promotions

## R. T. Helein Named Sales, Merchandise Department Manager

Robert T. Helein, 28, has been promoted to sales and merchandise manager at Appleton's J. C. Penney Co. Store according to Ralph Boettcher, store manager. Helein will take over the position Oct. 3.

The vacancy was created when William Johnston was named manager of the J. C. Penney store in Antigo. His advancement will be effective Sept. 30.

A third promotion transferred Frank Heimerl, manager of the Appleton store's shoe department, to the Ford City Shopping Center store, Chicago. Heimerl reported to his new job Sept. 6.

Helein

Helein is presently the store's ready-to-wear department head. He was born in Appleton, attended Appleton High School and graduated from St. Norbert College, De Pere in 1960 with a degree in economics. Helein started with the company in 1960. He was granted a two-year leave of absence during a hitch in the U.S. Army. He and his wife, Joyce, and two children reside at 1122 W. Franklin St.

Johnston, sales and merchandise manager for the past four years, started with the company's store in Bloomington, Ill. in 1953. He has worked in J. C. Penney stores in Indiana and Illinois.

Heimerl's first company position was with the West Bend store in 1956.

Boettcher also announced that Dennis Hopfensperger, a trainee for the past two years, has been promoted to department manager. He started working with the company in May, 1963.

**LEGAL NOTICES**

# Job Outlines Scare Minority Applicants

Post-Crescent Madison Bureau

MADISON — State service job opening announcements are often so verbose and pretentious that they frighten away prospective applicants among the state's racial minority groups, the chairman of the state industrial commission told a civil service study committee Friday.

The comment came from Joseph Fagan, head of the agency which includes among its tasks the enforcement of the state fair employment laws, who commented on the shortage of applicants in some civil service categories and said it may relate to the lack of "communication" with the minority groups in the state by the state department of personnel.

**Brought Samples**

Fagan brought to the hearing room table samples of job descriptions and advertisements which he criticized for fuzzy writing, a tendency to inflate the technical requirements of elementary jobs, and a failure to make clear that supposed educational requirements often can be replaced with proof of relevant work experience.

"Some of these frighten even myself," he remarked about the state's recruiting literature.

Fagan obviously referred to unemployment in the Wisconsin Negro community and especially in Milwaukee, at a time when state services are complaining about a shortage of labor and especially in the lower job classifications.

**Concerned About Indians**

But he said Puerto Ricans are also involved because of their language difficulties, and that he also was concerned about Indians.

There are comparatively few minority group representatives now in the state civil service, although officials have publicly said they are trying to hire more of them.

Peter L. Graverson, 111 Van St., Neenah, and Joanne M. Van Gorp, 261 North Park Ave., Neenah.

Carl I. Rogers, route 1, Neenah, and Jacqueline G. Wilson, 1120 N. Superior St., Appleton.

John E. Martin, 506 Baldwin Ave., Oshkosh, and Susan M. Jones, 922 Main St., Delafield.

Daniel L. Genal, 578 Boyd St., Oshkosh, and Marian H. Boehm, 550 Boyd St., Oshkosh.

George C. Harper, 31 S. Seventh St., Winneconne, and Judy La Bliven, 1230 Jefferson St., Oshkosh.

## Today's Deaths

Mrs. Ida Bergholz, 83, 103 W. Elsie St., Appleton.

Mrs. John Kuba, 2301 S. Oneida St., Appleton.

Mrs. Walter Van Asperen Sr., 72, 222 N. Wilson St., Kimberly.

Mrs. Roy L. McCarter, 932 E. Washington St., Appleton, mother of Mrs. George C. Miotke, Appleton.

## Deaths Elsewhere

Mrs. Fred Karl, Milwaukee, mother of George C. Miotke, Appleton.

# Two Bankruptcy Petitions Filed

A New London electrician and a Fond du Lac sporting goods firm have filed bankruptcy petitions in U. S. District Court, Milwaukee.

Calvin R. McFaul, 902 Shiocton St., New London, listed liabilities of $6,206.32 and assets of $293, with $240 exempt.

Bill and Mike's Sport Shop, 258 N. Main St., Fond du Lac, listed liabilities of $9,414.90 and assets of $5,729.83, with no exemption.

# Obituaries

## Mrs. Fred Karl

Milwaukee, Wis.
Mother of Mr. George C. Miotke, Appleton, passed away at 4 a.m. Saturday. In addition to her son she is survived by her husband; one other son; one daughter; 4 grandchildren and 1 great-grandchild. Funeral services will be held at 1:30 p.m. Wednesday from the Evers Funeral Home, Milwaukee.

## Mrs. John Kuba

2301 S. Oneida St.
Funeral services for Mrs. Kuba will be held at 1 p.m. Monday at Mount Olive Lutheran Church with the Rev. R. E. Ziesemer officiating. Interment will be in Highland Memorial Park. Friends may call at the Wichmann Funeral Home, after 3 p.m. Sunday until 10 a.m. Monday and then at the church until the hour of the service.

## Mrs. Roy L. McCarter

(Winnie)
932 E. Washington St.
Mother of Mrs. George C. Miotke, Appleton, passed away unexpectedly Friday. Funeral services will be held at 2 p.m. Monday from the Wichmann Funeral Home with the Rev. Clifford J. Pierson officiating. Interment will be in Riverside Cemetery. Friends may call at the funeral home from 7 to 9 p.m. Sunday and on Monday until the hour of the service.

## Mrs. Walter Van Eperen, Sr.

(Marie)
222 N. Wilson St., Kimberly
Age 72, passed away at 10 p.m. Friday after a short illness. She was born October 23, 1893 in Uden, Holland. She was a member of the Gold Star Mothers; the Christian Mothers; the Catholic Order of Foresters; the Legion Auxiliary; the Catholic War Veterans Auxiliary and the Golden Age Club, Kimberly. Mrs. Van Eperen is survived by her husband; five daughters, Mrs. Robert (Leone) Green, Kimberly; Mrs. Walter (Johanna) Diedrick, Kaukauna; Mrs. Marie Saucer, Houston, Texas; Mrs. Robert (Fran) Richter, Burlington, Wis.; Mrs. Eugene (Luella) Schultz, Reno, Nev.; six sons, John, Paul, Joseph and Henry, all of Kimberly; Walter Jr., Combined Locks; Bernard, Appleton; 41 grandchildren; one sister, Mrs. Bertha Van Grinsven, Appleton; two brothers, Henry Van Den Boogaard, Kimberly; Frank Van Den Boogaard, DePere. Funeral services will be held at 10 a.m. Monday at Holy Name Catholic Church, Kimberly. Burial will be in the parish cemetery. Friends may call at the Jansen Funeral Home, Kimberly, after 2 p.m. Sunday. Rosary will be prayed by the Christian Mothers and the Catholic Order of Foresters at 7:30 p.m. and parish rosary at 8 p.m. Sunday at the funeral home.

Dental supply firm grows bigger with aid of Phone-Power!

When your dentist needs supplies, he needs them "right now." That's where the Milwaukee office of the M. F. Patterson Dental Supply Company fits into the picture.

Always open to ideas to improve their services, Patterson asked a Telephone Communications Consultant to have a look at their communications facilities.

Recommended and adopted was a modern Phone-Power inventory cycling system. This means planned telephone usage for stock reorders.

Results? Orders are now being delivered two to three days faster than ever before. And routine order taking no longer bogs down Patterson's salesmen.

Now they can see more dentists per day — and make better use of the limited time dentists can spare. There's more time for telling dentists about new product developments. And more time for demonstrations of new products. And selling.

All in all, William Sibley, Patterson's area manager, is highly pleased. No wonder. Sales are up 12% for the year's first half. And two salesmen can now do the work of three.

Does this give *you* an idea? If so, call in a Telephone Communications Consultant. Just call us and ask for a Communications Consultant. There's no charge for his services.

*Success stories like this are typical of the interesting business reading featured in our quarterly business publication . . .* PULSE

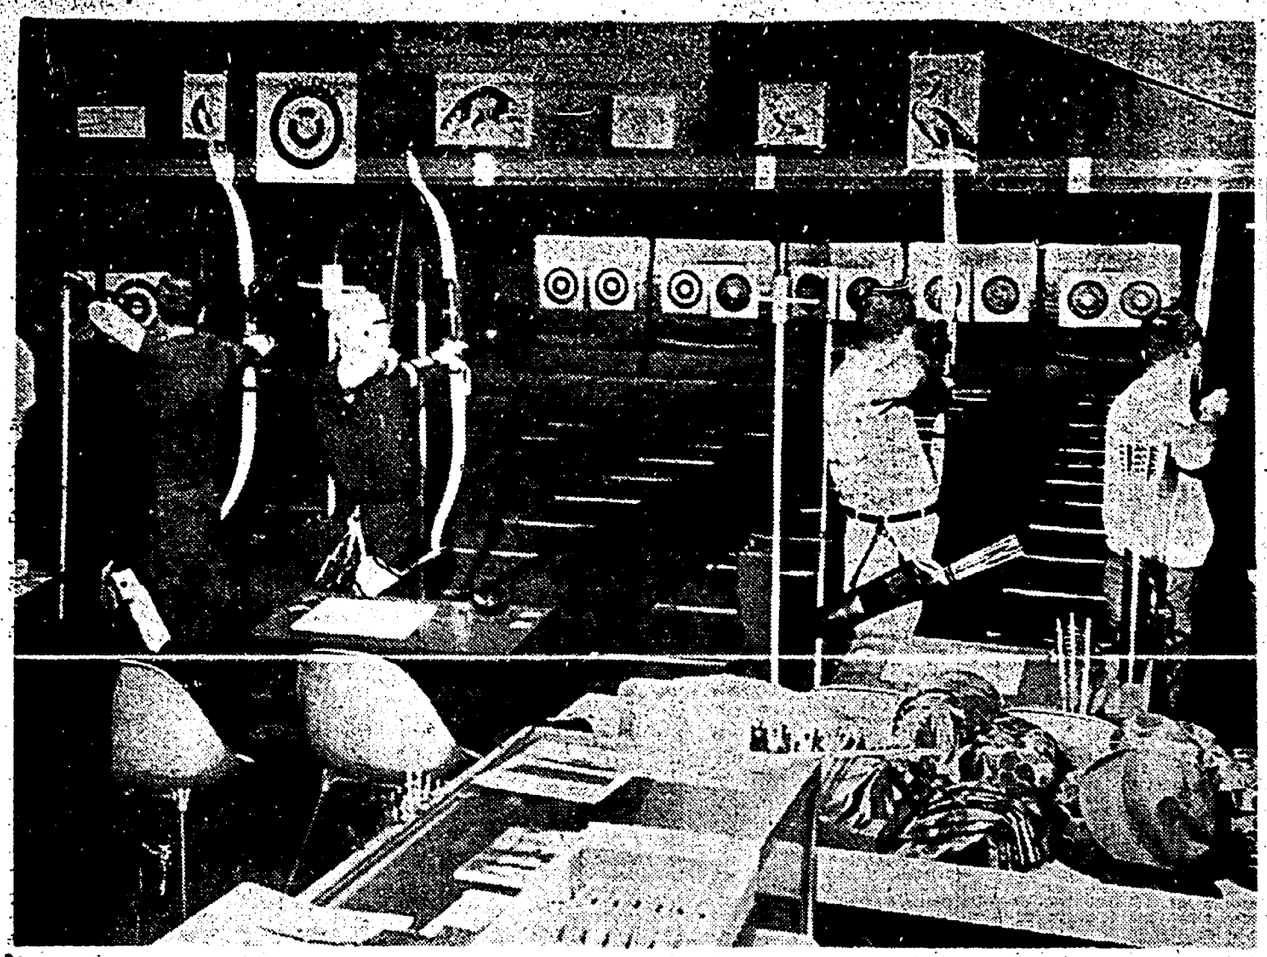

*To receive copies regularly, just write us on your letterhead.*

NEWSPAPERARCHIVE.COM

The Bow Hunting Season for deer is just around the corner, in fact it will open Saturday morning. Fox Cities area archers have been shooting at Ohm's Archery Lanes, Highway 76 northwest of Appleton, to sharpen up for the season. In the picture at the top left, archers are shown taking aims at targets while below Paul Hendrichs, Appleton and Norb Ohm, range owner, look over a bow. At the top right, John Mitchler, Kimberly takes aim while Ernie Buss, Appleton, watches. The lower picture on the right shows Bob Schremitzler, Kaukauna, pulling arrows from a target. (Post-Crescent Photos)

Archer-Hunters Get in Practice for Deer Season

# Indoor Bow Range Was First in State

When Norb Ohm first started in the archery "line" he was making arrows in his basement workshop and now he runs the first established indoor archery range in the state.

Ohm's Archery Range is now in its fourth year of operation and several other indoor ranges have sprung up since, but Ohm's was the first established one in Wisconsin.

The indoor range features a target setup which is operated automatically. Just the flick of a switch sets the target in motion and brings it up to the firing line where the archer can withdraw his arrows and then flick the switch again to send the target back into shooting position.

Targets can be stopped at any point so the archer can regulate the distance he wants to shoot at.

Ohm has been involved in archery for 20 years and this season Jim Hillegas is working with him as an instructor, salesman and arrow maker.

This is probably the busiest time of the year for Ohm. Hunters who use their bows and arrows for deer jam the range nightly to get in a little practice before the season arrives. This fall, Wisconsin's bow-deer season gets underway Saturday and early indications are for another record turnout of archers in the field.

Archery is one of the fastest growing sports in the nation, judging from the response to the sport and the booming increase in sales of equipment.

**Compete in Leagues**

Ohm has helped to organize archery leagues and through the winter months archers compete in industrial and couples leagues as well as just an evening of shooting. Rates for shooting at the indoor range are on an hourly basis. The range is open until midnight.

In addition to the range, Ohm has equipment available for sale or rent and instructions also can be furnished.

Ohm's partner, Hillegas, pointed out that there is an advantage to having the equipment at the range because potential customers can try out a bow before they buy it and thereby know if they are getting a piece of equipment which they will be able to handle.

Bows are rated by pounds of pull and the most popular pull is the 35 to 40-pound class nowdays. Frequently, beginners or those interested mainly in the hunting aspect of archery will stay with this pull class.

One thing Ohm has noted in the past several years is the swing of interest in archery to women and children. Archery is becoming more and more of a family sport.

# SINGLE SHOT

By Jim Harp

Fall, the magic season is upon us.
It arrives — carried on the wings of a migrating bird
Or riding on a crimson maple leaf.

With the magic season comes crisp, refreshing air.
Cool nights, days kissed with warming sunlight
And a restlessness that makes man yearn for the outdoors.

The harvest moon floats over fields and trees.
The dog whines and then sings with a howl
That echoes through the darkness.

In the morning, frost stiffens the grass
So that it crackles and crunches like,
Ten thousand egg shells underfoot.

The magic season also brings with it
A travelling artist with his palette
of colors, so beautiful the summer rainbow hides itself.

The artist touches here and tints there
Providing a display which brings man
From his dwelling with an eagerness to walk, to see.

In the woods and fields, wild animals
Shed the young of their yoke of protection,
Releasing them to find their own way.

With the magic season comes sounds
Familiar to all who have ever
Stood alone in the silence of the great outdoors.

The pheasant cackling in the thicket,
The mallard quacking at the pothole,
Or the squirrel scolding at each intruder.

Twigs snapping as the buck deer
Makes his way to the clearing or
The rustle of march grass as the rabbit scampers.

The magic season has much to offer.
The congestion of summertime is gone.
The beach is deserted, the oarlocks are empty.

Solitude is there and it is time for soul searching.
Man's thoughts are his own, uninterrupted
And the outdoors is spread before him like a ballroom.

Here, he can waltz to his heart's content
With partners like the wind, a falling leaf
Or an endless day.

There is no rationing of enjoyment.
An air of freedom grips the soul
For this is fall, the magic season.

Archers Take to Field Saturday

# Bow Deer Season Will Open

BY JIM HARP
Post-Crescent Outdoor Editor

"Give us back those days before the white man came and drove the game out — those days when deer abounded, wild ducks winged their way overhead and fish leaped eargerly in the Fox River."

Have you ever hears someone say this?

Well, if the Indians who roamed Wisconsin in the 17 and 1800s could see today's deer population they would probably climb to the top of their wig-wams and shout "geronimo."

The truth of the matter is that ducks may have been more plentiful and the Fox River was a lot cleaner, but never has the state's deer herd been in better shape than it is now.

**Take To Woods**

That is the situation archers will find this Saturday morning when they take to the woods as Wisconsin's 1966 archery deer season gets underway.

Bow hunters, who have been staking out likely spots for the past three weeks, will get their chance Saturday in a season which continues until Nov. 19.

One major change in the regulations for this season finds that there will be no bow hunting during the regular gun season Nov. 19 through 27th. Archers will have to hang up their bows until the special late season which will run from Dec. 3 to Dec. 31.

**Cure for Problem**

Harold Hettrick, administrative aide in the law enforcement division of the Conservation Department, said that prohibition of bow hunting during the gun season would serve as a cure for a problem.

"People have tried to register gun-shot deer as archery deer," Hettrick said, "and even though they are caught most of the time, it is a needless problem for workers to be faced with when they are busy with the gun season."

Hettrick added that there are very few archers out during the gun season.

Bow hunting is one of the fastest growing fall sports. The bow deer harvest jumped from 3,164 in 1964 to 4,995 last fall. In the 1965 harvest, 4,117 of the deer were taken during the early season and 878 in the late season.

**All Counties Open**

All counties of the state will be open to bow hunting and one deer of either sex will be permitted. A $5 archery deer license will be required of hunters over 18 years of age. Hunters under 18 will be sold the same license for $1.

Last fall, archers took deer in all counties except Green, Menominee and Milwaukee. About 22 per cent of the deer harvested were antlered, 35 per cent were adult does and 43 per cent were buck and doe fawns.

A check on the sale of licenses shows that 35,900 adults used a bow and arrow for deer and 19,600 junior licenses were sold last year.

One other notable aspect was brought out in a review of the 1965 season. Violations increased greatly with 333 arrests recorded. Out of the arrests, 121 were for shining wild animals, 88 for transporting a strung bow and 59 for hunting after hours. One-third of the arrests were against non-residents.

# Registration Stations Set For Archers

Seven registration stations have been set up for the convenience of area bow hunters who successfully bag their deer during the 1966 season which gets underway Saturday morning.

Conservation warden Dale Morey has listed the stations and suggests that bow hunters clip out the list to save for future reference. Registration stations include:

Christy's Sinclair Service, 524 E. Wisconsin Avenue, Appleton, 7 a.m. to 9 p.m. daily, 8 a.m. to 1 p.m. Sunday.

Elmer Baungarten, Peters Road, Kaukauna, after 3:30 p.m. daily and all day on weekends.

Ralph Kleist, Seymour, 3 miles south of Highway 54 on the French Road, after 5:30 p.m. weekdays and all day on weekends.

Gerald Van Stratten's Service Station, junction of Highways 76 and 54, Shiocton, 9 a.m. to 9 p.m. daily.

Richard Konlon, Greenville, one mile east of intersection of Highways 45 and 76, after 5:30 p.m. weekdays and all day weekends.

D and E Sinclair Service, Winchester, 6 a.m. to 9 p.m. daily.

Mueske's Zephyr Station, 811 Plank Road, Menasha 7 a.m. to 10 p.m. daily.

Signs will be posted at the registration stations, the warden said. Morey also will be available for registration if necessary.

## PSC Okays Wildlife Development Along Embarrass River

Post-Crescent Madison Bureau

MADISON — A proposed wildlife pond adjacent to the Embarrass River in the Town of Herman, Shawano County, has been approved by the State Public Service Commission.

The pond had been proposed by James Kristof of Leopolis, for construction on land he owns adjacent to the north branch of the river.

The pond will measure 200 feet in length in an east-west direction, and 60 feet in width and will be located 200 feet from the river. Maximum water depth in the pond will be 8 feet.

The commission gave approval after no objections were received to the plan within 30 days following its publication.

## Recreational Plans Set in County Forests

MADISON — Comprehensive recreational plans have been completed for 22 of the 27 county forests of the state, the state conservation reported as it accepted the plans filed by Florence and Oneida conties.

The plans are being encouraged to foster the multiple use concept of county forest management, and are required as a condition for the payment of state aid to counties for the improvement of recreational facilities within their forest holdings.

# Gets Dark Earlier, Boaters Should be More Cautious

At about this time of year, you begin to notice that it gets dark earlier.

To the experienced boater this means it is time to take certain precautions.

With more hours of darkness each night and fewer people in many waterfront places, boat and motor thieves tend to become bolder.

This does not mean it's time to quit boating for the season. But it does mean that a bit of extra care is in order. If your boat has been moored on the outskirts of your local anchorage, find space closer in which has been vacated by some departed summer resident and move the boat to it.

Such a late-summer moving around of moored boats throws a monkey wrench into any casing jobs boat thieves may have been doing. Also, getting your boat nearer to lighted dock areas makes it a vastly less tempting target for them.

That chore done, get out your marine insurance papers and refresh your memory on the expiration date. Some policies expire or shift to a status of reduced coverage after a certain date in late autumn. Be sure you know the score exactly on this matter.

Now for some easy but timely mechanical work. A check-up of your boat's electrical system will be in order because you'll be using the navigation lights more. See that all fixtures are secure and that the lamps burn bright. It's usually a simple matter to remove a bulb to clean and brighten its contacts with abrasive paper. Make sure, too, that all instrument lights are in good working order.

# CAMPING with VAN

The average person, when he buys a new car, promptly sits down to study the owner's manual to determine the type and frequency of maintenance and service needed to keep his car in shape.

The same person may very his camping equipment and wind up with an expensive item needlessly damaged. My own practice is to maintain a permanent file of all the instruction or data sheets that come with any equipment.

* * *

Dear Van — I recently used a good quality down sleeping bag on a weekend trip. The excursion was a dusty one so I decided to have the bag dry-cleaned before putting it away. My mistake. The bag came back from the cleaners with the shell so stiff that I was afraid it would crack. How can I undo the damage--and how should I go about having sleeping bags cleaned in the future? I certainly can't afford to throw away my sleeping bag every time it gets dirty. J. B.

I'm not sure you can undo the damage, but try writing to the manfacturer for specific information. If you don't get cleaning instructions with a sleeping bag when you buy it a letter to the manufacturer will bring the necessary data. Different makes of bags have to be treated differently because of the variation in materials and construction.

Some bags, with a simple cotton shell, can just be tossed in a washing machine. Others must be dry cleaned--and here's the catch. Not all cleaners can do the job satisfactorily. If your local cleaner can't guarantee satisfactory results ask him to send the bag out to a cleaner who specializes in this work and can do a complete job, including re-downproofing the shell if necessary.

Bags that have rubberized or plasticized outer covers must be taken apart before cleaning since the rubber or plastic might be ruined by the cleaning fluids.

* * *

Send your camping question to Camping with Van, care of this paper, enclosing a stamped addressed envelope for a personal reply.

Coordinates operating budget proposals and determines and investigates variances between actual and standard cost and forecasted profit. Estimates new product and tooling costs. B.S. in Bus. Adm. or Engineering, with courses in cost accounting, operations analysis, etc., helpful. Five years' experience in industrial accounting.

FINANCIAL ANALYST — Will perform economic research and analysis of return on investment, overhead and profit, distribution of expense, master budget development and report preparation. Recent college graduate with accounting, finance or equivalent degree will qualify. One or two years' industrial or public accoun'ng experience desirable.

INTERNAL AUDITOR — Conducts audit of company activities and evaluates findings and makes corrective recommendations. Appraises company's financial records and procedures. Reviews findings with personnel responsible and prepares audit reports for management. Some travel to Centralab or Battery Division branch plants. Requires B.A. in Business Administration, Major in Public Accounting, two to five years of industrial accounting, and/or public accounting helpful.

ECONOMICS ANALYST/ENGINEERING — Work in general field of technical economics and industrial accounting. Assist in feasibility studies of a new product planning, evaluates new products and process proposals in Centralab Division. Will work closely with management of Engineering Group to appraise operating results. Requires degree in Engineering or scientific discipline with a Bus. or Econ. minor. Three years or more experience in manufacturing.

SENIOR COST ACCOUNTANT — Assist in administration of cost control program. Opportunity involves analysis and processing of data relating to product and tooling costs and labor and material. Will develop and establish overhead rates and budgets. Bachelor's Degree required, emphasis in accounting with some pre-engineering training helpful. Two years' cost accounting experience desirable.

Globe-Union Inc., manufacturer of precision electro-mechanical components and batteries, is located on Milwaukee's north side and is currently expanding its operations. Complete benefit program includes profit-sharing. Company contributes toward relocation expense.

Mr. J. Abell will be conducting interviews at the Holiday Inn, Appleton, on Tuesday and Wednesday, September 20 and 21. Please telephone 734-9872 on these days for an appointment.

# Try Post-Crescent Classified Ads

**WANT AD INFORMATION**

**CLOSING TIME**

Want ads accepted to 4:00 p.m. the day before day of publication. For Monday—Before noon Saturdays. For Sundays—Before 10:30 a.m. Saturdays.

**CORRECTIONS OR CANCELLATIONS**

Want ad corrections or cancellations accepted to 8:30 a.m. for the same day publication. For Sundays—Before 10:30 a.m. Saturday.

**IMPORTANT**

Composition costs will be charged, if an ordered ad is cancelled before publication.

After an ad is ordered, it cannot be changed before one publication.

When cancelling an ad, demand a "kill number." No claim is recognized on ads cancelled without it. The number of days ad is published determines the rate of such ads.

**ADJUSTMENTS**

The Post-Crescent assumes no responsibility for verbal statements in conflict with its established rules, policies or rates.

All claims for adjustments or refunds must be made within 7 days after expiration of ad.

Errors, not the fault of the advertiser, which make the advertisement less valuable, should be corrected the first day, when one extra corrected insertion will be made without charge. The Post-Crescent assumes no responsibility for error after the first insertion.

**NOTICE**

The Post-Crescent is exercising all precautions to avoid publishing any fraudulent or misleading advertising. However, if any ad appearing in the classified columns of the Post-Crescent can be proven fraudulent or misleading, we would appreciate your informing us immediately.

## EMPLOYMENT

**NOTICE . . .**

Designations as to sex in our Help Wanted columns are made only (1) to indicate bona fide occupational qualifications for employment which an employer regards as reasonably necessary to the normal operation of his business or enterprise, or (2) as a convenience to our readers to let them know which positions the advertiser believes would be of more interest to one sex than the other because of the nature of the work involved. Such designations shall not be taken to indicate that any advertiser intends or practices any unlawful preference, limitation, specification or discrimination in employment practices.

BELL & HOWELL

# Loyal Old River 'Lady' to be Rebuilt After 40 Years of Dredging Harbors

BY CLIFF MILLER
Post-Crescent Staff Writer

PIPE — She's 40 years old and has seen better days, but next year she'll be a new girl altogether.

Though she'll literally be out of steam when the river opens next spring, the U.S. Army Corps of Engineers dredge "Winneconne" will have new muscle for continuing her work.

The old dredge is busy in the channel of Pipe Creek here, deepening Calumet Harbor where the creek enters Lake Winnebago. She keeps company with her usual escort: a tugboat, a coal barge and a mud scow. When this job at Colombia Park is done, she and her escort will leave Fond du Lac County and move north to Stockbridge in Calumet County, where another small boat harbor along the lake needs cleaning. From there she's scheduled to move back south and remove silt and sediment from the channel at Brothertown Harbor.

If there's time before the winter freeze, according to Ross Plainse, project engineer at the Appleton Corps office, the 100-foot long dredge will move to the Neenah Harbor where she'll begin a job not expected to be finished until next spring.

### New Look

But, when she returns to finish her task, she'll hardly be recognizable as the same old lady of the river, according to Plainse.

When the navigation season ends, she'll come home to the Corps base at Kaukauna, where her face-lifting and rejuvenation will begin.

She'll be stripped of the 50-foot-high A-frame supporting the 80-foot boom from which she swings the scoop that moves river bottoms.

Her superstructure including the control cabin will be removed. The wood and steel that covers her engine room and boiler will be cut away. The smokestack and steam funnel towering from her upper deck will come down. And the great boiler and cast-iron gears, pinions and steam engines — her heart and muscle — will be torn out.

They'll be replaced with a new diesel engine and compressed air system.

A new controlroom will be built and a new A-frame and 80-foot crane will be mounted on her foredeck.

### Hull To Remain

About all that will remain of the present dredge will be the hull, part of the afterdeck and the three studs, which she plants like legs on the riverbottom to steady herself while she works.

Gone will be the coal barge and the smell of smoke and steam wherever she works.

Lower bridges and a need for modernization are responsible for the surgery.

The Corps of Engineers, representatives of Fox River boating interests and the State Highway Commission agreed earlier this year that any new bridges built on the river in the future should be 30-foot fixed spans at a minimum.

### Supports Lowered

That ruled out high spans and drawbridges, and it also meant the Winneconne's 50-foot A-frame boom supports would have to be lowered.

Plainse said the dredge would have had to be modernized soon even if it had not been for the bridge ruling.

She was built by the Leathem D. Smith Dock Co. at Sturgeon Bay in 1926. Parts are becoming scarce if not impossible to find. And diesel power is expected to be more efficient, while eliminating the smoke problem along with the need for shoving a coal barge with her wherever she goes.

"She has given us good service and has been real economical," said Plainse, but he added that old age is starting to show up in breakdowns and rising repair costs.

### 40 Years of Service

Her 40 years of service have taken her long distances from here. The big dredge has been nudged by tugboat as far north as Manistique, Mich., and Michigan City, Ind., and other small harbors along the west shore of Lake Michigan.

The crew of the "Winneconne" include dredge master, John Wald; Kimberly; tender operator Donald Carter, Kaukauna; deckhands Theodore Tilly, Combined Locks, and William Gildernick, De Pere, and watchman Robert Peppard, Manitowoc.

Wald has made sure the "Winneconne" will not pass entirely from the scene in her present form. The tedious chore of man-sized scale present steam a sentimental homely but loya

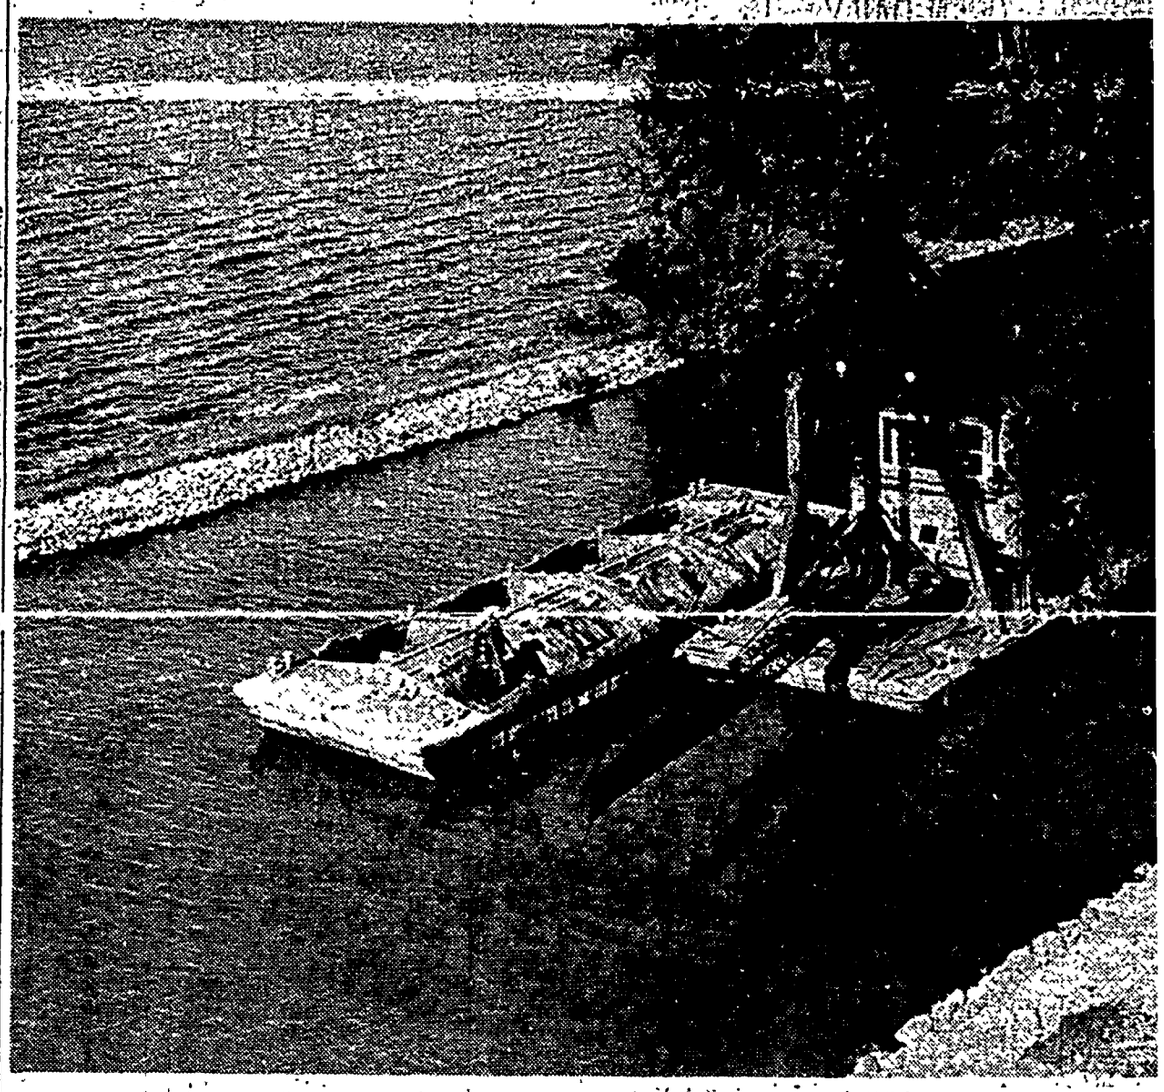

## *County Commission Joins in Observing Highway Week in State*

The Outagamie County Highway Department is joining with other government, industry and civic groups in Wisconsin Sept. 18-24 in the observance of Wonderful Wisconsin Highway Week.

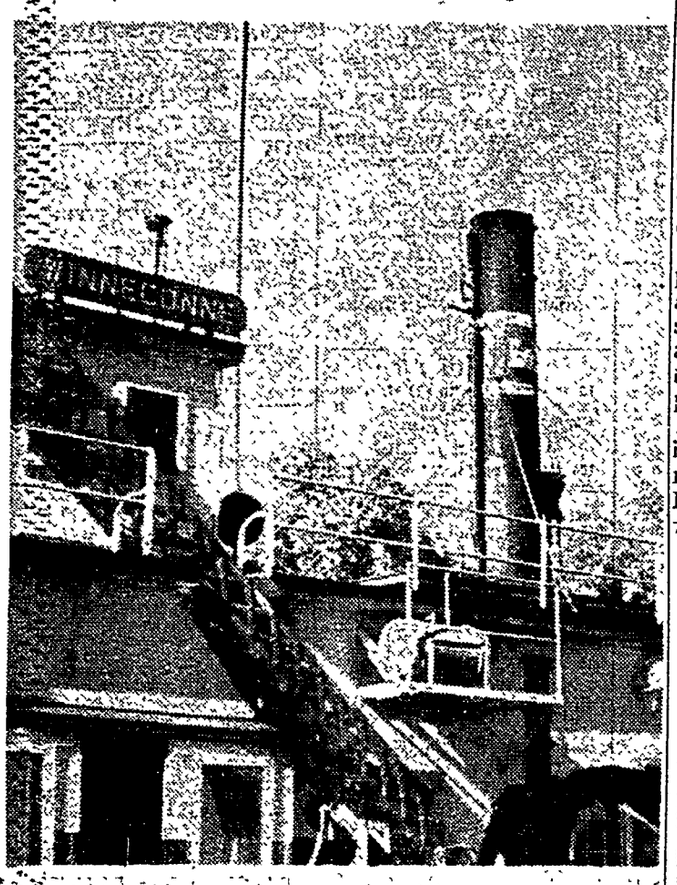

The event is a result of concurrent dates for the first "Wonderful Wisconsin Week" started by the State Chamber of Commerce and the 6th annual "National Highway Week" proclaimed by President Johnson.

Governor Knowles said the purpose is to "help focus public attention on the state's resources, including highways, and the importance of safe highway transportation in our personal, daily lives."

Clarence J. Brownson, county highway commissioner, is serving as a coordinator for the Highway Week observance.

**The Dredge, "Winneconne," will be a new girl altogether by next spring, hardly recognizable as the same 1926 vintage steam rig shown in this photo, taken from atop the lookout tower in Columbia Park, Fond du Lac County, where she is dredging Calumet Harbor. This winter a new 80-foot crane will replace the boom of the same length shown h 50-foot high A-frame supporting the h lowered to 30 feet to permit passage u built in the future on the Fox River. ( Photo)**

**This Is the Last Season** that steam and smoke will mark the work sites of the U.S. Army Corps of Engineers dredge "Winneconne." The 40-year-old dredge will soon return to Kaukauna to be outfitted with diesel rather than steam equipment and to have the bulk of her superstructure rebuilt. (Post-Crescent Photo)

It's fun to save on the big brands at T.I. Hoover, the quality name in floor care.

# Readers Give Their Views

BY JINGO

The readers who volunteered to help Jingo review the new television season started replying shortly after the premieres hit the air.

Some of the early returns are printed here, with additional Sunday columns to follow until all have been aired.

* * * *

**The Rounders (Mrs. Robert Hocking, 926 Grignon St., Kaukauna).** — In my opinion, this is NOT a prize winner! Chill Wills is very good as a fast talking "Wheeler Dealer," but the story is nothing new. Pat Wayne and Ron Hayes are very handsome but wasted in these roles. Not having a color TV, maybe the scenery is nicer than the show itself. I'll bet "Red Skelton" wins this time spot.

* * * *

**Pruitts of Southampton (Mrs. Jack Andrews, Route 2, Shiocton).** — There are a few funny moments in the "Pruitts of Southampton," but

*Phyllis Diller*
*"Just doesn't fit"*

one wishes that Phyllis Diller would have learned from a few other comedians' lessons — they are much funnier in night clubs and guest appearances than in their own TV shows. There's simply too much Phyllis. Her forced laugh, which is an amusing trademark, just doesn't fit here. The narration was not done well. Frequently, it seemed to be part of the action of the show, thereby confusing the listening audience. The butler was not convincing, being too mousey and old and insecure. The Pruitts seems to be headed for the same reviews that Joey Bishop and the Smothers Brothers received — not so good.

* * * *

**Love on a Rooftop (Mrs. Jack Andrews, Route 2, Shiocton).** — "Love on a Rooftop" is a delightful half hour. A windowless apartment makes an amusing setting for characters well done, especially the serious, wealthy father. Judy Carne and Peter Deuel are an attractive couple, easy to like and laugh with. The neighbors are funny and convincing and the pace moves beautifully. This would appear to be a welcome replacement for the "Dick Van Dyke Show"; provided the writers continue to give the fine cast good working material.

* * * *

**The Man Who Never Was (Ronnie M. Otto, 1126 Manitowoc Rd., Menasha).** — If the viewers can accept yet another spy show, "The Man Who Never Was" might just make it. That is, if they can also believe that a man can successfully assume a dead man's identity, complete with wife, business, scheming half-brother, various personal affairs and STILL be an effective functioning spy. I suppose this does give the writers plenty of angles to work on. Although well directed and packing plenty of action for a half-hour show, the premiere script was sketchy and confusing. It did, however, present the show's format and effectively introduce the main characters. Robert Lansing gave a convincing performance, but I think that not even he can make this series anything more than just another spy show. The rest of the cast was adequate.

* * * *

**Tarzan (Steve Friis, 109½ Racine St., Menasha).** — One of NBC's advance premiere shows, "Tarzan," left me with

Jingo

mixed emotions. The show is definitely not one of the best I have seen, but it did have some good points. Casting is good in my opinion, with Ron Ely as a polished Tarzan. The show started much as I expected with a lot of stock wildlife film clips. Action moved at a fast pace but I hope they can come up with better plots in the future. This one was a little hard to swallow, in view of the fact that this is not a "camp" show. I think it could be a sleeper and if "Green Acres" can last, so can "Tarzan."

* * * *

**Tammy Grimes (Mike Smith, 1100 E. Grant St., Appleton).** — This show was very humorous and fib-tickling. The person who played the brother did a very ineffective job, but aside from this the acting was excellent. The plot moved swiftly and never left you wondering when something was going to happen. The show appeared to fulfill its format. I feel that this show is the best and most refreshing new comedy show of the season.

* * * *

**Star Trek (Nancy Fraedrich, Route 2, Weyauwega).** — "Star Trek" revolves around the USS Enterprise on a five-year mission making checks on alien planets. The first stop produced an adventure that generally moved along, slowed several times to give an insight into the personalities residing on the space ship. The color was lavish, but the bright red sky on the planet M-113 was a bit hard to take. The many actors that portrayed the chameleon-type villain did an excellent depiction. This is a truly integrated show with a ship's crew composed equally of males and females (including one voluptuous blonde), Negroes, Japanese and one non-earthman.

* * * *

**That Girl (Patty Wagner, 2413 S. Lawe St., Appleton).** — Miss Thomas fits her part

*Marlo Thomas*
*"Just the right girl"*

just perfectly. She is a gay bouncy girl. That is just the way a New York "actress" should be. The quality of Miss Thomas' acting is 100 per cent. She must have inherited her great acting from her father. "That Girl's" format is being filled piece by piece. She wants to be an actress. So Ann Marie is starting to be an actress "piece by piece." The pace of "That Girl" is fast and exciting. In my opinion, Marlo Thomas is just the right girl for this part. . . I really enjoyed this show.

* * * *

Other reviews will appear next week.

# 'Star Trek' Shows Promise

BY DON ROYAL

NEW YORK — "Star Trek," NBC's hour-long venture into deep space, in color, airs Thursday evenings, 7:30-8:30 p.m.

Whether the Desilu production's plots for the science fiction shows go into pedestrian orbit or take off for the stars remains to be viewed, but the prospect is intriguing. Based on projections of today's thinking by the experts, the series deals with the dramatic potential of occurences in an era when man is able to voyage beyond his present boundaries in space.

To insure a plausible blend of drama and fact scientists from the world-famed Rand Corporation acted as consultants in planning, writing and filming "Star Trek."

Focal points for the dramas is the U.S.S. Enterprise, a galaxy-traveling spacecraft. The "U.S.S." stands for "United Space Ship." Skippered by Capt James Kirk, as played by William Shatner, it carries its complement of several hundred men light-years out from our solar system.

## *Not a Stranger*

In a manner of speaking, Shatner is no stranger to "star" travel. The young actor, an alumnus of the Canadian Repertory Theater in Ottawa and the Stratford, Ont., Shakespearean Festival, has worked with some first-magnitude earthly stars—among them, Sir Alec Guiness, James Mason, Anthony Quayle and Irene Worth.

Space travel is a fifth dimension for Shatner. He has acted in the "dimensions" of radio, stage, motion pictures and television.

The man with a role that's truly out of this world is Leonard Nimoy, as Mister Spock, second-in-command of the Enterprise. Spock is the child of an earth mother and a man from a far planet.

Nimoy, a graduate of the Pasadena Playhouse, has appeared in "Dr. Kildare," "The Outer Limits," and "Profiles in Courage" on television. His motion picture credits include roles in "Seven Days in May" and "The Balcony."

Others to be seen frequently: Grace Lee Whitney as Yeoman Janice Rand of the Enterprise crew, and De Forest Kelly as the ship's doctor, Dr. McCoy.

## *Guest Stars*

One old earth custom carried into interstellar space by "Star Trek:" There will be guest stars in abundance on the show.

One step beyond space ships, time tunnels and other, other-world adventures in another dimension for astronomic specials for the upcoming season.

As the new shows wear in, and the season wears on, the inevitable, perennial complaint will be: "There's nothing different to watch."

Ain't necessarily so. A modest estimate, which includes all types of specials, places the season figure at about 200. Other guesstimates range much higher, and include many daytime specials often overlooked in tabulations.

Name your own figure for this area of television, where change is the one constant which is observed.

## *Real Special*

First, of course, are the genuine "special" specials—the fast-breaking big stories on the news side of the video tube. How best they are handled, and by which net, will afford watchers in the hot-tube league hours of material for discussion, praise and recrimination all season.

Next to be considered, and they are not few in number, are the perennial specials—the beauty shows, the Oscar and Emmy and other awards programs, the spectaculars at Thanksgiving, Christmas and the New Year.

And then come those holiday repeats of well-watched shows. These approximate the beginnings of video folklore.

For examples: this Christmastide, ABC airs again "Little Red Riding Hood," CBS repeats "The Nutcracker" and "Charlie Brown's Christmas." NBC re-airs "Rudolph the Red Nosed Reindeer" and "Mr. Magoo's Christmas Carol."

The folklore bit spills over into the new year, too, with CBS repeating "Cinderella" in January, "Wizard of Oz" in February. ABC will repeat "Alice in Wonderland" (date to be announced).

To try and list the new shows in this space would be to court utter confusion. Each net has its measure of prestige shows coming up. Sponsors of the past season will be back with household-word specials, and the mere names of the sponsors, or the series, provide instant indication of the caliber of the shows to be presented.

You'll be able to dial deep-dish drama or the lightest froth. While there'll be, numerically, a special at least 2 out of every 3 days, they'll often come in bunches, like bananas.

Your best guides to this visual smorgasbord are the daily and weekly entertainment pages of The Post-Crescent.

Good hunting, clear reception and much enjoyment to you in tracking down the special offerings. They often prove to be something truly special!

# TV HIGHLIGHTS OF THE WEEK

1

**Cliff Norton** personifies the Stone Age antics that are in store for two wayward space jockeys on the new comedy series, "It's About Time," Sundays (6:30-7, Channels 2-7-12).

2

**Diana Hyland** and **Jack Palance** guest-star in a "Run for Your Life" episode Monday (9-10, Channels 4-5). In the drama, a wife disappears after burning her effects, leaving a charred diamond as evidence. Series star Ben Gazzara can be seen in the mirror.

3

**Bess Myerson** joins Allen Funt as co-host of "Candid Camera", Sundays (9-9:30, Channels 2-7-12). The former Miss America replaces Durward Kirby, who returned to "The Garry Moore Show" this season.

4

**James Mason** and **Hugh Griffith** (in bed) star in the "ABC Stage 67" presentation of John Le Carre's original story for the series, "Dare I Weep, Dare I Mourn," a contemporary drama of the Cold War. In the background are Jill Bennett and Derek Francis. The show, filmed in England and Germany, airs Wednesday (9-10, Channels 11-6-9).

5

**Anthony Perkins** stars in Alfred Hitchcock's suspense thriller, "Psycho," a presentation of "The CBS Friday Night Movies" this week (8-10, Channels 2-7-12).

**10:30 — Channel 12 — "The Outcasts"**

* * *

**11:30 — Channel 2 — "The Wild One" — (1954)** Marlon Brando, Lee Marvin, Robert Keith, and Mary Murphy. Frightening story of a motorcycle gang on the prowl for trouble.

* * *

**12:15 — Channel 4 — "Women's Prison" — (1955)** Ida Lupino, Jan Sterling, Audrey Totter, Phyllis Thaxter, Howard Duff. A prison doctor tries to help women prisoners who are being brutally treated by sadistic superintendent of women.

## WEDNESDAY

**3:30 — Channel 5 — "The Big Operator" — (1959)** Mickey Rooney, Mamie Van Doren — A union leader who keeps his members in line by using strongarm methods is questioned by the Senate investigating committee.

* * *

**4:00 — Channel 4 — "Make Believe Ballroom"** — Frankie Laine — Radio Station's big contest stirs up jealousy, romance and avarice, with justice and love triumphing.

* * *

**10:30 — Channel 7 — "The Nightfighters"**

* * *

**10:30 — Channel 12 — "The Red Danube"**

* * *

**10:30 — Channel 2 — "The Prisoner" —** Alec Guiness, Jack Hawkins — A Roman Catholic Cardinal in a European police state is arrested and charged with treason.

* * *

**12:00 — Channel 2 — "Cargo to Capetown" —** (1950) Ellen Drew, John Ireland, Broderick Crawford — Oil tanker scene for romance and violence. Both captain and chief engineer love same girl passenger. Explosion straightens triangle.

* * *

**12:15 — Channel 4 — "How Green was my Valley" (1941)** Walter Pidgeon, Maureen O'Hara, Donald Crisp.

## THURSDAY

**3:30 — Channel 5 — 'Abbott and Costello Meet Frankenstein" (1948) —** Abbott and Costello, Bela Lugosi, Lon Chaney. Spook comedy.

* * *

**4:00 — Channel 4 — "Last of the Fast Guns" —** Jock Mahoney.

* * *

**8:00 — Channel 2-7-12 — "Good Neighbor Sam" — (Color)** Jack Lemmon, Romy Schneider — A married man poses as the husband of the girl next door to help her win a multimillion dollar inheritance.

* * *

8:00 — Channel 2-7-12 "Good Neighbor Sam" — (Color) Jack Lemmon, Romy Schneider — A married man poses as the hisband of the girl next door to help her win a multimillion dollar inheritance.

* * *

**10:30 — Channel 12 — "Babette Goes to War" — (Color) Brigitte Bardot,** Jacques Charrier and Francis Blanche.

* * *

**10:30 — Channel 7 — "The Girl in Black Stockings"**

* * *

**11:30 — Channel 2 — "On Moonlight Bay" (1951)** Doris Day, Gordon MacRae, Jack Smith, Leon Ames. Romance before World War I as a girl meets two boys, but her father prefers the one she likes the least.

* * *

**12:15 — Channel 4 — "Land of the Pharaohs" —** Jack Hawkins, Joan Collins.

## FRIDAY

**3:30 — Channel 5 — "Terror at Black Falls" — (1963)** House Peters Jr. — Seeking vengeance for his son's death and the loss of his right hand, a man holds eight hostages and kills three men before forcing the sheriff to a showdown.

* * *

**4:00 — Channel 4 — "Odongo" — (1956)** Rhonda Fleming, Macdonald Carey. A misogynist learns the error of his ways as he leads a safari into the jungle. The treatment and cure are effected by a beautiful doctor.

* * *

**8:00 — Channels 2-7-12 — Psycho** — Janet Leigh, Tony Perkins.

* * *

**10:30 — Channel 2 — "Meet Me At the Fair" — (1953) (Color)** Dan Dailey, Diana Lynn, Hugh O'Brian. A runaway orphan boy sparks the romance between a medicine show operator and a pretty welfare worker.

* * *

**10:30 — Channel 12 — "Nightmare in the Sun" (Color)** John Derek, Aldo Ray and Ursula Andress.

* * *

**11:00 — Channel 7 — "Pride and the Passion" — (1957)** Cary Grant, Frank Sinatra, Sophia Loren.

* * *

**12:00 — Channel 2 — "The 49th Man" — (1953)** John Ireland, Richard Denning. Secret agent trails smugglers of A-bomb parts to France, then back to U.S.

* * *

**12:00 — Channel 5 — "Poison Ivy" — (1953)** Eddie Constantine — An FBI agent in Tangiers, uncovers a plot to confiscate U.S. gold bullion en route to Casablanca.

* * *

**12:15 — Channel 4 — "Come Fill the Cup" — (1951)** James Cagney, Phyllis Thaxter. A newspaperman gets off the bottle to fight the mob.

## SATURDAY

**1:00 — Channel 7 — Saturday Matinee — TBA**

* * *

**1:00 — Channel 12 — "Target: Sea of China" —** Harry Lauter, Aline Towne and Lyle Talbot.

* * *

**2:00 — Channel 2 — "Shoot-Out at Medicine Bend" — (1957)** Randolph Scott, Angie Dickinson. Three men set out to avenge the death of the brother of one, a trail which leads to a man who sells faulty ammunition.

* * *

**8:00 — Channels 4-5 "Last Sunset" (Color)** Kirk Douglas, Rock Hudson.

* * *

**10:30 — Channel 4 — "The Barefoot Contessa" — (1954)** Ava Gardner, Humphrey Bogart. Many men try to discover the secret of a fortune huntress as he wanders around the world.

* * *

**10:30 — Channel 2 — "Desiree" — (Color)** Marlon Brando, Jean Simmons. Story of Napoleon and his first love, the daughter of a silk merchant and how their later meetings changes the course of history.

* * *

**10:30 — Channel 5 — "The Little Hut" — (1957) (Color)** David Niven, Stewart Granger, Ava Gardner. A girl and two men are shipwrecked on an island.

* * *

**10:30 — Channel 12 — "Spartacus and the Ten Gladiators" (Color) 1st run.**

* * *

**11:00 — Channel 7 — "Man from Del Rio" — (1956)**

* * *

**11:15 — Chennal 11 — "Nun and the The Sergeant"**

* * *

**12:00 — Channel 2 — "The Invisible Man Returns" — (1940)** Sir Cedric Hardwicke, Nan Grey. The imaginative device of using cigar smoke for crime detection helps apprehend the Invisible man.

* * *

**12:15 — Channel 5 — "High School Confidential" (1958)** Russ Tanblyn, Mamie Van Doren. A new student in town purposely attracts attention to himself so that he can get in with the rough school dope-taking crowd.

* * *

**1:10 — Channel 4 — "Let's Do It Again" — (1953)** Jane Wyman, Ray Miland, Aldo Ray.

# *Filming 'Ecstasy' Was an Agony*

Filming a best-seller like Irving Stone's novel of Michelangelo, "The Agony and the Ecstasy," seems as satisfactory a money-making idea as any to come along since Rumpelstiltskin taught the princess to spin hay into gold.

But when 20th Century-Fox president Darryl F. Zanuck discussed the book with script writer Philip Dunne more than three years ago, the prospect seemed somewhat less certain. Confronted with the bulky volume, weighing something over a pound, they soon realized it was impossible to compress a lifetime of almost 90 years into a single evening's entertainment.

Finally they realized the only solution was to concentrate on the single, most important human relationship and the one key artistic achievement of the Renaissance genius — the story of how the Warrior Pope Julius II forced Michelangelo the Sculptor to paint the Sistine Chapel ceiling frescoes.

The actor who portrayed Moses in "The Ten Commandments," the heroic Spanish patriot "El Cid" and Judah Ben-Hur in the Lew Wallace novel of the Christ — Charlton Heston — agreed to add the role of Michelangelo to his gallery of great-men. Then the noted British director, Sir Carol Reed, knighted for such screen achievements as "Odd Man Out," "The Fallen Idol" and "The Third Man," agreed to direct the picture. And added to this combination, Rex Harrison took on the role of Michelangelo's patron and nemesis, Pope Julius II. The result of their accomplishment can be seen starting Wednesday at the Brin Theatre, Menasha.

Filming got underway in the Carrara marble quarries north of Seravezza where Michelangelo cut the giant block from which he created the great Moses, one of several figures for the tomb of Pope Julius. Two weeks later, after completion of a sequence showing Michelangelo hiding from the Pope's troops, the company moved on to the Medieval town of Todi. Here, St. Peter's Square as it appeared in 1508 was recreated in the piazza flanked by the ancient palaces of the same ear — Palazzo del Popolo, Palazzo dei Priori and Palazzo del Capitano. With artful adaptations of 20th-century storefronts and advertising sings, production designer John De Cuir restored the center of the tiny town by draping ivy on electric cables and hanging laundry from telephone lines.

The Interiors of Pope Julius' Vatican Apartments were filmed in the 15th-century Orsini Palace overlooking Lake Bracciano about an hour's drive from production headquarters at Cinecitta Studio in Rome. The symbolic Orsini bears were covered with plaster copies of the crossed olivetree branches which represent the family of Julius, the noble della Roveres. The throne room was hung with copies of the Tournai tapestries in the Vatican Museum, which depicted scenes from the life of Christ woven in gold lame cloth.

Back at Cinecitta, the home of Michelangelo, which was in an old Roman ruin on Piazza San Pietro, was built on Stage Five. It was in these crude quarters that Michelangelo laid down his sculptor's chisel on the Slaves and the Moses to devote himself to the cartoons, the rough sketches for the Sistine Chapel frescoes. This setting was demolished to accommodate the terrace and the gardens of the Medici residence in Rome where the only woman, Contessina de' Medici, in this story of Michelangelo makes her residence as the wife of another man. The volatile British actress Diane Cilento, an Oscar nominee for "Tom Jones" brings to life this strange relationship of unrewarded love.

For the battles of the Warrior Pope, Carol Reed took his company to the outskirts of Canale di Monterano, malarial swamp marshes in the days of the Renaissance, with a spectacular view of the Medieval fortress town in the background of the Todd-AO-DeLuxe Color photography. Hundreds of extras were equipped with working models of the weapons of the day: halbards, pikes and arquebuses.

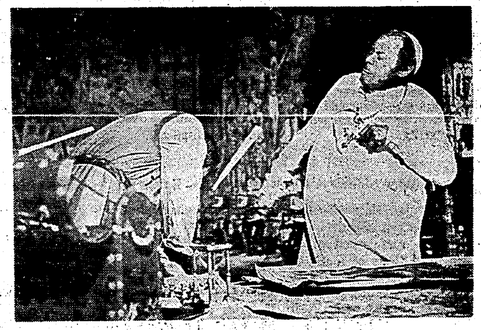

The main setting, which occupied a full-third of the entire shooting period of nearly four months, was a full-scale reproduction of the Sistine Chapel. The new Dino DeLaurentiis studio 12 miles from Rome was the only place in Italy where the setting could be accommodated. Although it was originally planned to construct two separate sets, one of the walls and floor of the chapel and another of the ceiling alone, the completion of the new stage enabled cinematographer Leon Shamroy to shoot "The Agony and the Ecstasy" as if he had access to the real Sistine Chapel itself.

Permission to use the real chapel was not forthcoming because of the enormous illumination required, which would dry-out and crumble the centuries-old frescoes. Furthermore, today's Sistine does not look as it did in 1508, when the ceiling was originally painted blue with gold stars and the altar-wall contained two windows instead of Michelangelo's creation of a later generation, "The Last Judgment." The 72-foot set was designed like a giant puzzle, coming in pieces for the placement of the huge arc-lamps.

*Diana Cilento, as the Contessina de Medici, tends Michelangelo, played by Charlton Heston, in 20th Century-Fox's "The Agony and the Ecstasy." Directed by Carol Reed, the color film opens for the first time in this area Wednesday at the Brin Theatre, Menasha.*

*Rex Harrison, as Pope Julius II (above), breaks his cane over the back of a belligerent Heston in the screen version of the Irving Stone book. At left, a paint-spattered Heston labors on the Sistine Chapel ceiling fresco. It was this part of Stone's book on which the film makers decided to concentrate.*

## UNDER THE ALBUM COVERS

# Jimmy Smith Great Jazz Organist, Fair Blues Singer

BY DAVID F. WAGNER
Post-Crescent Staff Writer

**Hoochie Cooche Man (Jimmy Smith, Verve).**

Smith may be "out of sight," but sometime between this album and the last, he ceased to be billed as "incredible" (could be it was his "inimitable vocal" of "Got My Mojo Workin'" and its pop success that did it).

Musically, Jimmy sits on the periphery of rock-blues and jazz, where he is roundly despised by some purists and warmly loved by a broadening listenership that does not ask for an intellectual expression in its music.

Oliver Nelson arranged the six selections and conducts the 25-piece orchestra that includes top jazz names (Kenny Burrell, Bobby Rosengarden, Grady Tate, etc.). Most of the credit, however, goes to Smith, a man who could make a Gary Lewis arrangement nitty gritty.

The half dozen tracks are equally divided between vocals and instrumentals. The basic flaw here is that Jimmy's talents fall about 80-20. Far superior as an organist, his always-explosive passages lend "One Mint Julep," "Blues and the Abstract Truth" and "TNT" guts as well as spirit. "I'm Your Hoochie Cooche Man" and "Ain't That Just Like a Woman" bring his singing to the realm of believability and "Boom Boom" is not likely to make anyone forget the Animals.

Smith the singer does not approach the empathy and drama that Animal Eric Burdon has achieved. But an album featuring Smith on organ and Burdon as vocalist would be sensational.

☆ ☆ ☆

**Over Under Sideways Down (Yardbirds, Epic).**

The jazz-blues-influenced Yardbirds can effectively express a vast spectrum of American types of music in forthright, fresh ways. They were one of the first groups to consider backing equal to, if not more important than, vocalizing. Themes this time are somber; "Farewell" concerns the survivor of an atomic war, a heavy subject for such a delicate song. A stark etude piano piece accompanies the tale, told tellingly, if third-handedly. "Turn Into Earth," perhaps the best song, recreates the "liturgical sound" heard on "Still I'm Sad" from the preceding LP. If lyrics are self-consciously moralistic ("Ever Since the World Began" quaintly suggests that money is the root of all evil), the instrumentation is as assured, intense and sincere as its composers.

☆ ☆ ☆

**60 Years of Song (Maurice Chevalier, London Four-Record Set).**

Talk about historical significance! France's Super Showman, entertaining for nearly 60 years, offers as many songs on this first release of the label's Global Heritage Series. The familiar Chevalier smile may be missing, but it's easy to visualize the energetic gentleman as he sings some of his best, starting in 1908 ("Le Beau Gosse?") and stopping in 1965 (appropriately, "Au Revoir").

☆ ☆ ☆

**Live! (Doc Severinsen Sextet, Command).**

Doc is one of America's most familiar trumpet players through his regular job on "The Tonight Show." He's also one of the best and the creation of his own group is welcome. Doc has the talent to make a listener comfortable with his versions of the oldest ("When the Saints Go Marching In") or newest ("Strangers in the Night") music.

**Go Ahead and Cry (Righteous Brothers, Verve).**

To degrade this album would be an injustice, but to unequivocally praise it would be inaccurate. The Brothers are heavy on the Black sound, but it's a sticky type of soul this time. Material is good, familiar and solid ("Island in the Sun," "Let It Be Me," "Stagger Lee"), but to feed their voices through an echo chamber is, well ... Who needs it? Not these boys.

☆ ☆ ☆

**Distant Shores (Chad and Jeremy, Columbia).**

This is a new label for the non-Dynamic Duo. The first album has rich, intricate presentations of several recent, beautiful songs. "Homeward Bound," "Everyone's Gone to the Moon" and "Early Morning Rain" (especially) are sung with more understanding than most have achieved. But "You Are She," one of four tunes written by the pair, is the treasure of the set. Fashionably baroque, it deserves a single.

☆ ☆ ☆

**Happening! (Dick Hyman, Command).**

Given his own choice, Hyman makes the jazziest sounds yet heard on the harpsichord. An indication of Hyman's jazz roots is found in his grits treatment of "Zorba the Greek." A year ago, with the Enoch Light orchestra, Hyman was featured on an outstanding big band treatment of the theme, but here it's jazz, man. It's that way most of the LP, but when the music isn't funky, it's baroque.

☆ ☆ ☆

**Skaterdater (Motion Picture Soundtrack, Mira). On Her Bed of Roses (Motion Picture Soundtrack, Mira).**

Mira Records' debut in film soundtracks exemplifies the contrasts in types of movie music. "Skaterdater," the only American winner at this year's Cannes Film Festival, is reminiscent of the early Ventures and the theme recalls "Telstar." Altogether a pleasing, listenable LP. The "Roses" track, however, is not easy on the ears and is valuable only to the collector of motion picture music.

☆ ☆ ☆

**Album Potpourri:**

**Everybody Loves Somebody (Jerry Vale, Columbia).** Vale is countryish on Eddy Arnold ("Make the World Go Away") and Al Martino ("I Love You Because") songs.

**Put on a Happy Face (Oscar Peterson, Verve).** Recorded live at the London House, Chicago, pianist Oscar and bassist Ray Brown and drummer Ed Thigpen cut loose on some easy movers.

**Live at the Copa (Bobby Vinton, Epic).** Joined by the Village Stompers ("Washington Square"), Bobby reprises some of his hits and even tries to get tuff on the "I've Got a Woman" — "Henry VIII" medley. Not bad.

**Amor Mexico — S. A. (Tony Mottola, Command).** Possibly the best romantic guitarist in the world, Tony is aided by great Spanish material and superior quality in recording.

**Bambuco Moves In (Pancho Purcell, Columbia).** Bambuco is billed as a new Pop-Latin sound. Whatever, it sounds all right on "Rainy Day Women."

**Steve Lawrence Sings of Love and Sad Young Men (Columbia).** And he sings about them well.

**Jim Nabors Sings Love Me With All Your Heart (Columbia).** I'm never going to get used to hearing Gomer Pyle sing a beautiful baritone.

**Right Now! (Mel Torme, Columbia).** It's right now, you can be sure. Even includes "Red Rubber Ball" and "Pretty Flamingo."

**You Don't Have to Say You Love Me (Raymond Lefevre, Kapp).** Strings lead the way on a pleasant, good-for-background album.

## RUDOLPH ON RECORD

# Peer Gynt Suite Popular LP Item

BY JACK RUDOLPH

BIZET — GRIEG

**L'Arlesienne Suite No. 1 (Bizet), Peer Gynt Suite No.1 (Grieg). Cleveland Orchestra, George Szell conducting. Columbia MS 6877 (Mono ML 6277).**

There's no shortage of recordings of either of these familiar and popular suites but always room for another good one. Szell and his Clevelanders have a way with such melodic, clean-limbed music, and the performances are fully up to expectations. Especially the Greig. The Bizet is at times a touch too assertive.

* * *

DVORAK — SMETANA

**"The Moldau," Overture and Three Dances from "Bartered Bride" (Smetana). Two Slavonic Dances, Carnival Overture (Dvorak). New York Philharmonic, Leonard Bernstein conducting. Columbia MS 6879 (Mono ML 6279).**

An interesting if not entirely successful example of Berstein's sometimes erratic approach to Romantic music. The Dvorak pieces are beautifully and deftly played, with much warmth, color and quiet enthusiasm. The Smetana works, on the other hand (Moldau excepted) are equally colorful, but too much reliance on the big bass drum makes them heavy and awkward, like an elephant dancing ballet.

* * *

LISZT

**The Operatic Liszt: "Hexameron," Reminscences de "Norma." Raymond Lewenthal, pianist. RCA-Victor LSC 2895 (Mono LM 2895).**

Lewenthal, enjoying a remarkable and well deserved career, is a "Romantic throwback" to the 19th Century, of which this album offers a fascinating example. Neither of these infrequently heard works is very profound but they contain a full magazine of pianistic skyrockets which he touches off with enthusiasm and flashing technique. The "Hexameron," especially, has a history as colorful as its score, but space doesn't permit a recital here. Lewenthal's on jacket notes tell it cheefully if in too much chatty detail.

* * *

CHOPIN

**Fantaisie in F Minor, Barcarolle, Berceuse, Three Nouvelles Etudes, Bolero, Tarantelle. Arthur Rubinstein, pianist. RCA-Victor LSC 2889 (Mono LM 2889).**

Major interest in this album centers on Rubinstein's first recordings of "Bolero" and "Tarantelle" — in fact, this is the only recording of the short, lyrical but generally innocous pieces now available. Everything else on the disc is well known and played with Rubinstein's lovely, sure touch, velvety tone and special elan. Very, very pleasant.

## TELEVISION

# Even Animals Have 'Star System'

BY CYNTHIA LOWRY

HOLLYWOOD (AP) — The mimeographed sheet headed "detailed shooting schedule" was a breakdown, scene by scene, of the actors, props and livestock needed in an episode of "Gunsmoke."

The actors in Scene One were the cast regulars, five cowboys and two women, all extras. The prop was a hatbox for Kitty, proprietor of the Long Branch saloon. The livestock needed was "wagon & 1-up, 4 N.D. horses, 1 dog."

Robert J. Miles, whose title is "director of livestock" on the CBS hit, concentrated on the last. On the day the scene was shot, a wagon drawn by a single horse stood on the set simulating Dodge City's main street. Four well-mannered horses drooped quietly before the hitching rail, and a dog, accompanied by his trainer, awaited the director's instructions.

The star system operates even in the television animal business. At the bottom of the status pile is the "N.D. horse" — the initials stand for "nondescript" — and these are the animals just used to dress a set. Mostly they just stand around like extras to provide some color when the hero gallops up in front of the saloon.

"The basic price for an N.D. horse is $10 a day," said Miles "But that goes up to $15 a head when he has something to do. He becomes a 'semi-cast horse,' like a bit player."

The next step up is to become a full-fledged "cast horse," and the price goes to $25 a day. These are the mounts of members of the cast, usually guest stars.

### 'Contract Horse'

At the top of the heap is the "contract horse," whose owner is paid $100 a week under contract, and which is never used on other shows even when the production company is on vacation. Such a horse is Chappo, the big animal ridden by "Gunsmoke" star Jim Arness. The animal is the fourth used by Arness under contract over the 11 years the series has been made.

*James Arness*
*Matt on Fourth Horse*

There are types of horses, which are needed from time to time — rearing horses, falling horses, lay down horses, jumping horses and dragging horses.

"A dragging horse — and I think there are only about two really good ones available — is trained to drag a stunt man, responding to hand signals," Miles said. "It takes a calm animal with the right disposition, one that doesn't panic or kick."

Specially horses make good money for their owners. There is a woman who owns a swaybacked horse which she rents for $50 a day. She has a corner on the market: the only other sway-back died recently of old age.

Miles, who has been a livestock specialist since the days of the old Cecil B. DeMille spectaculars, says that the older a horse becomes, the better he is. Some of the most steadily employed are 20 to 23.

"We like to break in young horses," he said. "We bring them over here and let them stay around the set and get used to the noise and action and the lights and reflectors.

"Horses work through habit and not because they want to, but some of them get so camera-wise that they react like humans to the word 'action.'"

### Fix Stampedes

Cattle stampedes take a lot of arranging, are expensive and time consuming. Arrangements must be made for cattle, at $15 a head daily, for the active ones and $5 a head for "background" beef. Camera stands must be protected and the ground thoroughly cleared of gopher holes or anything that might injure the livestock.

At a minimum, a stampede costs $750, and most of the time producers simply buy stock of old stampedes — some recent television stampedes come from movies made as far back as the 1930s — for $10 a foot of film and match up the current sets with the vintage scene.

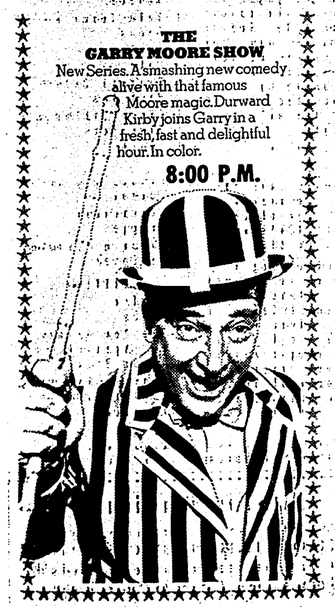

"Most actors are not horsemen," Miles said. "Not more than eight out of 100 can really ride, but a lot of them want jobs so they say they can. Then they sneak over to me and ask me to please give them a gentle horse. That's easy —I've got five horses that anyone can ride.

"Even so, it is hard to keep the horses still because actors, when they are acting, start emoting with their hands and feet, and the horse responds because he is trained to hand signals."

Miles frets a bit because there are very few young poeople coming along who know how to handle teams — six or eight team hitches.

"There's no place for a youngster to learn to drive big teams," he said, "but as long as horse barns exist, there will be horse-happy kids hanging around them."

NEWSPAPERARCHIVE.COM Image serial: 61539

# Jonathan Winters Wary of Guys Who Claim to Be Authorities on Humor

*"Life Is Sweet at 40." So admitted Winters outside his home in fashionable, suburban Toluca Lake, Calif. Winters, turned 40 and enjoying it, is husband, father, hobbyist, comic genius and just plain funny. Here he plays "fetch" with his huge, nondescript family dog (bought at the local pound for one dollar).*

*Between movie shootings on a Hollywood set recently, Jonathan Winters pursues one of his several hobbies. In this case it is whittling and carving. Winters is also an avid fisherman. For the first time in years, he's enjoying the pleasure of being home on a more regular basis. (APN Photo)*

HOLLYWOOD (AP) — On humor: "I'm always wary of guys who claim to be authorities on humor. And guys who say, 'I've never bombed.' Everybody has bombed. It's like baseball; you can't hit a home run every time. Everybody strikes out."

So says Jonathan Winters, husband, father, hobbyist, fisherman, comic genius and at 40 a happy man.

"The Man Up There has been very good to me," said the moon-faced satirist with the sad eyes and teeth-gritting grin.

The years of performing in noisy night clubs, with their misery of lonely hotel rooms and separation from family, are far behind.

Turning 40 last Nov. 11 was not the frightening experience he had feared. "You begin to realize that life is pretty sweet."

His home, formerly Dana Andres', is a big English Tudor type on more than an acre around the corner from Bob Hope in fashionable, suburban Toluca Lake.

His wife is the former Eileen Schauder, whom he met while attending art institute in his native Dayton, Ohio. Their children are Jonathan Jr. (Jay), 16, and Lucinda, 10.

## Enjoys Time Off

Winters often has weeks for fishing, wood-carving, snapping pictures or taking his son to ball games.

Work this year has included a television special taped at London's Palladium Theater; Winters' fifth movie, "Penelope," and a two-hour television drama, "The Midnight Oil."

Things weren't always this good.

"Everyone goes through a lot of stages. All of us have been touched by tragedy," said Jonathan.

He won't talk about his own misfortunes—"I quit complaining because I found there are too many people who can top you." But they're reflected in news records.

—Police taking him to a psychiatric ward in San Francisco seven years ago after he insisted, they said, on climbing the rigging of an oldtime sailing ship and declaring he was "a man from outer space."

His wife, flying from New York the next day, had him removed to a rest home, saying, "He'll be all right. He's just tired out." Winters had been appearing at a San Francisco night club.

—Winters, on the wagon now for eight years, saying he was "bombed most of the time" in his night-club years.

## 'Bombs' Too

He has "bombed," too, in another sense. "It was a cold Winters night," a critic wrote early last year. "Jonathan Winters' fifth special of the season was painfully disappointing."

But the vast preponderance of Winters reviews are favorable: "Very funny man". "Hilarious". "One of the funniest men on television". "One of the freshest, most ingratiating talents of the postward period". "Brilliant."

At lunch in a smart restaurant, wearing cowboy pants, boots and shirt because "I like old clothees," Winters said:

"The idea of reaching 40 was frightening to me. But no matter how you cut it, you're halfway through the storm — maybe better than halfway.

"No matter how tired a cliche it is that 'life begins at 40,' it's true. What a man has absorbed through the years he'll now be able to put to work to the fullest.

"If I went (died) tomorrow, I'd be well ahead of the game. I never dreamed I'd go this far.

"I used to think, 'If I could just get one picture.' Now I've done five. I got a late start in pictures, but I think I have a lot to look forward to. I love pictures, but I always want to keep a foot in television."

Television brought him fame, first on Jack Paar's old morning show, then on "Omnibus," the George Gobel show and his own "Jonathan Winters Show." He is a frequent guest on other big time shows.

His first television job, after wartime military service, was as announcer for WBNS-TV, Columbus. Performing later at the Blue Angel night club, New York, he was seen by Paar, who invited him to the home screen.

What's his appeal? Said Winters, whose favorite form of entertaining is "winging it," or ad-libbing his comic invention from a given situation:

"I like to believe that basically people have my sense of humor. I try to paint a verbal picture they can identify with.

"Reality can be both frightening and funny. I take situations from life and exaggerate them, but not too much. You don't have to go too far out to make it funny."

## Photo Fan

"I love to take pictures," he said later at his home. "From pictures you get a lot of ideas for skits. A fellow in a shop selling his wares becomes a bit. A family picnic with the baby screaming" — suddenly he was a succession of comic voices: baby screaming, husband calling for a hard-boiled egg, wife ordering him to get into the photo about to be snapped.

What does he want for the next 40 years?

"To live long enough to see my grandchildren."

Winters glanced up at an ancient clay vessel on a shelf and thought of one other thing.

"I've always been fascinated by archeology. Someday I'd like to go someplace and dig."

# cover

Operation of a steam-powered drag saw, built from scratch by himself and Ernest Vandervert, of Fond du Lac, is demonstrated in today's cover photo by Richard Carter, of Campbellsport.

The photo is the work of Doug Koplein, Post-Crescent Fond du Lac bureau chief, whose story on the recent display of antique farm equipment at Fond du Lac may be found on pages 12, 13 and 14 of this issue.

The Herbert Kleinschmidt farm was the scene of the display, at which farming methods are turned back more than half a century for two days annually.

## The VIEW Ahead

From a display of antique farm machinery at Fond du Lac to a shopping tour of exotic Bangkok, Thailand, this week's VIEW offers reading material for many tastes. The giant Sequoia trees of California's state parks are featured on pages 6 and 7; a prospective physicist is interviewed on page 8, and the ordeal of Appleton's first nursing nuns, at St. Elizabeth hospital, is recalled by Post-Crescent columnist Lillian Mackesy on page 19. Next week, VIEW readers will visit the farm of the brilliant young Wisconsin artist Charles Dix, at Delafield, and see how he makes the jewelry that is scheduled to go on display at Neenah's Bergstrom Art Center, Wednesday.

WONDERFUL WISCONSIN WEEK

What makes Wisconsin wonderful? The people of course, and we should know because we have been dealing with the people of the Fox River Valley since 1893 and we think they are the finest in the state.

Your savings have helped thousands of your neighbors purchase and modernize their houses. This neighbor helping neighbor is what makes a great community.

We at Twin City salute you, the people that make this a wonderful place to live, work, and play.

SEALY MATTRESS RIOT!

FIRM! MEDIUM FIRM! EXTRA FIRM! LUXURY FIRM! QUILTED!

OPEN EVENINGS

4 DAYS ONLY — MON. - TUES. - WED. - THURS.

Sealy.

**2 for $59.88**
TWIN OR FULL SIZE SET
$29.95 ea.

**TUFTED MEDIUM FIRM**
Firm innerspring mattress is heavily padded, deep tufted, with heavy striped cover. Matching box spring for resilient support. A lot of comfort for the money! Don't miss it during this limited time sale.

**2 for $79.88**
TWIN OR FULL SIZE SET
$44.95 ea.

**QUILTED FIRM**
Unheard of low price for this quality set. Hundreds of sturdy innerspring coils, heavy woven stripe cover and matching firm box spring. Pre-built crush-proof borders, too! See it tomorrow!

**2 for $69.88**
TWIN OR FULL SIZE SET
$36.95 ea.

**TUFTLESS EXTRA FIRM**
Hundreds of tempered steel coils in the mattress and matching box spring for extra firm support, pure sleeping luxury. Handsome ticking covers a smooth, button-free top. Once a year buy!

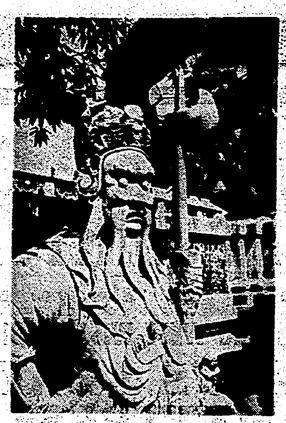

**2 for $89.88**
TWIN OR FULL SIZE SET
$49.95 ea.

**QUILTED LUXURY FIRM**
Deluxe inside and out! Deeply quilted luxury firm mattress is reinforced for added comfort and long wear. Works together with matching box spring to give you bracing support, superb comfort.

# Richly Decorated Temples Give Bangkok Its Unique Flavor

*The entrance at Wat Benchamabopitr, the Marble Temple, shows some of the common architectural features of Thai temples, with lions guarding the doors, tile roofs, and gilt roof gables carved to resemble Naga, the celestial serpent and demi-god of rain.*

BY MICHELE LEBER
For The Post-Crescent

BANGKOK, Thailand — There's much more to this city than its shops.

And it's not that the shopping isn't good — beautiful Thai silks, semi-precious stones, teak carvings, bronze flatware, are the best possible buys. But Bangkok offers so much more.

Just what it is that gives Bangkok its unique flavor depends in part on the tourist — for travel is relative, to where you've been and what you're looking for. (And after having grown accustomed to one part of the Far East, our senses were a bit dulled to the spectacle of large Oriental markets, but Bangkok's modern four-lane highways looked awfully good.)

*This is the first of a series of feature articles about Bangkok, Thailand, by Michele Mathews Leber, a former Post-Crescent reporter now living at Seattle, where her husband, Lt. T. T. Leber, is assistant professor of naval science at the University of Washington. Mrs. Leber, a graduate of Northwestern University, gathered material for the series during a 10-day vacation in Thailand. The Lebers recently returned to the United States from the Philippines, where Lt. Leber was stationed with the U. S. Navy.*

These highways lead through cool green countryside to a modern, bustling city, bristling with Coca-Cola, Kodak, and Kelvinator signs, and full of some 2.5 million friendly and attractive people.

It's a city colored by hundreds of richly-decorated Buddhist temples and by their saffron-robed monks, a city still laced with canals, or klongs, which offer a floating market at dawn each day for the river's inhabitants, a city whose palace grounds become each weekend a vast marketplace, which leaves no trace of its existence on Monday morning.

There's a fine, efficient rapid-transit system, with buses arriving every minute or two, traveling at 35 miles an hour or better, and stopping at a blast of the young conductor's whistle, all for 2.5 cents. (Otherwise, you bargain with the driver of the small European taxi before you get in it — for although he has a meter, he never uses it because it would spoil all the fun.)

And there are children playing hopscotch outside the small shops, and poorer people living in weathered wood shanties along the side of the Chao Phaya River.

But best of all, Bangkok is Thai, with no strong, direct influence from any other country. For although English is commonly used, and the tourist can get a hamburger lunch at Wimpy's, he can dine the same night in pure elegance at a typically Thai restaurant.

Here diners check their shoes at the door, then are seated on floor pillows at foot-high tables, left to lounge like Romans at a feast while costumed, bare-footed young ladies serve the delicacies of their land. Six small bowls, placed in a semicircle in front of each diner, offer him a clear soup, chicken curry distinctly different from that of India, rice, fried threadlike vermicelli, salad with coconut milk dressing, fried shrimp sausage with sauce. And to end the meal, slices of orange, watermelon, and mangosteen, a subtly flavored pearly gray fruit, accompany a Thai sweet, a rich rice custard.

Even more distinctive is the classical Thai dancing which follows the meal. To the singsong music of a hand drum, reed pipe, and xylophone-like instrument, lovely young ladies dressed in costumes as opulent as a Thai temple, fashioned of bright fabrics heavily jeweled and embroidered, strike the traditional poses, stepping daintily in a manner that at first seems awkward to westerners, but gradually seems natural and graceful.

Or for a more lively evening that's just as typically Thai, boxing is a must for even non-sports fans. For here it's more a spectacle than a sport, and anything goes — fists, knees, elbows, and feet.

A program announcing a coming event described one athlete as "possessed of a handsome profile and a deceptive high kick to the head," matched against a man whose "most dangerous weapon is the elbow, which he uses viciously in the close circle."

Boxers enter the ring wearing four-ounce gloves and amulets, which superstition says will ward off harm, and they kneel to pay homage to their teachers. And then, to a rhythmic musical accompaniment, almost anything goes, short of biting and hair-pulling, until the better man wins. An unusual attraction even for a city of this scope is Bangkok's Pasteur Institute, popularly known as the snake farm, where poisonous snakes native to Thailand are kept to collect their venom and develop serum to counteract snakebite. And for a small fee, the public can view the twice-weekly feeding and milking periods for the snakes.

In a sunken arena, the snake handlers overturn the round covers to reveal a tangled swarm of cobras, kick aside those snakes poised to strike, then quickly grasp the cobras behind the head and squeeze its poison glands to squirt the venom onto glass plates. After rinsing their hands in the water in which deadly banded kraits swim, the men force-feed the kraits and a pair of king cobras, the largest of which is more than 10 feet long. The show is a brief one, but the nervelessness of the handlers guarantees its success.

A Thai attraction with an American touch is Jim Thompson's house, a typical Thai teak house built by an American who came to this country after World War II to go into the silk business. Made of six separate houses brought to Bangkok from upcountry, the home now rivals a museum with its collection of arts and antiques.

Tour guides, most of them well-informed wives of Americans who work in Bangkok, point out the walls which taper slightly in (for everything must point to heaven), the high threshholds between rooms (to keep out evil spirits, which can travel only in a straight line and not around or ever objects), and exquisite furnishings ranging from ancient Burmese to Chinese Chippendale.

And this is just some of the best of Bangkok — so much more than just a place to shop.

*Spectators line the large sunken snake pits of the Pasteur Institute as handlers prepare to extract venom from cobras.*

*A king cobra is held to receive his twice-weekly force-feeding of raw meat at the Pasteur Institute.*

*A weaver operates her loom, making the beautiful, brightly colored Thai silks, as potential buyers look on.*

# Long Trip Makes Birds Hungry And Thirsty

BY CLARA HUSSONG

It's time to watch for migrating birds in your yard again. Just as in spring when they were heading north, they stop off to rest and feed. On their migratory flights, most song birds travel at night, starting soon after sunset and flying for three, four or more hours. Before daylight they come to rest.

Even birds which through the summer lived in lonely wilderness places may use your yard as a feeding and resting spot. They may sleep in your trees and bushes, and, after the sun comes up, look for insects, seeds and berries, each species finding its favorite food.

It's a good idea keep the bird bath filled with water. A long trip makes them thirsty, and hungry too, so you may want to put out seeds and suet for them.

These visiting birds are not so conspicuous as they were in spring. Many of the more colorful visitors, and especially the warblers, are now toned down in their plumage colors. They all appear to be green-gray above and yellow below, some with breast streaks and some without. The heavy foliage on trees and bushes keeps them hidden too.

The best way to find out whether there is a flock of migrating birds in your yard is to listen for their chirping notes. They may not sing their full spring songs, but they are sure to sound out with chips and chirps as they feed in the trees and bushes. Those that look for seeds and insect life on the ground are more easily spotted.

Among the ground feeders are the thrushes, although they feed on fruits of trees and shrubs too. If you happened to miss seeing one of these olive-brown birds on his way north last spring, you may have another chance during the fall migration. Their migrating time through the state is during September and most of October.

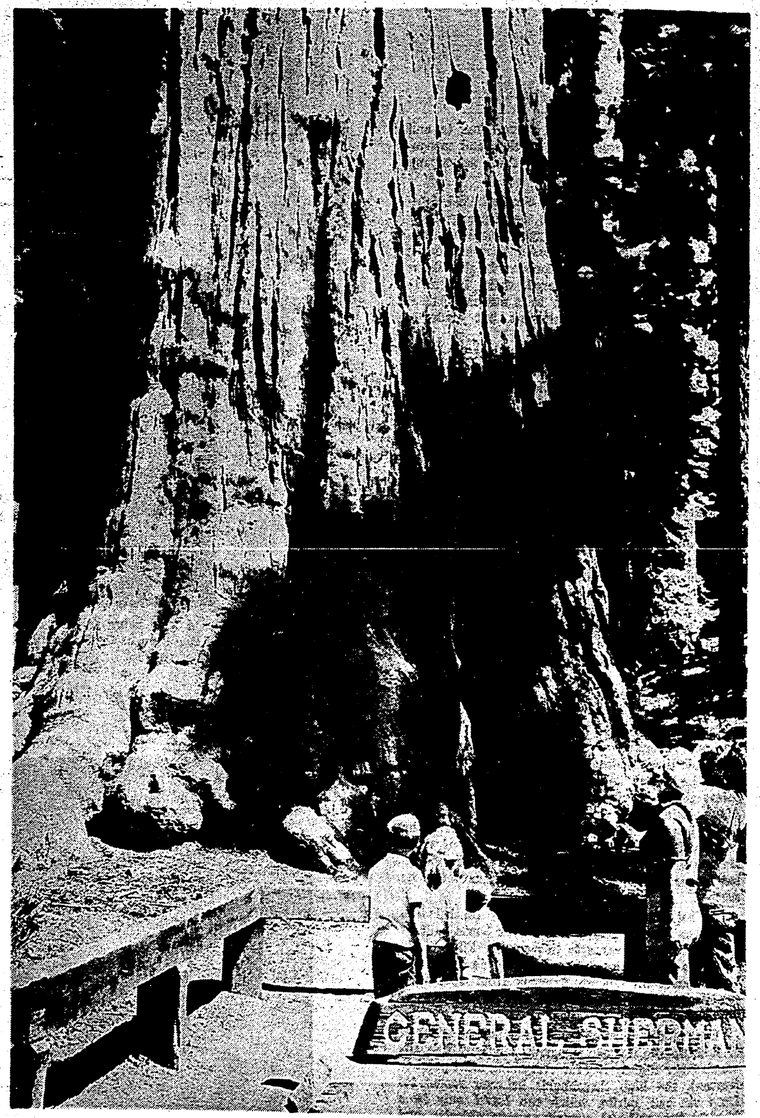

The veery, hermit and wood thrush are summer residents of the state, but they are found mostly in wooded places. The veery is the smallest of the thrushes. It is a little larger than a sparrow, with a bright cinnamon-brown back, white below with a cluster of indistinct spots at the throat.

The hermit thrush is a little larger, with a bright reddish-brown tail. The wood thrush is still larger, with a reddish head, white underparts thickly spotted with round spots. The wood thrush also has a white eye ring.

Two which summer mostly beyond the state's northern limits are the Swainson's thrush and the gray-cheeked. The Swainson's was formerly known as the olive-backed thrush. That is the color of the two, a dull olive gray above. Both wear speckles at the throat. They may look similar, but they can be told apart. The gray-cheeked has a patch of gray under each eye, and the Swainson's has a white eye-ring. Look for all of these thrushes feeding on the lawn or under shrubbery.

# Parks Preserve Sequoias, Continent's Oldest Trees

*These sightseers are awed by the General Sherman tree in the Giant Forest at Sequoia National Park, Calif. This ancient tree is said to be the world's largest and oldest living thing. Over 4,000 years old, the tree is 37 feet at its greatest diameter and 272 feet high. Sequoia and Kings Canyon National Parks, about 220 miles from Los Angeles, embrace grove after grove of the giant sequoia trees and beautiful mountain scenery.*

SEQUOIA, Calif. — If you are California vacation bound this fall and plan a visit to Los Angeles or San Francisco, a side trip from either one of these cities to Sequoia and Kings Canyon National Parks is a must.

These twin parks, located in the high Sierras just east of California's rich San Joaquin valley, have a great deal to offer the sightseer as well as the rugged camper.

Sequoia National Park is the home of the giant sequoia trees whose lineage goes back to the age of the dinosaurs. It is the second oldest of the National Parks, having been established in 1890 to protect these towering giants from logging destruction. The trees, however, are not the only attraction at Sequoia. The park also embraces 600 miles of beautiful mountain scenery and wild life. Here, too, on the eastern border of Sequoia is the highest mountain in continental United States, Mount Whitney, which rises to a height of 14,496 feet.

Kings Canyon National Park was created to preserve a wilderness area along the Kings River. It is larger than Sequoia and, in addition to many groves of "big trees", it has magnificent canyons with high mountain meadows reaching to the great granite domes of the Sierra Mountains.

Driving from Los Angeles to Sequoia and Kings Canyon takes about five hours. From San Francisco a motorist should allow six hours. However, if you do not drive, Fred Harvey operates a bus service which meets the Southern Pacific in Tulare. Connections also are made with Western Greyhound at Tulare and Visalia and Continental Trailways at Tulare.

Whether it's hiking the trails, camping in the groves or relaxing in rustic cabins, you will be awed by the majesty of the giant sequoias, the greatest attraction in both parks. The sequoia trees are believed to be the earth's largest and oldest living thing. Their fossils indicate that they were born in the Mesozoic era, a hundred million years ago and were abundant throughout the earth's Northern hemisphere prior to the Ice Age. Those that exist today in the Sierra Nevada region escaped destruction because the high basins sheltered them from the glaciers.

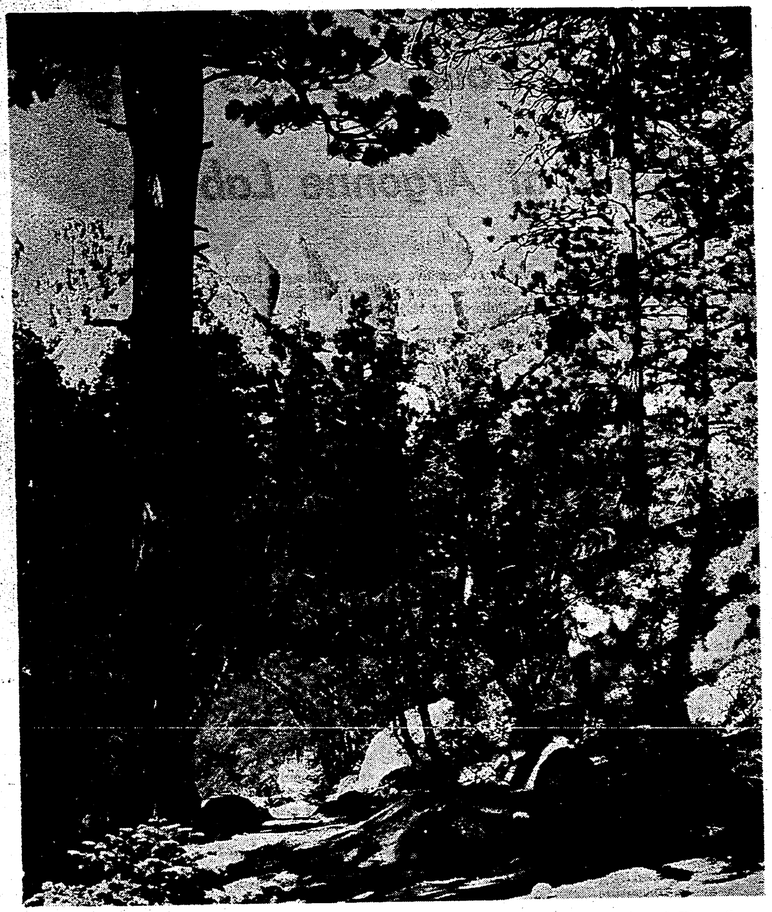

The trip to Sequoia and Kings Canyon National Parks will take you from the foothills of the San Joaquin valley into the granite mountains of the Sierra Nevadas and within this 1,300 square miles of wilderness are grove after grove of the ancient sequoia trees.

Coming from Los Angeles you enter at the South entrance to Sequoia National Park on General's Highway (198) which takes you directly to the Giant Forest. If you are driving from San Francisco via Fresno (U. S. 180) you enter through Kings Canyon National Park at the North entrance and take the General's Highway to the Giant Forest. However, if you decide to make your home base at either Grant Grove Lodge or Meadow Camp near the entrance to Kings Canyon, there are tourists' facilities available here as well as in the Giant Forest.

The majority of visitors make their headquarters in the Giant Forest which embraces the largest of sequoia trees. Here, campfire programs are given with illustrated talks by park naturalists. There are guided nature walks beginning with the General Sherman Tree, the oldest and largest of the sequoias, 37 feet at its greatest diameter and 272 feet high, and sightseeing bus tours.

Of special interest and about nine miles from the Giant Forest is Crystal Cave. Its formations are unusual and beautiful and guided tours are available.

Tourist accommodations in the Giant Forest include: Giant Forest Lodge, nestled among the trees and surrounded by cabins, and nearby Camp Kaweah and Pinewood Camp.

*Mount Whitney, which rises to a height of 14,496 feet and is the highest mountain in the continental United States, is located in the wilderness area on the eastern border of Sequoia National Park, Calif., the home of the giant sequoia trees. Sequoia and Kings Canyon National Parks preserve these ancient trees in a 1,300 square mile area.*

# A Physicist Is Born: Appleton Youth Spends Summer at Argonne Lab

FROM Post-Crescent carrier to co-operative student at Chicago's Argonne National Laboratories — that's the story of 20-year-old David Pollard, son of Mr. and Mrs. Perry Pollard, 525 N. Drew St.

Pollard, who earned part of his college expenses during his four years with a Post-Crescent route, spent a major part of this summer working as a data processor at the laboratories, on the University of Chicago campus where, in the 1940s, vital research was done, leading to the development of the first atomic bomb.

## A.H.S. Graduate

A 1964 graduate of Appleton High School, Pollard is in his third year at the Northwestern Technological Institute, Evanston, Ill. He was assigned to Argonne National Laboratories as part of a work-study program developed by Northwestern in cooperation with the laboratories.

"This is becoming popular among engineering students," Pollard explained. "You spend the first two years in the normal curriculum, and the last two years, in a combined work-study program, working six months, and in school six months."

In this way, he noted, "you gain valuable work experience in addition to academic experience . . . not just academic knowledge, but technique."

As a data processor, Pollard was responsible for taking "raw", or generalized data, and putting it into a more refined form, for the use of physicists at the laboratory.

## 'Necessary Work'

"It is busy but necessary work," he said. "Much better to have a co-op student do it than a $20,000-a-year physicist."

Although Pollard is not yet certain of his career plans, he hopes to join the Peace Corps after earning his first undergraduate degree. Then, after two years of Peace Corps work, he would like to "get into nuclear physics or something like that. I like the atmosphere at Argonne. Some of the people down there are very fascinating . . . interesting people to get to know."

One of his principal extracurricular activities at Northwestern is playing trumpet in the marching band. He is also on the panel for the symposium, a gathering at which students meet with outside experts who have been brought in by the University.

His courses include physics, mathematics and "basically related science courses." Known as "science engineering", the program provides basic science courses plus a technical background.

David Pollard

"You don't specialize in this type of engineering," Pollard noted.

Although his own schedule is heavy on science and math courses, Pollard is convinced that a good liberal arts background should be the foundation of every scientist's education.

"Not how soon we get to the moon, but how long we can stay here without being blown up, is the basic question."

A "frustrated actor", Pollard spent much of his spare time this summer doing technical work backstage at the Elmhurst Community Theatre. His other hobbies include reading and "a little bit" of tennis.

J.M.A.

# Hurricane Betsy Spawns LISA—Plan to Protect Coast Areas

NEW ORLEANS (AP)—Everyone has heard of Betsy, the ferocious hurricane. Soon the name LISA may be equally familiar along South Louisiana's Gulf Coast.

LISA stands for the Louisiana Intracoastal Seaway Association, which backs a plan that would include raising a 12-foot levee to protect low coastal areas from hurricane tidal surges.

"It looks like our best plan," said Gov. John J. McKeithen after pondering LISA's potential — not only for flood protection but also for industrial possibilities.

Betsy did about $1 billion damage to the Louisiana coastal area, by best estimates. It was the third hurricane of extraordinary violence since 1958. And it stirred a lot of brainstorming as to the future.

One eminent scientist, Dr. Edward Teller, predicted that man will be able to control hurricanes in a decade or so. This is a comforting thought—but many weather forecasters are not so optimistic.

"Work is being done on it," said E. H. Hill of the New Orleans weather bureau. "How soon you will get a breakthrough, I don't know, it might be several decades."

Backers of LISA would rather not wait.

In Betsy, as in other storms, the major problem was not the wind. It was the flooding caused by tidal surges—sea water pushed inland by the storm.

Towns in lowlying areas were hard hit. And thousands upon thousands of acres remained under water for weeks as floods slowly drained away.

LISA stalwarts say much of the flooding could be prevented by a 12-foot levee extending the length of the coast, from the Mississippi River to the Texas border.

Under the project envisioned by LISA, such a levee would be merely a valuable byproduct of the Intracoastal Canal.

The existing canal—12 feet deep and 150 feet wide—would be widened and deepened, with salt water locks at strategic points to let seagoing traffic in or out.

An engineering firm, Waldemar S. Nelson & Co., said dredging the canal to a depth of 40 feet and widening it to 500 feet would involve moving enough earth to create a natural levee on the seaward side.

Any dirt left over could be spread on the landward side to form a foundation for hundreds of industrial sites.

The prospect is so enticing the 1964 legislature created LISA, with its membership drawn from adjoining parishes abutting the Gulf.

The coast of LISA is figured at about half a billion dollars.

Backers suggest most of the money could come from offshore oil royalties, now held in escrow by the federal government in the tidelands dispute.

## for photo fans

# 'Don't Skimp on Film' Called Key to Successful Photography

BY IRVING DESFOR

Bob Zwerz, global explorer, picture-taking professional sportsman, editor and lecturer, sums up his photo-journalistic experiences with this advice for amateur photographers: "Simplify and know your equipment, follow the action through the camera viewfinder and don't skimp on film!"

These basic rules for action photography can result in a story-telling pictorial record of outdoor vacation activities like a hunting or fishing trip, a sports tournament, a field day, picnic or hike and boating activities.

"It doesn't require special photographic talent or unusual camera tricks to capture action as it happens," Bob pointed out. "Just remember to use the camera as the action takes place and let the pictures tell the story.

"A photo-journalist covering a sporting event hasn't time to be an artist with a camera—he's too busy shooting pictures. The amateur, on the other hand, is likely to be watching the action with his camera hanging from his shoulder or in his lap. By the time he senses a picture-worthy instant and gets the camera to his eye, the peak of the action is past.

"So for pro results, do as the pros do—follow the action *through* the lens, not over it. A camera becomes part of his face. When I'm on assignment, the only time the camera leaves my eye is when I'm reloading film or switching from one camera to another."

For the record, Bob covers most assignments with two Miranda 35mm cameras around his neck—one loaded with black-and-white film, the other with color. He favors the 35mm single lens reflex as the most versatile camera for outdoor shooting because he finds the focusing fast and easy and "you can actually watch the action in your viewfinder."

"It's important to simplify and know one's equipment because it eliminates uncertainty when shooting. An amateur should practice handling his camera so that all operations from loading film to making last-second exposure adjustment become automatic and fumble free."

Bob's assignments, many of them in remote primitive areas, enable him to judge which accessory equipment could be most useful when space and weight are vital factors. Besides his camera's normal 50mm lens, he chooses two Soligor lenses. One is a wide-angle 35mm lens for close quarters; the other a 135mm telephoto. The latter he considers the best "compromise" lens because it can be used to make distortion-free portraits and it's a basic nature lens for photographing animals, birds or people from a distance without scaring them.

Two other items he recommends for amateurs are a light-weight electronic flash and a small tripod. "You often need flash as a 'fill-in' light in shaded areas or when there is backlight hitting the subject," he said. "And a tripod is very handy but you can always improvise. A tree stump, an automobile hood or a wall will steady the camera and eliminate hand-held movement in low-light situations."

What makes a good action picture? "Somebody doing something," says Bob, "not just standing there staring at the camera. Sometimes you may have to recreate action. If you miss the instant a fish is caught and hauled out of the water, have your subject drop the fish back in the water, swish around, work up a spray and come up again.

*Youthful Participation in photography is a healthful prescription for these orthopedic patients in Blythedale Children's Hospital, Valhalla, N. Y. Marion Levy, a member of the Volunteer Service Photographers, has shown the boys how to process 35 mm. film in daylight right on their ward. This year marks VSP's 25th anniversary of service through photography in hospitals, rehabilitation and community centers.*

"You should also tell the whole story, not part of it. For instance, a picture of the fish itself or of the fisherman merely holding the rod whould leave the viewer with a question. Use a wide-angle lens if necessary but tell a complete story in a picture."

On the matter of shooting generously, Bob's advice is hardly new. A vacation trip or a special event represents a large investment in time, money and equipment and film is comparatively a minor item. Without film, the event can never be relived but the more pictures that are taken, the more chances there are of recreating the occasion.

"So don't be afraid to burn up film," says Bob Zwerz. "Keep the camera to your eye and shoot, shoot, shoot!"

For the tape fan, we feature the famous SONY. Tape decks at 135.00 and 179.95. Complete tape recorders begin at 39.95. Ideal for the student!

BELL & HOWELL

*Borrowing from the hippie jargon, you can't keep a cool cat down. The pictures on this page more or less prove that point. Above, a pet cat in the Boston traffic department checks up on four kittens she is rearing in street light on its side in a storeroom. The kittens have been named Jaywalk, Walk, Crosswalk and Don't Walk. But with mama, the lights read "caution." Below is a cat that refused to grow. Midget, a three-month-old kitten, measures only a scant six inches, minus tail and weighs only a few ounces. All this despite a diet of tuna fish and plenty of loving care. The kitten is seen here on a Maine vacation with Lisbeth Tompkins, 5, of Waltham, Mass. (AP Wirephotos)*

# Can't Keep a Cool Cat Down

# According to the Hippies

*To Peanuts, a one-year-old cat owned by Miss Karolyn Walker, Sacramento, Calif., something appears fishy (above). Peanuts, like most cats, is attracted by the movement of the fish and likes to sit and watch it swim. It's all right for Peanuts to watch, but he better not touch, according to Miss Walker. Kitties of a different color are shown below. The four lion cubs, a month old, make their photographic debut at Woodland Park Zoo at Seattle. The cubs were the mother's fourth litter. BY TOM RICHARDS
Post-Crescent Staff Writer

An event of great importance has passed virtually unnoticed.

It was midnight, Aug. 31. At that time, the Twentieth Century was two-thirds gone.

It is appalling to realize that a moment of such moment received no attention.

One would think that at least television, which always is cognizant of this type of thing, would have had some kind of a special. Of course, they would have had to interrupt the summer reruns for it.

Even, I'm ashamed to say, the newspapers, until now, overlooked it. I don't know for sure what we can do about it at this point, now that the event has passed. Obviously, it is too late for any sort of massive celebration. We could regret the century is already that far gone. Or maybe we should be happy. But I'm afraid it's too late for anything except deep regret for having missed this important day.

But wait! There may be some chance after all. We could learn from our mistake. We could not make a similar error again. It won't be too long before the century will be three-quarters gone. It will be 1975, only nine years away.

Then we can really have a big celebration.

We could have a world's fair, called Three-Quarters of a Century of Progress.

By that time, we will be able to call attention to the years of peace we have and will enjoy.

Of course we face the possibility that in nine more years there won't be any world left to celebrate Three-Quarters of a Century of Progress.

It really is too bad we missed Aug. 31.

## Cover Story

# Antique Farm Machinery Displayed

BY DOUG KOPLIEN
Post-Crescent Staff Writer

FOND DU LAC—For at least two days out of each year, farming methods are turned back more than half a century on the Herbert Kleinschmidt farm, six miles south of here.

For the sake of nostalgia, equipment well over the 50-year mark is put into operation, and neighbors from miles around come in and take part in the picnic-type gathering.

Kleinschmidt and many of his cohorts, who share his enthusiasm for rejuvenating old farm equipment, set up their antique machines and put them into operation for two days.

Model relics on display include threshing machines, steam engines, gasoline and steam-operated saws and merry-go-rounds. This year the fourth annual display and demonstration was attended by some 2,500 persons.

It all began when the steam engine show, long a tradition at the Fond du Lac County Fairgrounds, was moved to Beaver Dam.

Undismayed, Kleinschmidt decided that as long as the show be no more, at least in this area, he would sponsor one of his own.

Now each year, in the later part of August, persons from miles around bring their antique wares, all of which are in working order, to the farm for the annual get-together.

A unique item at this year's affair was a horse-operated threshing machine. The horses, in this instance Shetland ponies, were hooked in four teams to a circular device, which, when turned, operated a complex of gears.

These gears transferred horizontal circular power to vertical power on a pulley. This in turn powered a pulley which operated the machine.

The hand-fed machine, which dates back to 1915, is one of the few left in the nation, Kleinschmidt explained.

A model builder, Elmer C. Kranz Beaver Dam, was on hand with his scale models of 1912 steam engines, silo fillers, a water wagon and threshing machines. He explained that his models were built, using only a 1912 catalog for a guide.

The threshing machine, he said, will actually thresh oats and wheat.

Mike Karrels, route 1, Menasha, was on hand with the 1912 Cretors popcorn wagon which he rejuvenated during his spare time.

Although "up" on the oldtime machinery, Kleinschmidt oftentimes finds himself drawing on the knowledge of many of the real old timers in the area as to exactly how to assemble pieces of the relics.

Two of his contributors have been Ernest Vandervort, 113 N. Lincoln St., Fond du Lac, and Richard Carter, Campbellsport. Carter, 84, built from scratch and scrap a steam engine which powers a drag saw which he built in association with Kleinschmidt.

Vandervort, an ex-lumberjack and long-time sawman, has built four gasoline powered eight-foot saws.

Joseph Hansen, Cleveland, had on display a 370 h.p. 1908 Renault airplane engine.

Most popular among antique enthusiasts are the car collectors, about 30 of whom were on hand from the Horseless Carriage Club, the Kaiser-Fraser Club and the Essex and Hudson Club.

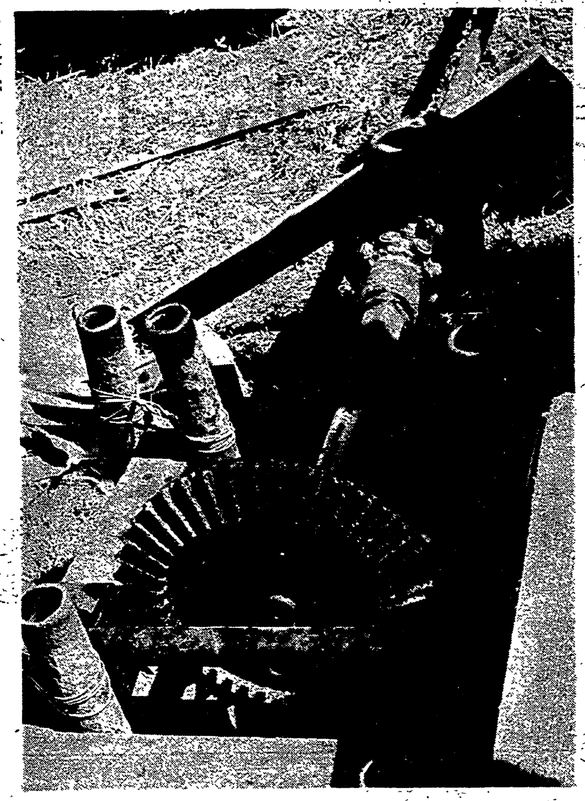

Virgil Gilbert, Sullivan, demonstrated his steam engine-operated, hand-built miniature merry - go-round.

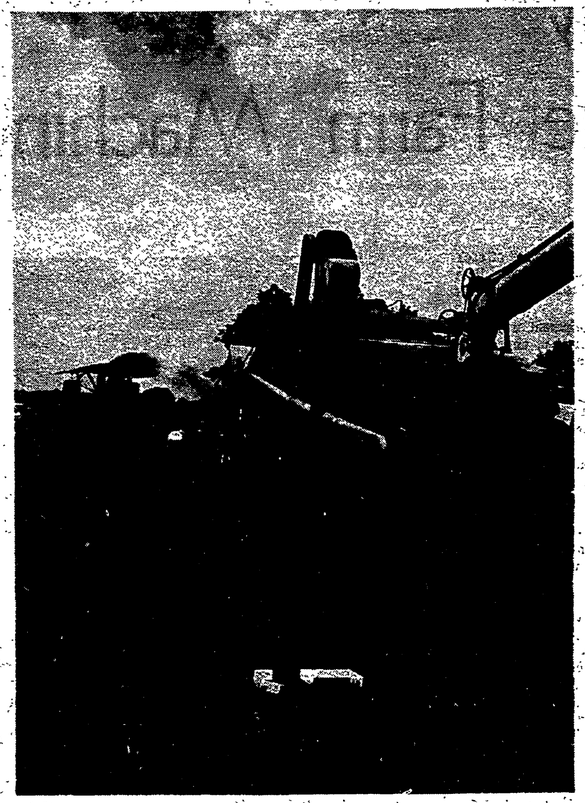

In addition to the machinery, which also includes old-time washing machines, well-drilling units, and steam engine-operated threshing machines, were old household items and clothing.

A sewing machine about six inches square was on display, as were a pot bellied stove, a spinning wheel and pictures which obviously date back many years.

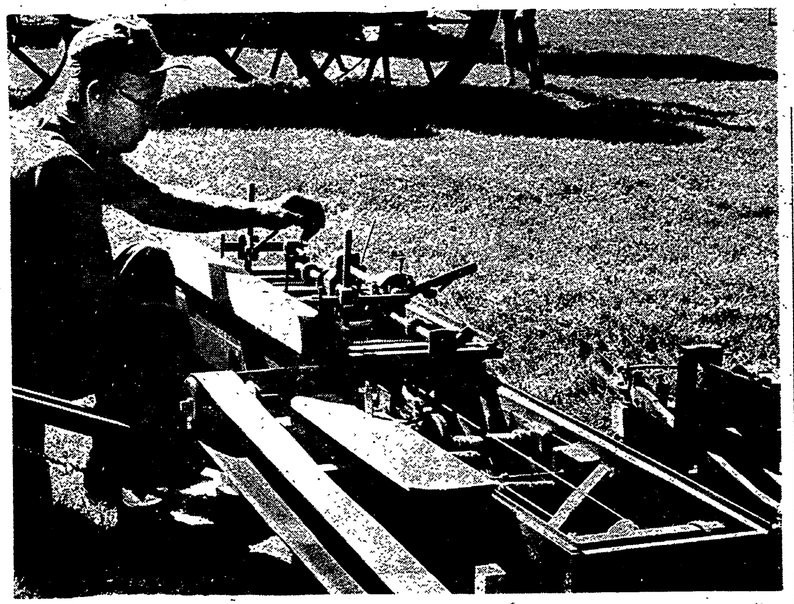

*Operation of a hand-fed, pow-powered threshing machine was demonstrated at the two-day show on the Herbert Kleinschmidt farm, s miles south of Fond du Lac. (Post-Crescent Photo)*

*Crows in attendance at the show of antique farm equipment were able to view the operation of a threshing machine (above) as powered by a 1916 steam engine. At upper left is a close-up of the gears of the pony-powered thresher shown on page 13. (Post-Crescent Photos)*

*This narrow bridge, which connects two town roads about a mile east of Anston, was constructed mainly of railroad ties. Long wooden pilings were employed to shore up the embankment of sand and gravel on either side. (Post-Crescent Photo)*

# Horses Used in Construction of Picturesque Bridge at Anston

BY PAT DUFFEY
Post-Crescent Farm Editor

ANSTON — Ben Pagel was a young man on his father's farm in northwestern Brown County when the Chicago and North Western Railroad line was built through here on its way from Green Bay to Gillett.

Today, Ben is 78, and he still recalls how, after working on the family farm earlier in the day, he helped drive his team of horses as they assisted in construction of the railroad line.

Part of the project was the bridge, about a mile east of the community, which connected two town roads, one of which passed the Pagel farm. The first bridge was constructed about 58 years ago, and later replaced with the present structure.

The narrow bridge is built mainly of railroad ties. Pagel recalls that when it was first constructed, long wooden pilings were employed to shore up the embankment of sand and gravel on either side.

Horses were used in the construction. The section to Gillett only took one season, he said. The part south of Green Bay had been completed the previous year.

The team of horses would straddle the small track and pull a string of eight to ten small cars loaded with material for the bridge embankment.

Years ago, he recalled, there were more passenger trains passing through the area. Today only two short trains pass by, both in the afternoon.

About 15 years ago the railroad company installed larger and heavier tracks. An old wooden bridge east of his farm was subsequently replaced by a concrete structure, which was the scene of a derailment earlier this year. Several cars left the tracks, and a considerable amount of trackage was uprooted.

The bridge arches up from each bank to a high plateau as it towers about 25 feet above the tracks. It was built eight feet higher than the top of a box car in order to accommodate a brakeman working on top.

Land for the bridge came from the old Herman Ziller and Henry Sheedy farms, which have since changed hands.

Pagel has a 240 acre farm about a half mile south of the bridge. His father settled the farm after his marriage in the 1870s.

Mr. and Mrs. Pagel live on the old homestead with Walter Van Horn, 73, a mute who originally was from Mill Center and who has made his home with them for the past 23 years.

*Walter Van Horn, left, originally of Mill Center, has made his home with the Ben Pagel family for the past 23 years. The farm was originally settled in the late 1870s. (Post-Crescent Photo)*

Answer on Page 9

# hints from Heloise

DEAR HELOISE:
If you like real thin, crisp toast of the melba type, try taking a piece of bread and ironing it between two pieces of foil until it's brown and thin. The ironed bread can be buttered or eaten plain, and it's delicious when cold.

Thomas Millaird

You're so right. It's great! I used thinly-sliced sandwich bread and placed it between two pieces of thin foil, ironing it with a *hot* iron.

The toast was about one-eighth inch thick and very hard when cold.

Heloise

**RUB-A-DUB-SCRUB**

DEAR HELOISE:
I discovered an easy way to clean my bathtub:
First, I run water on the sides and bottom of the tub, sprinkle on some cleanser, then scrub with the broom. I turn on the water, rinse the tub thoroughly, and sweep the water down the drain.
My tub sparkles, my broom is clean, and, best of all, I have no backache.

Mother

**TERRIFIC TERRY TOWELS**

DEAR HELOISE:
My mother-in-law sent me some lovely pillows that are very practical, especially when there are small children around. Each pillow is made out of two fingertip towels.
Pick any color — solid, flowered, etc.—to go with your room. Sew them together on three sides, fill with shredded foam, sew up the fourth side, and then stitch yarn or fringe around the edges.
Mine have pink and red roses on white, with red yarn trimming. They are lovely.

Helen Fletcher

**BOBBY PIN-UP**

DEAR HELOISE:
Some people may have the problem of keeping up with bobby pins. I did until I came up with this idea:
I took the cardboard tube from a roll of paper towels, and cut it into smaller tubes. Using these, I simply clip the pins around the rims of the tubes, and when needed, just set one on my dresser, table, etc. Result—no more scattered pins.

Sheila Stafford
Age 12

**FANCY DUST RUFFLES**

DEAR HELOISE:
My king-sized bedding costs king-sized prices! A dust ruffle is not only expensive, but becomes limp and must be washed and ironed often.
A good solution to the problem is to use a regular size double-bed sheet for the middle and attach a dust ruffle made from a wide fiberglass drape bought on sale. It washes beautifully, needs no ironing, and looks lovely and expensive.

Lua Henning

**BLUEPRINT FOR COMFORT**

DEAR HELOISE:
My husband is a sales engineer who brings his big blueprints and books home to work on. Once he's all set up to work, he doesn't like to be asked to move, so the kitchen table was out.
We hit on the idea of using my adjustable ironing board in front of the couch. There he can spread out his blueprints, lay the books on the couch, and adjust the ironing board to just the right height—and it's great to type on, since it's lower than the table.
He can have his coffee handy on the end table . . . pretty comfortable, don't you think? This idea can also be used for school children.

Mrs. M. A. Vetter

**HER OWN NEWSLETTER**

DEAR HELOISE:
I keep a "news envelope" in which I place all "Heloise Hints", interesting news clippings, pictures, and a notebook in which I jot down things of interest.
When writing to a relative or friend, I include a hint, along with anything else that may be of interest to that particular person.

Mrs. J. G. Penner

**FOR PUNGENT FRUIT**

DEAR HELOISE:
When you cut any fruit, such as cantaloupe, papayas, etc., if you put it in a thin, plastic bag and twist the end, it will not only keep the fruit fresh and prevent it from drying out, but also keeps the odors from permeating the other food in your refrigerator.

S. Harrison
9-18

**If you have a hint, problem or suggestion you'd like to share . . . write to Heloise in care of this newspaper.**

**BABY'S FINGERNAILS**

DEAR HELOISE:
Have you ever tried to cut a young baby's fingernails? They're too young to know what "hold still" means, and they would rather hold your finger than spread their hands for you. Finally, my mother had the solution:
Try cutting the fingernails when the baby is taking his nap. It's much easier and a lot safer. They are such sound sleepers, they never know what's going on.

S. J. S.

**COTTON KNIT SHIRTS**

DEAR HELOISE:
I've found a way to make cotton knit shirts behave.
To make them take the shape of a new, unwashed shirt, simply spray lightly with spray starch and pull lengthwise as you iron with a steam iron. This gives both body and shape.

Mrs. Clyde H. Ball

# After the Game

LOOK WHAT'S COOKIN'
Lillian Mackesy POST-CRESCENT FOOD EDITOR

## *Is Over . . . After The Battle's Won*

*Casseroles for hearty appetites, rice and cheese above, meat and vegetables below.*

### First 'n' Ten Rice

*¾ cup soft bread crumbs*
*3 tablespoons grated Parmesan cheese*
*1 tablespoon melted butter*
*3 cups Spaghetti Meat Sauce*
*3 cups cooked rice*
*¼ pound sliced Mozzarella cheese*
*½ cup dry cottage cheese*

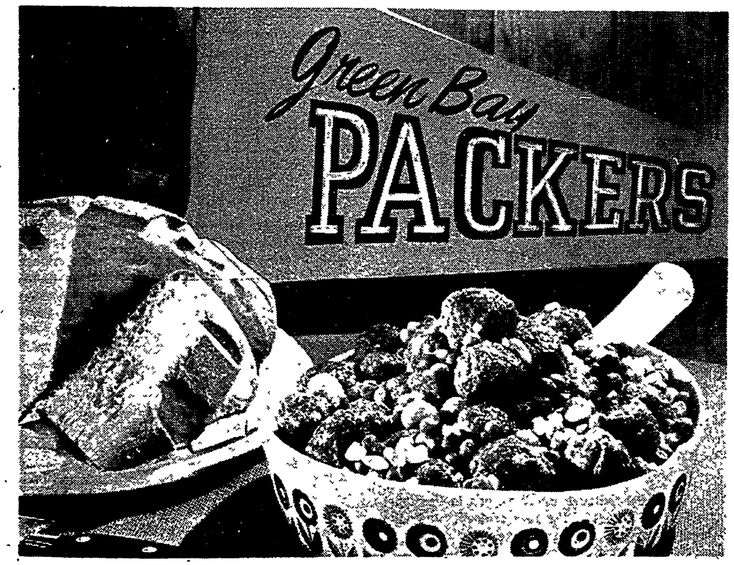

Heat oven to 350 degrees. Combine soft bread crumbs with Parmesan cheese and melted butter. In 8-inch square baking dish spoon third of meat sauce; top with half the rice. Evenly distribute Mozzarella and cottage cheese over rice; add a second layer of meat sauce and rice. Cover with remaining meat sauce; top with bread crumbs. Bake 20 to 25 minutes or until hot and crumbs are nicely browned. Recipe makes six to eight servings.

NOTE: If rice and sauce are cold when ingredients are combined, increase baking time five to 10 minutes.

### *Spaghetti, Meat Sauce*

*½ pound ground beef chuck*
*1 clove garlic, minced*
*½ cup chopped onion*
*2 tablespoons shortening or bacon drippings*
*1 can (10¾ ounces) Condensed Tomato Soup, undiluted*
*1 can (1 pound) tomatoes*
*1 teaspoon salt*
*½ teaspoon oregano leaves*
*⅛ teaspoon pepper*

Brown beef, onion and garlic in shortening. Add soup and remaining ingredients. Simmer, uncovered, stirring occasionally, 1 hour 15 minutes or until desired consistency. Makes three cups sauce.

### Packer Backer Meat Balls

*3 slices day old bread*
*Water*
*1 pound ground beef*
*1 egg*
*1 tablespoon minced onion*
*1 teaspoon salt*
*½ teaspoon fennel seed (optional)*
*Dash of pepper*
*1 tablespoon butter*
*1 can (8 oz.) tomato sauce*
*1 package (10 oz.) frozen green peas*
*1 package (10 oz.) frozen succotash*
*Salted water*

Cover bread with water. Soak until bread is soft; then squeeze dry. Separate into crumbs. Combine crumbs with beef, egg, onion, salt, fennel seed, and pepper. Shape into 1-inch balls. Heat butter in skillet. Add meat balls and saute until evenly browned, stirring frequently. Add tomato sauce. Cover and simmer 15 minutes.

Meanwhile, separately cook peas and succotash in salted water as directed on packages. Do not drain. Stir into meat ball mixture. Makes about five cups or four to six servings.

## Brinkley Writes Attractive, Readable Novel of Men at Anzio Beachhead

BY STAN SWINTON

*The Ninety and Nine.* By William Brinkley. Doubleday. $5.95.

In telling the story of men on an LST on the Anzio Beachhead run in World War II, Brinkley has produced an immensely attractive and readable novel. He has written five since the war, including the bestseller "Don't Go Near the Water."

Few men knew the perilous Anzio run better than Brinkley. As a Stars and Stripes reporter (the only Navy man on the Mediterranean edition, and an officer at that) he covered it.

Fewer writers could translate the many faces of war — the savagery and humor, the tender and the antic, the bureaucracy and the purpose — into a 393-page novel so rich in dialogue and incident. Caught in Brinkley's fictional tale are remembered scenes of intense validity, but perhaps best of all are his characters.

The romance of Lt. (j.g.) Matthew Barclay and Nurse Sarah Clark rings true as an Italian church bell. Lt. Shanley is a larger than life caballero whom war spins out — and his jeep, with a big "Bomb Disposal" sign has a personality all its own. There is Seaman Red Carlyle and the innocent beauty of his love for Coco Comparo, whose pragmatism is so very Italian. Last but far from least is Rear Admiral Haynes Doddridge, whose meeting with LST 1826 crewmen and their signorine in a sea cave is to me the funniest scene since "Catch 22."

It would be unfair to disclose how the novel ends. Perhaps, like the chapter in which a Luftwaffe officer leads an ill-omened prisoner escape effort from the LST, the penultimate chapter is overdramatic. But war itself is overdramatic. In combat the improbable becomes probable.

If you are tired of sick fiction, if you want an utterly readable book which produces both laughter and suspiciously moist tear ducts, this novel is for you.

★ ★ ★

*The Hostages.* By Charles E. Israel. Simon & Schuster. $4.95.

The chilling plot of this novel isn't quite as implausible as it might sound in a brief summary. By wild happenstance, it could have taken place.

The action is between the hours of 8 a.m. and midnight on a day when a delegation from Red China is en route to New York, where Peking finally is to have a seat in the United Nations.

The day begins with the usual departure of young children of various UN delegates for an International School, but on this day the customary yellow school bus has been supplanted by a shabby old blue bus, and only one guardian mother notices that something seems to be wrong.

The trouble is that a warped right-wing fanatic and a mere handful of deluded followers have succeeded in carrying off a plot to substitute school buses, carry off 16 children — a cross section of races, nationalities and religions — and hold them as hostages. The fanatic dreams irrationally that by

means of the hostages he can force the UN to revoke Red China's entrance.

The fast-paced story shifts from UN headquarters to the mobilization of local and state police, the FBI and the Coast Guard; to the places of captivity; to the harried assemblage of frightened parents of so many nationalities.

There are some stark scenes in the high levels of the UN headquarters, and among the law officers. There are other scenes among the captive children — these are a bit overdrawn — and finally there is a movie-like climax as the rescuers close in on the final hideaway.

This is thriller-diller business, of course. It is a type of fiction which requires more than the usual suspension of disbelief, but if you'd like to remain in suspension, it offers a lot of excitement.

MILES A. SMITH

★ ★ ★

*Golf — Its History, People and Events.* By Will Grimsley. Prentice-Hall. $19.95.

Grimsley presents in one volume of large format the salient features of golf's history and its contemporary status.

He begins with the somewhat mysterious origins of a sport that, apocryphally, might have been invented in the days of a stick-swinging caveman, but more likely had its roots in a primitive pastime of early Roman soldiers. He also relates the evolution of the stick and ball equipment.

He chronicles the real impetus given to the sport on the Scottish moors of the 15th century, and the 19th century origins of golf in America.

Then comes a series of chapters on the legendary international stars of the past, and their modern counterparts; these are the big names in the flesh.

Another section treats the great tournaments here and abroad, and the famous competitions for coveted cups and trophies. A final section describes some of the most notable and thrilling shots ever made in competition, and discusses the various golf associations and tours.

There is a special section contributed by golf course architect Robert Trent Jones, on 10 of the greatest courses in the world, illustrated with fold-out maps in three colors.

The whole volume is keyed to the anecdotal, emphasizing personality stories and inside glimpses of the sport's great moments. It is copiously illustrated in both black and white and color.

*Tanzania, Young Nation in a Hurry.* By Alexander MacDonald. Hawthorn. $5.95.

In "Scoop," the late Evelyn Waugh had a journalist unfamiliar with Africa blandly pick a name from the map and dateline a dispatch: "Terra Incognita."

For most Americans, Africa remains terra incognita, the unknown land. The profusion of newly independent African nations, the unfamiliar names many have substituted for those we knew in our stamp collecting days, and the sad frequency of political instability compound the confusion with which the average American regards Africa.

The merger of Tanganyika and Zanzibar produced Tanzania, one of the most interesting of Africa's young nations. In 1964 the discovery of the remains of a race of upright, small-brained pygmies dating back 1,820,000 years and seemingly directly linked with thinking man, indicated humanity may have originated there.

Julius Nyerere, the Roman Catholic school teacher who guided the East African nation to independence, and who remains Tanzania's dominant figure, ranks among the truly significant and hopeful leaders on a continent still woefully weak in trained leadership.

Tanzania's policy of non-alignment between East and West offers a fascinating case study. Her community development program is a remarkable example of how 10 million Africans, who were more than 80 per cent illiterate and had average earnings of only $58 a year when they gained independence from Britain, through cooperative effort can build schools, wells and roads, and maintain a hugely successful adult literacy program.

MacDonald knows Tanzania first hand and writes with the skill and pace of an expert journalist. The book's main faults are an over-abundance of detail for the lay reader, and the author's enthusiasm for virtually everything Tanzania has done, is doing and plans to do. A more detached approach and inclusion of more critical views would have added balance to an essentially valuable book. Nevertheless, "Tanzania, Young Nation in a Hurry," provides a well written and interesting introduction to a nation and a continent almost all of us need to know more about.

## *Rusted Tin Box Tells Sacrifices Of Nursing Nuns*

BY LILLIAN MACKESY
Post-Crescent Staff Writer

A piece of Appleton history was recalled recently when the cornerstone of the now-razed, old St. Elizabeth Hospital was opened. Like a period drama in flashback — or a slice-of-life play — the contents of the crumbling and rusted tin box set the scene for an Appleton of long ago, at the turn of the century.

Newspapers — five different issues — tell their story of what Appleton was like in 1900 when the hospital cornerstone was laid and sealed into place with fitting ceremony. A small rosary, worn and brown in color, together with a collection of still beautiful prayer cards are dramatic reminders of the handful of Franciscan nuns who worked so hard with courage and unwavering faith to bring hospital care to Appleton and its surrounding area. The fading paper with the careful penmanship of Father John Kaster of Sacred Heart Church tells the story of the hospital founding; the words, however, are all in Latin.

A tiny medal, corroded beyond recognition, and a miniature fabric or leather heart seemingly stuffed with a once-pungent filling complete the contents of the cornerstone box.

Only one of the newspapers, the Appleton Post for June 16, 1900, is printed in English. The Daily Crescent for the day is missing. But the others reveal that the Yankee flavor of the original village of Appleton had changed considerably. These newspapers were in the German language.

They carry the masthead names of the Appleton Volksfreund, the Appleton Wecker and Das Montags-Blatt, in addition to the Catholic family weekly named Excelsior and published in Milwaukee.

The Wecker was one of Editor Chris Roemer's German newspapers; the others were among the several Volksfreund publications with state-wide distribution. The Volksfreund building was located on the site of the present police station.

### Turn of Century Look

The German papers all advertised the Zion Church congregation's outing scheduled for Sonntag, Juni 17 (Sunday, June 17) at Harriman's Park. K. F. Keller and Son, in business since 1873, were selling "gute" timepieces and Fraulein Katie Freund was teaching piano and organ by appointment in her North Richmond Street home.

Schlafer Hardware Co. was selling the "one freezer of worth," the Lightning, "in which it is real fun to make ice cream, it's so easy." Conkey's Book Store had added photographic equipment and cameras to its already established book and stationary goods. Pharmacists Kamps and Sacksteder proclaimed a new corn cure.

Other College Avenue merchants advertising in either English or German, frequently in both languages, were Arnold Peerenboom, Pettibone-Peabody Co. and the Boston Store. F. C. Hyde had his jewelry store in the Douglas Stone building (on the northeast corner of College and Oneida); W. L. Rhodes was promoting Ferndale coffee, while A. L. Smith and Joseph Koffend were in the insurance business together. Stark and Teech were selling awnings in their hardware store on Appleton and Edwards (Washington) Streets, S. C. Shannon had a grocery store and Henry Schuetter was a merchant tailor of note.

According to the Appleton Post, the biggest news of the day was the destruction by fire of the main power plant of the Appleton Electric Light & Power Co. Located on the government canal, the plant was totally destroyed early in the morning of June 17 with serious consequences. The city street cars were stopped so that the railway power could be skitched over to the interurban system since the power dynamo for these cars was destroyed. The old Citizens Power and Light plant in the ravine was put to use temporarily to supply limited lighting for homes and stores.

Plans for the cornerstone laying seemed unaffected by the fire, even though street car service to the hospital was no longer assured. The Post outlined the program for the day in its news columns: "The corner stone of the new St. Elizabeth Hospital will be laid by Father Fox (Msgr. J. J. Fox, vicar general of the Green Bay Diocese) tomorrow afternoon (Sunday) at 2:30 o'clock. An invitation has been extended to all the different societies of the city to take part in the exercises. The procession will form at the corner of Lawrence and Walnut Streets at 1:45 o'clock and march down College Avenue as far as Oneida Street, where it will turn South. The common council will join the procession as it passes city hall."

### Procession on Long Walk

Since processions and parades were part of the 1880s and early 1900s, nearly every organized group responded to calls such as these. Probably everyone was marching anyway, so only a few needed the streetcars.

The program included an address by Judge John Goodland in English and another in German by Rabbi Gerechter. Prof. Schueller's choir sang and Prof. Heard's quartet furnished instrumental music. Msgr. Fox officiated at the ceremony. Dr. Rush Winslow, Appleton physician who served as chief of staff until his death in 1902, presented a speech along with such other notable citizens as Thomas B. Reid, P. R. Thom and the Rev. F. T. Rouse and Rev. John McCoy.

It was a gala day, marking a big step forward for the hospital which was a long time coming. Civic leaders and area doctors had backed the idea of a hospital since the 1880s. Two of Appleton's most respected physicians, Drs. Winslow and A. H. Levings, led the cause for years. Both men also were Appleton mayors, each serving three one-year terms between 1887 and 1892. They knew well the work of the Franciscan Order in its Milwaukee hospital. Things began to move early in 1889 when the Rt. Rev. Sebastian G. Messmer, bishop of Green, Bay, delegated the Rev. John Kaster, pastor of Sacred Heart Church, and Dr. A. M. Freunde to start negotiations with the mother house, then in St. Louis, Mo.

Thus it was that Sister M. Carola, Sister M. Clothilde and two other Catholic nuns arrived in Appleton on Nov. 19, 1899, the feast day of St. Elizabeth. Their home and first hospital for the next 10 months was a modest frame house on the Lake Street (S. Oneida St.) site. Taking the attic for their personal quarters, the four sisters proceeded to turn the rest of the eight-room house into a hospital. Sister Carola was in charge.

### Many Years of Hardship

These early years in both the cottage hospital and the later brick structure just torn down were not easy for the nuns. They were overworked, ex-

Continued on Page 20

*The worn rosary with its carved wooden beads seen in the center of the picture is believed to have belonged to Sister M. Carola, one of the four Franciscan nuns who came to Appleton in 1899 to establish St. Elizabeth Hospital in a two-story frame house. The rosary, the cards with either German or French prayers printed on the back, four German newspapers and the Daily Post in English were among the objects found in the cornerstone box of the 1900 hospital building recently torn down. The story of the founding of the hospital and the cornerstone laying ceremonies of June 17, 1900, was handwritten in Latin by the Rev. John Kaster, then pastor of Sacred Heart Church. This 66-year-old, brown but still legible paper is in the envelope in the tin box along with other mementos of the day. (Post-Crescent Photo by Ralph Acker)*

# Alocasia Chantrieri Increases in Size, Beauty as It Grows Older

BY KATHERINE B. WALKER

Alocasia chantrieri is one of the loveliest plants in this family noted for its magnificent foliage. It is a bushy plant that grows from a rhizome, increasing in size and beauty with age. The large leaves are an elongated heart-shape, leathery in texture, a deep olive-green with light grey veins and scalloped margins of white. The leaf reverses are a striking coppery purple color. Seldom seen in the average flower shop, this plant may be purchased by mail from the first grower listed on our Source Sheet. (This sheet is free; please send a self-addressed, stamped envelope, to me, in care of The Post-Crescent, with your request for a copy).

Alocasias come originally from tropical Asia, and like most tender tropicals, need ample warmth, ample moisture at the roots and in the air, and they must be protected from direct sunlight. For best growth, they should be potted in peatmoss mixed with chicken gravel and small chunks of charcoal, with the tuber lying about an inch below the soil level. Use a fairly large pot to start with, then shift the plants to larger quarters as they require it. The best time to repot alocasias is in mid-spring when they begin their most active growth; at this time, any offsets that have formed may be separated and potted singly.

Keep the soil evenly and constantly moist, and spray the foliage with a mist of plain water whenever and as often as you find it convenient to do so. To help remind myself of this, I keep a small plastic spray-bottle beside the plant, and whenever I pass by I give the plant a few squirts. In most homes, alocasias also need to be kept on pebble-trays, to further aid in offsetting the dry air effects. High humidity is almost essential if these plants are to open their huge leaves without cracking, a circumstance that somewhat impairs their beauty.

In the catalog of the grower mentioned previously, you will find many other alocasias listed, with illustrations of some. If price is no object, and if you have ample room for it, I can recommend Alocasia watsoniana, called the Queen of the Alocasias, and rightly so. This has unbelievably huge, broad leaves, blue-green with silvery white veins and margins, lovely, clear purple reverses. The secondary veins of this alocasia give the entire leaf a distinct pattern quite unlike those of most of the other species, and while the plant does grow large, it is a very choice one if you have the room (and the money) for it.

*Q. I have been given a Hoya carnosa. Does this plant bloom? Can cuttings be rooted in water?*

A. This is known as Wax Plant, and has magnificent clusters of fragrant, pinkish white flowers with a red, star-shaped crown. A section of the vine which already shows root development will root quite readily in water.

☆ ☆ ☆

*Q. We have ceilings over eight feet high, and want some flowering plant that will grow nearly that high. We have one area that gets morning sun through large windows, and in addition, it has a skylight. What do you suggest?*

A. Oleanders, hibiscus and dwarf citrus such as kumquat are a few.

☆ ☆ ☆

*Q. My hibiscus has had a few flowers on it, but they fall off after a day or two. What care should I give it?*

A. If your plant is blooming, it is getting the right care. Normally, hibiscus flowers only last a day. A two days, but that's the limit. It is for this reason that few varieties have blooms which may stay fresh for the plants are often called Flower of a Day.

## uncle jack's garden diary

# *Delicious Cider Proves Power Of the Press!*

BY UNCLE JACK

It is the cider season, and our little backyard garden produce enterprise has become more satisfying as my old-fashioned cider press turns out gallons of delectable apple juice each weekend.

Readers may remember that for several years I had kept up a patient and not entirely hopeful search for the old-time press that was a basic tool of the family farm in the days of my youth, but that had seemed to disappear entirely in later years. An old friend remembered that he had seen something that resembled the machine of my description on the old family farm in the Fox River Valley, dismantled it, and brought it to me as a gift. I suppose that none of the gadgets in my tool shed has given me quite the delightful diversion that this old press made by careful artisans of the 1870s has brought during the last two seasons.

Although memory tends to exaggerate the experiences of one's boyhood—the melons were always bigger, the corn always taller, the small-mouth bass in the back pond more combative, than those of today—in this instance I am surprised at the juice potential of the moderate harvest of apples from my small orchard.

There is a chance, I suppose, that I may burden my friends with my Monday morning deliveries of jugs of surplus juice.

Maybe I will borrow a leaf from a book of my favorite uncle, and bone up on the techniques of making hard cider. What was it called? Apple jack? I'll call at the library for a book of instructions. Uncle Jack's apple jack. What more could be fairer, as Roundy Coughlin of Madison would say?

# *Nuns' Sacrifices Built Hospital*

Continued from Page 19

tremely poor and often hungry since they saved the best of any food for their patients.

Many stories have been remembered by later hospital nuns who knew the original four. Sister Clothilde, youngest of the group, is supposed to have wept that first Christmas spent in the frame house-hospital. Her tears were shed because they had nothing to make the occasion festive. There was only bread — without butter — for Christmas dinner.

Another story told about Sister Carola also goes back to those first months. When more and more patients began seeking a bed in the hospital and there was no room, the nun decided to look for financial help from downtown Appleton. While walking along College Avenue, she fainted and was taken into a drug store where she was fed a nourishing milk drink.

The superioress had forgotten to eat even the meager rations allotted that day. She explained she had left the hospital without food because she was eager to promote help for the place already too small. It was suspected that the sisters kept little food for themselves, only for the patients.

Even in later years, in the second hospital, benefactors and doctors frequently brought hampers and baskets filled with meats, fruits, staples and sometimes delicacies. When these special baskets reached their kitchen, there always was a note, saying, "These are for the sisters, not the patients."

These nursing nuns were a resourceful lot because they had to be. Equipment for operations was scarce and frequently had to be contrived with whatever was at hand. The sisters stood on tables and focused the lights by hand for overhead illumination. A kitchen table became an operating table; incubators were created with baskets and properly placed lights.

The day came, of course, when the brick hospital became as inadequate as its predecessor, the little white house. The new hospital was dedicated and opened for business May 8, 1901, just short of a year after the cornerstone ceremony. That year the hospital served 144 patients — by 1920 this number had grown to 2,000 patients a year. Through "squeeze" technique and the use of the corridors, the 50-bed structure was upped to 70. It was not enough.

Once more, doctors and the community rallied to match the $200,000 fund volunteered by the Franciscan Sisters to build a 100-bed hospital. On July 3, 1923, the hospital became a reality with the old hospital the obstetrical department or maternity ward.

For the third and last time, this early hospital has just completed another yeoman stint by serving as hospital entrance during the first phases of the new hospital expansion program. Now the old St. Elizabeth Hospital is gone to make way for progress.

But the spirit and the will to succeed of those founding nuns still is intact in their personal mementos placed by them in the cornerstone of 1900. They should go in the new cornerstone as a proper and dramatic link with St. Elizabeth Hospital's past.

# 'Your Dog and the Press' Completed By U.S. Dog Writers Association

BY BUD LARIMER

Members of the Dog Writers Association of America have recently completed another edition of their "labor of love", the 1966 edition of "Your Dog Show and the Press". This enlarged pamphlet should be available soon.

Its information and coverage will be a valuable aid to dog clubs everywhere in their relations with newspapers, magazines, TV and radio.

A New York research center is paying all costs of publishing and distributing this concise aggregation of information and suggestions. Director of the Center, Walter Chimel, and an associate, Evelyn Monte, also a member of DWAA, worked closely and cooperatively with Lewis Sharply, president of the association, and Wentzle Ruml Jr., it secretary treasurer.

A copy of this publication will be mailed out to all DWAA members and five copies will go to each club, soon after its show or trial date has been approved.

☆ ☆ ☆

The Oshkosh Kennel Club on Sept. 13 began a 12-week series of conformation and obedience training classes.

This opportunity to work your dog is competition and under conditions similar to actual show or trial surroundings is equally beneficial to novice and old-timer alike.

Further information may be obtained from Mrs. Robert Piette, Appleton, Mrs. William Pryor, Neenah, or Mrs. John Casper, Oshkosh.

These classes are being held every Tuesday evening at 7:30 p.m. at the Oshkosh recreation building.

☆ ☆ ☆

"Sunnybank," the estate of the late Albert Payson Terhune, author of the series of books about his Collies, is now owned by a real estate broker, who has proposed sub-dividing it into 10 lots on which he planned building homes in the $75,000 class. The planning board rejected his proposal and the matter will go into the courts. The owner, Leon G. Feinbloom, says condemnation proceedings are intended only to force him to sell at a low price, while the mayor, Edward Sisco, hopes that the Terhune homestead can be developed into an historical site.

☆ ☆ ☆

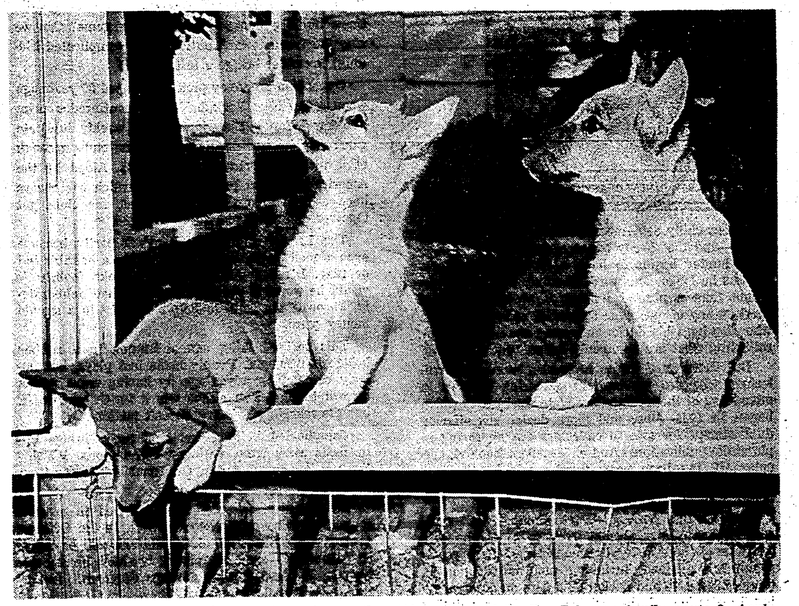

Lochbur Kennels, Appleton, announces the purchase of Cul Mor Cymru Charmian, a smooth collie. She was acquired to replace Lochbur Dominique, recently injured in an automobile accident. This sable and white smooth charmer hails from Pearland, Texas, where she was bred by Mrs. Betty Clemens. The collie is a daughter of Ch. Cul Mor Terrance of Cymru out of Ch. Mor Calpurnia. She will make her show ring debut at today's Manitowoc event.

☆ ☆ ☆

With that true "gathering-in" instinct "inherited" from their breed, the Sheltie people sent in all kinds of good tidings on their wins at the outdoor fun match held by Winnegamie Dog Club on Aug. 28 and also at the fun match on the same date held by the Greater Milwaukee Shetland Sheepdog Club at Menomonee Falls.

Mrs. Richard Mason, Wheelers Point, Neenah, joyfully reported the wins of her dogs at the local Winnegamie match. It was the first time out for the pups, so she was extra pleased with the results.

Thistlerose Misty Morn, C.D., took second in graduate novice obedience. Her four pups, sired by Pinefrost Kennels-owned Saravan's G-Jack, placed as follows: Lochbrae Misty Muir, first place, 3-6 month puppy dogs; Lochbrae Misty Gloamin', second place in the same class, and Lochbrae Misty Gowden, fourth place. Their sister, Lochbrae Misty Heather, took a third in 3-6 month puppy bitches.

*These handsome, active Welsh Corgi puppies are the pride and joy of the Ken Fehrman family, route 3, Appleton. (Post-Crescent Photo)*

Carol Wogibroski, of the Menasha Brucar Sheltie Kennels, seems equally pleased with her wins. Brucar Easter Sunrise took first in puppy bitches, 3 - 6 months. Pinefrost Prince of Darkness took a first in puppy dogs, 6-9 months. Their Pinefrost Lerick Dancer was third in open adult. Third in puppy dogs, 3-6 months, was Pinefrost Apache of Brucar, owned by Mary and Dave Purdy. Brucar's kennel boy, Bob Spielbauer, showed his pup, Pinefrost Sioux of Brucar to a second in puppy bitches, 3-6 months, and also a first in junior showmanship. It was the first time out for both ends of the leash.

The Menomonee Falls Sheltie wins are reported as follows: Best in match from jr. adult male class, Thistlerose Design'd For Duty (Sable male), owned by Ann Robinson, of Menomonee Falls, and bred by Thistlerose Kennels, of Greenleaf. Best of match and best of opposite sex to BiM from 6-9 month class, Thistlerose Little Blue Angel (blue merl bitch) owned by Joanne Hinz, Sheboygan, and bred by Thistlerose Kennels. Best senior adult in match from adult bitch class, Crawford Spice O'Life (sable bitch), owned by Mrs. Michael Eschweiler, Milwaukee, and bred by Janet Crawford, West Allis. Highest scoring in trial from open class, Randland George Washington, C.D., owned and handled by 13-year-old Danny Newman. A local winner from the 6-9 month puppy male class was second-place Pinefrost Exotic Vanquisher (tri male) breeder-owned by Mrs. Ray Neetzel Neenah. In three matches this pup has gotten two firsts and a second in classes of 5 and 6.

☆ ☆ ☆

Very soon now, all you ardent followers of the fields and marshes will begin to check out your bird dog, retriever, spaniel or just that "dog that hunts." Look him over for excess poundage, trim the nails short, especially any dew-claws and, if heavily coated, thin out rather drastically.

Again we say, you cannot expect fine hunting and good manners from a dog which has been confined to a small pen for nine months of the year, with little hard running or attention. Begin short runs, early morning and late evenings. Get a lot of that pent-up wildness worked out of him.

As things calm down a bit, stiffen up on your handling. Give a refresher course to the grown dogs on being steady to wing and shot. Give the same to the spaniels and retrievers, plus plenty of retrieving practice, both on land and in the water.

Keep the burrs combed out after each trip afield; check on the pads of the feet rigorously, especially in spaniels and many other sporting breeds as well. Be sure that the eyes are kept free from weed seeds and other debris. Use some good eye ointment nightly if the eyes become inflamed and sore. Don't let those "merry tails" on the English pointers and some English setters get sore or even bloody before or after the hunting season. Tape the tails daily if that seems called for. See that your gun dogs are worked quickly and knowledgeably to whistle and hand signals.

# Collectors May 'Bag' Ducks on Special Issues

BY W. R. DOBERSTEIN

A few chilly September mornings, some gusty fall winds—and that hardy breed of male known as the duck hunter begins to have a watery glint in his eyes as he looks cloudward. The only thing more extreme than a nimrod itching to swing a shotgun bead on any of our game species of waterfowl is one who also bags his ducks and geese another way—by collecting what are commonly called "duck stamps."

But there must be an increasing number of collectors who are non-hunters gathering together a mixed bag of these Migratory Waterfowl issues which began in 1934. More and more dealer ads offering duck stamps for sale to collectors are appearing in philatelic publications. And an excellent booklet, Circular III, has been produced for sale by the U.S. Department of the Interior, to satisfy popular demand for such a reference.

The booklet, entitled "Duck Stamp Data," gives a good deal of background information of the why and how of these Federal revenue issues. Each year's stamp is explained, including such information as the artist's name and background with an accompanying illustration of the original sketch or painting from which a duck stamp design was taken. It's a handsome booklet, available for 25 cents from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20240.

To the uninitiated, however, the booklet contains a bit of ambiguity. In a paragraph under the subhead reading "Scarcity of the Early Issues" it is stated: "Issues previous to 1941 are exceedingly rare." For a beginning collector who measures his stamp purchases in "how many can I get for a quarter?" most duck stamps would seem out of reach.

But a stamp which sells for $15 nowadays could hardly be considered rare. And that's the highest retail price for the scarcest of the duck stamps, unless the collector seeks exceptionally superb condition or a fine plate number single. That "rarest" of Migratory Waterfowl stamps is the 1935 issue, second of 33 issued to date. That's for a mint copy; a cancelled copy would be $10 at the most.

On the basis of attractiveness and exceptional engraving and printing, on a progressive year-by-year basis, the duck stamps, however, deserve any collector's interest and admiration. The designs have been drawn from the artistic efforts of some of America's finest wildlife artists. And beginning with the 1959-60 stamp, they have been printed in multiple colors—making them even more handsome additions to anyone's album.

The current 1966-67 issue, featuring a pair of whistling swans, would capture the admiration of most anyone.

And some of the scenes portrayed are enough to spark the imagination of many a dyed-in-the-wool duck hunter—like the 1936-'37 trio of Canada geese setting their wings to drop in (illustration).

# Las Vegas Contest May Answer Questions About Rubber Bridge

BY ALFRED SHEINWOLD

The rubber bridge tournament to be held in Las Vegas early in October poses some interesting questions: Will big money prizes spoil the game? Can we stop the trend toward outrageously complicated bidding? Is rubber bridge a test of skill?

Opposition to money prizes developed 30 years ago when a few New York bridge clubs offered a prize of a few dollars to the winner of the weekly duplicate game. A prize war developed, and the clubs got sick of it when the prize got up [illegible]. Aided by the American Contract Bridge League, which has always been utterly opposed to cash prizes, the clubs got together and abolished all cash prizes.

The League opposes cash prizes partly because even a good player occasionally makes a horrible bid or play. It's bad enough that he looks foolish; it would be worse if people thought he had deliberately "thrown" the hand to help a friend win a sizable money prize.

This sort of thing cannot happen in a rubber bridge tournament. People make bad plays, but nobody can get an advantage by having extra points thrown to him. You either win a match or lose it, but the margin of victory doesn't matter.

Complicated bidding has kept many bridge enthusiasts away from ordinary tournaments. It's difficult to remember a dozen unusual bids every time you change opponents.

No complicated systems are allowed in a well-regulated rubber bridge tournament. In the October contest at the Sands Hotel, certain bids will be listed as "standard"—such as forcing two-bids, strong no-trumps, Blackwood, and perhaps Stayman. Everything else is called "unusual."

A partnership is allowed to use only a maximum of three unusual bids. These must be written down and explained to the opponents before each match begins. It's easy to understand what the opponents are doing if they are so strictly limited to "natural" bidding.

To win a rubber bridge tournament you must not only bid and play skillfully, but you must also watch the scorepad like a hawk. When the last hand of the match comes along you must bid enough to give yourself a crack at the number of points you need.

Today's hand, played in a rubber bridge tournament in New York ten years ago, illustrates the principle. North and South were 1,600 points behind when the last hand of the match was dealt. A small slam with honors and an overtrick would not be enough (only 1,560 points), so South bid a do-or-die grand slam without wasting time.

Opening lead — ◇ 2

A spade, heart or club opening lead would have defeated the contract, but West had no way of knowing this. He opened a low diamond.

Declarer played low from the dummy, and South captured the nine with the jack. He immediately returned the queen of diamonds, covered by the king and won by the ace.

South then returned dummy's trump and ran all of the trumps, thanking his lucky stars that the trumps broke well. Declarer saved all of dummy's hearts, discarding the last diamond and the four of clubs.

Forced to reduce to five cards, East could save four hearts and one other card. East discarded the ten of diamonds, hoping his partner could control the suit.

South promptly cashed the eight of diamonds, and East was squeezed again. A heart discard would still be fatal, so East threw the ace of clubs.

South cashed the ten of clubs, took a finesse with the queen of hearts, cashed the ace of hearts and then took the 13th trick with dummy's jack of hearts when the king fell.

South needed luck to make his slam: a favorable opening lead, two finesses, a trump break, and the cards right for a three-suit squeeze. Still, he had to bid the hand well and play it superbly to get the most out of it.

Some pair will win about $20,000 next month, and the losers will call them lucky, but don't you believe it. The eventual winners will have to be very good players in their best form. Luck will help those who help themselves.

# King Cassius Learns a New Trick

CHICAGO — No magician worth his salt would be caught without a trick when there's a likely audience around — especially when that audience is world heavyweight champion Cassius Clay.

So it's understandable that Detroit conjurer Sid Nickin — in Chicago to do a Shrine benefit — pulled the sponge ball trick out of his pocket and proceeded to demonstrate it for a surprised but amused Clay when he spotted him in the parking lot of a lakeshore motel.

So delighted was Clay by the impromptu demonstration that he made a date with Nickin for a session of private lessons later in the day. So magic may be the next step in the amazing entertainment career of the versifying versatile champ.

Incidentally, the pictures on this page are proof of the old adage that a photographer should always have a camera handy. Post-Crescent Sunday Editor James Auer just happened to cross the parking lot as Clay and the conjurer were doing their stuff. He whipped out his trusty Leica, and these candid shots are the result.

An Encounter in a Parking Lot . . .

Leaves Cassius Clay an Astonished Champion.

## "ASTRO-GUIDE" By Ceean

Sunday, September 18

**Present—For You and Yours** . . . Discuss children's affairs—school work, hopes, aspirations, etc. The outlook is excellent for domestic happiness and for good relationships with friends and neighbors. News from afar is highlighted during the coming week, so listen for the postman's ring. The business outlook is fine.

### The Day Under Your Sign

**Aries. Born Mar. 21 to Apr. 19** The situation is of your own doing, so don't try to shift the blame to others.

**Taurus. April 20 to May 20** People are more sociable now. This is a fine time to entertain or to go visiting.

**Gemini. May 21 to June 21** Don't take advice at face value. It may be based on misinformation.

**Cancer. June 22 to July 21** Leave speculation to others. Be content with a day's pay for a day's work.

**Leo. July 22 to Aug. 21** The air clears and everything is back to normal at home, lucky for you!

**Virgo. Aug. 22 to Sept. 22** Disturbing influences mar the day, so watch your step wherever you go.

**Libra. Sept. 23 to Oct. 22** You can get up steam now as the day promises to be full of fun and happiness.

**Scorpio. Oct. 23 to Nov. 21** Avoid excitable folk—especially members of the family. Seek calm surroundings.

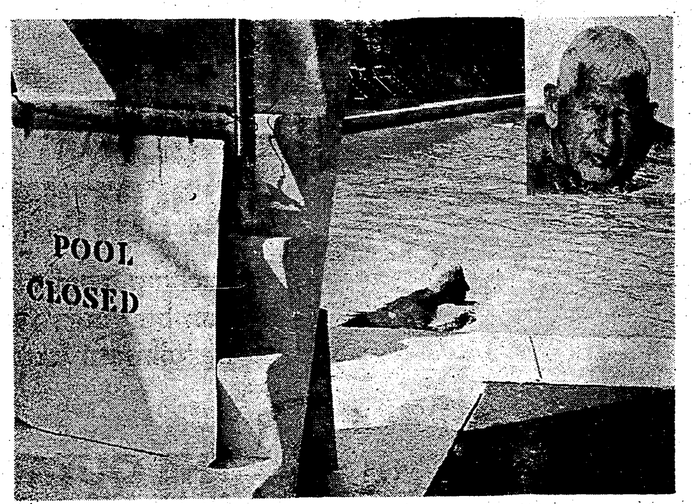

**Sagittarius. Nov. 22 to Dec. 21** Carelessness on your part irks co-workers. The loss doesn't like it either.

**Capricorn. Dec. 22 to Jan. 20** Your melancholy mood will vanish when you meet a favorite person today.

**Aquarius. Jan. 21 to Feb. 19** Keep work up to date as you may want to take some time off real soon.

**Pisces. Feb. 20 to March 20** Optimism is warranted, but mix it with plenty of common sense at this point.

"Miss America Main Street, bounded by Fame and Fortune Avenue," was the home of Miss Wisconsin, Candace Gail Hinz, last week.

The daughter of Mr. and Mrs. Howard Hinz, West Allis, performed beautifully throughout the pageant events.

She had her hair done up in a full top bun for Tuesday night's pageant parade down the boardwalk.

Miss Wisconsin had a better chance than most of the contestants to get acquainted with Atlantic City, because she arrived there Saturday, when only 17 girls were there. She spent much of the weekend resting, and did some sightseeing in a historic resort area at Smithville, N. J., about ten miles from the city.

**Parents Attended**

Candy's parents and her sister, brother and cousin, were in Atlantic City all week, but getting to see them presented something of a problem. The contestant didn't have much free time, and her family couldn't get into the convention hall during the rehearsals. Her mother and sister could visit her hotel room with an appointment, but her father was allowed to see her only in the lobby, chaperoned by a pageant hostess.

Evening gown competition was Candy's competition segment in the opening preliminary pageant Wednesday night. She wore a white silver-quilted brocade gown, lined with scarlet peau de soie. Later during the evening's show, she wore a royal blue coat and white fur hat. In a production number that same evening, she appeared in a stage set and wore a blue ski ensemble.

After the performance Wednesday night, Candy appeared a bit tired, but at ease. "How did the formal interview go this afternoon," I asked her. "All right," she said, "but the informal get-acquainted period with the judges after the formal portion was easier. They asked me deep, serious questions about my art work. I really had to think hard."

Thursday was her day of freedom, to some extent. She rehearsed in the morning for the bathing suit competition scheduled for that evening. In the afternoon, she practiced her piano number for the talent competition. She also got an hour of rest and practiced walking.

**Confident At Rehearsal**

Friday was spent at convention hall, rehearsing her talent presentation for the evening's performance. Final dress rehearsal was held in the afternoon, when she went through her number with the pageant orchestra. She seemed to be confident and played well. That night, she played her selection, "Tara's Theme" from "Gone with the Wind," She performed beneath the full-screen reproduction of the statue of Prometheus.

After the evening competition, Candy fought back her tears. She said she had not done as well as she had hoped. Her eyes were wet and her lips trembled. The hostess whisked her away.

**"Good Luck Doll"**

Virginia Haberman, the Miss Wisconsin pageant producer-director, gave Candy a "good luck rag doll, a friend who nobody can take away," Friday night.

Convention hall was bustling Saturday in preparation for the evening televised Miss America finals. Candy, wearing a dark blue skirt, canary yellow blazer jacket and white ruffled hair net, practiced her walk during the day.

The evening performance was a spectacle of glitter and glamor, attended by more than 35,000 persons.

Now, with the Miss America Pageant over and the Wisconsin crown resting comfortably, Miss Wisconsin is back home. Monday she will be in Oshkosh, where she won the title that took her to national competition. She will open 'Wonderful Wisconsin Week' for Rotary Club members here Monday. The statewide observance has a "We Like It Here" theme. Miss Hinz will be a guest and Jack Erkilla, executive director of the Miss Wisconsin Pageant, the speaker.

Rotarians will be among the first to see the film of the 1966 Miss Wisconsin Pageant made by WAOW-TV, Wausau. Miss Hinz will serve as narrator.

A full schedule of fall appearances for Miss Hinz is already arranged, says Kenneth Seefeld, pageant business manager. She will be at Wisconsin State University-Oshkosh, where she was a student last year, for Oct. 15 Homecoming. The next day she'll be in Milwaukee with Miss America and her predecessor, Miss Sharon Singstock, Oshkosh.

Miss Wisconsin, Miss Candy Hinz, and last year's Miss America, Miss Deborah Bryant of Kansas, chatted during the hectic days of the pageant at Atlantic City.

## Marriage Ceremony Performed

OSHKOSH — Miss Marjorie Soappman and James Edward Hunt exchanged nuptial vows in an 11 a.m. double ring ceremony Saturday at Sacred Heart Catholic Church. The Rev. David Bunkleman officiated.

The bride is the daughter of Mr. and Mrs. Clare D. Soappman, 618 W. Ninth Ave. Parents of the bridegroom are Mr. and Mrs. Lawrence Hunt, 541 W. Ninth Ave.

Miss Carol Frank, a cousin of the bride, was maid of honor. Mrs. Richard G. Hunt and Mrs. James C. Frank assisted as bridesmaids. Miss Diana Ehlke was junior bridesmaid.

The bridegroom's brother, Lawrence C. Hunt, performed the duties of best man, with Richard G. Hunt and James C. Frank as groomsmen. Guests were ushered by Bernard R. Hunt and Francis J. Kosmer.

Hiebel Photo

*Mrs. James E. Hunt*

The bride is a clerk at Piggly Wiggly. Her husband is employed at Heiss Bakery Inc.

After a wedding trip to Canada, the couple will reside at 222A W. 15th Ave.

*Mrs. Denger*

## Promises Given in Ceremony

OSHKOSH — Frederick Melvin Degner, 518 Merritt Ave., claimed Miss Linda Rae Carrick as his bride at 7 p.m. Saturday at Zion Lutheran Church. The Rev. Gerald Nerenhausen officiated at the double ring candlelight service.

Parents of the bride are Mr. and Mrs. Jack L. Carrick, 1029 Otter Ave. The bridegroom is the son of Mr. and Mrs. Melvin F. Degner, Darlington.

The bride chose her sister, Miss Patricia Carrick, as maid of honor. Miss Marie Miller was bridesmaid and Miss Debra Carrick was a junior aide.

Thomas Lloyd performed as best man, while Michael Bailey attended as groomsman.

Guests were ushered by Neil Last and Eugene Klinger.

The bride is with A.R.S. Insurance Co. Her husband, who attended Wisconsin State University-Oshkosh, is a machinist at C M Manufacturing Co.

The couple will reside at 518 Merritt Ave., and will take a wedding trip to California during the Christmas holidays.

## Honeymoon In Canada

OMRO — Miss Gloria Lea Shoquist and Rex O. Wesner, Waukau, exchanged wedding promises at a 2 p.m. ceremony Saturday at Mount Zion Evangelical Lutheran Church, Ripon. The Rev. E. H. Semenske officiated at the double ring rite.

The bride is the daughter of Mr. and Mrs. Ted Shoquist, route 1. Parents of the bridegroom are Mr. and Mrs. Vernon Wesner, P.O. Box 167, Waukau.

A sister of the bride, Miss Curtis Johnson, attended as matron of honor, with Miss Sally Shoquist and Miss Gail Wesner as bridesmaids.

Best man's duties were handled by Curtis Johnson. Dennis Craig and Bradley Wesner served as groomsmen.

Guests were ushered by Russell Shoquist and Terrence Raatz.

After a wedding trip to Canada, the couple will be at home at 40A W. 11th Ave., Oshkosh.

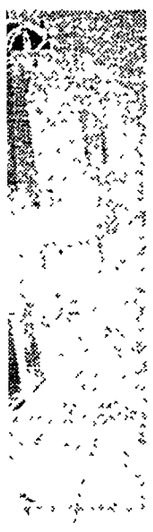

The bride is employed at Harwell Agency Inc., Oshkosh. Her husband is with Leach Co., Oshkosh.

Best man's duties were performed by Donald Bartlett, brother of the bride. Ronald Buehring, Phillip Reinke and George Tipler Jr., served as groomsmen.

Guests were ushered by Jerry Peterson and Edward Flater.

The couple greeted guests at a reception at the Eagles Ballroom.

The bride is employed in the office of Victrylite Candle Co. Her husband, a graduate of IBM Training School, Indianapolis, Ind., is in the Data Processing Department at Wisconsin National Life Insurance Co.

After a honeymoon trip through northeran Wisconsin and Canada, the couple will reside at 7130 Clairville Road.

## WSU-O Tells Homecoming Election Plans

OSHKOSH — Preliminary elections for the 1966 Homecoming Queen and her court will be held this week at Wisconsin State University-Oshkosh. The deadline for all candidates or candidate representatives to file applications is 7 p.m. Monday.

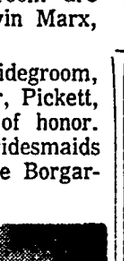

The purpose of the preliminary elections, to be held from 8:30 a.m. to 5 p.m. Thursday, is to narrow to five the number of candidates in each class. The five freshman, sophomore, junior and senior finalists will be introduced at a TGIF "football special" Sept. 30 and will participate in a queen candidates' rally Oct. 10. Homecoming is Oct. 15.

**Voting Schedule**

Final balioting will be held Oct. 10 and 11, with freshmen, sophomores and juniors voting for their court representative. Junior and seniors will vote for the homecoming queen and senior court representative. The senior candidate with the majority of votes will be homecoming queen while the runner-up will be the senior class court representative.

Crowning of the queen and announcement of her court will take place during the homecoming show, featuring the Kingston Trio, at 8 p.m. Oct. 13 in Albee Hall.

NEWSPAPERARCHIVE.COM

An Aerial View Shows Portion of downtown Fond du Lac where planners say redevelopment is needed to help preserve the central core area. Some private and municipal improvements are being timetabled to start in 1967. Major places now in that sector are: (1) Home of the National Exchange Bank which intends to announce new building plans soon; (2) Site of the proposed new bank development; (3) Already remodeled Commonwealth Reporter newspaper building; (4) Fond du Lac Department Store: (5) Blacktopped and landscaped municipal parking lot; (6) Historic county courthouse complex where new addition is being considered; (7) City-County Safety Building with municipally-owned property to the rear. Outlined is the block which planners say is an ideal target for urban renewal and private construction projects. Dotted line shows alleyway which will eventually have to be vacated once the project gets under way. (Post-Crescent Photo by Doug Koplien)

# New Bank Seen For Fond du Lac

## May Set Off Downtown Revitilization

FOND DU LAC — Architects are preparing plans for what is expected to be a new multi-million dollar National Exchange Bank building development in the downtown core area.

While there has been no formal public announcement of the bank's future plans, the contemplated project represents one of several which may become a reality here in 1967.

City officials have been working quietly behind the scenes to cooperate with the bank and other commercial-retail entities which have indicated interest in projects that could result in marked changes in the down town skyline.

Along with cooperating with National Exchange Bank officials, the city has also been laying the groundwork for future urban renewal-private investor developments — all related to revitalizing the central business district.

**Strip-Type Retail Area**

Fond du Lac, like Appleton and several other Wisconsin cities, has a central city strip-type retail area which is being threatened by shopping centers sprouting up at its borders.

And comparable to Appleton where the three major banks have constructed new buildings within the past four years downtown, the two banks here are breaking the ice when it comes to giving Main Street a major facelifting.

The First Fond du Lac National Bank in the heart of the business district at 55 S. Main St. has already launched an ambitious new building program and is presently occupying the old Vocational School building purchased from the city.

A signal that plans for the National Exchange Bank project are being finalized was the request to the city council last week to vacate a portion of the alley between S. Main and S. Macy Street, south of W. Second St.

**Purchased Property**

Attorney John Tonjes, a bank director and its legal counsel, said the alley vacation would be required for a bank drive-in window type operation.

The National Exchange Bank, located on the ground floor of a seven-story office building at 104 S. Main St., has purchased property a block to the south

# County Expects Higher Interest Rate On Bond for Airport

## Winnebago to Open Bids for Financing of Expansion Project

OSHKOSH — Winnebago County officials will find out Thursday morning the extent of current tight money policies on county financing when they open bids for $933,000 in general obligation bonds for Winnebago County Airport expansion.

Experience of other municipalities across the country on recent bond issues has been an increase in the interest rate they have had to pay. This increase has been as much as 1.5 per cent above previous bond issues.

Fox River Valley communities have generally been successful in selling municipal bonds in the past for between 2.9 and 3.1 per cent. In view of recent experience, however, a 4 per cent rate should not be considered too unexpected.

**Cost to County**

The main concern, however, is how much this higher interest rate would cost the county. Depending on how much higher the interest rate is, the additional cost to Winnebago County could approach $100,000 over a 20-year period.

Bids on the bonds will be opened at 10 a.m. Thursday.

William Morris, executive director of the Wolf River Basin Regional Planning Commission, will present a proposal to the county board for the preparation of a comprehensive area plan in Winnebago County to study water and sewer systems in communities of less than 5,500 population.

Winnebago County will be asked to provide $17,249 for the Wolf Basin commission to conduct the study.

The study is a requirement under the federal government's Farmers Home Administration act which could provide federal assistance to these communities for the improvement of water and sewer facilities.

**Two Resolutions**

Two other major resolutions will be offered Thursday morning. The first is for renting three business machines from the Oshkosh Board of Education to process county payroll records and affiliated reports.

Cost of the rental is $60 a month for a key punch machine, $90 a month for a calculator and $6 per hour for an accounting machine and its operator. Funds had been included in the 1966 budget for this purpose.

The second resolution is for creation of a Winnebago County mental health and mental retardation planning committee to study and coordinate needs and existing programs in the county.

The resolution originally had been presented to the county board at its July meeting, but

# Tour Set for Winnebago Supervisors

## Airport, Sanatorium Expected to Take Up Much of Day

OSHKOSH — Winnebago County Board members will make their annual trek Wednesday to inspect county-owned facilities.

Two sites are expected to occupy most of their time and interest.

The first is the new Pleasant Acres Home under construction and the second is the area into which the county airport will be expanded.

Most of Wednesday morning will be spent at Pleasant Acres and Sunnyview Sanatorium, after a brief stop at the fairgrounds.

**Nearing Completion**

The 250-bed Pleasant Acres Home is nearing completion and is expected to be ready for occupancy soon after Jan. 1. Supervisors also are expected to inspect existing buildings now used in conjunction with the present Pleasant Acres Home to determine which, if any, can be salvaged for other use.

The airport will be the first afternoon stop, with inspection of the expansion area and County Trunk X and Ripple Road, both of which are slated to be closed.

Other features to be inspected in the afternoon are the Eureka boat landing, Poygan campsite, proposed 1967 road construction and the county park at Winneconne.

### Budget Requests Being Tabulated

# Winnebago Costs Increase

OSHKOSH — Winnebago County residents can expect to pay more for the operation of the county in 1967, according to preliminary budget estimates being submitted to M. H. Morrissette, County auditor.

All of the department budgets were to be submitted to Morrissette by last Thursday, however, several have not been completed.

The proposed department budgets will be turned over to the finance committee for tabulation and an accuracy check.

All of the operating budget requests are up over 1966, Morrissette said, due mainly to salary increases. How much the total budget will be up a great deal on how much county wants to spend for capital improvement items during the next year, he added.

**Two Major Items**

Two major items, under consideration, air conditioning for the courthouse and purchase of new right-of-way for State 26, have not been put into the budget requests.

Air conditioning costs run from $60,000 to $140,000, depending on whether the county wants the present "cooling system" reconditioned or a central air conditioning unit installed.

Supv. Floyd Shurbert, (Town of Algoma), chairman of the special remodeling and alterations committee, said his committee has not been satisfied with the air conditioning cost estimates. "We are still studying the possibilities," he said. "If a realistic figure is submitted we still can ask for funds in the budget right up the last minute."

The highway right-of-way is the result of plans to close State 26 for airport expansion. The State Highway Commission suggested the county purchase the new right-of-way next year, before the area builds up. No acquisition cost estimates have been made.

A major salary item also is missing from the preliminary budget requests. Negotiations are still in progress with county hospital and highway department employe unions and it is doubtful that agreements will be reached with the two locals before the budget is completed.

In the event contract agreements are not completed at the time the budget is up for adoption, an employe salary appropriation will have to be estimated.

Morrissette said he is now attempting to determine the amount of surplus from this year. Surpluses develope when departments do not spend all of the money which they budgeted. The left-over funds then go into the general fund.

# No Limit Set for Campaign Backing

## Candidate Allowed Only $400, Winnebago D. A. Fink Rules

OSHKOSH — There is no limit to the amount of money which may be spent on a political campaign. The only limit on spending is the amount which the candidate himself, or his political committee may spend.

This explanation of state election laws was offered by Winnebago County District Attorney Thomas Fink after the question was raised in reference to expense statements filed Sept. 6 by the First Assembly District GOP primary candidates.

The question of limits on spending was asked of Gov. Warren Knowles last Monday on radio station WOSH's Public Opinion program. The governor confirmed that the statutes limit an assembly candidate to $400 in campaign expenses. The questioner had quoted last Sunday's Post-Crescent story which reported preliminary campaign expenses of $739 in behalf of Wallace Zahn and $449 in behalf of Jack Steinhilber.

Of these totals, Zahn spent $169 himself and Steinhilber spent $27. The rest was spent by committees supporting those candidates. The totals also only represent a portion of the total expenditures. Final expense accountings must be reported this Tuesday.

State election laws, which are among the most confusing in the statute books, have four sections which pertain to campaign expenses. One section specifies the maximum amount which a candidate or his personal committee may spend in an election campaign for a particular office.

In the case of the state assembly, the maximum amount is $400.

The other sections refer to spending by campaign committees. In this case, the typical committee, generally a "Citizens for. . ." committee, is not bound by a spending limit.

The requirements are that the committee register with the proper authority, in this case the county clerk, and that it file a report of all receipts and expenditures one week before and one week after the election.

The statutes governing the amount a candidate may spend has been on the books for many years and there was a test case in its early days, Fink said. In that case the State Supreme Court ruled that the limits pertained only to the candidate and his personal committee and not to the "citizen" type committees.

A personal campaign committee has been defined as being a person, or persons, specifically designated by the candidate to handle his campaign expenses. This type of committee has rarely been used in local elections in this area.

In last Tuesday's primary race for the assembly, Steinhilber and Zahn were limited to spending $400 themselves but the "Zahn for Assembly" committee and the "Citizens for Steinhilber" committee were not bound by these limits.

## Plan for New Office Building to be Heard By Board of Appeals

OSHKOSH — Morgan Company officials will go before the municipal board of appeals here Monday with plans for a new home office building to be constructed on West Sixth Avenue and Oregon Street.

The board will be requested to grant a variance of the standard 10-foot setback from the avenue because plans allow only five feet of setback.

Called for 4 p.m., Monday, the board of appeals' meeting will have two items on its agenda, in addition to the Morgan office building, according to William R. Lovelace, secretary.

Andrew Kallas, 1305 National Ave., is seeking permission to operate a mail order business as a home occupation in an R-LB zone. Literal enforcement of the zoning ordinance, Kallas said in his appeal, would cause extreme personal hardship since he is a homebound disabled person.

George Sosinski, 1532 Maple Ave., proposed an addition to his house which would require a variation of the required 7.5-foot side yard to four feet.

# Rights Council To Hear Steiger Talk at Oshkosh

OSHKOSH — The first fall meeting of the Oshkosh Human Rights Council will feature a talk by Assemblyman William A. Steiger when it convenes at 7:30 p.m. Tuesday at First Presbyterian Church.

Dr. Martin Gruberg of Wisconsin State University-Oshkosh is president of the organization.

He said the Oshkosh Human Rights Council was organized in 1964 by some 40 teachers, ministers, businessmen and others as a "way to bridge barriers to intergroup understanding." Dr. Roy Robinson was its first president.

The Oshkosh council is one of similar groups organized throughout the state. A Governor's Commission on Human Rights assists local groups in their work.

It's the First Bullet That counts in any encounter with the fierce Cape buffalo of Mozambique, according to Kenneth Spatt, Oshkosh, who will hang this speciman's head in his trophy room. The nearly 2,000-pound animal was one of two Spatt felled with alternate shots. The picture is from his photo record of his safari.

### Three Weeks in African Bush

# Oshkosh Hunter Realizes Safari Dream

BY EDITH BOCK
Associated Press Writer

OSHKOSH — A dream that began in grade school for Kenneth Spatt, 1116 Indian Point Road, grew into the reality of an African safari last month.

Spatt, a 36-year-old therapist at Winnebago State Hospital, returned last week from Mozambique, Africa, bone tired and "almost satisfied" after three weeks in the bush.

Some 10 selected trophies of his skill will follow him home for display in his basement game room.

What most people consider a "millionaire's vacation" was his after three years of planning and saving, half a lifetime of dreaming, and a wife who implemented with enthusiasm.

He killed two cape buffalo, both while they charged him. He watched a trophy lion lope past and never found another to match his magnificance although many roared around his camp at night.

**Experienced Thrills**

He experienced the thrill of beinging down a sable and a kudu, and tested his skill and courage in the face of primitive danger. There were nights of waiting and watching at baited water holes. There were early mornings and late afternoons in the dust and the heat with the excitement of safari hunting.

Spatt's romance with Africa and the safari began with Theodore Roosevelt's book, "African Game Trails," a tale which fired his imagination and kept him from geography because it fit neatly behind that large text book.

He dreamed of the bush and of lions while he plinked away at squirels near his Oshkosh home.

The dream got sidetracked for awhile, Spatt said. There were three years with the Army in Hawai, there was marriage and a job and two children, a son, now 9, and a baby daughter. Spatt hunted in Wyoming on horseback and in Canada. The dream of Africa began to build despite the deer and moose racks on the wall.

Three years ago he began planning in earnest, saving with his wife's help for the African trip, working holidays and off-days to add to his vacation funds. He said Dr. James Payne of the hospital staff helped with the planning. A travel agency made the arrangements he requested.

He carried 26 pounds of guns, w3ua Browning .338 magnum and a Witherby .257 magnum), 13 pounds of ammunition, and his hunting clothes when he left by plane for Lisbon, Portugal, Luanda, Angola, and Beira, Mozambique. He made a side trip to Salisbury, Rhodesia, while waiting four days for his credentials to clear.

Spatt said he selected Mozambique because relatively stable political conditions in that Portugese colony, comparatively reasonable costs of hunting licenses and permits, its air accessibility, and good lion kill statistics.

He paid $106 for a 30-day hunting license and an additional $13 each for licenses to hunt lion and leopard. The safari cost $3,000 for 30 days.

Spatt prefers to hunt alone. His safari included a "white-hunter" and his apprentice. A dozen native Mozambique were servants, skinners, gun bearers, and trackers. A camp lion caller added his special skill to the group.

A slow 10-hour trip, mostly over dirt roads, brought Spatt to the first camp in the Zambezi River basin. This was dry country and Spatt said clouds of dust followed the Land Rover and enveloped it at every stop.

He hunted the wary and

Turn to Page 8, Col. 7

Spatt, an Industrial Therapist at Winnebago State Hospital, examines the sable he bagged while on safari. Its 40-inch horns make it a trophy of which any African big game hunter can be proud. His gunbearer shared in the excitement.

# Titans Drop Opener 14-7

## La Crosse Intercepts 3 Passes; Falaschi Scores Winning TD

BY DON CASTONIA
Post-Crescent Staff Writer

OSHKOSH — Three pass interceptions, one in the final two minutes of play, killed Oshkosh State University hopes of an opening game win as La Crosse State University edged the Titans, 14-7, in the State University Conference opener for both teams.

Ed Cretens picked off a Larry Cramberg pass on the La Crosse 5-yard line with just 1:58 remaining to end Oshkosh hopes. The Indians then ran out the clock. Barry Schockmel ended an early Oshkosh drive, intercepting a pass on the 7-yard line on the second play of the fourth quarter. Oshkosh had driven down to the La Crosse 20 in both instances.

La Crosse quarterback Rocky Falaschi kept Oshkosh off balance most of the game with his rollouts off the belly series, gaining 64 yards rushing, including an 8-yard scamper with the winning touchdown in the third quarter.

### Titans Slowed

The Titans ground game was slowed considerably in the second half when full back Myles Strasser was injured. Strasser had bulldozed for 54 yards in the first half before leaving the game with a foot injury on the last play of the half.

The Titans had started strong, scoring the first time they had the ball but then lost their spark until the final quarter, when it was too late.

After forcing a punt following the opening kickoff, Oshkosh took over on its own 24 and marched 76 yards in 14 plays to score with Ned Gatzke taking an 11-yard pass from Cramberg for the touchdown. Cramberg added the extra point.

### March 71 Yards

La Crosse was contained until midway through the second quarter. Starting on their own 29, the Indians marched 71 yards in eight plays with Warren Baer going the final five yards. Dan Meinert added the first of two extra points.

Falaschi was the big thorn in the drive, gaining 16 yards on three keeper plays and passing to Grady Steensrud for 27 more yards.

A good punt return by Steensrud to the Oshkosh 44 set up the second La Crosse touchdown in the third period with Falaschi going the final eight yards on a roll-out.

Oshkosh's last-ditch effort started on its own 16. The drive appeared doomed before it got moving when Cramberg was forced to punt after the first series of downs. However, La Crosse was detected holding, giving Oshkosh a first down on its 36.

Cramberg promptly connected with Greg Carlson for a 17-yard gain to the La Crosse 47. After three running plays moved the ball to the Indians' 32, Cramberg passed to Ron Hayek for 11. A running play picked up two more and then the interception ended Titan hopes.

Steensrud's punting also kept Oshkosh in the hole much of the afternoon. He punted out of bounds inside the 1-yard line in the fourth quarter and had punts roll dead on the 5- and 16-yard lines in the third and fourth periods.

# Iowa Makes Nagel's Debut 31-20 Success

## Podolak Scores Twice Against Arizona Gridders

IOWA CITY, Iowa (AP) — Iowa unleashed a balanced running and passing attack coupled with an at times stingy defense and made new coach Ray Nagel's debut a 31-20 success over Arizona Saturday in an intersectional football battle.

The Hawkeyes, loaded with sophomores and inexperienced players, showed surprising poise in hammering through the Wildcats' rather weak line for touchdowns two of the first three times they had the ball.

Quarterback Ed Podolak, a sophomore, directed the attack two-thirds of the way and wound up plunging over for two touchdowns himself and passing for another.

Iowa's other quarterback, junior Chuck Roland, who saw only limited service a season ago, scored the other on a seven-yard scamper in the third quarter.

The triumph snapped an eight game losing streak for the Big Ten's cellar dwellers of last season.

*Arizona didn't get hot until after the game had already* been decided. The Wildcats, who had difficulties on the ground, were successful through the air in the fourth quarter.

Reed drilled a 23 yard pass to halfback John Greth climaxing a 75-yard march that began in the closing seconds of the third quarter.

After the Hawkeyes' Bob Anderson had kicked a 22-yard field goal with 5:23 left, a series of short Reed passes, mostly to Greth, carried Arizona to the 29, where Brad Hubbart broke around left end and raced for the touchdown.

Only 12 seconds remained when Reed fired a 20-yard strike to halfback Paul Wargo for the final score.

Dick Bunda (Left), Oshkosh High School cross country coach, is shown with his co-captains, Craig Preston (center) and Larry Clark. The Indians open their season Wednesday. (Post-Crescent Photo)

# New Officers For Oshkosh Yacht Club

OSHKOSH — A sure sign of fall and the end of the sailing season here is installation of officers by the Oshkosh Yacht Club on Cup Night.

Held recently at Oshkosh Country Club, the 1966 Cup Night saw installation of Donald Stoll as commodore with Richard Meyer as vice commodore, Mrs. Jerry Hale as secretary and Mrs. Lincoln Foster, treasurer.

Robert McGuire was named to the board of directors to serve with Jack Haverty and Vernon Frohrib.

Skippers ending the season as class champions were Jack Schloesser, Class E; Tom Meyer, Class M senior, and Jud Hirschberg, at 14, the youngest skipper ever to win the club's Class M junior award. His older brother, Larry, was awarded the club trophy as best crew.

Other trophies presented on Cup Night included the most improved skipper award to Tom Hyde and the outstanding sailing school sailor award to Jack Young.

# OHS Harrier Team Set for First Meet

## Clark, Preston Head Promising Nucleus for '66

BY JUDY RUSSELL
Post-Crescent Staff Writer

OSHKOSH — A senior who is one of the most versatile runners in the state and a junior who could be one of the outstanding distance runners in Wisconsin will lead the Oshkosh High School cross-country team into action this week.

The two are Larry Clark and Craig Preston, co-captains of the 1966 harriers. Coach Dick Bunda expects them to give the Indians "a good 1-2 scoring punch. If we come up with three more runners who can score low we could be fairly tough," he predicted.

Clark, top scorer last year when the Indians split eight meets, is rounding into fine shape, but Bunda expects Preston to try to "beat" his teammate this year. The sparkling junior, who runs the mile, finished third in the Fox River Valley Conference in 1965, setting a school record.

Another returning varsity letterman, Ted Duex, shows good promise and should push Preston, according to Bunda. Duex is the brother of Tim Duex, Wisconsin State University-Oshkosh cross-country and track ace. Other varsity lettermen back are Bill Cochran, Jon Wolfgram, Brian Moushey and Jim Hoffman.

Cochran and Wolfgram ran on the varsity track team. Moushey came out late but has "outstanding ability and was a top runner last year," the mentor remarked.

### Relay Team Stars

Hoffman and Clark, members of the track squad, both ran on the state record-breaking mile relay team, unofficially clocked at 50 seconds flat for the quarter-mile.

Junior varsity runners back are Doug Becker, Tom Paffenroth, Dave Wills, Mike Sewall and Steve Streblow. Juniors and seniors out for the first time are Terry Henkel, Mike Sheppard, Terry Dahms, Bob Bartelt, Tom Uvaas, Gunner Naslund and Larry Stenerson.

*New boys out from the sophomore class include* Randy Hansen, Jim Streblow, Tom Mulloy, Jim Cochran and Bob Redemann. Bunda said that Cochran and Redemann could develop into fine distance runners. Both broke records in the 880-yard run during the city track meet in the spring.

The varsity and jayvees open the season at 4:15 p.m. Sednesday when they play host to New London. The rest of the schedule is: Sept. 23, practice meet with Albany High School here; Sept. 27, Quadrangular meet here with Berlin, Manitowoc and Plymouth; Sept. 29, Menasha and Kimberly here; Oct. 3, Sheboygan North and South here; Oct. 5, at Appleton; Oct. , Manitowoc-Two Rivers Invitational; Oct. 10, Beaver Dam Invitational; Oct. 15, conference meet at Appleton; Oct. 17, Kaukauna here; Oct. 22, sectional at Wausau, and Oct. 29, state meet at Hartford.

# Kaat Posts 24th Victory as Twins Beat Yanks, 4-2

NEW YORK (AP) — Jim Kaat scattered seven hits, joining Sandy Koufax as the only 24-game winners in the majors, as Minnesota defeated the New York Yankees 4-2 Saturday.

Kaat, who lost 10, singled during a four-run Minnesota uprising in the sixth that put the game out of reach. Ted Uhlaender scored the first run on a wild pitch, two more scored on a ground rule double by Rich Rollins and another on Earl Battey's single.

Fifth Year at Viking Helm

# Winnebago Lutheran Grid Coach Optimistic

FOND DU LAC — The coach of the Winnebago Lutheran Academy Vikings here has an optimistic outlook toward the 1966 grid season, with two games already under the Viking belts.

He is depended on the arm of his quarterback, Maury Picchiottino, a junior, who led the team last year. On the receiving end of Picchiottino's passes will be Rueben Ruch, a senior halfback, Randy Westphal, a senior end, and Glen Bechlar, a senior flanker back.

Coach R. A. Spangenberg, who is entering his fifth year as the Viking mentor, indicated that interior offensive line strength and depth will be the team's main weakness.

### Veteran Center

Leading the line will be veteran senior center Ken Dins. The guard and tackle spots are still open with as many as four men vying for each position.

Defense will be the byword in the Viking camp this year especially with outside linebackers, halfbacks and ends. Early season play has indicated that the Viking ends will be hard to crack.

Spangenberg said he plans to stick to the basic 6-2-3, 8-3, and 5-4-2 defensive formations.

With only 29 men turning out for the 1966 season, nine of which are returning lettermen, Spangenberg said the football "savvy" is finally getting through to the players. Last year the Vikings ended the season with a 2-5 record.

The Fox Valley Tri-County league which includes teams from Green Lake, Fond du Lac and Dodge county, will be well balanced this year, he predicted. "The top team at the end of the season will have lost at least one game," he said.

He picked defending champion Lomira, Brandon and Rosendale as possible league winners. He did not discount the possibility of the Vikings being among the top teams.

The remainder of the season will have the Vikings playing at Rosendale, Sept. 23, but returning to their home field on Sept. 30 to take on Reeseville for the Academy Homecoming. They will meet champion Lomira on Oct. 7 at Lomira, and the next two games will be on their opponents home grounds on Oct. 14 and Oct. 21 when they will meet Green Lake and Brandon on those respective Fridays.

# St. Norbert Wins Over St. Cloud '11'

ST. CLOUD, Minn. (AP) — Tom Schoen of St. Norbert College blocked three St. Cloud State punts and St. Norbert turned them into two touchdowns and a safety Saturday, as the De Pere, Wis., school notched a 20-7 victory.

Scoring for the victors were Schoen, a defensive end, on the safety, Dave Schoenwetter from the one-yard line and Dick Hilger on a ten yard pass.

John Thienlen scored St. Cloud's only touchdown on a two yard plunge.

## Steelers' Hoak May Miss Today's Game

PITTSBURGH (AP) — Pittsburgh Steeler halfback Dick Hoak was hospitalized Saturday with what was diagnosed as acute intestinal upset and will probably miss today's National Football League game here with the Detroit Lions. c

The Steelers said Hoak would be replaced by Jim (Cannonball) Butler or Bob Smith.

# Ninth Grade Grid Season Opens Soon

## Expect Over 200 to Compete in Oshkosh Junior High Program

OSHKOSH — Approximately 200 boys are participating in the ninth grade football program this fall, according to John Nevers, director of the Department of Health, Physical Education and Safety for the Oshkosh Area Public Schools.

The six-game slate for ninth-graders gets underway at 4 p.m. Thursday when Webster Stanley meets South Park-Roosevelt at South Park and Merrill faces the Lourdes freshmen at Lourdes. The following four weeks will feature play on Thursdays also, with the final games set for Wednesday, Oct. 26.

South Park-Roosevelt and Lourdes are the defending co-champions, having completed 1965 action with 4-2 records. The former team will be coached by Marty Anderson of South Park and Lowell Johnson of Roosevelt, while Lourdes will be directed by Ralph Nielsen, assisted by Chuck Morrill.

Other coaches for the 1966 campaign are Jim Bruins and Asst. Walter Pollex, Merrill, and Roy Clumpner and Asst. Chuck Neuser, Webster Stanley.

Eight-minute quarters will be played with 10 minutes between the second and third quarter. All games will start promptly at 4 p.m. and in case of inclement weather will be canceled by 1 p.m. the same day. All contests will be played under WIAA and Oshkosh Junior High School rules.

## Packy Paquette Out for Season

SUPERIOR (AP)— Superior's Packy Paquette, who was recently named Associated Press Wisconsin high school football "Player of the Week," will be out for the rest of the season after suffering a broken ankle bone Friday night while Superior defeated Bloomington, Minn., Lincoln, 27-0.

Paquette, a 6-foot-1, 185-pound halfback, scored one touchdown and passed for another before being injured in the second quarter. In the first three games this year Paquette, a senior, had scored eight touchdowns.

Oshkosh Sports Safari

# Bottle Caps Proving Kids' Status Symbols

BY TIGER BROOKS
Post-Crescent Staff Writer

OSHKOSH — It's status symbol time for Oshkosh kids again. Status in the neighborhood these days is measured by the possession of coveted bottle caps lined with football players' muscled facial features.

Whether it ranks ahead of, or behind, Stingray bikes in image-building is debatable but it's a close race. Of course, if you're related to Vince Lombardi or if Jim Taylor is your uncle, you can join the "upper upper echelon" even if you DON'T have any caps.

A stray, unclaimed cap of the football variety can turn a normal, friendly child into an obnoxious little demon as he fights for possession of the item that spells "s-e-c-u-r-i-t-y." Would you believe security is a lumpy bottle cap in your pocket?

To be really secure, you arm yourself with a magnet and at least eight or 10 cap sheets and go out into the nooks of the city where pop machines are located. If this doesn't work, you lie on the floor and scream when your mothers walks by the beverage section at the supermarket or when father refuses to drink anything but malt beverages while watching television.

### Position to Bargain

The more caps, the more security — you are now in a position to bargain with the other sharpies in the block who might need just one Zeke Bratkowski to complete a set (and you have Bratkowskis to spare in your secret hiding place).

Or you might be in a position to trade six or seven bleary-eyed players for one that is particularly hard to get. Every year there's one of these guys, the elusive NFL All-Star who only shows up after you're bloated from drinking 200 bottles of pop.

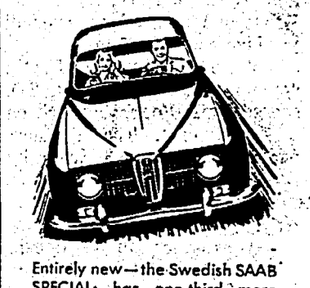

According to an authoritative juvenile source, the elusive player this season is Tucker Frederickson, a back who plays with the New York Giants — or at least a back who USED to play with them. Now he's injured and his only claim to fame in 1966 may be that he was the guy hardest to find on a bottle cap!

The pop company has an "out" when unfortunate things like this happen. On the collection sheets, in fine print, is the following note: "Players, team assignments and positions were accurate as of date of printing." Well, players come and go and three of the Packers went — Lloyd Voss, Ron Smith and Rich Marshall. All three are included in this year's cap collection.

# Fond du Lac on Threshold Of Inner Core Development

CONTINUED FROM PAGE 1

for its proposed major development.

Located at the southwest corner of S. Main and W. First Streets, the brick building was constructed in 1923, the same year as the Retlaw Hotel.

It was owned by a New York firm as an investment property with the bank having a long-term lease on the ground floor which has two levels.

In 1964 the building was purchased by the First National Casualty Co., an insurance firm which originally occupied a few offices and then took over an entire floor. The firm's home base is now Fond du Lac.

**Law Office Building**

One well-known Fond du Lac law firm is expected to make an announcement soon that it intends to construct a new bi-level office building.

Bank officials acknowledge they intend to build and will be moving within a year, but at this point they say it would be premature to elaborate on actual building plans until they are completed.

Triggering speculation the entire block bounded by S. Main, W. Second, S. Macy and Court Streets has been singled out for more than just a new bank building was a side remark by Tonjes that it may become necessary to eventually vacate the entire alley (Second to Court Streets).

The block-long alley splits a section where there are several old and some vacant buildings, making that area ideal for the kind of urban renewal City Manager Henry Buslee and the city council say will be undertaken.

**Corporate Changes**

There have been recent corporate changes at the National Exchange Bank with William A. Sanders elevated to the position of board chairman, and Herbert Niederehe succeeding him as president.

In addition, it has been learned a wealthy, retired Fond du Lac businessman has disposed of his bank stock and the Elmer Stone family, prominent in the Green Bay area, has bought in heavily.

Observers in Fox Valley banking circles believe the National Exchange bank — smaller of the city's two banking institutions — is charting a more aggressive course.

It has merely been a tenant in the tall office building bearing its name.

**Chartered in 1933**

The bank was chartered in 1933 but is a youngster compared to the First Fond du Lac National which has been doing business since 1855. The former was founded by the Perry family with Jerome W. Wolff now its president.

At the beginning of the 1966 calendar year, according to the Wisconsin-Upper Michigan Bank Directory, the National Exchange Bank's capitalization was $400,000 and it had a $700,000 surplus while undivided profits and revenues amounted to $739,250. The bank's cash reserve was $739,250 and deposits amounted to $23,628,082. Loans and discounts totaled $9,037,808.

The Dec. 31, 1965 report of the First Fond du Lac Bank showed a $1 million capitalization; $1 million surplus; $531,116 in undivided profits; $3,342,455 in cash and revenues, and $33,981,257 in deposits.

**Development Authority**

An indication that more downtown projects are being planned — tied in with the central business district plan recommended by a professional planning firm — is creation of an urban renewal development authority by the city council, and formation of a citizens' advisory committee.

Indicative of the city's future plans to get into urban renewal is the keen interest shown by Buslee and councilmen in such programs. Recently, they made a trip to Green Bay and discussed that city's 12-block renewal project which is scheduled to get underway soon in the central business district.

In addition, the Department of Housing and Urban Development (HUD) has given formal approval to Fond du Lac's community improvement program using public and private resources for urban renewal. The certification did not constitute approval of any specific aid.

A recommended physical plan for the "new" downtown (A phase of the comprehensive plan being prepared now under a Federal 701 grant) has been in the hands of city officials and local planners for several months.

**Core Renewal**

City planners and engineers, it was disclosed, have been working up potential renewal projects in the core area, taking into consideration and evaluating a number of possible expansion or new building plans submitted by local businesses.

Rearranging of a few core area streets may be required to meet the needs of prospective builders.

It is significant, also, that the city has adopted a tax freeze ordinance (the only community to do so outside Milwaukee) but has given no indication as to whom, when and where.

Future private and public projects in the downtown area have been discussed by Buslee and the council during executive sessions. A proposed department store complex has reportedly been given more than casual mention.

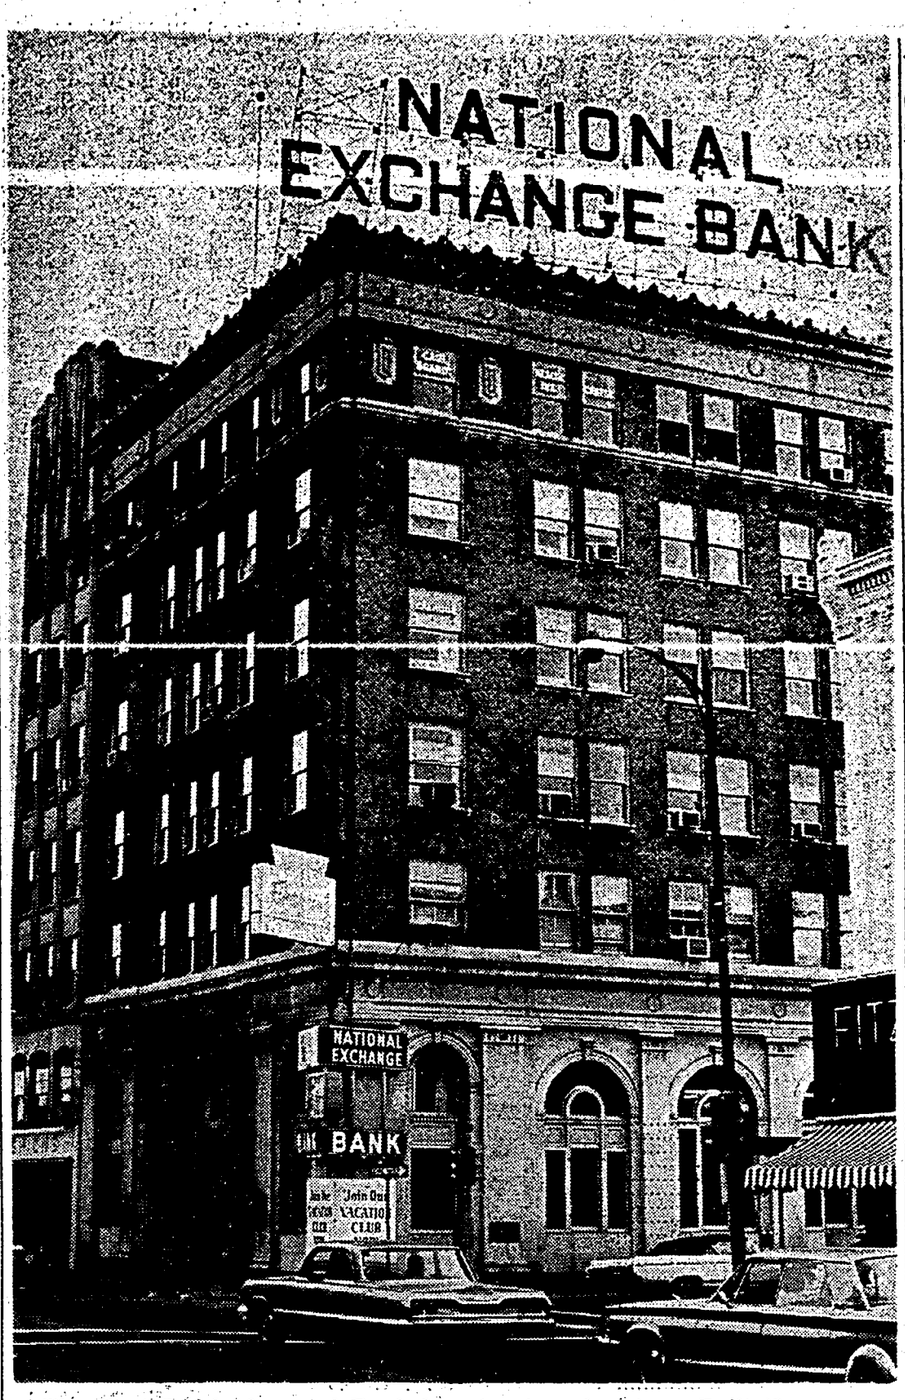

**Other Expansions**

Under urban renewal the city, with federal funds, would buy up old properties through the Redevelopment Authority, raze antiquated buildings, clear the sites and then sell them at reasonable price to private investors who would erect new buildings.

In the meantime, Marian College is engaged in a multi-million construction program at the eastern city limits, and additional activity appears in the making on the far northwest side where the H. C. Prange Co. recently opened a shopping center.

Practically across the street from Prange's is a 10-acre tract in the city which the General Property Development Co. of Detroit — also active in recent months in other Valley cities — wants rezoned to construct a proposed $2 million complex, including a large department store.

Thre is evidence big things are and will be taking shape here, and as Buslee said at a recent civic group luncheon "Things are happening so fast for us it is hard to keep up with current events as they appear."

**The First Level** of one of Fond du Lac's biggest buildings at Main and First Streets has been occupied since the 1930's by the National Exchange Bank which plans to construct a new building elsewhere downtown. Built 43 years ago, the building is owned by First National Casualty Co., a locally headquartered firm. (Post-Crescent Photo)

# Oshkosh Hunter's Dream of A Safari Becomes Reality

CONTINUED FROM PAGE 1

speedy nyala, kudu, and impala at this location. "If you miss, like I did the first time, there's no other chance at that animal," he said. He describes a kudu with 56-inch horns which he missed on his first shot in Africa.

It was at this camp that he saw "my trophy lion" running. Lopes had already explained that a lion shot must kill so hunters wait for a quiet target. Wounded beasts are dangerous and must be tracked.

Teased and Tantalized

Spatt wanted a lion. He said their roaring around camp to the lion caller's art kept him teased and tantalized. He hunted such long hours he was exhausted in three weeks. The hot, dry days cracked his lips and nose. He shivered through low night temperatures.

Twice, Spatt said, he saw young lions with their mates, once at 35 yards, but he didn't shoot. "You know the difference between the lion you want and the one you don't," he commented after describing the "king" he saw in action.

The safari moved camp after a week, going farther into the Zambezi Valley where water holes attracted a variety of game animals. Here were the fast and dangerous sable, the reedbuck, and the cape buffalo.

Spatt talks of the "toughness" of the wild animals, and their incredible fighting spirit. A 125-pound reedbuck was still fighting after taking some four tons of impact from two bullets, he said.

Thrilling Experience

His most thrilling experience was the day he baged two cape buffalo, animals his white hunter classed with lions, elephants, leopards, and rhinos as the five most dangerous in Africa. The second animal weighing 2,000 pounds was not 15 paces from him, Spatt said, when dropped.

"I wasn't scared until it was over," Spatt recalls. "I'm glad I had the experience, but I wouldn't want to do it again."

His third cape buffalo was killed at night when it left a herd while Spatt and his party were waiting at a baited water hole for lion.

The carcass was covered with thorn bushes and left as an attraction for lion. He counted 27 hyenas feeding on the carcass the next night. Later, the location was cleaned even of bones, an example of the African waste disposal system of hyena and vulture.

On the hunt, Spatt rode a high seat in the back of the Land Rover for a wide view of the terrain. Game spotted some 1,000 yards away signaled the start of a footstalk. He hunted generally from about 5 to 11 a.m., returned to camp by 2 p.m. and was out again by 4 p.m. to hunt until 9:30 p.m. or later.

**Worked Too Hard**

He says he thinks now that he worked too hard in his pursuit of a lion. The extremes of climate and the long hours were tiring. Safari amenities were luxurious, however. There was warm water for showers, a man to clean the guns, and even one to inspect the beds for snakes.

Taken altogether, Spatt said, it was a satisfying experience for a dream come true although he is sorry there isn't a lion in his bag.

He said he thinks his big game hunting is over for awhile at least, "but I've always wanted to get the three bears, a grizzly, a brown, and a polar bear." Spatt said hunting in Alaska will cost more money than his African trip, and so far is just a thought for the future.

Trophies coming home to Oshkosh from Africa for the Spatt household are two buffalo, an oribi, two reedbuck, the horns of two hartebeest, an impala, nyala, sable, and a zebra.

Daily distribution of a fresh kill to neighboring villages gave Spatt an opportunity to see the Mozambique ways and a society struggling for fire and water to survive. He talked in Salisbury of the emerging African nations with men from both north and south Africa. He learned of chronic guerrilla warfare in Mozambique and experienced military security at Luanda airport for trouble he never learned about.

# Court Hearing Tuesday On Milk Pricing Suit

### Injunction Filed Against Freeman by PMP, Fond du Lac Farmer Charges Illegal Action

FOND DU LAC — A hearing is scheduled for Tuesday in Federal Judge John W. Reynolds' court on an injunction filed against Secretary of Agriculture Orville Freeman by a Fond du Lac farmer and the Pure Milk Products Cooperative here.

The injunction, filed Sept. 1 in the U.S. District Court of the Eastern District of Wisconsin, contends that Freeman took illegal action last April when he placed a 24-cent per hundredweight price reduction on class one milk bound for Milwaukee, Madison and nine other Midwest markets.

Class one milk is the Grade A variety used for bottling purposes.

The 24-cent reduction was part of Freeman's recently-imposed supply-demand adjuster which is used to determine the minimum milk price that can be paid the farmer by the processor.

**Replaces Chicago Order**

Freeman's supply-demand adjuster takes the place of the Chicago Milk Order which terminated April 30. The old ruling, set in 1951, was designed to have the price of Class one milk fluctuate with supply and demand.

Sen. Gaylord Nelson (D-Wis.) has urged Freeman to drop the supply-demand adjuster, ". . . in view of the large numbers of farmers quitting dairying every day in Wisconsin and the continuing decline in milk production . . ."

Nelson said in a letter to Freeman that in view of the continuing drop in milk production, "it doesn't make sense" for the agriculture department to keep a negative pricing factor in effect.

Dr. Arthur Miller, a Pure Milk Products Cooperative economist, explained that the reduction imposed by Freeman was a permanent one and leaves no room for flexibility.

The Sept. 3 Dairy Industry Newsletter stated that the suit was being brought against Freeman because the supply-demand adjuster is not authorized by law.

Lt. Col. Donald Raiche

### Retiring After 24 Years

# Oshkosh Guard Unit Honors Lt. Col. Raiche

OSHKOSH — Men and officers of the 2nd battalion, 127th Infantry, Oshkosh National Guard unit, honored their commander, Lt. Col. Donald Raiche, with a pass-in-review parade Saturday afternoon.

Lt. Col. Raiche, who lives at 320 W. Forest Ave., Neenah, will be retiring late this winter. The review was held now to take advantage of the mild weather.

Participating in the program were Maj. Gen. John A. Dunlap, commander of the 32nd Division, and members of the division staff.

Guard units from Oshkosh, Ripon and Berlin participated in the parade in addition to the Oshkosh VFW Band.

Lt. Col. Raiche has commanded the 2nd battalion since April 1, 1963, and has been a member of the Red Arrow Division since April 23, 1947.

When he retires, Lt. Col. Raiche will have completed more than 24 years of service.

He enlisted in the Army Nov. 30, 1942, and was commissioned a 2nd lieutenant Aug. 13, 1943, after graduation from officer candidate school at Ft. Lee, Va.

During the second World War, Lt. Col. Raiche saw action in Normandy, Northern France, the Ardennes, the Rhineland and in central Europe. During most of the period, he was with the 4009th Quartermaster Truck Co. He was promoted to his present rank in 1955.

A native of Neenah, Raiche graduated from Neenah High School in 1932. He is employed in the main office of Kimberly-Clark Corp.

### Showing Considered Poor

# 37.8 Per Cent of Voters At Polls in Oshkosh

OSHKOSH — Only 8,037 of Oshkosh's 21,265 registered voters went to the polls last Tuesday despite three highly contested primary races in the Republican column. The percentage of voters who turned out was 37.8.

Though the showing was poor, the Oshkosh turnout was the best in the county among communities which have voter registration. In Neenah, 23 per cent of the eligible voters went to the polls. In Menasha it was 21 per cent and in the Town of Menasha only 15 per cent.

The Oshkosh ballot was spiced by the First Assembly District primary fight between Jack Steinhilber, Wallace Zahn and Leonard Wright. The Twin Cities area did not have a primary contest in its assembly district.

The 29th district, which includes parts of the old 10th, 11th and 15th wards on the northeast side, had the best turnout among the 20 districts in Oshkosh. Of 1,101 registered voters, 533 went to the polls for 48.4 per cent. The 30th district, just to the south of the 29th, was second with a 45 per cent turnout, 523 ballots cast of a possible 1162.

**The Low Turnout**

At the other end of the line, the 34th district, which includes parts of the 10th and 11th wards, just to the west of the 29th and 30th distrists, had the poorest turnout with only 266 of 907 registered voters going to the polls for 29.3 per cent.

Next lowest was the 36th district, northwest of the 34th, with 31 per cent on 356 votes out of a possible 959.

Surprisingly, the four district which are not in the First Assembly district and had one less primary on the ballot, fared beter in voting percentage than many of the other districts. Two of the districts were above the city average and two were slightly below.

The 42nd and 45th districts, the two southern-most districts in the city, each had voter percentages of 39 and the 44th and 46th districts, the western-most pair, had percentages of 35 and 34, respectively. Those four districts are in the Second Assembly District.

# Students Approve 10-Story Gruenhagen Hall at WSU-O

## New Dormitory Has Elevator, Snack Bar, Recreation Library

OSHKOSH — Swinging through the wide-windowed lobbies and down the day-lighted entrance corridors, men and women of New Gruenhagen Hall, Wisconsin State University-Oshkosh, paused long enough in the first weekend rush to say what they thought about the new dormitory.

The 10-story, double-wing building is the first high rise and the first co-ed residence hall in the state university system. It opened to men and women students this week.

Comments ranged from "I like it" through "It's wonderful;" as resident students endorsed accommodations at the hall. It's the newest, the biggest and the trend setter in housing this year.

"That elevator is easier than walking," Ann Hammang, a Fond du Lac freshman, declared. She lives on the fifth floor and likes it. John McComb, a freshman from Arlington Heights, Ill., is spending his first year in a dormitory and he, too, knows what he likes about Gruenhagen. "The room sare big enough," he said. He applauded the snack bar, the way his room is decorated and the furnishings. "I like it very much."

**Same Size Rooms**

John D. Bacheller, university director of housing, said the room sizes are about the same as in other recently constructed dormitories on the campus. He said a feeling of space is created by wide windows and furnishings.

"We have all the conveniences here. It's like our own community by itself," Lynn Prusko, a sophomore from Marinette, said enthusiastically. She lived in Evans Hall last year and had a basis of comparison. "Evans doesn't have sun decks," she added. Gruenhagen has sunning areas atop its 10 stories.

There was the usual criticism of elevators because they stop in answer to calls from every floor. This is especially true during rush hours and students in less than five days of residency haven't cultivated the patience of the accustomed elevator rider.

"Nobody likes the elevators because they're always stopping," according to John Nelson, who lives on the seventh floor of the men's south wing. A sophomore from Racine, Nelson said his room gives a good view of "High Rise 2," under construction across High Avenue. It will accommodate 1,200 students by September, 1967, compared to the 1,150 at Gruenhagen.

Nelson had high praise for the room decor and furnishings. He lived in Breese Hall last year and thinks Gruenhagen is more attractive.

Bacheller explained that Gruenhagen is the first project to reflect the efforts of professional interior decorators. The firm of Don Rippen and Associates, Madison, was consultant for the project.

Joseph Kamm, a sophomore from Milwaukee, said radio reception is excellent in his eighth floor room. His view is of a new food service under construcuon across Pearl Avenue from the high rise. He spoke with appreciation of the snack bar and the first-floor rooms to be used by residents of both wings.

"I think this hall is a lot more quiet than the one I was in last year," he declared.

First floor accommodations include, in additon to the snack bar, a big parlor, a recreation library, television and music rooms. So far, these areas are unfurnished, awaiting the delayed arrival of carpeting, Bacheller explained.

**Serious Work Habits**

He said, further, that most of the university dormitories may be quieter this year than they once were. For the first time, he said, a significant number of returning students are housed on campus. Bacheller said their serious work habits can be expected to have an effect on freshmen. Gruenhagen Hall students are about half freshmen and half returning students, he said.

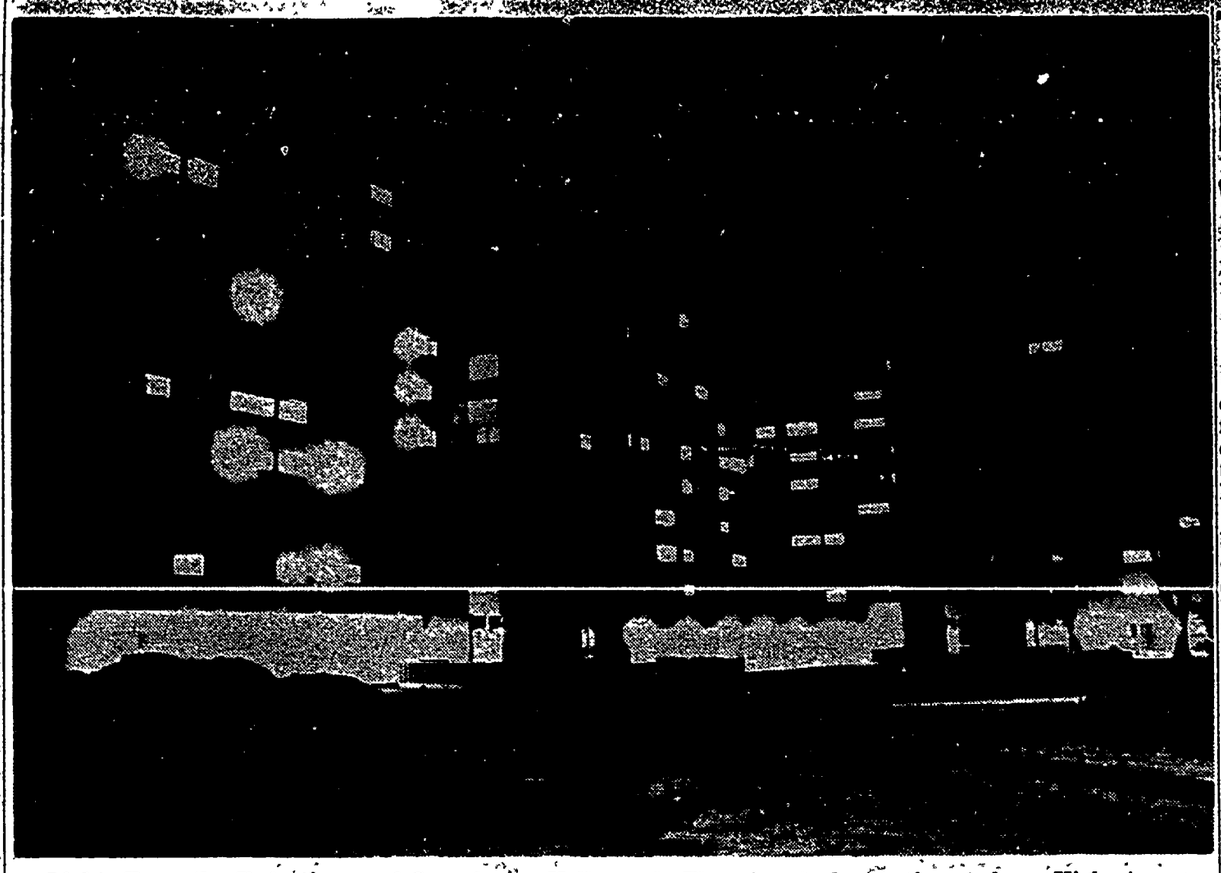

Tom Effenheim, a sophomore from Milwaukee, is a little bit sorry he moved from Nelson Hall. "It was more like a family there," he said. "I like this building, though. I like the use of wood and furniture that doesn't feel and look like a kitchen."

Most resident halls at WSU-O accommodate 200 to 250 students.

Kay Bretzman, a senior, takes the opposite view. "I like the feeling of independence I have here," she said. "The other dormitories always made me feel closed in. Gruenhagen has more of a college atmosphere."

She lives on the 10th floor of the women's north wing. "I can see all the way to the Lake Butte Des Morts Bridge and most of the campus. Kay lived in two of the other halls. She said the rooms at Gruenhagen do seem bigger, but thought it was because of the furniture arrangement and the colors used in decoration.

Saturday night there was a "nickel dance" at Gruenhagen as residents began to build "house" interest. Already under discussion is a residence hall government, expected to begin with floor organizations.

**Lights From the Twin** towers of Gruenhagen Hall, WSU-O's newest and biggest residence hall, signal students at work or preparing for the first football weekend. The view looks southwest from High Avenue showing men's and women's wings and the one-story connecting unit. (Post-Crescent Photo)

# Two Educators In Music Give Views of Work

## Fond du Lac Elks Hear of Green Lake, Cedarburg Projects

FOND DU LAC — Two experts in the high school music field discussed their specialties during the annual meeting of the East Central Music Festival last week at the Elks Club.

Speaking were William Loebel, Cedarburg, drum and bugle corps, and Lawrence Skilbred, district executive secretary, Fond du Lac, on what Carleton Sawall had been doing to keep the summer band concert series going in Green Lake.

One of the keys to the success of the program, Skilbred explained, has been the introduction of a variety of top talent from the Fond du Lac Home Show.

**Three Parts**

The programs are divided into three parts with the band playing for the first and third part and the talent performing during the second portion.

Green Lake, in addition, has a long heritage of the summer musical shows dating back to the mid-1920s when some of the big bands of the era played at the resorts.

Held at Deacon Mill Park every Wednesday during July and August, the program is under the jurisdiction of the city park commission but is directed by Sawall. The band consists of high school band members who receive a share of the profits at the end of the nine-week season.

Loebel, director of Cedarburg's Thunderbolts, explained that during the past summer the group traveled 6,416 miles, including some of the events at South Milwaukee, Madison and in Cedarburg.

He said about 5,000 corps in the nation and 50 in Wisconsin perform at the mony community events and parades.

Also appearing at the annual meeting was Richard Haarder, Wisconsin School Music Association secretary, who spoke on the rule changes and the possibility of forming an all-state honor orchestra to spend one week at a summer camp.

The state festival will be held on May 6 at Eau Claire and Oshkosh, he said.

The attending 57 representatives of 35 member schools chose Berlin and Horicon for the north and south district competition this year.

**Books for Billiards**

# Masonic Temple Rescues Oshkosh Library Service

OSHKOSH — Good neighbors help in a pinch, as the Oshkosh Public Library discovered last spring when Masonic Temple trustees rescued the extension department, boosk, shelves, and lighting from a threatened homeless interim.

The extension department, which includes operation of the in-city bookmobile service, was located in the basement of the Oshkosh Public Library and was the first service to be dislodged by current expansion construction.

When efforts to find a temporary home elsewhere failed, trustees of the Masonic Temple, across Mount Vernon Street from the library, agreed to make room.

**In Billiard Room**

So the extension department is currently operating from the billiard room of the temple, a room conveniently located on the first floor and large enough to accommodate the entire department.

Two billiard tables serve as handy packing areas. They were converted to their present use by heavy plywood covers. Other tables have been moved into a card room and the temple reading room.

Overhead in the temporary quarters are the green shaded lamps used over billiard tables. Lighting is boosted, however, by fluorescent lights installed on a tempoary basis.

The scoring strings of pool and billiard players add an unusually frivilous touch to the dignified rows of shelved books.

The two-way radio for bookmobile communication and a telephone are further evidence of the library invasion of the traditional privacy of the billiard room.

**Until Next Summer**

Gerald Carpenter, head of extension services, said the department will be housed in the temple until new quarters are ready sometime next summer.

The department moved last May, including the 38,400 volumes of the county collection and the 5,900 items of bookmobile stock.

Oshkosh Fire Department officials are playing good neighbor to the library bookmobile, another displaced facility. It is housed nightly at the Number 8 station on W. New York Avenue.

Loading of the bookmobile is probably the most unhandy part of the displacement arrangement although it is good publicity for the popular service.

Instead of standing discreetly at a dock in the rear of the library, the bookmobile flaunts its orange and white on Washington Ave. just east of the library, while it takes on its load of reading materials.

Carpenter said the division planned to load on nearby Mount Vernon St., at the side door of the Masonic Temple, but construction has so far closed one lane of the two-lane street, leaving little room for traffic and the bookmobile.

Wisconsin State University-Oshkosh might be considered another good neighbor of the extension service and of the community.

Carpenter, who joined the staff in September, and Mrs. Lois Adams, new bookmobile librarian, are products of library science classes at the state university.

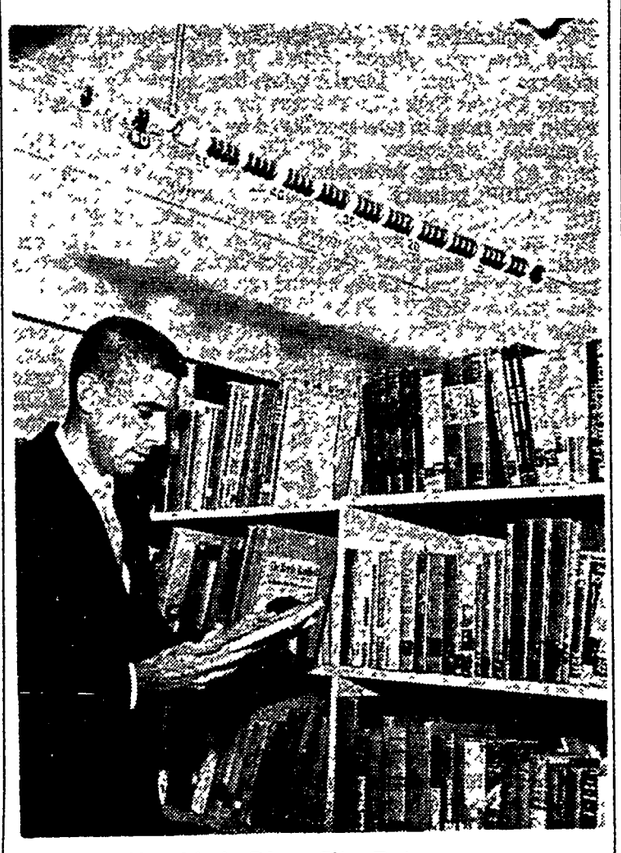

The extension division director completed work for a master of library science degree at the University of Wisconsin-Madison in August.

Carpenter was born in Appleton and moved with his parents to Shawano when he was 11. He studied a year at St. Norbert College, DePere, before coming to WSU-O. He said he began thinking about library science when a high school teacher became a librarian.

Mrs. Adams became interested in library work while a student at Suring High School. She was a June graduate at WSU-O and was married in August.

The extension service is operated by Oshkosh Public Library under a budget provided by Winnebago County. It serves area schools in three high school districts, and branches at Omro, Winneconne, and Waukau. Winnebago County Homemakers Clubs participate in a "personal reading program" conducted by the extension service and 4-H Club members find its resources helpful in their projects.

Serving all of rural Winnebago County except for the Town of Neenah and Menasha, the extension service makes available to the county's residents the entire resources of the Oshkosh Public Library.

**There's Trouble in River City.** But now you can use the pool score markers above Oshkosh extension librarian Gerald Carpenter to chalk up the books you wish to withdraw. The extension library has temporarily moved into the pool room of the Masonic Temple while construction is in progress at the Oshkosh Library. (Post-Crescent Photo)

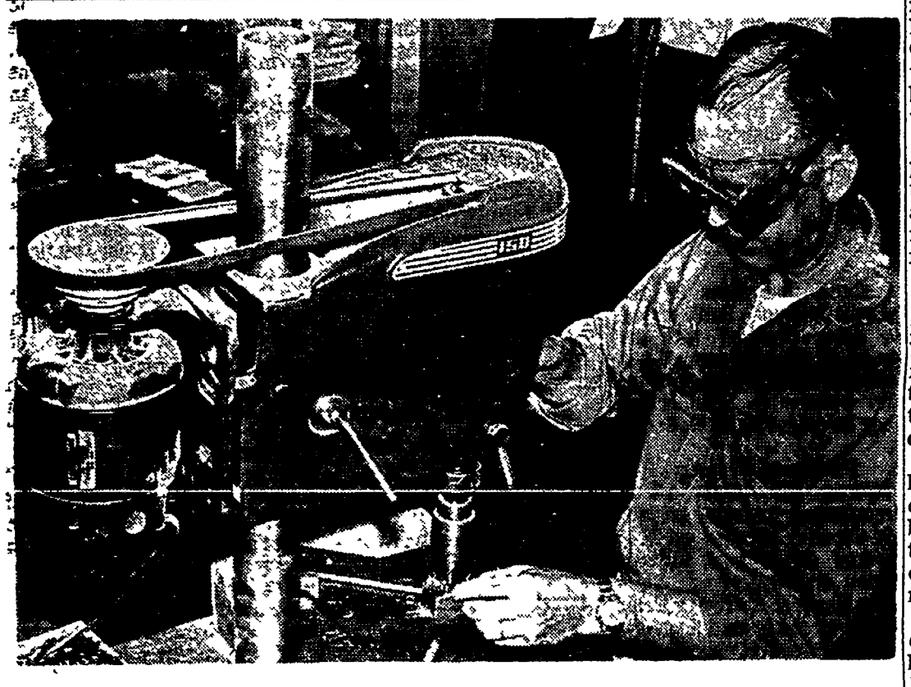

# Winnebago to Open Bids on Airport Bonds

CONTINUED FROM PAGE 1

was referred to its health committee for further study. The only major change in the proposal is a reduction in the size of the committee from 15 to nine members.

Thursday afternoon will be devoted to the annual equalization meeting, at which time the State Department of Assessment will present 1967 equalized value figures for the county. The figures will represent a re-evaluation of the county by the state, the first since 1956. A considerable increase in the equalized value of the county is expected to be shown.

These figures normally are presented to the equalization committee of the county board but because of the realignment of the board, the 47 supervisors will sit as an equalization committee of the whole.

**One of the Jobs Which** the Fond du Lac Sheltered Workshop performs for various city industries is punch and drill press operations. Here a client is punching small pieces of metal to fit into the intricate workings of a large machine manufactured in the city. (Post-Crescent Photo)

# Sheltered Center Needs Building

## Fond du Lac Council Contacted to Make Land Available for Plant

FOND DU LAC—After operating for 18 months the sheltered workshop operating in cramped quarters, has asked the city for land to build new facilities.

Robert Brummond, executive director of Workshops, Inc., said the city has been contacted for available land which could be leased for the new building.

He said the workshop needs from three to four acres and the new building would include from 10,000 to 13,000 square feet of floor space.

At present the workshop serves about 29 persons but a waiting list of about 100 persons has made necessary the move to larger facilities.

**Work for Industries**

Located at 186 W. Division St., clients are doing work for many of the city industries.

A total of 18 persons have been placed on jobs as a result of training received at the workshop, Brummond said.

The shop offers three types of training. Work evaluation training is designed to find out as much as possble about the individual including his habits and potential.

The extended or sheltered employment program hires the clients at the workshop.

**Third Program**

The third program involves recreation which will begin this fall with bowling and a variety of other activities in the spring.

Recreation is carried out primarily by volunteers but the program is under the supervision of professional staff workers.

In addition to Brummond and his secretary, the workshop employs a valuation and training supervisor, a job placement supervisor and a shop foreman, all on a fulltime basis. Working on a six hour per month basis are a parent counselor and social worker and psychologist.

Employed at the workshop are mentally retarded, mentally ill, physically handicapped, blind, deaf and cerebral palsy victims.

**Bid for Projects**

Although the programs began by getting work from various community industries, the project has taken on a new look with competition on a bid basis for various jobs

He explained he figures his bid on how much it would cost if a full time production worker would be doing the job

The clients are paid according to how they compare with fulltime production workers. If they do half the work they get half pay, he said.

Although the income from the bid project does not pay the way for the workshop it does relieve some of the financial pressure.

Work performed includes such tasks as drill and punch press operations, sorting, salvage, rework, typing, addressing envelopes and janitorial services.

**Package Dry Milk**

At present the workshop is packaging dry milk for a Fond du Lac dairy.

He explained that a new program may be introduced this year. In conjunction with the special education classes in the schools, handicapped children will be training for two half days a week.

The teachers will watch for special talent traits to be developed, he said.

"If we can't provide adequate service there is no reason to provide any," he said in reference to the long waiting list.

"These are people who can be trained to perform useful services and become productive citizens and it is our job to help as many as we can," he explained

As soon as the decision is made by the city the workshop expects to get the planning under way for the expansion program.

ADULT DAY and Evening Classes

REGISTER AT NEENAH VOCATIONAL SCHOOL
410 South Commercial Street

Sept. 19—Monday
Sept. 20—Tuesday
Sept. 21—Wednesday
Sept. 22—Thursday
8:30 to 11:30 a.m.
1:00 to 4:30 p.m.
6:30 to 8:30 p.m.

REGISTER AT NEENAH HIGH SCHOOL
NEW GYM LOBBY
For Women's Physical Ed.
Monday, Tuesday, Thursday Eve.
7:00 to 8:30 p.m.
